RETURN TO AGENDA

OAKLAND COUNTY
PARKS AND RECREATION COMMISSION

2800 WATKINS LAKE ROAD, WATERFORD, MICHIGAN 48328
Telephone: (248) 858-0906

Yolanda Smith Charles
Vice Chair
Andrea LaFontaine
Secretary

REGULAR MEETING
Ebony Bagley, Chair

October 7, 2026

Kate Baker
Lola Banks
Ann Erickson Gault
Christine Long
Eric McPherson
Jim Nash
Shanell Weatherspoon

Chair Bagley called the meeting of the Oakland County Parks and Recreation Commission to order at 2:02 p.m. in the Parks Commission Room.

COMMISSION MEMBERS PRESENT:

Ebony Bagley, Yolanda Smith Charles, Andrea LaFontaine, Ann Erickson Gault, Kate Baker, Christine Long, Eric McPherson, Jim Nash, Shanell Weatherspoon

COMMISSION MEMBERS ABSENT WITH NOTICE:

Lola Banks

OTHERS PRESENT:

PARKS AND RECREATION	Chris Ward, Director Alan Jaros, Deputy Director Esther Jackson, Manager – Strategic Planning & Performance Zach Crane, Supervisor – Design, Engineering & Compliance Colin Gibbs, Chief – Facilities & Land Management Tom Hughes, Chief – Park Operations – North District Simon Rivers, Chief – Strategic Partnerships & Initiatives Bill Singleton, Chief – Business Systems Ashlie Smith, Chief – Nature & Outdoor Education Desiree Stanfield, Chief – Communications & Marketing Kevin Syoen, Chief – Budget & Procurement Zach Zuchowicz, DEI & Community Engagement Coordinator Andy Krumwiede, Strategic Sourcing Agent Jon Noyes, Planner Principal Jami Monte, Administrative Services Coordinator Aileen Matney, Project Advisor Louise Kavanaugh, Recreation Program Supervisor Haley Hansen, Community Liaison Kristian Alexander, Parks Naturalist Meghan Cleveland, Parks Naturalist Brad Wethy, Asst. Parks Supervisor – Waterford Oaks Shannon Kenny, Administrative Specialist
BOARD OF COMMISSIONERS	William Miller, Oakland County Commissioner, District 16
MSU EXTENSION	Kristi Evans, Director
WATER RESOURCES COMMISSIONER	Jack Barshaw, Administrative Assistant to Elected Official
PUBLIC	Rex Mathewson, Headwater Trails, Inc. Roman Wasylkovich, Waterford Greenways

APPROVAL OF AGENDA

LaFontaine moved to approve the agenda, as presented. Seconded by Long.

Motion carried on a voice vote with Smith Charles and Weatherspoon absent.

APPROVAL OF MINUTES

Erickson Gault moved to approve the minutes of the September 2, 2026 regular meeting, as presented. Seconded by Baker.

Motion carried on a voice vote with Smith Charles and Weatherspoon absent.

PUBLIC COMMENT

None.

PRESENTATIONS/RECOGNITIONS

A. Staff Introduction: Meghan Cleveland & Kristian Alexander

Ms. Smith introduced Meghan Cleveland and Kristian Alexander as new Parks Naturalists.

B. Arts, Beats & Eats 2026 Update

Ms. Jackson provided a brief presentation on Oakland County Parks' involvement in the 2026 Arts, Beats & Eats event.

COMMUNICATIONS/REPORTS

C. FY2026 Monthly Financial Report

Mr. Syoen provided an overview of the FY2026 Monthly Financial Report.

REGULAR AGENDA ITEMS

1. Residential Property Use and Leasing Policy

Commissioners Smith Charles and Weatherspoon arrived at 2:19 p.m.

LaFontaine moved to adopt the Residential Property Use and Leasing Policy, as presented, superseding Commission Policy C09-003, Residential Property Lease Policy. Seconded by Long.

Motion carried unanimously on a roll call vote.

2. FY26 Incentive Pay Adjustment

Smith Charles moved to approve the adjusted Incentive Hours Threshold for part-time positions at Red Oaks Waterpark for the completed 2026 season as follows:

- Employees who worked more than 250 hours and were available at least 9 of the Reduced Operation & Closure Dates will receive a $300 bonus, OR
- Employees who worked more than 350 hours and were available at least 9 of the Reduced Operation & Closure Dates will receive a $400 bonus.

Seconded by Erickson Gault.

Motion carried unanimously on a roll call vote.

3. FY2027 MDNR ORV Trail Improvement Fund Grant Acceptance

Smith Charles moved to accept the Michigan Department of Natural Resources (MDNR) Off-

Road Vehicle (ORV) Trail Improvement Fund grant award in the amount of $150,000 for improvements at Holly Oaks ORV Park, and to forward to the Oakland County Board of Commissioners for approval. Seconded by Long.

Motion carried unanimously on a roll call vote.

4. Waterford Oaks Sanitary Easement – Waterford Twp

Baker moved to approve the Waterford Township Sanitary Easement at Waterford Oaks County Park and forward to the Oakland County Board of Commissioners for approval. Seconded by Nash.

Motion carried unanimously on a roll call vote.

5. FY2027 Capital Equipment Budget Amendment

Baker moved to approve the FY2027 Capital Equipment Budget, as amended. Seconded by Smith Charles.

Motion carried unanimously on a roll call vote.

6. FY2027 Campground Fees

Baker moved to approve the proposed FY2027 campground fees for Addison Oaks and Groveland Oaks Campgrounds as presented, effective for the 2027 camping season. Seconded by Weatherspoon.

Motion carried unanimously on a roll call vote.

7. Independence Oaks – Alpha Towers PropCo III LLC Cell Tower Lease

McPherson moved to approve the lease agreement between the County of Oakland and Alpha Towers PropCo III LLC, for the right to use a portion of the property located at 9501 Sashabaw Road, Clarkston, Michigan. Seconded by Smith Charles.

Motion carried unanimously on a roll call vote.

8. Clinton River Oaks Park Maintenance Services Interlocal Agreement Extension

Erickson Gault moved to approve the Interlocal Agreement Extension between the City of Rochester Hills and Oakland County Parks and Recreation for park maintenance services at Clinton River Oaks County Park, and forward the agreement to the Board of Commissioners for final approval. Seconded by Baker.

Motion carried unanimously on a roll call vote.

UNFINISHED BUSINESS

None.

NEW & MISCELLANEOUS BUSINESS

9. Director's Report

Director Ward provided an overview of his report and reviewed a document entitled "BIG PICTURE – Building the Operating System for 2027," which was distributed to the Commissioners. He also

recognized Ashlie Smith for receiving a Recognition Award from the Michigan Alliance for Environmental and Outdoor Education.

10. Executive Committee Update

Chair Bagley stated that she attended the NRPA Annual Conference and she will be preparing a report for the Commissioners summarizing some of her key takeaways. Chair Bagley also highlighted upcoming events at Discovery Oaks, Catalpa Oaks, Turtle Woods and Red Oaks, and encouraged Commissioners to attend.

CLOSED SESSION

11. Pursuant to MCL 15.268(d) – Discussion to consider the purchase or lease of real property

Smith Charles moved that the Oakland County Parks and Recreation Commission enter into Closed Session for the purposes of discussion to consider the purchase or lease of real property. Seconded by Baker.

Motion carried unanimously on a roll call vote.

The Commission went into Closed Session at 3:08 p.m.

The Commission reconvened in Open Session at 3:47 p.m.

ANNOUNCEMENTS/ADJOURNMENT

At 3:47 p.m., there being no further business to come before the Commission, the meeting was adjourned to November 4, 2026, or to the Call of the Chair.

Andrea LaFontaine, OCPRC Secretary **Jami Monte, Recording Secretary**

NOTE: The foregoing minutes are subject to Commission approval.

RETURN TO AGENDA

Parks and Recreation

Fund Balance	As of 9/30/2025	Current 10/30/2026
	$54,556,755.98	$75,292,106.08

Summary of Parks and Recreation

FY 2026 YTD	Adopted	Amended	Actual	Favorability/UNF	Percentage
Revenue	$68,596,827.00	$71,372,827.00	$72,337,114.80	$964,287.80	101.35%
Expenses	$68,596,827.00	$71,372,827.00	$50,647,605.83	$20,725,221.17	70.96%

Summary of Golf Programs

FY 2026 YTD	Adopted	Amended	Actual	Favorability/UNF	Percentage
Revenue	$6,574,600.00	$6,574,600.00	$7,432,785.86	$858,185.86	113.05%
Expenses	$7,400,995.00	$7,400,995.00	$8,391,254.41	($990,259.41)	113.38%

Summary of Waterpark Programs

FY 2026 YTD	Adopted	Amended	Actual	Favorability/UNF	Percentage
Revenue	$1,635,615.00	$1,635,615.00	$1,576,101.55	($59,513.45)	96.36%
Expenses	$2,177,748.00	$2,177,748.00	$2,275,642.59	($97,894.59)	104.50%

Summary of Campground Programs

FY 2026 YTD	Adopted	Amended	Actual	Favorability/UNF	Percentage
Revenue	$2,226,000.00	$2,226,000.00	$2,293,676.14	$67,676.14	103.04%
Expenses	$4,490,879.00	$4,490,879.00	$4,481,793.85	$9,085.15	99.80%

Summary of ORV Park Operations

FY 2026 YTD	Adopted	Amended	Actual	Favorability/UNF	Percentage
Revenue	$320,000.00	$369,000.00	$263,645.00	($105,355.00)	71.45%
Expenses	$446,124.00	$446,124.00	$271,222.22	$174,901.78	60.80%

Summary of Community Grant and Strategic Partnership Program

FY 2022 - 2026 YTD	Awarded	Amount Paid Out	Amount Remaining
Expenses	$5,595,216.00	$3,516,750.00	$2,078,466.00

Investment Income

FY 2025	
$2,242,274.65	The County strategy is to invest in longer term Agencies and Treasuries. Before the unprecedented rise in short term rates this strategy consistently outpreformed the short term investments (CDs and High Yeild Savings accounts).
FY 2026 YTD	
$2,238,150.39	

RETURN TO AGENDA

Oakland County Parks and Recreation Commission
Agenda Item Brief

Meeting date	November 4, 2026
Agenda item	1 - Enterprise Business Planning Policy
Item type	Action
Lead staff	Chris Ward, Director
Recommended by	Policy Modernization Workgroup — Commissioners Baker and Banks

ACTION REQUESTED

Recommended motion: Move to adopt the Enterprise Business Planning Policy, as presented, superseding Parks Commission Policy C-09-002, Development of Business Plans Policy.

AT A GLANCE

This policy requires business plans for designated major recreation and learning facilities. It gives the Parks Commission a clear picture of demand, revenue, operating costs, public subsidy, capital needs, and public benefits before deciding how to sustain or change an enterprise. It replaces the broader 2009 policy with a focused framework for enterprise facilities.

BACKGROUND AND CONTEXT

C-09-002 called for business and feasibility planning across existing and proposed parks and facilities. The replacement focuses enterprise business planning on major facilities that have separate program-level budget centers and regularly provide paid services or experiences. An incidental fee, revenue account, or separately tracked activity does not make a service an enterprise.

Revenue alone does not show whether a facility is financially sustainable. A facility can generate substantial revenue while requiring public subsidy or carrying major future repair and replacement needs. Business plans will distinguish gross revenue from operating results and show capital and lifecycle obligations separately.

Potential candidates include major golf, aquatic, camping, ORV, and learning facilities. These are examples, not automatic designations. The Director recommends a verified inventory; the Parks Commission approves it and any material additions or removals. Accounting changes alone do not change the approved inventory.

PUBLIC VALUE AND STRATEGIC ALIGNMENT

Enterprise designation does not require profit or full cost recovery. Cost-recovery expectations reflect the balance of benefits to participating users and the broader community, together with the public subsidy the Parks Commission considers appropriate. Business plans also address accessibility, affordability, and the facility's public purpose.

Enterprise planning addresses how a facility should operate, respond to demand, and improve. Lifecycle evaluation identifies what it takes to sustain it over time. The policy allows this work to be incorporated into existing park, financial, capital, and operating reviews.

HOW THE POLICY WORKS

Step	What happens
Identify the facilities	The Director recommends major recreation and learning facilities with separate program-level budget centers and recurring paid services or experiences. The Parks Commission approves the enterprise inventory.
Prepare business plans	Each designated facility has a current plan addressing public purpose, demand, revenue, operating costs, subsidy, pricing, staffing, risks, capital and lifecycle needs, performance, and reasonable future options.
Update and report	Comprehensive updates occur at least every five years and before a new enterprise, major reinvestment, material operating change, or material operating agreement, and when performance materially departs from approved expectations. The Director establishes annual monitoring and presents an annual portfolio report.
Make decisions	The Parks Commission receives plan executive summaries and the annual report, and establishes or affirms public purpose, strategic direction, and subsidy or cost-recovery parameters requiring its action. Projects, spending, contracts, pricing changes, and other reserved actions follow their separate approval processes.

IMPACTS AND COMMITMENTS

Area	Key information
Financial	Adoption establishes planning and reporting requirements. It does not itself approve spending, a capital project, a pricing change, or a subsidy. Plans make operating performance and future financial obligations visible.
Operating	The Director sets methods, staff assignments, annual monitoring, and an implementation schedule within approved authority. Initial planning should be prioritized to available staff capacity and integrated with existing systems.
Long-term	Plans identify capital backlog, renewal, replacement, and lifecycle obligations and consider continuation, reinvestment, redesign, alternative delivery, consolidation, or retirement.
Legal and governance	The Parks Commission approves enterprise designation and retains strategic and reserved decisions. Business plans do not independently change approved park frameworks or replace required Parks Commission or Oakland County Board of Commissioners approvals.

ALTERNATIVES CONSIDERED

- Adopt: Replace C-09-002 with focused enterprise planning and reporting requirements.
- Modify: Adjust the scope, planning requirements, or reporting schedule before adoption.
- Defer or decline: C-09-002 remains in effect unless separately amended or repealed.

NEXT STEPS

Upon adoption, staff will verify the initial enterprise inventory for Parks Commission approval and develop a prioritized implementation schedule. Staff should also identify plans and updates completed under C-09-002 and confirm how planning for parks and services outside the enterprise scope is addressed through Integrated Park Plans and other applicable systems.

	Commission Policy	Date Adopted: [proposed] Date Revised: ____-____-____ C: 26-___ (Proposed)
	Enterprise Business Planning	

Authority: Public Act 261 of 1965, as amended; Oakland County Parks and Recreation Commission Bylaws; applicable Oakland County Board of Commissioners resolutions, County policies, and adopted budgets.

Related Policies: C26-001, Commission Reserved Authority and Director Delegation; C26-002, Integrated Park Plans and Park Zones; applicable pricing, contracting, and real-estate policies.

I. PURPOSE

The purpose of this policy is to ensure that major Oakland County Parks recreation and learning facilities with separate program-level budget centers that provide paid services or experiences are managed through disciplined enterprise business planning.

Enterprise business planning shall provide the Commission with a transparent understanding of operating performance, public subsidy, capital and lifecycle obligations, market conditions, public value, and the available options for continuation, reinvestment, redesign, alternative delivery, consolidation, or retirement.

II. DEFINITIONS

Enterprise facility. A major recreation or learning facility that has a separate program-level budget center and regularly provides paid services or experiences. An incidental fee, separately tracked activity, or revenue account does not, by itself, establish an enterprise.

Private and community benefit. Private benefit accrues principally to participating users or groups; community benefit extends to the broader public. Enterprise facilities may produce both.

Other public and merit services shall not be classified as enterprises solely because they charge a fee. Those services shall be evaluated through applicable public-value, program-planning, cost-of-service, pricing, and performance frameworks.

III. ENTERPRISE DESIGNATION

The Director shall recommend facilities for enterprise designation based on the criteria established by this policy. The Commission shall approve the initial inventory of enterprise facilities and any subsequent material additions or removals. Changes in accounting structure alone shall not alter the Commission-approved inventory.

Designation as an enterprise does not establish a requirement that the operation generate a profit or recover all costs. Cost-recovery expectations shall reflect the relative private and community benefits produced and the public subsidy the Commission considers appropriate. Designation establishes that the operation's financial performance, subsidy, capital exposure, lifecycle obligations, and public value must be explicitly evaluated and managed.

IV. BUSINESS PLANNING REQUIREMENTS

Oakland County Parks shall maintain a current business plan for each designated enterprise facility. Each business plan shall address, as applicable:

- the public purpose and the private and community benefits produced;
- utilization, capacity, customer demand, and market position;
- gross earned revenue, operating costs, net operating contribution or deficit, and public subsidy;
- pricing, cost-recovery expectations, accessibility, and affordability;
- staffing, operating, contractual requirements, and material risks;
- asset condition, capital backlog, renewal, replacement, and full lifecycle obligations; and
- performance measures and options for continuation, reinvestment, redesign, alternative delivery, consolidation, or retirement.

Financial analysis shall distinguish gross revenue generation from net operating performance and shall identify capital and lifecycle obligations separately from annual operating results.

V. PLANNING AND REPORTING SCHEDULE

An enterprise business plan shall be prepared or comprehensively updated before establishing or acquiring a new enterprise, undertaking major capital reinvestment or a material change in operations, or entering a material operating agreement; when performance materially departs from approved expectations; and at least once every five years.

The Director shall establish annual monitoring requirements and shall present an annual enterprise portfolio report to the Commission.

VI. DIRECTOR AUTHORITY

The Director shall oversee and administer enterprise business planning consistent with Commission policy, approved Integrated Park Plans, adopted budgets, and other applicable authority.

The Director may establish planning formats, analytical methods, performance measures, materiality thresholds, staff assignments, and administrative procedures necessary to implement this policy.

The Director may incorporate enterprise business planning into Integrated Park Plans, financial planning, capital planning, operating reviews, or other management systems as appropriate.

VII. COMMISSION REVIEW

The Commission shall receive an executive summary of each enterprise business plan and the annual enterprise portfolio report. The Commission shall establish or affirm the public purpose and strategic direction of each enterprise, including any public subsidy or cost-recovery parameters requiring Commission action.

Enterprise business plans are management and decision-support tools. They do not independently amend an approved park framework or authorize projects, appropriations, contracts, pricing changes, capital commitments, public commitments, or other actions requiring Commission or County Board approval.

Any recommendation arising from an enterprise business plan that requires Commission or County Board authority shall be presented through the applicable approval process.

VIII. EFFECTIVE DATE

This policy takes effect upon Commission adoption and supersedes Commission Policy C-09-002, Development of Business Plans Policy.

OAKLAND COUNTY PARKS	Commission Policy	Date Adopted: 04-08-09	Dated Revised: 04-08-09	C-09-002 Page 1 of 2
		Development of Business Plans Policy		

I. PURPOSE: The purpose of developing business plans for destination facilities and core programs centers on developing a business approach and philosophy to managing these facilities and programs based on a key strategy outlined in the Oakland County Parks and Recreation Commission's Strategic Plan adopted in August, 2008. The goal is to maximize revenues, and provide efficiency to these facilities and programs through effective pricing, cost containment and staffing of these resources. Staff within the organization, along with outside consulting support, will develop these business plans over the next two years. The Oakland County Parks and Recreation Commission will review and adopt the Executive Summaries of these business plans for staff implementation. The results of the business plans efforts will be reviewed and updated annually by OCPRC staff.

II. PROCEDURE:

A. The Executive Officer will establish which business plans will be developed over the course of each year. Business Plans will be done for all current parks and facilities but also for any new proposed park or facility to determine its feasibility. Staff will follow the business template developed by PROS Consulting and will use the appropriate methodology:
   1. For tracking direct and indirect costs
   2. Reviewing demographics and potential users
   3. Focus on existing programs to support the destination facility the makeup of the core program area
   4. Evaluate marketing efforts to attract new users and retain existing users
   5. Focus on appropriate pricing options as outlined in the pricing policy of the Commission
   6. Evaluate existing partnerships and level of equity from Oakland County and its partner's perspective and incorporate measureable outcomes to be tracked and managed through the changes recommended in the business plan.

III. STANDARDS:

A. Staff will follow agreed to performance measures that focus on the following:
   1. Revenues to expense outcomes desired
   2. Staffing levels and use based on approved budget levels
   3. Customer retention and satisfaction levels achieved
   4. Capacity management of each core program area and destination facility

Replace

OAKLAND COUNTY PARKS	Commission Policy	Date Adopted: 04-08-09	Dated Revised: 04-08-09	C-09-002 Page 2 of 2
		Development of Business Plans Policy		

5. Earned income gained to off-set operational costs
6. Staff performance levels met through effective scheduling
7. Marketing efforts and point-of-sale data collected and managed on each customer
8. Partnership equity levels met

IV. EVALUATION:

A. The Business and Organizational Development Section will work with staff on the development of the business plan and in tracking of the performance measures established in the business plan. Staff will review with the Business and Organizational Development Section staff their approaches to make business related changes to achieve the recommendations and cost containment efforts outlined in their respective business plan. The Administrative Management Team will review monthly with staff on how their efforts to manage the sites and core programs are working against expected outcomes.

Replace

RETURN TO AGENDA

Oakland County Parks and Recreation Commission
Agenda Item Brief

Meeting date	November 4, 2026
Agenda item	2 - Lifecycle Obligations and Public Value Policy
Item type	Action
Lead staff	Chris Ward, Director
Recommended by	Policy Modernization Workgroup — Commissioners Baker and Banks

ACTION REQUESTED

Recommended motion: Move to adopt the Lifecycle Obligations and Public Value Policy, as presented.

AT A GLANCE

Before making a major decision, the Parks Commission should understand what it will take to sustain the asset or service, what public benefits it will provide, and what reasonable alternatives exist. This policy requires that information in the materials already prepared for significant Parks Commission decisions. It does not require a separate study for routine work or exhaustive accounting of every cost.

BACKGROUND AND CONTEXT

The initial price of a facility, land acquisition, program, partnership, or restoration project can be only part of its cost. A decision may also commit staff time, require recurring maintenance or treatment, and create major future repair or renewal needs. Annual operating results alone may not show those obligations.

The policy requires staff to identify the continuing obligations that could change a decision. Estimates may use existing records, comparable experience, professional judgment, and reasonable cost ranges. Significant assumptions, uncertainty, and demands on existing staff must be visible. More detail is not required when it would not improve the decision.

Related activities are considered together when they support the same service or outcome. For example, a golf pro shop should be understood within the golf enterprise rather than judged as a separate service simply because its finances can be tracked separately.

PUBLIC VALUE AND STRATEGIC ALIGNMENT

Cost is considered alongside recreation, access, learning, health, ecological function, resilience, and community benefits. Understanding the full cost does not require full recovery through user fees or selection of the cheapest option. It helps the Parks Commission judge whether the benefits justify the obligations and use of public resources.

Enterprise business planning addresses how an enterprise should operate and improve. This policy addresses what it takes to sustain an asset, activity, or service over time. The two inform the same decisions without requiring duplicate reports.

HOW THE POLICY WORKS

Step	What happens
Identify major decisions	An assessment supports Parks Commission actions involving significant capital investment, facility renewal, service or enterprise changes, land acquisitions, partnerships, or recurring natural-resource commitments. Routine maintenance, minor purchases, and ordinary program administration do not require a separate assessment.
Focus on what matters	Staff identify principal initial and continuing costs, major future renewal or treatment, staff capacity needs, expected public benefits, and reasonable alternatives. Detail is proportionate to the decision; no universal dollar threshold or consultant study is required.
Inform the decision	The Director includes the assessment in existing Parks Commission decision materials, with significant assumptions and uncertainties. A cost matters when a reasonable change in its estimate could change affordability, alternatives, future budgets, staffing capacity, or stewardship obligations.

IMPACTS AND COMMITMENTS

Area	Key information
Financial	Adoption establishes an evaluation standard. It does not itself approve a project, expenditure, or appropriation. Future decisions will show significant continuing costs as well as initial costs.
Operating	The Director establishes practical screening, estimation, and documentation methods within existing planning, budgeting, asset management, enterprise, and stewardship processes. Use existing information and avoid unnecessary work.
Long-term	Major decisions will account for foreseeable operating, maintenance, staffing, renewal, replacement, and stewardship responsibilities. Past spending alone does not justify further investment or automatic continuation.
Legal and governance	The Parks Commission retains its decision authority. Existing Parks Commission and Oakland County Board of Commissioners approval requirements remain in place. No separate standing approval process is created; binding legal and contractual obligations still apply.

ALTERNATIVES CONSIDERED

- Adopt: Establish a consistent expectation for lifecycle obligations and public value in major decisions.
- Modify: Adjust applicability or the information expected before adoption.
- Defer or decline: Continue under existing requirements without this common assessment standard.

NEXT STEPS

Upon adoption, the Director will establish screening and estimation practices, use existing information and systems, and incorporate proportionate assessments into applicable Parks Commission decision materials. Separate project, budget, contract, and other approvals remain required.

	Commission Policy	Date Adopted: [proposed] Date Revised: ____-____-____ C: 26-___ (Proposed)
	Lifecycle Obligations and Public Value	

Authority: Public Act 261 of 1965, as amended; Oakland County Parks and Recreation Commission Bylaws; applicable Oakland County Board of Commissioners resolutions, County policies, and adopted budgets.
Related Policies: C26-001, Commission Reserved Authority and Director Delegation; C26-002, Integrated Park Plans and Park Zones; and other applicable Commission policies.

I. PURPOSE

The purpose of this policy is to establish Commission expectations for considering material long-term obligations and public value when making consequential decisions about Oakland County Parks assets, natural resources, facilities, enterprises, services, programs, and partnerships.

II. POLICY STATEMENT

The Oakland County Parks and Recreation Commission ("Commission") recognizes that decisions to acquire, develop, operate, maintain, restore, improve, or provide assets and services can create recurring costs, major future expenditures, and continuing stewardship responsibilities beyond their initial authorization.

Significant decisions shall be informed by a reasonable understanding of these obligations, the anticipated public benefits, available resources, and institutional capacity. Lifecycle evaluation informs judgment; it does not presume continuation, replacement, full cost recovery, discontinuation, or selection of the lowest-cost alternative.

III. SCOPE AND APPLICABILITY

A proportionate lifecycle and public-value assessment shall support matters requiring Commission action that involve material new or continuing commitments, including:

- major capital investments, substantial facility rehabilitation or replacement, and significant asset adaptation or disposition;
- major establishment, expansion, reinvestment, restructuring, or discontinuation of recreational business enterprises, Outdoor Learning and Stewardship Services, or other public services;
- significant land acquisitions, partnerships, agreements, or shared responsibilities creating continuing obligations; and
- natural-resource restoration or management programs establishing substantial ongoing treatment, monitoring, or stewardship commitments.

A separate lifecycle assessment is not required for routine maintenance, minor asset purchases, ordinary program administration, or other matters unlikely to materially affect a decision. The Director shall apply lifecycle considerations within existing planning, budgeting, asset management, and natural-resource stewardship processes as appropriate.

IV. LIFECYCLE AND PUBLIC VALUE PRINCIPLES

A. Functional Consolidation. Related revenues, expenditures, assets, activities, and obligations shall be considered together when they support a common service, enterprise, or ecological outcome. Components may be examined separately when useful for management, but shall not be treated as independent services solely because they can be accounted for separately.

B. Full Lifecycle Consideration. Evaluations shall identify reasonably foreseeable material initial costs; recurring operations, maintenance, staffing, and management obligations, including demands on existing capacity; major repair, renewal, replacement, and continuing treatment; and other significant future commitments. Operating results and long-term cash needs shall remain distinguishable without obscuring their combined burden.

C. Public Value. Financial performance shall be considered alongside relevant public benefits, including recreation, access, geographic reach, learning, health, ecological function, resilience, and community outcomes. Identifying the full cost of a service does not require full recovery through user fees or selection of the least expensive alternative.

D. Materiality and Decision Sufficiency. The level of analysis shall be proportionate to financial significance, duration, complexity, risk, and long-term consequences. An item is material when a reasonable change in its estimate could affect affordability, comparison of alternatives, future budgets, staffing capacity, or stewardship commitments. Assessments may use standardized assumptions, comparable experience, professional judgment, and reasonable cost ranges, applied consistently across alternatives. Principal obligations, material assumptions, and uncertainties shall be disclosed. Additional precision or incidental cost detail is not required when unlikely to materially improve the decision.

E. Alternatives and Responsible Stewardship. Material continuation, reinvestment, or expansion decisions shall consider reasonable alternatives, organizational capacity, and competing uses of public resources. Past expenditures alone shall not justify future investment. Applicable legal, contractual, safety, environmental, and other binding obligations remain controlling.

V. DIRECTOR AUTHORITY AND ADMINISTRATION

The Director shall oversee and administer this policy within applicable law, approved budgets, County requirements, Commission policies, and delegated authority.

The Director may establish screening criteria, materiality thresholds for analytical effort, standardized estimation methods, documentation and review practices, and staff responsibilities. These practices shall support consistent, evidence-based assessments and be incorporated into existing planning, budgeting, enterprise management, natural-resource stewardship, and program processes.

Administration shall make practical use of existing information and systems, avoid unnecessary duplication, and stop further analysis when additional detail would not materially improve a decision. Administrative screening and routine management shall not create a separate Commission approval process. The Director may recommend changes to existing commitments based on the resulting evaluations.

VI. COMMISSION REVIEW

For applicable matters requiring Commission action, the Director shall include in the existing decision materials a proportionate assessment of principal lifecycle obligations, anticipated public value, relevant alternatives, and significant assumptions or uncertainties. It shall provide information sufficient for a sound decision, not exhaustive activity-level accounting. Matters requiring Commission or Oakland County Board of Commissioners approval shall follow existing authorization processes.

Nothing in this policy independently authorizes any project, expenditure, appropriation, contract, land-use restriction, disposition, public commitment, or other action requiring separate approval.

VII. RELATIONSHIP TO OTHER REQUIREMENTS

This policy establishes general stewardship expectations. Specialized policies governing pricing, enterprise business planning, capital investment, natural resources, partnerships, and other matters may impose additional requirements. This policy does not supersede applicable law, County requirements, Park Rules, approved park frameworks, or reserved authorities.

VIII. EFFECTIVE DATE

This policy takes effect upon Commission adoption.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission
Agenda Item Brief

Meeting date	November 4, 2026
Agenda item	3 - External Funding and Grant Authorization Policy
Item type	Action
Lead staff	Chris Ward, Director
Recommended by	Policy Modernization Workgroup — Commissioners Baker and Banks

ACTION REQUESTED

Recommended motion: Move to adopt Parks Commission Policy C26-010, External Funding and Grant Authorization, as presented.

AT A GLANCE

This policy sets out who may authorize Oakland County Parks to pursue grants and other external funding, submit awards for acceptance, and request changes to existing grants. It gives the Director authority to handle routine matters and identifies decisions that require Parks Commission approval. Adopting the policy does not approve a specific grant or commit funds.

BACKGROUND AND CONTEXT

A grant can bring money into the park system while also requiring matching funds, staff time, maintenance, reporting, or other future costs. The policy allows staff to meet funding deadlines while ensuring that significant commitments come to the Parks Commission.

The Oakland County Board of Commissioners Grant Policy and associated County grant procedures govern County review and approval. This Parks policy establishes OCP's internal authorization rules within that framework.

Director or Parks Commission authorization permits submission into the County process. All required County approvals, including Oakland County Board of Commissioners approval where required, must be completed before final acceptance or execution. Separate spending, contract, and staffing approvals remain required.

PUBLIC VALUE AND STRATEGIC ALIGNMENT

Funding must support Parks Commission-approved park purposes and priorities. The availability of money alone is not a reason to take on an obligation. Review must consider the public benefit and the matching funds, cash flow, staffing, maintenance, compliance, and long-term responsibilities the funding would create.

The Director will establish staff procedures and keep the Parks Commission informed of material applications, awards, and amendments. The authorization rules are summarized on the following page.

HOW THE AUTHORIZATION RULES WORK

Funding step	Director may authorize submission	Parks Commission must authorize
Apply for funding	Routine applications.	Applications that themselves create a binding commitment or require a decision reserved to the Parks Commission.
Submit an award for acceptance	$10,000 or less, with no exception below or reserved decision.	Over $10,000, any exception below, or a decision reserved to the Parks Commission.
Submit a grant amendment	A change of less than 15% of the current award OR $10,000 or less, with no reserved decision.	Changes meeting neither test, or requiring a decision reserved to the Parks Commission.

Small-award exceptions: Parks Commission authorization is required if the grantor requires a separate resolution, an interlocal agreement is needed, or acceptance changes authorized staffing levels. Amendment tests apply to the amount of the change, not the total award.

IMPACTS AND COMMITMENTS

Area	Key information
Financial	Adopting this policy establishes authorization rules only. Individual grants and related spending remain subject to the required approvals. Funding decisions must consider matching funds, cash flow, and continuing costs.
Operating	The Director establishes staff procedures for review, County routing, documentation, compliance, reporting, and closeout.
Legal and governance	Parks Commission authorization and County approval are separate steps. All applicable County policies, grant procedures, and other required approvals remain in effect.

ALTERNATIVES CONSIDERED

- Adopt: Establish the proposed authorization rules and Director delegation within the County framework.
- Modify: Adjust the thresholds, reserved decisions, or reporting expectations before adoption.
- Defer or decline: Existing County requirements and OCP policies continue to govern; the proposed delegation would not take effect.

NEXT STEPS

Upon adoption, the Director will establish staff procedures and guidance. Items requiring Parks Commission authorization will be brought forward before submission into the applicable County approval process. The Director will keep the Parks Commission informed of material grant activity.

	Parks Commission Policy	Date Adopted: [proposed] Date Revised: ____-____-____ C: 26-010 (Proposed)
	External Funding and Grant Authorization	

Authority: Public Act 261 of 1965, as amended; Oakland County Parks and Recreation Commission Bylaws; applicable County resolutions, policies, and adopted budgets.

Related Policies: C26-001, Commission Reserved Authority and Director Delegation; C23-003, Expenditure and Contract Approval Policy; and other applicable Parks Commission policies.

I. PURPOSE

This policy establishes authority for the development, submission, and consideration of external funding applications, grant acceptances, and amendments for Oakland County Parks. It supports timely pursuit of funding while preserving Parks Commission authority over material commitments and compliance with the Oakland County grant review and approval process. In this policy, "Parks Commission" means the Oakland County Parks and Recreation Commission. References to the Oakland County Board of Commissioners identify the separate County governing body.

II. POLICY STATEMENT

External funding shall advance Parks Commission-approved public purposes and priorities. Availability of funding alone shall not justify new or continuing institutional obligations.

Authorization by the Parks Commission or Director under this policy means authorization to submit the matter into the applicable Oakland County grant review and approval process. It does not constitute final County approval, grant acceptance, execution of an agreement, or approval of any other commitment requiring separate authorization.

III. GRANT APPLICATIONS

The Director or designee may authorize preparation and submission of external funding applications through the applicable County grant review and approval process without routine prior Parks Commission approval.

Prior Parks Commission authorization is required when an application itself would make a binding commitment or otherwise involve an action reserved to the Parks Commission. Preliminary County review may proceed before such authorization when permitted by County procedures.

IV. GRANT ACCEPTANCE SUBMISSIONS

The Director may administratively authorize submission of an award acceptance for County review when the award is $10,000 or less, provided the grantor does not require a separate resolution, an interlocal agreement is not required, and acceptance would not change authorized staffing levels.

Parks Commission authorization is required before submission for County acceptance review when the award exceeds $10,000, any of the above conditions is present, or the award otherwise involves a matter reserved to the Parks Commission.

V. GRANT AMENDMENT SUBMISSIONS

The Director may administratively authorize submission of a grant amendment for County review when the change is less than 15 percent of the current award amount or is $10,000 or less, provided the amendment does not require an action reserved to the Parks Commission.

Parks Commission authorization is required before submission for County review when an amendment meets neither threshold or otherwise requires Parks Commission action. The percentage and dollar tests apply to the proposed change in the current award, not the total award amount.

VI. EVALUATION AND OVERSIGHT

Grant decisions shall reasonably consider anticipated public value, funding conditions, matching and cash-flow requirements, and material staffing, operating, maintenance, compliance, and long-term stewardship obligations. The level of review shall be proportionate to the significance of the decision.

The Director shall keep the Parks Commission reasonably informed of material applications, awards, and amendments and shall establish administrative procedures for staff responsibilities, County routing, documentation, compliance, reporting, and closeout.

VII. OTHER AUTHORITY AND EFFECTIVE DATE

All matters remain subject to applicable law, Parks Commission policies and reserved authority, County grant review and approval requirements, including any required Oakland County Board of Commissioners approval, grantor conditions, and other required approvals. No authorization under this policy independently permits an expenditure, contract, staffing change, land-use action, or other commitment requiring separate approval.

This policy takes effect upon Parks Commission adoption.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 4

Department: Administration

From: Jami Monte, Administrative Services Coordinator

Subject: 2027 Oakland County Parks and Recreation Commission Meeting Schedule

RECOMMENDED MOTION

Move to approve the 2027 Oakland County Parks and Recreation Meeting Schedule.

INTRODUCTION AND HISTORY

Annually, the Oakland County Parks and Recreation Commission (OCPRC) receives a proposed schedule for the upcoming calendar year for approval. The OCPRC typically meets on the first Wednesday of every month at 2:00 p.m. The schedule is developed to provide consistency for strategic planning and public engagement.

The January meeting is scheduled to begin at 12:30 p.m. to include additional time for discussion on the long-term fiscal outlook including recurring cost and capital investment scenarios. The February meeting is scheduled for Tuesday, February 9, to accommodate commissioner and staff attendance at the mParks Conference from February 2–5, and to avoid Ash Wednesday on February 10.

The majority of meetings will be held in the Parks Commission Room at the Parks and Recreation Administration building in Waterford Township, with two meetings being held off-site to highlight different park locations. The July off-site meeting coincides with the Oakland County Fair, scheduled for July 9-18. The May off-site meeting was determined based on the Commission's majority consensus identifying Bikes, Fishing & Fritters at Clinton River Oaks as their preferred recreational activity.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 5

Department: Strategic Partnerships and Initiatives

From: Simon Rivers, Chief – Strategic Partnerships & Initiatives

Subject: Clinton River Oaks Construction License Agreement – Great Lakes Fisheries Commission

RECOMMENDED MOTION

Move to approve the Construction License Agreement between the County of Oakland and the Great Lakes Fisheries Commission.

INTRODUCTION AND HISTORY

Earlier this year, Oakland County Parks (OCP) purchased a 128.61-acre parcel in Rochester, commonly referred to as the Letica property. OCP had been interested in this property for many years, as it holds significant strategic and ecological value, located adjacent to (immediately south of) the Clinton River Trail and adjacent to (immediately north of) Bloomer Park. The property includes a stretch of the Clinton River, including an area in need of significant restoration.

This acquisition is central to a broader conservation and restoration effort. OCP has been working with the Great Lakes Fisheries Commission (GLFC) to restore this section of the river, particularly to address a bypass around a dam that is allowing invasive Sea Lamprey into the upstream reach of the river, which is detrimental to native fish species, such as trout, that make the Clinton River and Paint Creek such a high-quality fishery in Oakland County. GLFC has committed to funding and implementing the restoration project, with an estimated completion date of 2027 and a projected cost of over $1 million.

Due to the significance of this project and the desire to protect the river in perpetuity, GLFC has committed to contributing $300,000 towards the acquisition of the Letica property. This funding is guaranteed and only requires OCP to submit an invoice to receive the funds.

In addition to the aquatic restoration and protection project, OCP plans to utilize the Letica property as part of Clinton River Oaks to preserve the river and surrounding natural areas, providing people with pedestrian and water access both from the Clinton River Trail and Bloomer Park. There are opportunities to create trails, boardwalks and river waypoints on the property to provide better access to and interpretation of this stretch of river for Oakland County residents.

1. License Construction Agreement – Great Lakes Fisheries Commission
2. Great Lakes Fisheries Commission – Letter of Support

CONSTRUCTION LICENSE AGREEMENT

County of Oakland, by and through its statutory agent the Oakland County Parks and Recreation Commission, 2800 Watkins Lake Road, Waterford MI ("Landowner") who is the owner of the Subject Property, as defined herein, and Great Lakes Fishery Commission ("GLFC"), 2200 Commonwealth Boulevard, Suite 100, Ann Arbor, MI (both parties, Landowner and GLFC, referred to as "Parties") agree to enter into this agreement ("Agreement") to facilitate the Clinton River Sea Lamprey Barrier and Clinton River Restoration ("Project"), a Project that will provide natural resource benefit to the Subject Property as further described below.

Recitals

A. The Project involves restoration of the Clinton River utilizing principals of natural channel design to allow for effective sea lamprey blockage at Yates Dam, as further detailed in the attached **Exhibit A**.

B. Various stakeholders and partners are contributing efforts and funds to complete the Project to benefit the area, including, but not limited to, the, Clinton River Watershed Council, City of Rochester, Rochester Hills, Michigan Department of Natural Resources ("DNR"), Michigan Department of Environment, Great Lakes, and Energy ("EGLE"), the United States Fish and Wildlife Service, among others.

C. Green Watershed Restoration is providing professional consulting services necessary to complete the Project.

D. Use of the Subject Property as described below is necessary for completing the Project.

NOW, THEREFORE, for the mutual consideration and promises set forth in this Agreement, the Parties agree to enter the following Agreement subject to the terms and conditions below.

1. **Consideration:** The Parties agree that this Agreement is made with good and adequate consideration. Namely, allowing the Project will enhance the natural resource value of the Subject Property due to providing a long-term solution for the blockage of sea lamprey and restoration of the Clinton River. GLFC benefits from the Agreement by being able to use the Subject Property as specified below to assist with completing the Project.

2. **Subject Property:** The defined term "Subject Property" means the property located at Dequindre Road, Rochester, Michigan associated with Oakland County Parcel Number: 15-13-276-005. An aerial photograph showing the Subject Property is attached as **Exhibit B**.

3. **GLFC:** The defined term "GLFC" includes all employees, contractors, subcontractors, and agents of GLFC and/or of any entity or person working to complete the Project (e.g., the entities listed in the Recitals above). Such persons will be authorized to access the Subject Property for the reasons specified in this Agreement.

4. **Work / Subject Property Access:** GLFC may access and utilize the Subject Property for the purposes of completing the Project. This access includes, but is not limited to, GLFC: (1) entering and passing over the Subject Property; (2) potential incidental storage of equipment and materials on the Subject Property solely for purposes of completing the Project; (3) conducting any other activities as may be necessary or useful to completing the Project. For purposes of completing the Project, GLFC will be working within and adjacent to the stream bank but has reserved additional land rights in this paragraph to facilitate Project construction in the event of unforeseen circumstances.

5. **Term:** The term of this Agreement lasts from the date GLFC and Landowner execute this Agreement until GLFC completes the Project. Project construction necessitates use of the Subject Property and is estimated to conclude by December 31, 2027, with post-construction monitoring to conclude at the latest by January 1, 2031, and GLFC will use reasonable and prudent attempts to complete use of the Subject Property by the dates above but will not be strictly bound to completion by the above dates.

6. **Landowner Access Obligations:** GLFC shall not unduly restrict access to the Subject Property from Landowner unless in the event of an emergency requiring restrictions on access for safety. Moreover, Landowner acknowledges that it will allow GLFC (and all individuals authorized to access the Subject Property) to access the Subject Property as outlined in this Agreement and will not prevent GLFC from use of the Subject Property under the terms of this Agreement.

7. **Condition:** GLFC may not leave any items besides those associated with Project improvements on the Subject Property after the term of this Agreement. GLFC will make reasonable efforts to ensure that it does not substantially impair the conditions of the Subject Property, other than impacts to the Subject Property from improvements associated with the Project, while accessing the Subject Property under the terms of this Agreement.

8. **GLFC** shall obtain and maintain insurance according to the specifications set forth in Exhibit C. Exhibit C is incorporated into this Agreement.

9. **Compliance with Laws:** All of the activities of GLFC, its contractors, subcontractors consultants, agents, and employees relating to the Project and the Subject Property shall be

performed in full compliance with all applicable environmental, health, safety, and other laws, regulations, ordinances, and requirements.

10. **Indemnification:** To the extent permitted by international law, the Great Lakes Fishery Act, and all regulations, proclamations, and statutes imposed by the governments of Canada and United States, GLFC shall indemnify, hold harmless, and/or defend (at the Landowner's election) the Landowner and its Boards, Commissions, elected or appointed officials, and employees from any and all Claims that are incurred by or asserted against the County and its Boards, Commissions, elected or appointed officials, and employees by any person or entity, which are alleged to have been caused by or found to arise from the acts, performances, errors, or omissions of GLFC or its employees, agents, volunteers, subcontractors, invitees, or any other persons at or on the Property because of GLFC's use of the Property. GLFC shall require its agents, contractors, and subcontractors to indemnify, hold harmless, and/or defend (at the Landowner's election) the Landowner and its Boards, Commissions, elected or appointed officials, and employees from any and all Claims that are incurred by or asserted against the County and its Boards, Commissions, elected or appointed officials, and employees by any person or entity, which are alleged to have been caused by or found to arise from the acts, performances, errors, or omissions of such agents, contractors, and subcontractors. As used herein, "Claim" means any loss; complaint; demand for relief or damages; lawsuit; cause of action; proceeding; judgment; penalty; costs or other liability of any kind which is imposed on, incurred by, or asserted against the Landowner or for which the Landowner may become legally or contractually obligated to pay or defend against, whether commenced or threatened, including, but not limited to, reimbursement for reasonable attorney fees, mediation, facilitation, arbitration fees, witness fees, court costs, investigation expenses, litigation expenses, or amounts paid in settlement.

11. **Release:** GLFC does hereby release Landowner and its successors or assigns from any and all Claims arising from, due to, or in any way connected with the Project at the Subject Property or the activities of GLFC's contractors, consultants, agents, and/or employees related thereto.

12. **Site Restoration**. Upon completion of the Project, and at GLFC's sole cost and expense, GLFC agrees to remove any and all equipment or devices used by it or its contractors, consultants, agents, and/or employees from the Subject Property and to repair any damage to the Subject Property caused by any of the foregoing and/or the Survey Work.

13. **Notice:** Landowner may receive written notice or communications pursuant to this Agreement by personal service or via mail to Oakland County Parks and Recreation Commission, Attn: Director, 2800 Watkins Lake Road, Waterford, Michigan 48328. GLFC may receive written notice pursuant to this Agreement by: (1) mail or personal

service to 2200 Commonwealth Boulevard, Suite 100, Ann Arbor, MI; or (2) e-mail to cfreiburger@glfc.org.

14. **Entire Agreement:** This Agreement contains and comprises the entire agreement and understanding of the GLFC and Landowner. There are no additional promises between the parties other than those contained herein. Any other agreements between GLFC and previous owners of the Subject Property shall be null and void as they relate to the subject matter of this Agreement.

15. **Counterparts:** This Agreement may be executed in counterparts with photocopies, electronic copies, or facsimile copies of signatures treated in all manner and respects as binding and original.

16. **Waiver:** The waiver of a breach or violation of any provision of this Agreement will not operate as or be construed to be a waiver of any subsequent breach.

17. **Severability:** If any one or more of the provisions of this Agreement is deemed invalid, illegal, or unenforceable in any respect, the validity, legality, and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired.

18. **Governing Law & Dispute Resolution:** This Agreement will be governed by and construed in accordance with the laws of the State of Michigan. In the event that the mandatory alternative dispute resolution process below is not successful, jurisdiction and venue for any disputes related to this Agreement are proper in any court of competent jurisdiction within Oakland County, Michigan. Before utilizing courts to resolve disputes under this Agreement, if either party believes the other party is in breach of this Agreement or is otherwise aggrieved by the other party they must: (1) provide detailed written notice to the other party detailing the alleged breach(es) and/or issues of the other party; and (2) meet with the other party and provide at least 30 days for the alleged offending party to cure any breach or to resolve a dispute. During the alternative dispute resolution process, the Parties shall not unreasonably withhold an alleged breaching/offending party from curing any such breach or resolving a dispute to continue activities under the Agreement.

19. **Modification and Assignment:** This Agreement may be amended only in a writing intended for that purpose that is signed by the GLFC and Landowner. Landowner may assign this Agreement to any purchaser of the Subject Property.

20. **Headings**: This Agreement contains headings for the convenience of the parties. These headings shall not be considered when interpreting this Agreement.

By signing the below, the individuals represent and warrant that they may bind themselves to this Agreement.

EXHIBIT A - INSURANCE REQUIREMENTS

A. **Insurance Coverages.** GLFC shall provide and maintain, at its expense, all insurance as set forth below. The insurance shall be written for not less than any minimum coverage herein specified or required by law, whichever is greater.

1. **Commercial General Liability Insurance:** with the following minimum limits:

$1,000,000 Bodily Injury & Property Damage Each Occurrence Limit
$1,000,000 Personal & Advertising Injury Limit
$1,000,000 Products/Completed operations
$5,000 Medical Expense (Any One Person)
$2,000,000 General Aggregate Limit

Commercial General Liability Insurance shall contain the following minimum coverages:

- Occurrence Form
- Premises/Operations
- Personal and Advertising Injury
- Independent Contractors
- Broad Form Property Damage
- (Blanket) Broad Form Contractual (including coverage for obligations assumed in this Agreement)

2. **Supplemental Coverages – As Needed**

☐ **Host Liquor Liability Insurance** with a limit of $1,000,000 each occurrence shall be required when alcohol is served to guest with no charge.

☐ **Liquor Legal Liability Insurance** with a limit of $1,000,000 each occurrence shall be required when a cash bar is present and/or alcohol is served by a Caterer.

☐ **Other:**

3. **Workers' Compensation Insurance** with limits statutorily required by any applicable Federal or State Law and Employers Liability insurance with limits of no less than $500,000 each accident, $500,000 disease each employee, and $500,000 disease policy limit. This requirement is waived if there are no owners or employees.

☐ Fully Insured or State approved self-insurer.

☐ Sole Proprietors must submit a signed Sole Proprietor form.

☐ Exempt entities, Partnerships, LLC, etc., must submit a State of Michigan form WC-337 Certificate of Exemption.

4. **Commercial Automobile Liability Insurance** covering bodily injury or property damage arising out of the use of any owned, hired, or non-owned automobile with a combined single limits of $1,000,000 each accident. This requirement is waived if there are no company owned, hired or non-owned automobiles utilized in the performance of this Agreement.

B. **General Insurance Provisions**. All certificates of insurance and insurance policies shall contain the following provisions and/or clauses with evidence of same provided to the Oakland County Parks and Recreation Commission 2800 Watkins Lake Road, Waterford, Michigan 48328:

1. All policies of insurance shall be on a primary, non-contributory basis with any other insurance and/or self-insurance carried by the County of Oakland.
2. The insurance company(s) issuing the policy or policies shall have no recourse against the County of Oakland for subrogation, payment of any premiums, deductibles, or assessments under any form of policy.
3. Any and all deductibles in the required insurance policies shall be assumed by and be at the sole risk of GLFC.
4. All policies must be endorsed to include a written waiver of subrogation in favor of the County of Oakland.
5. All insurance policies must be endorsed to name as Additional Insured: the County of Oakland and it officers, directors, employees, appointees and commissioners.
6. GLFC shall require their contractors or sub-contractors not protected under GLFC's insurance policies, to procure and maintain insurance with coverages, limits, provisions, and/or clauses equal to those required of GLFC in this Agreement.
7. Certificates of insurance must bear evidence of all required endorsements and clauses and must be provided no less than ten (10) business days prior to commencement of the Project.
8. All policies of insurance required in this Agreement shall be issued by companies that are licensed and approved to do business in Michigan and shall have and maintain a minimum A.M. Best rating of AV or greater.

Great Lakes Fishery Commission

May 20, 2025

Melissa Prowse, Manager, Planning + Development
1200 North Telegraph Road
Pontiac, MI 48341

Dear Ms. Prowse,

Oakland County Parks and Recreation (OCP) and the Great Lakes Fishery Commission (GLFC) are committed partners in the acquisition and restoration of 128 acres in the City of Rochester, including a significant stretch of the Clinton River.

As part of this partnership, OCP will purchase, own, and manage the property as protected parkland, preserving its natural river corridor. GLFC is fully committed to supporting the project by contributing $300,000 toward the land acquisition and funding a $1.4 million river restoration initiative. This restoration will prevent the upstream migration of invasive sea lamprey, restore natural stream function using principles of natural channel design, and enhance recreational access and use of the river.

OCP will provide the remaining $1.2 million needed for the purchase and will ensure long-term stewardship of the site, including ongoing monitoring of the restored river segments. This joint effort reflects both organizations shared dedication to ecological restoration, invasive species management, and expanding public access to natural resources.

Sincerely,

Chris Freiburger

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 6

Department: Strategic Partnerships and Initiatives

From: Simon Rivers, Chief – Strategic Partnerships & Initiatives

Subject: 2023 Community Grant Program Agreement Extension – Village of Leonard, Polly Ann Trail Project

RECOMMENDED MOTION

Move to approve the Oakland County Parks Community Park and Trail Capital Grant Program Agreement Amendment between the County of Oakland and the Village of Leonard, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In 2023, Oakland County Parks (OCP) awarded the Village of Leonard a $25,000 grant for the Polly Ann Trail Modernization & Safety Improvements Design project through OCP's Community Grant Program. The grant has a three-year term, with an original end date of 11/1/2026. On October 8, 2026, the project manager for the Polly Ann Trail Modernization project, Kristen Wiltfang, requested a one-year extension due to a project expansion.

In 2024, an amendment to the original agreement was approved by the Oakland County Parks and Recreation Commission to change the scope of the project due to the higher than anticipated engineering design estimates. The revised scope focuses on specific areas of the Polly Ann Trail deemed most in need of improvements, reducing the portion of the trail included in the project from the full 16.9 miles to 4.1 miles of trail from Hosner Road to Elmwood Street.

Last fall, the Michigan Department of Natural Resources (DNR) was awarded a $500,000 Michigan Health Endowment Fund grant (on behalf of the Polly Ann Trailway Management Council) to further support the planning and engineering design of upgrades to the Polly Ann Trail. The Village of Leonard will combine OCP funding with the new grant funding to enhance year-round access to safe walking and biking – promoting sustainable physical activity and positioning the region for future construction funding.

BACKGROUND

The Polly Ann Trail (PAT) begins in Orion Township and spans almost 37 miles across northeastern Oakland County and central Lapeer County. Much of the trailway generally follows the former Pontiac, Oxford and Port Austin Railroad right-of-way (later obtained by Grand Trunk Western Railroad). While the DNR owns the majority of the trail property, the Polly Ann Trailway Management Council oversees the portion in Oakland County. The Oakland County portion of the Polly Ann Trail is a 16.9-mile linear park that is open year-round to hiking, biking, cross-country skiing and horseback riding. Trail users can enjoy the vistas of the scenic rural countryside and also take advantage of the businesses found along major commercial corridors. The PAT passes through the quaint downtowns of Oxford and Leonard and is easily accessible by nearby neighborhoods, schools and parks.

ATTACHMENTS

1. Village of Leonard Grant Amendment – Polly Ann Trail Project

OAKLAND COUNTY PARKS
COMMUNITY PARK AND TRAIL CAPITAL GRANT PROGRAM AGREEMENT AMENDMENT

This Agreement Amendment ("Amendment") is between the County of Oakland, 1200 North Telegraph Road, Pontiac, MI 48341 ("County"), by and through its statutory agent, the Oakland County Parks and Recreation Commission ("OCPRC"), 2800 Watkins Lake Road, Waterford, MI 48328 and the **Village of Leonard, 23 E. Elmwood, P.O. Box 112, Leonard, MI 48367** ("Grantee").

The Grantee and OCPRC entered into an Agreement dated **11/1/2023** for the Project set forth below ("Agreement"), which Agreement is attached and incorporated herein as Exhibit A. The Parties now desire to amend the Agreement. This Amendment extends the End Date of the Agreement as set forth below. The Parties agree to the terms and conditions set forth in this Amendment.

Project Title ("Project"): Polly Ann Trail Modernization & Safety Improvements Design
Grant Amount ("Grant Amount"): $25,000
Match Amount ("Match Amount"): $500,000
Total Project Amount: $525,000
Start Date: 11/1/2023
Original End Date: 5/15/2026
Amended End Date: [1 year from the date the last Party to this Agreement signs the Agreement]

This Amendment and the Agreement comprise the entire agreement and understanding between the Parties and supersede all other prior oral or written understandings, communications, agreements, or contracts between the Parties. By signing this Amendment, the below individuals certify they are authorized to sign this Amendment on behalf of their organization, and the Parties will fulfill the terms of the Agreement and this Amendment.

Grantee:

_____

Name: William Moore, President Date
Village of Leonard

County of Oakland:

_____

Name: David T. Woodward, Chairperson Date
Oakland County Board of Commissioners

Oakland County Parks and Recreation Commission:

_____

Name: Ebony Bagley, Chairperson Date
Oakland County Parks and Recreation Commission

OAKLAND COUNTY PARKS TRAILWAYS AND PARK DEVELOPMENT PROGRAM AGREEMENT AMENDMENT

This Agreement Amendment ("Amendment") is between **Village of Leonard, 23 E. Elmwood, P.O. Box 112, Leonard, MI 48367** ("Grantee") and the County of Oakland, by and through its statutory agent, the Oakland County Parks and Recreation Commission ("OCPRC").

The Grantee and OCPRC entered into an Agreement dated **11/1/2023** for the Project and Project Number set forth below ("Agreement"), which Agreement is attached and incorporated herein as Exhibit A. The Parties now desire to amend the Agreement. This Amendment changes the scope of the project due to higher engineering design costs than originally anticipated. The project will now focus on specific areas on the Polly Ann Trail deemed most in need of improvements, reducing the scope from the full 16.9 miles of trail to 4.1 miles of trail from Hosner Road to Elmwood Street. The Parties agree to the terms and conditions set forth in this Amendment.

Project Title ("Project"): Polly Ann Trail Modernization & Safety Improvements Design
Project Number: GU-PR-Leonard-PA
Grant Amount ("Grant Amount"): $25,000
Match Amount ("Match Amount"): $75,000
Total Project Amount: $100,000
Start Date: November 1, 2023 [Date of last signature on Agreement]
End Date: October 31, 2026

This Amendment and the Agreement comprise the entire agreement and understanding between the Parties and supersede all other prior oral or written understandings, communications, agreements, or contracts between the Parties. By signing this Amendment, the below individuals certify they are authorized to sign this Amendment on behalf of their organization and the Parties will fulfill the terms of the Agreement and this Amendment.

OAKLAND COUNTY PARKS COMMUNITY PARK AND TRAIL CAPITAL GRANT PROGRAM AGREEMENT

This Agreement is between **Village of Leonard, 23 E. Elmwood, P.O. Box 112, Leonard, MI 48367** ("Grantee") and the County of Oakland, by and through its statutory agent, the Oakland County Parks and Recreation Commission ("OCPRC").

Monies from the Oakland County Parks and Recreation Commission Millage have been appropriated for the Oakland County Parks Community Park and Trail Capital Grant Program ("Program"). The purpose of this Agreement is to provide funding to Grantee in exchange for the work to be performed by Grantee for the below named project. The Parties agree to the terms and conditions set forth in this Agreement.

Project Title ("Project"): Polly Ann Trail Modernization & Safety Improvements Design
Project Number: GU-PR-Leonard-PA
Grant Amount ("Grant Amount"): $25,000.00
Match Amount ("Match Amount"): $75,000.00
Total Project Amount: $100,000.00
Start Date: [Effective Date—the date the last Party to this Agreement signs the Agreement]
End Date: [3 years from Start Date]

By signing this Agreement, the below individuals certify they are authorized to sign this Agreement on behalf of their organization and the Parties will fulfill the terms of this Agreement, including any attached Exhibits.

Grantee:

Signed: _____

Name: Michael J McDonald
Title: President
Organization: Village of Leonard

Name: David T. Woodward
Chairperson, Oakland County Board of Commissioners
Date: Nov 1, 2023

1. **Agreement Execution.** Grantee is required to sign the Agreement and return it to OCPRC within sixty (60) calendar days of the date the Agreement is issued to Grantee. If not, OCPRC may cancel this Agreement and the monies allocated under this Agreement may be issued to another entity, in OCPRC's sole discretion. This Agreement is not effective until both Parties sign the Agreement. The "Effective Date" shall be the date the last Party signs the Agreement.
2. **Contact Information.** This Agreement shall be administered on behalf of OCPRC by the **Planning & Resource Development Unit.** All notices, reports, documents, requests, actions, or other communications required between OCPRC and Grantee shall be submitted to the contacts identified below. By written notice, the Parties may designate a different contact with correlating information.
   2.1. **Grantee Contact**
      2.1.1. **Organization:** Village of Leonard
      2.1.2. **Name/Title:** Michael J McDonald / President
      2.1.3. **Address:** 23 E Elmwood, PO Box 789
      2.1.4. **Telephone Number:** 248 628 7380
      2.1.5. **E-Mail Address:** villageofleonard@gmail.com
   2.2. **OCPRC Contact**
      2.2.1. **Name/Title: Donna Folland, Supervisor – Planning & Resource Development**
      2.2.2. **Address: 2800 Watkins Lake Road, Waterford, MI 48328**
      2.2.3. **Telephone Number: 248-736-9087**
      2.2.4. **E-Mail Address: follandd@oakgov.com**
3. **Project/Project Period.**
   3.1. Grantee shall complete the Project as set forth and described in Exhibit A within the Project Period. Exhibit A is incorporated into this Agreement.
   3.2. As defined in this Agreement, "Project Period" means the period of time beginning on the Effective Date and ending on the End Date listed on page 1 of this Agreement.
   3.3. Grantee shall complete the Project within the Project Period. Requests to extend the Project Period must be made in writing a minimum of thirty (30) calendar days before the Project Period ends. OCPRC may extend the Project Period, in its sole discretion, and the extension must be codified in an amendment to this Agreement.
4. **Grantee Reporting Requirements:**
   4.1. Grantee shall complete and submit bi-annual progress reports, including a narrative report and summary of Project expenditures, in accordance with instructions provided by OCPRC.
   4.2. Within sixty (60) days of Project completion, Grantee shall submit final reporting documentation, including a final reimbursement request and narrative report, and copies of written materials and/or photographs of grant recognition signs in accordance with the instructions provided by OCPRC.
5. **OCPRC Payments/Advances/Project Closeout.** OCPRC shall make payments of the Grant Amount to Grantee as follows:
   5.1. OCPRC shall pay Grantee the Grant Amount listed on page 1 of this Agreement, in accordance with Exhibit A. Any cost overruns incurred to complete the Project shall be the sole responsibility of Grantee.

5.2. To be eligible for payment, Grantee must submit a complete payment request to the OCPRC on form(s) provided by OCRPC and have satisfied all progress reporting requirements due prior to the date of the payment request.

5.3. Grantee shall submit documentation of all costs incurred, including the value of match and donations made to the Project. Documentation of expenditures and value of match and donations must meet written OCRPC requirements as specified in the 2023 Grant Program Guidance Criteria.

5.4. OCPRC reserves the right to request additional information necessary to substantiate payments.

5.5. Grantee shall be a registered vendor with the County of Oakland to receive payments. Registration can be accomplished by completing a vendor registration through the Oakland County Vendor Registration link on the County Web site. All grant funds will be paid by ACH or check.

5.6. OCPRC shall not pay any portion of the Grant Amount to a Grantee contractor or subcontractors. Grant Amounts shall only be paid to Grantee.

5.7. OCPRC will hold back ten percent (10%) of the Grant Amount until Project Closeout set forth in this Section. Final payment of the remaining ten percent (10%) of the Grant Amount will be released upon OCPRC approval of Grantee's **Final Report** and satisfactory Project completion as determined by OCPRC, in its sole discretion.

5.8. A determination of Project completion, which may include a site inspection and an audit, shall be made by OCPRC after Grantee has met any match obligations, satisfactorily completed the activities, and provided products and deliverables described in Exhibit A.

5.9. Grantee shall immediately refund to OCPRC any payments in excess of the costs allowed by this Agreement.

5.10. Upon issuance of final payment from OCPRC, Grantee releases OCPRC of all claims against OCPRC arising under this Agreement. Unless otherwise provided in this Agreement or by State law, final payment under this Agreement shall not constitute a waiver of OCPRC's claims against Grantee.

6. **Grantee Assurances/Responsibilities.**

6.1. Grantee shall comply with all applicable local, State, and federal laws, rules, ordinances, and regulations in the performance of this Agreement.

6.2. Grantee shall comply with the 2023 Grant Program Guidance Criteria.

6.3. Grantee shall obtain all necessary permits and licenses for construction and maintenance of the Project. This Agreement shall not be construed to obligate OCPRC or any other governmental entity to issue any permit or license required for the Project. Grantee shall solely determine what permits or licenses are required for the Project, secure the needed permits or licenses, and remain in compliance with such permits or licenses. Grantee shall retain a copy of all permits or licenses and make them available to OCPRC upon request.

6.4. Grantee shall have control of the Project area through fee simple title, lease, or other recorded interest, or have written permission from the owner of the Project area to complete Project activities.

6.5. Grantee shall abide by all State and federal threatened and endangered species regulations when completing Project activities.

6.6. Grantee shall not discriminate against an employee or an applicant for employment in hiring, any terms and conditions of employment or matters related to employment regardless of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, marital status or any other reason, that is unrelated to the person's ability to perform the duties of a particular job or position, in accordance with applicable federal and state laws. Grantee further agrees that any subcontract shall contain non-discrimination provisions, which are not less stringent than this provision and binding upon any and all subcontractors. A breach of this covenant shall be regarded as a material breach of this Agreement.

6.7. Grantee shall require that no individual be denied access to the Project or Project activities on the basis of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, or marital status.

6.8. OCPRC reserves the right to deny the use of any consultant, contractor, associate, or other personnel to perform any portion of the Project.

6.9. Grantee is solely responsible for all activities performed under this Agreement and for the construction and maintenance of the Project. Grantee shall be the sole point of contact regarding contractual matters for the Project, including payment of any and all charges resulting from the Project.

6.10. Grantee shall require all contractors and subcontractors constructing or performing the Project to comply with this Agreement.

6.11. Grantee shall ensure all contractors and subcontractors constructing and performing the Project are qualified to perform such work.

6.12. Grantee shall be solely responsible for the operation and maintenance of the Project subject to this Agreement.

6.13. All records related to the Project must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by OCPRC.

7. **Liability.**

7.1. OCPRC is not liable or required to operate, maintain, or contribute to the operation or maintenance of the Project and any associated Project activities.

7.2. Grantee shall defend any Claim brought against either Party that involves the Project or associated Project activities or that involves title, ownership, or other specific rights of real property controlled by Grantee and relates to the Project.

7.3. Grantee is responsible for all Claims arising under or in any manner related to the Agreement, the activities authorized by the Agreement, or the use and occupancy of the Project.

7.4. As used in this Agreement, "Claims" mean any alleged losses, claims, complaints, demands for relief or damages, lawsuits, causes of action, proceedings, judgments, deficiencies, liabilities, penalties, litigation, costs, and expenses, including, but not limited to, reimbursement for reasonable attorney fees, witness fees, court costs, investigation expenses, litigation expenses, amounts paid in settlement, and/or other

amounts or liabilities of any kind which are incurred by or asserted against a Party, or for which a Party may become legally and/or contractually obligated to pay or defend against, whether direct, indirect or consequential, whether based upon any alleged violation of the federal or the state constitution, any federal or state statute, rule, regulation, or any alleged violation of federal or state common law, whether commenced or threatened.

7.5. Performance of this Agreement is a governmental function. This Agreement does not, and is not intended to, impair, divest, delegate, or contravene any constitutional, statutory, and/or other legal right, privilege, power, obligation, duty, or immunity of the Parties. Nothing in this Agreement shall be construed as a waiver of governmental immunity.

8. **Insurance.** The Grantee shall acquire and maintain insurance or a program of self-insurance, which Grantee deems necessary, to protect it from liability related to construction and/or operation of the Project. OCPRC shall not obtain any insurance or provide any self-insurance for construction and/or operation of the Project.
9. **Audit and Access to Records.** OCPRC reserves the right to conduct programmatic and financial audits of the Project and may withhold payment until the audit is satisfactorily completed. Grantee shall maintain all pertinent records and evidence pertaining to this Agreement, including grant and any required matching funds, in accordance with generally accepted accounting principles and other procedures specified by OCPRC. OCPRC or any of its duly authorized representatives must have access, upon reasonable notice, to such books, records, documents, and other evidence for the purpose of inspection, audit, and copying. Grantee shall provide proper facilities for such access and inspection. All records must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by OCPRC.
10. **Assignability.** Grantee shall not assign or transfer any interest in this Agreement without prior written authorization of the OCPRC Director.
11. **Changes.** Any changes to this Agreement requested by Grantee shall be made in writing and sent to OCPRC contact listed in section 2 of this agreement. OCPRC may approve or deny such change, in its sole discretion. Changes requiring an amendment to this Agreement will be executed by OCPRC and Grantee in the same manner as this Agreement.
12. **Termination.**

12.1. Failure by Grantee to comply with any provision of this Agreement shall be a material breach of this Agreement. Upon breach of the Agreement by Grantee, OCPRC may, in addition to any other remedy provided by law:

12.1.1. Terminate this Agreement;

12.1.2. Withhold and/or cancel future payments to Grantee on any or all current grant projects under the Program until the violation is resolved to the satisfaction of OCRPC;

12.1.3. Withhold action on all pending and future grant applications submitted by Grantee under the Program;

12.1.4. Require repayment of grant funds already paid to Grantee under this Program; and/or

12.1.5. Require specific performance of the Agreement.

12.2. This Agreement may be terminated by OCPRC, upon thirty (30) calendar days written notice, due to budgetary reduction, other lack of funding, or upon request by Grantee. OCPRC may honor requests for just and equitable compensation to Grantee for all satisfactory and eligible work completed under this Agreement up and until the date of Agreement termination.

Upon the date of termination, all outstanding reports and documents are due to OCPRC and after the termination date OCPRC will no longer be liable to pay or reimburse Grantee any outstanding Grant Amounts.

Exhibit A
OCPR Grant Program Application

For the 2023 Oakland County Parks and Recreation Park Improvement and Trailways Grant Program, $650,000 is available for trail and park improvement projects. This program is designed to assist local Oakland County communities with planning, preliminary engineering/design, and construction costs directly related to park improvement and trail projects located in Oakland County. For full program guidelines refer to the 2023 Community Grant Program Guidelines found on the Oakland County Parks web site.

We are not using Laserfiche this year but changing to this fillable PDF application. Please submit attachments and supporting documents along with this application as ONE PDF document if possible.

A. Applicant Information

1. Project Title: Polly Ann Trail Modernization & Safety Improvements Design Project

2. Oakland County City, Village or Township Name: Village of Leonard (Fiduciary), Addison, Oxford Twp, Oxford Village, Orion

3. Census Tract: 1284, 1281, 1286, 1218, 1217, 1215, 1210,1203, 1200

4. Name of Primary Grant Contact: Linda Moran, Polly Ann Trail Manager or Mike McDonald, Leonard Village President

Address: 23 E Elmwood, PO Box 112, Leonard, MI 48367

Primary Contact Phone: 248.981.1242

Primary Contact E-Mail Address: manager@pollyanntrailway.org or villageofleonard@gmail.com

5. Please list any project partners: Polly Ann Trailway Management Council, Michigan Department of Natural Resources

6. For which type of funding are you applying (please check one):

☑ Pre-development grants minimum request $5,000, maximum request $25,000 (design, engineering, planning, etc.) 25% Match

☐ Development grants minimum request $5,000, maximum request $100,000. 50% Match

B. Financial Information

Grant Amount Requested: $25,000

Match Amount: $75,000

☑ 25% minimum match for pre-development projects

☐ 50% match for development projects.

Certain communities may be eligible to have the match requirement waived – if your community is struggling to provide a match, please reach out to OCPR grants planning staff

Match Source(s):

Philanthropy: $50,000; Community Foundation SEMI - Wilson Legacy Design and Access (Pending)
General Fund: $25,000; Polly Ann Trailway Management Council (Budgeted)

Projected Budget (if more lines are needed, please attach as additional document):

Scope Item	Quantity	Total Amount
Geotechnical, Green Infrastructure and Wetland Delineation	1	$33,450
Topographic Surveying and Mapping Services	1	$20,000
Public Input and Project Coordination Meetings	1	$10,250
Design Development/Traffic Control Device (Incl permit apps)	1	$25,460
Construction Documents, Bidding and Award	1	$10,840

Total project budget: $100,000

C. Grant Application Requirements

1. Indicate how and where this project is addressed in relevant community planning documents, which may include: 5-Year Parks and Recreation Master Plan, Capital Improvement Plan, Park Master Plan, Community Master Plan, Complete Streets Plan, Trailway Master Plan, Pathway Plan, etc. Provide links to relevant online planning documents or add relevant pages to application PDF document. (100 word maximum)

The proposed project is identified mainly in Chapter 7: Action Program of the Polly Ann Trailway 5-year Master Plan (see pages 21, 81, 84, 85)
https://pollyanntrailway.org/images/PAT_MasterPlan_21_25.pdf
The Polly Ann Trail is also identified as a significant regional trail in the SEMCOG Bicycle and Pedestrian Mobility Plan for Southeast Michigan (Pages 2,10, 20, 98)
https://semcog.org/desktopmodules/SEMCOG.Publications/GetFile.ashx?filename=BicycleAndPedestrianMobilityPlanForSoutheastMichiganMarch2020.pdf

2. Proposed Project Dates

Anticipated Start Date: July 2023

Anticipated End Date: July 2024

3. Select the type of site control the applicant has over the site where the project is to be completed:

- [x] Fee simple
- [ ] Less-than-fee-simple (explain): (text field)
- [x] Lease
- [ ] License
- [x] Easement
- [x] Other (explain): Road Right-of-Way

4. Final Report & Reimbursement

The OCPR Trails and Park Improvements grant program is a reimbursement program. If awarded a grant, the community will have an opportunity to request reimbursement on a quarterly basis. A final report will need to be submitted and approved by OCPR grant management staff prior to the release of the final 20% of grant funds.

- [x] Please check here to acknowledge that this is a reimbursement grant and that a final report will be required to release the final 20% of grant funds.

D. Project Description

1. Describe the physical location of the proposed project and ownership of the property. (250 words max)

The Polly Ann Trail is 16.9 miles and extends across the northeastern corner of Oakland County through Orion Township, Oxford Township, Oxford Village, Addison Township and the Village of Leonard. These five municipalities have been collaborating for more than 25 years to transform the former railroad into a four season, non-motorized trail that is open to active transportation and outdoor recreation.

The trailway property is typically 50 feet wide and generally follows the former railroad right-of-way. The Polly Ann is owned by various entities including the Michigan Department of Natural Resources (DNR), Polly Ann Trailway Management Council, Orion Township, and long-term lease agreements with private entities. The PATMC oversees the day-to-day operations, maintenance, programming, management and construction projects for the entire trail in Oakland

2. Describe the project design and why it was chosen. (250 words max)

In the early 2000s, the Polly Ann Trail had been acquired and converted from a railroad to a shared use path open to walking, biking, cross-country skiing and horseback riding. Many of the state and federal guidelines for trailway development have changed since that time and this important regional trail needs to make necessary design changes to make transformative safety improvements and replace aging infrastructure. The following examples are a few of the known deficiencies:

--Existing road crossings: many of the existing trail/road crossings follow the old railroad alignment and cross on a diagonal rather than a 90-degree angle. The existing alignment causes trail users to be in the roadway and exposed to motor vehicle traffic for longer distances and longer periods of time.

3. Provide a relevant history/background information (including any environmental concerns). (250 words max)

Railroads have been an integral part of the transportation network in Michigan for nearly two centuries. Since 1970, many abandoned railway corridors in the state have been transformed into shared-use paths. This has allowed Michigan to be known as the "Trails State," leading the nation with more than 2,600 miles of rail-trails. These converted historic transportation routes continue to be essential infrastructure for outdoor recreation and active transportation like walking and biking.

The Polly Ann Trailway Management Council was formed in 1997 through an Interlocal Agreement that was entered into by the five participating communities of Orion Township, Oxford Township, Village of Oxford, Addison Township and Village of Leonard. The PATMC has a long-term lease agreement with the DNR to manage the day-to-day operations

4. Describe the community need for the project. (250 words max)

The community need for this project can be broken into three scales:

1. Local:
Many area residents start from their homes in nearby neighborhoods and mainly utilize the Polly Ann Trail for fitness and outdoor recreation and also to access local businesses, library, downtowns, schools, essential services, and local parks.

2. County and Regional:
The Polly Ann serves as an important trailway corridor in Southeast Michigan and provides users with connections to other regionally significant trails and parks like the Polly Ann Trail in Lapeer County, Paint Creek Trail, Bald Mountain

5. Project Alignment with most recent OCPR Community-Wide Needs Assessment.
Please select all categories in which your proposed project falls:

- [ ] Beaches
- [x] Multi-use trails
- [ ] Canoe & kayak launch sites
- [ ] Picnicking areas and pavilions
- [ ] Playgrounds
- [ ] Sledding Hills
- [ ] Farmers Markets
- [ ] Waterparks and Waterslides
- [ ] Boating and fishing areas
- [ ] Splash pads and spray parks
- [ ] Outdoor amphitheaters
- [ ] Camping areas
- [ ] Mountain-biking trails
- [ ] Tennis courts
- [ ] Baseball and softball diamonds
- [ ] Basketball courts
- [ ] Disc golf
- [ ] Archery range
- [ ] Hunting areas
- [ ] Off-road vehicle areas
- [ ] Soccer and cricket fields
- [ ] Outdoor equestrian facilities/trails
- [ ] Pickleball courts
- [ ] Other

6. Does the project positively impact equity and justice and/or provide parks and recreation services that feel safe and welcoming to everyone? If so, please summarize here. (250 word max)

Communities in northeast Oakland County, along with many towns across southeastern Michigan, face a number of disparities related to income, transportation choices, employment opportunities, and access to high quality education, healthcare and green space. Being known as the 'Motor City' often creates a stigma around using alternative modes of transportation like transit, walking, and biking. Many residents in Southeast Michigan are faced with limited transportation options and the Polly Ann Trail and other regional trails can help address some of the mobility inequities.

Once completed, the proposed improvements will ensure an accessible, equitable, and sustainable corridor for alternative modes of transportation to best serve people of all ages and abilities. It will also incorporate considerations for green infrastructure, connected open space, and environmental justice in its design and implementation. Once

7. Does the project consider sustainable design/construction practices and help build community resilience and adaptation to climate change? If so, please summarize here. (250 word max)

The project team will work to select a consultant to complete the design engineering phase of the project. An emphasis will be placed on sustainable design and construction practices. Examples include, using locally sourced materials whenever possible, requiring American steel, increasing green stormwater infrastructure, using native landscaping materials, pervious paving materials, recycled materials, and using wood materials from sustainable forestry practices.

Once fully implemented, this innovative and thoughtfully re-designed linear park will help the surrounding communities to adapt to climate change and improve community resilience.

8. Does the project increase access to spaces and experiences that promote physical, mental, and social health for all? If so, please summarize here. (250 word max)

The ongoing COVID-19 Pandemic has only emphasized how important trails and parks are to have a livable and healthy community. This critical infrastructure provides a place for residents to enrich both mental and physical wellbeing, reduce social isolation, and improve their access to nature. In addition, Southeast Michigan has become an automobile-centric place that contributes directly to preventable health conditions like obesity, high blood pressure and diabetes. Through the promotion of inclusive facilities like the Polly Ann Trail, trail users of all ages and abilities can fight chronic diseases and live healthy and active lives. The proposed project will also help to improve the overall user experience.

The Polly Ann Trailways Management Council envisions a future in which local residents enjoy: a walkable community, using the Polly Ann Trail and local spurs to make short trips within their neighborhoods and villages and to access

9. Has any public engagement been done around this project yet? If so please summarize here.

Over the past decade, several meetings and public engagement opportunities have been associated with the trail and 5-year Trail Master Plan update. In addition, several area road and pathway projects, such as the "Restore M-24" (Lapeer Road) reconstruction and the Clarkston Road Pathway Connector, have incorporated direct walking/biking path linkages and trail related amenities.

The Polly Ann Trail Modernization & Safety Improvements Design project is being developed in coordination with a diverse group of stakeholders from the public and private sectors and will continue to engage them in the planning, design, and implementation stages. Stakeholders have recently provided input for the proposed project. Input and comments were taken into consideration to address safety concerns, trailway condition and planned amenities. Several

10. Describe how the project will be managed and maintained long-term, including any equipment or staffing needs and how they will be addressed.

The proposed project is being managed by the Polly Ann Trailway Management Council. This work is the first of three stages that needs to be completed in order to modernize the trail and bring it up to the most current standards. After the Design Engineering is completed, it will be followed by the Bidding Stage and finally go to Construction.

Despite having a modest budget, the Polly Ann Trailway Management Council has been able to collaborate with partners and funders to purchase the former railroad right-of-way, improve the surface in the early 2000s, and construct a bridge over Lapeer Rd (M-24) in Oxford. The original trailway surface is nearly 20 year old and beyond its design life and the proposed project is the first step to making needed improvements to the surface and roadway crossings.

11. Describe how the project will meet or exceed ADA guidelines. Describe any Universal Design principles that will be incorporated into the project.

As mentioned in question 2 above, the trailway will be designed to meet AASHTO guidelines, which incorporate ADA and Universal Design principles. During the design process, the following elements will be incorporated:
- Walkways within a trailhead that are at least 6 feet wide with cross-slopes under 2% and running slopes under 5%
- Multi-use trail that is 10 feet wide, with 2-foot clear zones on both sides, with cross-slopes under 2% and running slopes under 5%
- Utilize a firm and stable surface material like concrete, boardwalk or asphalt, crushed aggregate that has been rolled and compacted
- Detectable warning surfaces at roadway crossing to assist people that have vision impairments
- Larger (greater than 60"X60") level areas at all turns and intersections

12. Select whether or not the park or facility has any required entrance fees – annual, daily, non-resident, etc.

- [x] No fees for park use
- [ ] Non-resident annual or daily fee
- [ ] Annual or daily fee for residents and non-residents
- [ ] Other (explain):

13. Select the ways in which people can access the site:

- [ ] Automobile only
- [x] Automobile
- [x] Bicycle on-street
- [ ] Dedicated bike lane
- [x] Sidewalk
- [ ] Nearby bus stop (within ¼ mile)

E. Attachments

If possible please use the "Combine Files into one PDF" tool to combine your application materials into one PDF document. If you don't have the ability to do so, individual files will still be accepted. Email all attachments to Kate Layton at laytonk@oakgov.com. Put your community name in the subject line of the email.

Required Attachments:

1. Project location map

2. Site plan or site map

3. Optional letters of support

4. Optional Other Materials

   a) Design drawings/specifications

   b) Photographs with captions that indicate the relevant content of the photo

Submission

Completed applications should be e-mailed to Kate Layton at laytonk@oakgov.com.

You will receive a confirmation e-mail within 48 hours indicating that we received your application. If your application file size is too large to e-mail, reach out to Kate or Donna for file-sharing options.

Applications should be submitted by April 21 at 5:00 p.m.

Re: 2023 OCPR Grant Program-Polly Ann Trail Modernization & Safety Improvements

Dear Ms. Folland,

The Polly Ann Trailway Management Council is pleased to collaborate with the Village of Leonard to submit a grant application to Oakland County Parks and Recreation (OCPR) to complete the required design engineering services, construction cost estimates, and bid documents to modernize and improve safety on the Polly Ann Trail in Oakland County. This request for funding is in the amount of $25,000 with a total project cost of $100,000. It is anticipated that the proposed design project will take one year to complete.

The Polly Ann Trail was originally developed in the early 2000s and many of the state and federal guidelines for trailway development have changed since that time. With your financial assistance, the proposed project will upgrade the overall design of the trail to better serve trail users of all ages and abilities, make necessary safety enhancements at road crossings, replace aging infrastructure, and bring this significant regional trail up to current design standards.

The proposed project is consistent with OCPR's goal to have safe and welcoming recreation facilities, strong sustainability and environmental stewardship practices, and promote physical, mental, and social health for all trail users. It will also consider feedback from public engagement and represents a collaboration among a variety of stakeholders from non-profits, private, local, state and county agencies.

Please contact me if you have any questions or if you would like to discuss this important project further.

Thank you for your consideration,

Curtis Wright, Chair
Polly Ann Trailway Management Council

RESOLUTION OF SUPPORT FOR A GRANT APPLICATION BY THE VILLAGE OF LEONARD TO THE OAKLAND COUNTY PARKS & RECREATION 2023 TRAIL PRE-DEVELOPMENT GRANT PROGRAM FOR FUNDING OF PRELIMINARY ENGINEERING OF THE POLLY ANN TRAIL

WHEREAS Voters passed the Oakland County Parks and Recreation (OCPR) Millage in November 2020 and a portion of those funds will be used for competitive grant programs to assist local communities with preliminary engineering and construction costs directly related to park and trail improvement projects located in Oakland County; and

WHEREAS OCPR requires grant applications to be submitted by a city, village, or township in Oakland County; and

WHEREAS the Village of Leonard, acting as a fiduciary on behalf of and in partnership with the Polly Ann Trailway Management Council (PATMC), desires to apply for a 2023 OCPR Trail Pre-Development Grant for the proposed Modernization and Safety Improvements Project to complete the preliminary engineering and bid documents to upgrade approximately 16.9-miles of the Polly Ann Trail and comply with current AASHTO and ADA standards; and

WHEREAS the PATMC is a public body corporate formed under an Interlocal Agreement between Orion Twp, Oxford Twp, Village of Oxford, Addison Twp and Village of Leonard and is also registered as a 501 (c)(3) non-profit namely to develop and maintain a recreational trail in Oakland County, Michigan between Joslyn Road (south of Waldon Rd) and Boardman Rd, utilizing the abandoned Grand Trunk Railroad right-of-way; and

WHEREAS the proposed project is supported by goals and objectives identified in the approved 2021-2025 Polly Ann Trailway Master Plan and will help to improve the overall trail user experience, enhance safety at road crossings, and modernize an established regional trailway in northeast Oakland County; and

WHEREAS several well publicized public participation opportunities have been held dating back to 2019 when the last Polly Ann Trailway Master Plan was created and input received supports the improvements identified in the proposed project; and

WHEREAS the Village of Leonard has prepared a grant application to OCPR for $25,000.00, based on a total project cost of $100,000.00, to fund preliminary engineering for the desired and proposed improvements; and

NOW, THEREFORE, BE IT RESOLVED, that the Village of Leonard, on behalf of the Polly Ann Trailway Management Council, hereby authorizes submission of a 2023 OCPR Trail Pre-Development Grant application in the amount of $25,000.00;

AND BE IT FURTHER RESOLVED if funding from OCPR is received, the Village of Leonard will enter into an agreement with the Polly Ann Trailway Management Council which will require the PATMC to make available a local match and other grant funding through financial commitment of $75,000.00 during the 2023-2024 fiscal years; and

OXFORD COMMUNITY SCHOOLS
Clear Lake Elementary
2085 W. Drahner Rd.
Oxford, MI 48371
248-969-5200

Dear Grant Project Funding Committee,

It is with great pleasure that I write to you in support of the Polly Ann Trail's grant proposal to secure funding to enhance the condition of the Polly Ann Trail. As the former International Baccalaureate (IB) Primary Years Programme (PYP) Coordinator and now as Principal for Clear Lake Elementary School in Oxford, it has been marvelous to have such proximity to the Polly Ann Trail, its natural resources, and the guidance of the Trail Manager, Linda Moran.

There are several times throughout our school year in which we interact with the Polly Ann Trail to take students' learning on location. Each fall, we are able to take our entire 5th grade to the trail to connect their learning of invasive species in Michigan and take their research outside the walls of the classroom. Within a short walking distance, we can see firsthand the invasive species that are local to our area. We learn the ways the Polly Ann Trail organization works to be innovative to remove or lessen the impact these invasive plant species have on our native plants and flowers. Through this trip, many of our students are now not only more knowledgeable and aware of their local community, but they are inspired and want to take action. Often, our students along with their families will volunteer to help once spring arrives to clean up the trail, plant flowers, and to help Mrs. Moran with other trail projects.

Another yearly learning opportunity that our school has been able to provide to our students is a walking field trip to our local Oxford Public Library. This field trip would not happen if we were not able to use the Polly Ann Trail. The Polly Ann Trail allows our students and teachers to safely travel the 4 miles round trip without having to worry about car traffic. The funding from this grant would directly impact and ensure that our route traveled is resurfaced to further improve safety for our students and other pedestrians.

Mrs. Moran's dedication and hard work that she puts forth in creating a safe and robust trail for our local community is so amazing. I am honored to write this letter on her and the Polly Ann Trail's behalf as they both have given back to our school and local community in so many ways. I have great trust that if provided the grant funding that it would be used to bring joy to our community and opportunities for the students in Oxford to grow their outdoor classroom space.

Please do not hesitate to reach out for further information or questions. Thank you for your time and the opportunity that this grant funding provides local communities to establish a culture of continuous improvement and innovation.

Educationally yours,

Stephanie Niemi

RE: Polly Ann Trail Modernization and Safety Improvements Project

Dear Ms. Moran,

I am writing on behalf of the Oxford Township Parks and Recreation Commission, to offer strong support of the Polly Ann Trailway Management Council's grant applications to upgrade the Polly Ann Trail in Oakland County. The proposed project will design, reconstruct and modernize almost 17 miles of shared-use path, improve safety at roadway crossings, upgrade the trail surface, and enhance connections to amenities.

The proposed project will not only make necessary safety improvements, but it will also make critical upgrades to aging infrastructure. This important linear corridor will continue to provide safe alternative transportation options, help to support economic vitality in rural towns, increase outdoor recreation opportunities, and further promote vibrant communities.

The Polly Ann is a key segment of the Southeast Michigan trail network, and it provides a direct link between neighborhoods, local businesses, schools, parks, historic and cultural attractions, Downtown Oxford, Downtown Leonard, and several commercial districts. This rail-trail also plays an important role in local tourism and was designated as a segment of Michigan's Iron Belle Trail-biking route in 2012 and honored with a Pure Michigan Trail designation in 2019.

I encourage the Polly Ann Trailway Management Council to pursue the necessary funding to complete the design engineering and construction phases of this important project. We strongly urge the granting agencies to approve this important request for funding for Polly Ann Trail Modernization and Safety Improvements project. This project meets the regional trail priorities to increase safety, accessibility, use and comfort level; and improve mobility for pedestrians, equestrians, and cyclists to access public spaces, downtowns, core services and amenities; and encourage active lifestyles in Southeast Michigan.

Please don't hesitate to contact me if you have any further questions. Thank you for your consideration.

Sincerely,

Phil Castonia, CPRP
Director

RE: Polly Ann Trail Modernization and Safety Improvements Project

Dear Ms. Moran,

I am writing on behalf of the Village of Leonard Park and Recreation Committee, to offer strong support of the Polly Ann Trailway Management Council's various grant applications to upgrade the Polly Ann Trail in Oakland County. The proposed project will design, reconstruct and modernize approximately 16.9 miles of shared-use path, improve safety at roadway crossings, upgrade the trail surface, and enhance connections to amenities.

The proposed project will not only make necessary safety improvements, but it will also make critical upgrades to aging infrastructure. This important linear corridor will continue to provide safe alternative transportation options, help to support economic vitality in rural towns, increase outdoor recreation opportunities, and further promote vibrant communities.

The Polly Ann is a key segment of the Southeast Michigan trail network and it provides a direct link between neighborhoods, local businesses, schools, parks, historic and cultural attractions, Downtown Oxford, Downtown Leonard, and several commercial districts. This rail-trail also plays an important role in local tourism and was designated as a segment of Michigan's Iron Belle Trail-biking route in 2012 and honored with a Pure Michigan Trail designation in 2019.

Much of the planning and development plans for the Village Park and Recreation programs hinge on the Polly Ann Trail for recreational as well as economic development for the Village's future.

We encourage the Polly Ann Trailway Management Council to pursue the necessary funding to complete the design engineering and construction phases of this important project. We strongly urge the granting agencies to approve this important request for funding for Polly Ann Trail Modernization and Safety Improvements project. This project meets the regional trail priorities to increase safety, accessibility, use and comfort level; and improve mobility for pedestrians, equestrians, and cyclists to access public spaces, downtowns, core services and amenities; and encourage active lifestyles in Southeast Michigan.

Please don't hesitate to contact me if you have any further questions. Thank you for your consideration.

RE: Polly Ann Trail Modernization and Safety Improvements Project

Dear Ms. Moran,

I am writing on behalf of White Pine Coffee Roasters to offer strong support of the Polly Ann Trailway Management Council's various grant applications to upgrade the Polly Ann Trail in Oakland County. The proposed project will design, reconstruct and modernize approximately 16.9 miles of shared-use path, improve safety at roadway crossings, upgrade the trail surface, and enhance connections to amenities.

The proposed project will not only make necessary safety improvements, but it will also make critical upgrades to aging infrastructure. This important linear corridor will continue to provide safe alternative transportation options, help to support economic vitality in rural towns, increase outdoor recreation opportunities, and further promote vibrant communities.

The Polly Ann is a key segment of the Southeast Michigan trail network and it provides a direct link between neighborhoods, local businesses, schools, parks, historic and cultural attractions, Downtown Oxford, Downtown Leonard, and several commercial districts. This rail-trail also plays an important role in local tourism and was designated as a segment of Michigan's Iron Belle Trail-biking route in 2012 and honored with a Pure Michigan Trail designation in 2019.

As a business owner who operates a retail business alongside the Polly Ann Trailway, I can wholeheartedly state that the trail helps our business tremendously. The number of customers that enter our doors is elevated due to the trail. The positivity of those customers and their passion for the trail is self-evident when talking with them. The trail is a huge benefit to the community, its businesses, those businesses' employees, and the residents of the communities the trail passes through.

I encourage the Polly Ann Trailway Management Council to pursue the necessary funding to complete the design engineering and construction phases of this important project. We strongly urge the granting agencies to approve this important request for funding for Polly Ann Trail Modernization and Safety Improvements project. This project meets the regional trail priorities to increase safety, accessibility, use and comfort level; and improve mobility for pedestrians, equestrians, and cyclists to access public spaces, downtowns, core services and amenities; and encourage active lifestyles in Southeast Michigan.

Please don't hesitate to contact me if you have any further questions. Thank you for your consideration.

RE: Polly Ann Trail Modernization and Safety Improvements Project

Dear Ms. Moran,

I am writing on behalf of Cooper Standard Leonard Plant to offer strong support of the Polly Ann Trailway Management Council's various grant applications to upgrade the Polly Ann Trail in Oakland County. I am to understand the proposed project will design, reconstruct and modernize approximately 16.9 miles of shared-use path, improve safety at roadway crossings, upgrade the trail surface, and enhance connections to amenities.

The proposed project is focused on not only making necessary safety improvements, but it will help in critical upgrades to aging infrastructure. This important linear corridor will continue to provide safe alternative transportation options, help to support economic vitality in rural towns, increase outdoor recreation opportunities, and further promote vibrant communities.

The Polly Ann is a key segment of the Southeast Michigan trail network, and it provides a direct link between neighborhoods, local businesses, schools, parks, historic and cultural attractions, Downtown Oxford, Downtown Leonard, and several commercial districts. This rail-trail also plays an important role in local tourism and was designated as a segment of Michigan's Iron Belle Trail-biking route in 2012 and honored with a Pure Michigan Trail designation in 2019.

Cooper Standard Leonard Plant is a very proud community partner in the Village of Leonard and always desires to support projects that improve both the general surroundings and population of the area.

I encourage the Polly Ann Trailway Management Council to pursue the necessary funding to complete the design engineering and construction phases of this important project. We strongly urge the granting agencies to approve this important request for funding for Polly Ann Trail Modernization and Safety Improvements project. Again, I am to understand this project meets the regional trail priorities to increase safety, accessibility, use and comfort level; and improve mobility for pedestrians, equestrians, and cyclists to access public spaces, downtowns, core services and amenities; and encourage active lifestyles in Southeast Michigan.

Thank you for your consideration.

Sincerely,

David Malcolm

To: Linda Moran

It is my understanding that the Polly Ann Trailway Management Council is seeking grants to improve and upgrade the Polly Ann Trail here in Oakland County. The efforts include design, rebuild, and modernize almost 17 miles of share-use path. This also includes safety at roadway crossings and improvements to the trail surface.

As personal users of the Polly Ann Trail my wife and I fully support these efforts. Additionally, in my capacity as a *Trustee of Oxford Township* I see how this can help us provide safer alternative user options within our Township to our residents.

In my capacity as *Chairperson of the Oxford Downtown Development Authority* ("DDA") I further also endorse the grant efforts. The Polly Ann trail is a vital part of our local efforts to enhance historic attractions, promote local businesses here, and recreation opportunities. In fact, several members of our DDA Board are looking to partner with a new bicycle shop in Downtown Oxford and the Polly Ann Trail. Most recently this included participation in a SEMCOG seminar re. rural bike paths and trails.

I all three of my identified capacities I encourage the Polly Ann Trail Council to engage in the necessary funding of the design and construction phases of the intended project. I also hope the granting agencies will look kindly on requests for funding of the Polly Ann Trail Modernization and Safety Improvements project. Certainly a win-win for all concerned.

Respectfully,

Rod Charles

RE: Polly Ann Trail Modernization and Safety Improvements Project

Dear Ms. Moran,

I am writing on behalf of the Oxford Chamber of Commerce to offer strong support of the Polly Ann Trailway Management Council's various grant applications to upgrade the Polly Ann Trail in Oakland County. The proposed project will design, reconstruct and modernize approximately 16.9 miles of shared-use path, improve safety at roadway crossings, upgrade the trail surface, and enhance connections to amenities.

The proposed project will not only make necessary safety improvements, but it will also make critical upgrades to aging infrastructure. This important linear corridor will continue to provide safe alternative transportation options, help to support economic vitality in rural towns, increase outdoor recreation opportunities, and further promote vibrant communities.

The Polly Ann is a key segment of the Southeast Michigan trail network and it provides a direct link between neighborhoods, local businesses, schools, parks, historic and cultural attractions, Downtown Oxford, Downtown Leonard, and several commercial districts. This rail-trail also plays an important role in local tourism and was designated as a segment of Michigan's Iron Belle Trail-biking route in 2012 and honored with a Pure Michigan Trail designation in 2019.

Linda Moran is a huge asset to our community along with her work ethic and willingness to help others.

We encourage the Polly Ann Trailway Management Council to pursue the necessary funding to complete the design engineering and construction phases of this important project. We strongly urge the granting agencies to approve this important request for funding for Polly Ann Trail Modernization and Safety Improvements project. This project meets the regional trail priorities to increase safety, accessibility, use and comfort level; and improve mobility for pedestrians, equestrians, and cyclists to access public spaces, downtowns, core services and amenities; and encourage active lifestyles in Southeast Michigan.

Please don't hesitate to contact me if you have any further questions. Thank you for your consideration.

Sincerely,

Amy Desotell, Executive Director
Oxford Chamber of Commerce

Larry A. Obrecht

December 2, 2022

Linda Moran, Polly Ann Trail Manager
23 E. Elmwood St
PO Box 112
Leonard, MI 48367

Dear Ms. Moran,

I am writing to encourage and support the Polly Ann Trail's grant applications for funding to improve 16.9 miles of trail. The needed improvements include: an upgrade to the trail surface, improvements to roadway crossings and enhanced connections to amenities.

The Polly Ann Trail is a significant segment of Michigan's trail network providing links between neighborhoods, local businesses, schools, parks, historic and cultural venues. The Polly Ann Trail connects Orion, Oxford and Addison Townships and the Villages of Orion, Oxford, and Leonard. This trail also is a connector to Lapeer County Trails, the Paint Creek Trail, and the Michigan Iron Belle Trail. Of note, the Polly Ann was honored with a Pure Michigan Trail designation in 2019.

The Polly Ann Trail was one of the first and very early developed rail to trails in Oakland County. Although very controversial when introduced it has proven to be very successful and maintains heavy use by walkers, runners, bikers, and equestrians.

Today when discussing the trail with citizens and local government leaders the recognition of this trail is supportive and very positive. Many users are hopeful for additional neighborhood paths which would connect to the main trail. Someday these will allow a hiker and bike rider the ability to travel around the entire perimeter of our State of Michigan.

Future projects will include necessary upgrades to aging infrastructure and safety improvements. The Polly Ann linear corridor will continue to provide safe transportation options, support economic vitality, increase outdoor recreation opportunities, and further enhance vibrant communities.

I encourage the Polly Ann Trail Management Council to continue to pursue the necessary funding for the design, engineering, and construction phases of this important project.

I strongly urge the granting agencies to approve this request and fund these safety and modernization improvements. This request meets the regional trail priorities to increase safety, accessibility and improved mobility for pedestrians, cyclists, and equestrians. This modernization also enhances access to public spaces, parks, downtowns, core services and amenities. AND, very importantly, it encourages a healthy and active lifestyle for all users in Southeast Michigan.

Sincerely,

Larry Obrecht

INTERLOCAL AGREEMENT
TOWNSHIPS OF ORION, OXFORD, ADDISON,
VILLAGES OF OXFORD AND LEONARD
AGREEMENT WITH THE POLLY ANN TRAILWAY MANAGEMENT COUNCIL, INC.

THIS INTERLOCAL AGREEMENT (the "Agreement") is entered into pursuant to the Urban Cooperation Act of 1967, 1967 PA 7, as amended ("Act 7"). MCL 124.501 et. seg. And Part 721 of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended ("Act 451"), MCL 324.72101 et. seq., by and between the Townships or Orion, Oxford, and Addison; the Villages of Oxford and Leonard (the "Parties"), for the purpose of establishing and providing for the powers and duties of the POLLY ANN TRAILWAY MANAGEMENT COUNCIL, INC. (the "COUNCIL"). Each of the Parties is a "governmental agency", as that term is defined in Act 451, and a "public Agency", as that term is defined in Act 7, with the power to carry out the programs described in this Agreement. The Parties have each determined that the Parties will be able to provide the trailway programs described in this Agreement on a more cost effective basis if the Parties carry out such programs jointly.

SECTION 1: ESTABLISHMENT AND PURPOSE

There is hereby established a separate legal entity to be known as the Polly Ann Trailway Management Council (the "Council") for the purpose of administering this Agreement. The Council shall be a public body corporate having the powers functions and duties provided in this agreement, for the purpose of operating and maintaining that portion of 1 or more Michigan trailways located on state owned land pursuant to an agreement entered into under section 72105 of Act 451 of 1994, (MCL 324.72105) between the Michigan Department of Natural Resources (the "DNR") and the Council.

SECTION 2: MEMBERSHIP

MEMBER UNITS to the COUNCIL shall be those Parties who are signatories to this Agreement. The COUNCIL shall be considered an established public corporation when two local governments of the Parties named above have entered into this Agreement. Subsequent to the effective date of the COUNCIL, other local governments, whether or not named above, may become MEMBER UNITS by entering into this agreement. The COUNCIL may require, as a condition of membership, a fair share contribution agreement between the COUNCIL and any proposed MEMBER UNIT, if the COUNCIL determines that such agreement is necessary to provide fair allocation of costs among present and proposed MEMBER UNITS. All local governments who are signatories to this agreement shall have full MEMBER UNIT status in accordance with this agreement. This agreement and any agreement entered into or obligation incurred by any MEMBER UNIT in accordance with this agreement, shall be binding upon that MEMBER UNIT'S successor in interest, if any.

SECTION 3: GOVERNANCE

A. COUNCIL

1. The COUNCIL shall be composed of two (2) persons from each of the MEMBER UNIT townships (Addison Township, Charter Township of Orion, and Charter Township of Oxford), and one (1) one person from each of the MEMBER UNIT villages (Village of Leonard, and Village of Oxford) of which shall be a member of the MEMBER UNIT's governing body, or the Village Manager in the case of the Village of Leonard or Village of Oxford ; and one (1) non-voting citizen at large who shall be a resident of a MEMBER UNIT. The governing body of each MEMBER UNIT shall, by resolution, appoint its representative(s). The non-voting citizen at large shall be appointed by the duly appointed MEMBER UNIT council representatives.

2. At least once every two years, each MEMBER UNIT shall certify to the COUNCIL the persons appointed pursuant to Section 3, A, 1.

3. Councilpersons shall serve at the pleasure of their MEMBER UNIT and may be removed by resolution of their MEMBER UNIT governing board at any time with or without cause. Councilpersons who are members of a MEMBER UNIT governing board shall not serve beyond their term on the governing board, unless the other Councilperson from that MEMBER UNIT is then a member of that MEMBER UNIT'S governing board. The non-voting citizen at large shall serve a two (2) year term, commencing from the date of appointment.

4. Any vacancy on the COUNCIL arising for any reason shall be filled by appointment of the MEMBER UNIT governing board that made the original appointment, within forty-five (45) days of the vacancy, for the remainder of the unexpired term. A MEMBER UNIT shall certify to the COUNCIL persons appointed pursuant to this paragraph. A vacancy for any reason in the non-voting citizen at large position shall be filled by the COUNCIL within forty-five (45) days of the vacancy.

5. Each MEMBER UNIT governing board may also appoint alternate councilpersons who shall serve with full privileges and duties in the absence of the regular councilpersons.

6. The COUNCIL shall adopt Bylaws pursuant to the purpose and activities of this agreement and consistent with this Inter Local Agreement.

B. OFFICERS

1. The COUNCIL shall elect from its membership a Chairperson, Vice Chairperson, Secretary, Treasurer, and such other officers as it may deem appropriate, who shall serve terms of one (1) year commencing January 1st, except for the officers first elected who shall serve that fraction of the calendar year between COUNCIL selection and December 31st.

2. Officers shall serve at the pleasure of the COUNCIL and may be removed by resolution at any time.

3. Vacancies in any office shall be filled by COUNCIL election within thirty (30) days of the vacancy, for the remainder of the unexpired term.

4. The Chairperson shall preside at all meetings of the COUNCIL and shall have all privileges and duties of a councilperson. The Vice Chairperson shall preside at all meetings of the COUNCIL at which the Chairperson is absent. The Secretary shall keep or cause to be made all non-financial reports, records and minutes required by this agreement of applicable law and shall be charged with assuring compliance with the Michigan Open Meetings Act and the Michigan Freedom of Information Act. The Treasurer shall have custody of all COUNCIL funds which shall be deposited, invested, and/or disbursed by the Treasurer as directed by the COUNCIL. The Treasurer shall be charged with assuring complete financial records and reports as required by this agreement or applicable law or contract provisions.

SECTION 4: MEETINGS

A. SCHEDULE/CALL OF MEETINGS

1. The COUNCIL shall meet at least quarterly and shall annually establish a regular meeting schedule which shall posted at the offices of the MEMBER UNIT governing boards in similar form and within similar times as required by law for governmental meeting schedules.

2. Special meetings of the COUNCIL may be called by the Chairperson, or in the absence of the Chairperson, by the Vice Chairperson.

B. NOTICE

Each councilperson shall receive five (5) days written notice of all regular meetings. All notices of all meetings shall also be posted as required by the Michigan Open Meetings Act.

C. VOTING

A majority vote of the COUNCIL shall be necessary to take any official action at a regular or special meeting, provided that only those items on the agenda may be acted upon, and provided that only bills which represent budgeted expenses may be approved. A majority of the COUNCIL, appointed and serving, shall constitute a quorum in such cases.

Bills which represent expenses not previously included in the budget may only be approved by a quorum including at least one member of each governmental unit.

D. MINUTES

Complete written minutes of all COUNCIL meetings shall be kept in compliance with applicable provisions of the Michigan Open Meetings Act. Copies of minutes shall be prepared within the time period established by the Open Meetings Act and sent to all councilpersons and the chairpersons of MEMBER UNIT governing boards as soon as reasonably possible following their preparation.

E. RULES

Roberts Rules of Order, as last revised, when not in conflict with this agreement or written standing rules the COUNCIL may adopt, shall serve as the parliamentary authority for all COUNCIL meetings.

SECTION 5: POWERS

A. GENERAL POWERS

The COUNCIL shall have the following powers, authority and obligations:

1. Purchase, lease, receive, acquire, hold title in, trade, sell, lease or rent to others, dispose of, divide, distribute, own or exercise right of dominion over, all or part of any land, and any improvements thereon, within the railroad right of way described in Appendix A which is hereby incorporated and made part of this agreement. The COUNCIL may exercise the aforesaid powers over other land only upon consent of the governing board of the MEMBER UNIT in whose jurisdiction such land lies. The disposition of land acquired with aid from state or federal funds shall have the approval of the state or federal agency involved, if required by the agency. All property, real or personal, of the COUNCIL shall be used solely for the purposes stated in this agreement.

2. Improve, build, maintain and operate public trails, access sites and appropriate structures on COUNCIL land.

3. Contract or cooperate with other governmental units, public agencies, or private parties, as-appropriate, to carry out COUNCIL functions or fulfill COUNCIL obligations.

4. Contract a director and such other personnel as it may determine necessary who shall serve at the pleasure of the COUNCIL subject to applicable law.

5. Accept funds, voluntary work, or other assistance to carry out COUNCIL functions or obligations, from any source, public or private, including, but not limited to, to local governmental funding of specific projects, state or federal grants, and private donations. A complete record of all funds received from any source shall be maintained and made part of the annual financial report.

6. Establish policies or rules governing use of COUNCIL land or facilities not inconsistent with state or local law.

7. Recommend local ordinance provisions to MEMBER UNITS, as necessary to provide for the safety of the public utilizing DNR and/or COUNCIL land or facilities.

8. Make claims for federal or state aid payable to the individual or several MEMBER UNITS or the COUNCIL as may be available and appropriate to carry out COUNCIL functions.

B. LIABILITY COVERAGE

The COUNCIL shall purchase public liability insurance covering any cause of action, claim, damage, accident, injury or liability that may arise as a result of the ownership, construction, maintenance or operation of the land, public trails, access sites or other facilities of the COUNCIL. The COUNCIL purchasing such insurance shall name the Michigan Department of Natural Resources (DNR) and the MEMBER UNITS as additionally named insureds.

C. REPORTS

The COUNCIL shall, at least annually, make a full and complete report of all of its activities to the governing boards of all MEMBER UNITS.

D. LIMITATIONS

The COUNCIL shall have no power or authority to:

1. Levy any tax in its own name or, except as provided in MCL 124.507(4), Issue any bonds in its own name.
2. Indebt any MEMBER UNIT in any way except as provided in this agreement.

3. Condemn any land for any purpose.

SECTION 6: FINANCES

A. FISCAL YEAR

The fiscal year of the COUNCIL shall be from January 1st to December 31st.

B. OPERATIONAL AND PROJECT BUDGET

The COUNCIL shall each year develop an operational budget which shall be limited to meeting, postage, document or accounting costs, and similar basic costs. This budget shall include personnel, engineering, legal, land purchase or lease, or any development or maintenance costs incurred or to be incurred by the COUNCIL.

C. COUNCILPERSON REIMBURSEMENT

Each councilperson shall serve with no compensation from the COUNCIL for COUNCIL meetings actually attended.

D. FINANCIAL AUDITS/REPORTS

The Treasurer shall make or cause to be made a full and complete financial report to MEMBER UNITS of all the COUNCIL'S financial transactions and affairs at the end of each financial year. Said report may include a complete audit by a certified public accountant. State and federal audit requirements shall be fully met as applicable. MEMBER UNITS shall have the right, at their expense, to conduct such additional audits as they deem necessary or appropriate.

SECTION 7: TERMINATION/DISSOLUTION

A. MEMBER UNIT TERMINATION

A MEMBER UNIT may terminate its membership only: 1) upon ninety (90) days written notice to the COUNCIL and termination shall be effective only upon the elapse of the ninety (90) days written notice to the COUNCIL and termination shall be effective only upon the elapse of the sixty (60) days. If a MEMBER UNIT terminates its membership, all COUNCIL MEMBER UNITS terminating its membership shall remain liable for all obligations incurred by it pursuant to this agreement and prior to actual termination. A MEMBER UNIT terminating its membership under subsection 2 shall remain liable for all obligations incurred by it pursuant to this agreement and prior to actual termination, but shall not be liable for financial obligations established by the COUNCIL'S new fiscal year budget request triggering the MEMBER UNIT'S termination.

B. COUNCIL DISSOLUTION

If all or all but one of the MEMBER UNITS terminates their membership, the COUNCIL shall be considered dissolved.

1. Upon dissolution, the trailways property and any improvements thereon located within the boundaries of each former MEMBER UNIT shall revert to ownership by that unit of the Government, upon such terms and conditions as are to be agreed upon by the Member Units. Each Unit of Government shall be responsible to uphold the following provisions:

   A) The trailways property and the improvements thereon shall remain open for public recreational use in perpetuity;

   B) No prohibitions, impediments or blockages shall be made to the free passage of the trailways of legitimate trail users;

   C) The use of the trailways and improvements thereon shall remain subject to all applicable deed restrictions and all applicable state provisions imposed by law or contract.

2. After dissolution, if any former MEMBER UNIT fails to uphold any of the provisions named in Section 7 (B) (1) above, any of the other former MEMBER UNITS shall have cause to enforce compliance with said provision(s), provided however that failure to seek enforcement of any provision shall not constitute a waiver.

SECTION 8: AMENDMENTS

This agreement may be amended in whole or in any part by the written agreement of the governing boards of all MEMBER UNITS.

SECTION 9: STATE APPROVAL

As soon as reasonably practicable after the effective date of this agreement, this agreement shall be officially submitted to the Office of the Governor for approval pursuant to the Urban Cooperation Act of 1967.

SECTION 10: APPLICABLE LAWS

The COUNCIL shall in all activities fully comply with applicable local, state and federal laws and regulations and with applicable grant conditions or contract provisions.

SECTION 11: EFFECTIVE DATE

This agreement shall be in full force and effect and the COUNCIL shall be considered in effect as an operating public corporation as provided in Section 2 above, which date shall be noted as the second date in time indicated below.

IN WITNESS WHEREOF, the authorized representatives of the MEMBER UNITS have signed the agreement on the dates indicated below.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 7

Department: Strategic Partnerships and Initiatives

From: Simon Rivers, Chief – Strategic Partnerships & Initiatives

Subject: 2022 Community Grant Program Agreement Extension – City of South Lyon, Downtown South Lyon Park Project

RECOMMENDED MOTION

Move to approve the Oakland County Parks Community Park and Trail Capital Grant Program Agreement Amendment between the County of Oakland and the City of South Lyon, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In 2023, Oakland County Parks (OCP) awarded the City of South Lyon a $100,000 grant for the Downtown South Lyon Park Development project through OCP's Community Grant Program. The grant had end date of 5/3/2026 and reimbursement was not completed by the deadline. The City of South Lyon has requested a one-year extension to utilize the funds.

BACKGROUND

The City of South Lyon was awarded $100,000 for development of a new park in downtown South Lyon. Located on a vacant city-owned parcel, the park will include a 10x10 shelter, pergola with swinging benches, decorative paving, a lawn area and various plantings. The space is envisioned to also house rotating artwork in the future and includes sustainability measures such as native plantings, low-volume drip irrigation, LED lighting and recycled plastic benches and receptacles.

The South Lyon DDA was also awarded approximately $300,000 through a grant with Main Street Oakland County. The original grant agreement end date was previously extended by one year to incorporate the Main Street Oakland County funding.

ATTACHMENTS

1. City of South Lyon Grant Amendment – Downtown South Lyon Park Project

OAKLAND COUNTY PARKS
COMMUNITY PARK AND TRAIL CAPITAL GRANT PROGRAM AGREEMENT AMENDMENT

This Agreement Amendment ("Amendment") is between the County of Oakland, 1200 North Telegraph Road, Pontiac, MI 48341 ("County"), by and through its statutory agent, the Oakland County Parks and Recreation Commission ("OCPRC"), 2800 Watkins Lake Road, Waterford, MI 48328 and the **City of South Lyon, 335 S. Warren St., South Lyon, MI 48178** ("Grantee").

The Grantee and OCPRC entered into an Agreement dated **5/4/2022** for the Project set forth below ("Agreement"), which Agreement is attached and incorporated herein as Exhibit A. The Parties now desire to amend the Agreement. This Amendment extends the End Date of the Agreement as set forth below. The Parties agree to the terms and conditions set forth in this Amendment.

Project Title ("Project"): Downtown South Lyon Park Development
Grant Amount ("Grant Amount"): $100,000
Match Amount ("Match Amount"): $350,000
Total Project Amount: $450,000
Start Date: 5/4/2022
Original End Date: 5/3/2026
Amended End Date: [1 year from the date the last Party to this Agreement signs the Agreement]

This Amendment and the Agreement comprise the entire agreement and understanding between the Parties and supersede all other prior oral or written understandings, communications, agreements, or contracts between the Parties. By signing this Amendment, the below individuals certify they are authorized to sign this Amendment on behalf of their organization, and the Parties will fulfill the terms of the Agreement and this Amendment.

3. **Project/Project Period.**
   3.1. Grantee shall complete the Project as set forth and described in Exhibit A within the Project Period. Exhibit A is incorporated into this Agreement.
   3.2. As defined in this Agreement, "Project Period" means the period of time beginning on the Effective Date and ending on the End Date listed on page 1 of this Agreement.
   3.3. Grantee shall complete the Project within the Project Period. Requests to extend the Project Period must be made in writing a minimum of thirty (30) calendar days before the Project Period ends. OCPRC may extend the Project Period, in its sole discretion, and the extension must be codified in an amendment to this Agreement.
4. **Grantee Reporting Requirements:**
   4.1. Grantee shall complete and submit bi-annual progress reports, including a narrative report and summary of Project expenditures, in accordance with instructions provided by OCPRC.
   4.2. Within sixty (60) days of Project completion, Grantee shall submit final reporting documentation, including a final reimbursement request and narrative report, and copies of written materials and/or photographs of grant recognition signs in accordance with the instructions provided by OCPRC.
5. **OCPRC Payments/Advances/Project Closeout.** OCPRC shall make payments of the Grant Amount to Grantee as follows:
   5.1. OCPRC shall pay Grantee the Grant Amount listed on page 1 of this Agreement, in accordance with Exhibit A. Any cost overruns incurred to complete the Project shall be the sole responsibility of Grantee.

5.2. To be eligible for payment, Grantee must submit a complete payment request to the OCPRC on form(s) provided by OCRPC and have satisfied all progress reporting requirements due prior to the date of the payment request
5.3. Grantee shall submit documentation of all costs incurred, including the value of match and donations made to the Project. Documentation of expenditures and value of match and donations must meet written OCRPC requirements as specified in the Trailways and Park Development Grant Program Criteria.
5.4. OCPRC reserves the right to request additional information necessary to substantiate payments.
5.5. Grantee shall be a registered vendor with the County of Oakland to receive payments. Registration can be accomplished by completing a vendor registration through the Oakland County Vendor Registration link on the County Web site. All grant funds will be paid by ACH or Check.
5.6. OCPRC shall not pay any portion of the Grant Amount to a Grantee contractor or subcontractors. Grant Amounts shall only be paid to Grantee.
5.7. OCPRC will hold back ten percent (10%) of the Grant Amount until Project Closeout set forth in this Section. Final payment of the remaining ten percent (10%) of the Grant Amount will be released upon OCPRC approval of Grantee's **Final Report** and satisfactory Project completion as determined by OCPRC, in its sole discretion.
5.8. A determination of Project completion, which may include a site inspection and an audit, shall be made by OCPRC after Grantee has met any match obligations, satisfactorily completed the activities, and provided products and deliverables described in Exhibit A.
5.9. Grantee shall immediately refund to OCPRC any payments in excess of the costs allowed by this Agreement.
5.10. Upon issuance of final payment from OCPRC, Grantee releases OCPRC of all claims against OCPRC arising under this Agreement. Unless otherwise provided in this Agreement or by State law, final payment under this Agreement shall not constitute a waiver of OCPRC's claims against Grantee.

6. **Grantee Assurances/Responsibilities.**
6.1. Grantee shall comply with all applicable local, State, and federal laws, rules, ordinances, and regulations in the performance of this Agreement.
6.2. Grantee shall comply with the OCPRC Trailways and Park Development Grant Program Criteria.
6.3. Grantee shall obtain all necessary permits and licenses for construction and maintenance of the Project. This Agreement shall not be construed to obligate OCPRC or any other governmental entity to issue any permit or license required for the Project. Grantee shall solely determine what permits or licenses are required for the Project, secure the needed permits or licenses, and remain in compliance with such permits or licenses. Grantee shall retain a copy of all permits or licenses and make them available to OCPRC upon request.
6.4. Grantee shall have control of the Project area through fee simple title, lease, or other recorded interest, or have written permission from the owner of the Project area to complete Project activities.

6.5. Grantee shall abide by all State and federal threatened and endangered species regulations when completing Project activities.

6.6. Grantee shall not discriminate against an employee or an applicant for employment in hiring, any terms and conditions of employment or matters related to employment regardless of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, marital status or any other reason, that is unrelated to the person's ability to perform the duties of a particular job or position, in accordance with applicable federal and state laws. Grantee further agrees that any subcontract shall contain non-discrimination provisions, which are not less stringent than this provision and binding upon any and all subcontractors. A breach of this covenant shall be regarded as a material breach of this Agreement.

6.7. Grantee shall require that no individual be denied access to the Project or Project activities on the basis of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, or marital status.

6.8. OCPRC reserves the right to deny the use of any consultant, contractor, associate, or other personnel to perform any portion of the Project.

6.9. Grantee is solely responsible for all activities performed under this Agreement and for the construction and maintenance of the Project. Grantee shall be the sole point of contact regarding contractual matters for the Project, including payment of any and all charges resulting from the Project.

6.10. Grantee shall require all contractors and subcontractors constructing or performing the Project to comply with this Agreement.

6.11. Grantee shall ensure all contractors and subcontractors constructing and performing the Project are qualified to perform such work.

6.12. Grantee shall be solely responsible for the operation and maintenance of the Project subject to this Agreement.

6.13. All records related to the Project must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by OCPRC.

7. **Liability.**

7.1. OCPRC is not liable or required to operate, maintain, or contribute to the operation or maintenance of the Project and any associated Project activities.

7.2. Grantee shall defend any Claim brought against either Party that involves the Project or associated Project activities or that involves title, ownership, or other specific rights of real property controlled by Grantee and relates to the Project.

7.3. Grantee is responsible for all Claims arising under or in any manner related to the Agreement, the activities authorized by the Agreement, or the use and occupancy of the Project.

7.4. As used in this Agreement, “Claims” mean any alleged losses, claims, complaints, demands for relief or damages, lawsuits, causes of action, proceedings, judgments, deficiencies, liabilities, penalties, litigation, costs, and expenses, including, but not limited to, reimbursement for reasonable attorney fees, witness fees, court costs, investigation expenses, litigation expenses, amounts paid in settlement, and/or other

amounts or liabilities of any kind which are incurred by or asserted against a Party, or for which a Party may become legally and/or contractually obligated to pay or defend against, whether direct, indirect or consequential, whether based upon any alleged violation of the federal or the state constitution, any federal or state statute, rule, regulation, or any alleged violation of federal or state common law, whether commenced or threatened.

7.5. Performance of this Agreement is a governmental function. This Agreement does not, and is not intended to, impair, divest, delegate, or contravene any constitutional, statutory, and/or other legal right, privilege, power, obligation, duty, or immunity of the Parties. Nothing in this Agreement shall be construed as a waiver of governmental immunity.

8. **Insurance.** The Grantee shall acquire and maintain insurance or a program of self-insurance, which Grantee deems necessary, to protect it from liability related to construction and/or operation of the Project. OCPRC shall not obtain any insurance or provide any self-insurance for construction and/or operation of the Project.
9. **Audit and Access to Records.** OCPRC reserves the right to conduct programmatic and financial audits of the Project and may withhold payment until the audit is satisfactorily completed. Grantee shall maintain all pertinent records and evidence pertaining to this Agreement, including grant and any required matching funds, in accordance with generally accepted accounting principles and other procedures specified by OCPRC. OCPRC or any of its duly authorized representatives must have access, upon reasonable notice, to such books, records, documents, and other evidence for the purpose of inspection, audit, and copying. Grantee shall provide proper facilities for such access and inspection. All records must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by OCPRC.
10. **Assignability.** Grantee shall not assign or transfer any interest in this Agreement without prior written authorization of the OCPRC Director.
11. **Changes.** Any changes to this Agreement requested by Grantee shall be made in writing and sent to OCPRC contact listed in section 2 of this agreement. OCPRC may approve or deny such change, in its sole discretion. Changes requiring an amendment to this Agreement will be executed by OCPRC and Grantee in the same manner as this Agreement.
12. **Termination.**

12.1. Failure by Grantee to comply with any provision of this Agreement shall be a material breach of this Agreement. Upon breach of the Agreement by Grantee, OCPRC may, in addition to any other remedy provided by law:

12.1.1. Terminate this Agreement;

12.1.2. Withhold and/or cancel future payments to Grantee on any or all current grant projects under the Program until the violation is resolved to the satisfaction of OCRPC;

12.1.3. Withhold action on all pending and future grant applications submitted by Grantee under the Program;

12.1.4. Require repayment of grant funds already paid to Grantee under this Program; and/or

12.1.5. Require specific performance of the Agreement.

12.2. This Agreement may be terminated by OCPRC, upon thirty (30) calendar days written notice, due to budgetary reduction, other lack of funding, or upon request by Grantee. OCPRC may honor requests for just and equitable compensation to Grantee for all satisfactory and eligible work completed under this Agreement up and until the date of Agreement termination.

12.3. Upon the date of termination, all outstanding reports and documents are due to OCPRC and after the termination date OCPRC will no longer be liable to pay or reimburse Grantee any outstanding Grant Amounts.

OCPR Grant Programs

When the Oakland County Parks and Recreation (OCPR) millage passed by voters in November 2020, a portion of the funds was allocated for competitive grant programs that support local park improvement projects and non-motorized trails. The OCPR Grant Programs were created to assist local communities with planning, preliminary engineering/design, and construction costs directly related to park improvement and trail projects located in Oakland County.

$1.2 million is available for the OCPR Grant Programs for Fiscal Year 2022 (Oakland County Fiscal Year begins October 1). Currently, $750,000 has been allocated for the Trailways Grant Program, and $450,000 allocated for the Park Improvements Grant Program. The OCPR Commission reserves the ability to adjust the funding in each grant program, in its sole discretion.

$ 150,000.00

Total Budget must equal Total Project Funding listed above.

Project Details

Project Description

Describe the physical location of the proposed project and ownership of the property. *

The physical location of the proposed project is 390 S. Lafayette St. in downtown South Lyon. The proposed site is a 100-foot by 60-foot parcel located at the northwest corner of S. Lafayette St. and W. McHattie St. The City of South Lyon owns the property where the proposed project would take place. This parcel is a prominent corner in the downtown and serves as an entrance to Downtown South Lyon.

Describe the project design and why it was chosen. *

This project design for a park in downtown South Lyon was chosen after considerable input from various community groups. Previously, this parcel was identified in the City of South Lyon Master Plan as a site for mixed-use, infill development. However, once the City of South Lyon conducted soil borings at the site, a presence of peat and ground water was found, resulting in a location that would be extremely costly to develop. In light of this information, the City of South Lyon, South Lyon Parks and Recreation Commission, Cultural Arts Commission, and the Downtown Development Authority began to offer input regarding the establishment of a park on the site. Feedback was sought from each of these groups to obtain an overall vision for the development of the space. Once this was completed, it was included in the City of South Lyon's updated Parks and Recreation Master Plan, which was formally adopted by City Council on December 13, 2021.

Provide a relevant history/background information (including any environmental concerns). *

The City of South Lyon purchased the property in approximately 2014. The parcel contained a building that was in disrepair and was demolished shortly after the city acquired it. Since that time, it has sat vacant with no development. Given the poor soil conditions present at this location, a downtown park is the most feasible and productive option for this site.

Describe the community need for the project. *

Currently, there is no park in the DDA district. This project has been identified in the City of South Lyon's Parks and Recreation Master Plan as well as by the Downtown Development Authority. Studies have shown that parks in an urban setting provide essential environmental, aesthetic, economic, and recreation benefits. They enhance property values, increase municipal revenue, and attract homebuyers and workers to the area. This section of the downtown does not have the concentration of retail and restaurants present in the core downtown area at the intersection of Lake and Lafayette Streets. However, this park would provide an important development to the downtown. Additionally, this area will become an important area for the promotion of arts and cultural programs.

As demographics continue to shift throughout Oakland County, Michigan, and the United States, planning for an inclusionary and diverse community must be a priority so that all people may access parks that will enhance their overall quality of life. With this in mind, parks provide essential places for play cities across the country are striving to provide.

Projected Identification in Planning Documents

Project Identification in Planning Documents: *

Indicate where and how this project is addressed in relevant community planning documents, which may include: 5 Year Parks and Recreation Master Plan, Capital Improvement Plan, Park Master Plan, Community Master Plan, Complete Streets Plan, Trailway Master Plan, Pathway Plan, etc. Provide links to relevant online planning documents, or upload applicable pages in optional uploads section on the next tab.

This project is identified in the updated 5-year South Lyon Parks and Recreation Master Plan.

Project Alignment (Park Improvement)

Project Alignment with Most Recent OCPR County-Wide Needs Assessment *

Please select all categories in which your proposed project falls.

- [ ] Beaches
- [ ] Paved multi-use trails
- [ ] Unpaved multi-use trails
- [ ] Canoe & Kayak launch sites
- [x] Picnicking areas and pavilions
- [ ] Playgrounds
- [ ] Sledding Hills
- [x] Farmers Markets
- [ ] Waterparks & Waterslides
- [ ] Boating & fishing areas
- [ ] Splash pads & spray parks
- [ ] Outdoor amphitheaters
- [ ] Camping areas
- [ ] Mountain-biking trails
- [ ] Tennis courts
- [ ] Baseball & softball diamonds
- [ ] Basketball courts
- [ ] Disc golf
- [ ] Archery range
- [ ] Hunting areas
- [ ] Off-road vehicle areas
- [ ] Soccer & cricket fields
- [ ] Outdoor equestrian facilities/trails
- [ ] Pickleball courts
- [ ] Proposed project does not align with any facilities/activities on this list

Public Engagement

Public Engagement: *

Applicants must hold at least one public meeting (advertised in a manner that would satisfy the Michigan Open Meetings Act) to receive public input about the project. This can be a regularly scheduled board/commission meeting or a separate stakeholder or public input meeting. Include a summary of all relevant public engagement regarding the proposed project. If additional space is needed, upload a public engagement summary in the optional uploads section on the next tab.

During the City of South Lyon's Parks and Master Plan Update 2022-2028 process, there was ample opportunity for public input. Beginning August 24, 2021, a public input survey was published and available to residents until October 1, 2021. On September 8, there was a kickoff meeting with Parks and Recreation Commission to gather input. From September 8-30 the draft plan was developed. October 1 the draft plan was completed. October 1 – 15 provided a two-week window for the draft plan to be reviewed by city staff and the Parks and Recreation Commission. The final draft preparation occurred from October 15 – November 12, which incorporated feedback, addressed comments and questions from Staff and Commission review. November 13 the final draft plan was completed. November 13 – December 13 the draft plan was publicly available for review and comment for 30 days. On December 6, the public hearing for the plan was advertised one week prior to the December 13 South Lyon City Council meeting. On December 13, there was a public hearing held and a resolution adopted for the Parks and Recreation Master Plan by the South Lyon City Council.

Sustainability

Sustainability: *

Describe how the project considers sustainability in design and/or construction.

The City of South Lyon takes sustainability seriously. One of the core tenets of quality parks and recreation, as well as economic development, is implementing elements of sustainability in projects. In order to achieve sustainability objectives for this project, the following items will be considered for the park design and/or construction: native plantings to help reduce irrigation demands, low volume drip irrigation heads and drip irrigation to help reduce irrigation demands, LED lighting, recycled plastic benches and trash receptacles, and, depending on budget constraints, permeable pavers to help reduce storm runoff.

Long-Term Maintenance

Long-Term Maintenance: *

Describe how the project will be managed long-term, including any equipment or staffing needs and how they will be addressed.

The project will be managed long-term by the City of South Lyon's Department of Public Works staff as well as by the South Lyon Area Recreation Authority and the Downtown Development Authority. The following maintenance standards have been developed in order to ensure the park remains an asset to the community for many years. Mowing and detailing: mow to the maximum recommended height for the turf at least once a week during the growing season; edge sidewalks, fences, borders, and other appropriate areas as needed; install sod or seed as needed; weeds should cover no more than 10% of the grass surface; prune shrubs and trees as necessary; remove hazardous limbs and plants immediately upon discovery; remove dead trees that pose an immediate hazard upon discovery; remove or treat invasive plants twice annually; inspect irrigation systems at least once per month; initiate repairs of non-functioning systems within 24 hours of discovery during the dry season and within 10 days during the wet season; inspect fences, gates, and other landscape structures at least once annually. Complete safety related repairs immediately. Complete other repairs within 48 hours of discovery; water manually as necessary to establish new plantings; weed as necessary; prune shrubs and trees as necessary; plant and renovate areas as needed; place organic mulch as needed; remove dirt, debris, and sand from walkways.

ADA Compliance/Universal Accessibility

ADA Compliance/Universal Accessibility: *

Describe how the project will meet or exceed ADA guidelines. Describe any Universal Design principles that will be incorporated into the project. Include design drawings/specifications/etc. as well as relevant meeting notes or feedback documents as applicable in optional uploads section.

The City of South Lyon will strive to meet and exceed ADA guidelines. The city will attempt to implement ADA friendly picnic tables as well as providing access for all types of users. This park will also be intuitive, meaning users will be able to understand its intended use no matter experience, knowledge, or language skills. Further, it will be designed in a manner that will allow for all types of individuals to access the park, whether that is a family with a stroller, a person in a wheelchair, or someone out for a walk.

Proposed Project Dates

Anticipated Start Date: *

04/01/2022

Anticipated End Date: *

04/01/2025

Site Control

Site Control *

Entrance Fees

Entrance Fees *

Select whether or not the park or facility has any required entrance fees - annual, daily, non-resident, etc.

- (•) No Fees for park use
- ( ) Non-resident annual or daily fee
- ( ) Annual or daily fee for residents and non-residents

Ease of Access

Ease of Access *

Select the ways in which people can access the site.

- [ ] Automobile only
- [x] Automobile
- [x] Bicycle on-street
- [ ] Dedicated bike lane
- [x] Sidewalk
- [ ] Nearby bus stop (within 1/4 mile)

Final Report & Reimbursement

Final Report & Reimbursement *

The OCPR Trailways and Park Improvements Grant Programs are reimbursement grants. If awarded a grant, the community will have an opportunity to request reimbursement on a quarterly basis. A final report will need to be submitted and approved by OCPR grant management staff prior to the release of the final 20% of grant funds.

- [x] Please check here to acknowledge that this is a reimbursement grant and that a final report will be required to release the final 20% of grant funds.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 8

Department: Strategic Partnerships and Initiatives

From: Simon Rivers, Chief – Strategic Partnerships and Initiatives

Subject: 2026 Strategic Partnership Grant Amendment – City of Ferndale, Lennon Memorial Park Project

RECOMMENDED MOTION

Move to approve the Park Development Agreement between the County of Oakland and the City of Ferndale for Lennon Park Improvements, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

At the August 2026 Oakland County Parks and Recreation Commission meeting, Commissioners approved a Strategic Partnership Grant to the City of Ferndale in the amount of $100,000 for basketball courts and accessibility improvements at Lennon Memorial Park. The grant agreement was later approved by the Board of Commissioners.

The approved grant agreement awards $100,000 to the City of Ferndale and indicates $200,000 in guaranteed matching funds. Ferndale has committed $100,000 from the city's general fund, with another $100,000 in potential funding from a grant (in the application stage) to the Michigan Department of Natural Resources (DNR). However, the approved grant agreement does not make that distinction – the matching funds are listed as "$200,000." This amendment is to indicate that the only guaranteed matching funds for this project are $100,000 from the City of Ferndale's general fund, with a total project funding of $200,000.

If the City of Ferndale receives the DNR grant, the project will increase accessibility improvements with additional paved pathways to park amenities.

BACKGROUND

Lennon Memorial Park is a 4.2-acre park in the City of Ferndale. Lennon Park currently consists of two small soccer fields, a basketball court, children's play areas, picnic areas, and open space areas. This grant will provide improvements that will allow Ferndale residents to gather and recreate outdoors. Having a safe space that provides residents with opportunities for physical activity, the ability to explore nature, and an environment that encourages gathering with others outdoors will help residents form connections with others. The City of Ferndale identified these improvements as a priority in their 2022 Recreation Plan.

The project scope includes:

- Replacing the outdated basketball court and hoops
- Installation of accessible pathways
- Installation of other site amenities, including benches and picnic tables

Project Significance

The Lennon Memorial Park improvement project represents a strategic investment in equitable access to recreational facilities and public health in one of Oakland County's most underserved areas. In addition to serving City residents, the Ferndale Parks and Recreation Department has agreements with the City of Hazel Park and Charter Township of Royal Oak to also serve their residents. As the park is near the Ferndale's border with Hazel Park, Lennon Park provides basketball court access to Hazel Park residents who do not have basketball facilities in their city. Furthermore, the installation of pathways will increase accessibility and connectivity, transforming Lennon Park into a more welcoming community space for all ages and abilities.

This partnership exemplifies the goals of Mission 26, particularly the Recreation for All pillar, by prioritizing modernized amenities and connected greenways so distance, cost, ability or jurisdictional boundaries are no longer barriers to participation. Through this collaboration, Oakland County Parks strengthens its regional network of inclusive recreation facilities while reinforcing its role as a partner to local communities in advancing public value.

ATTACHMENTS

1. City of Ferndale Grant Agreement – Lennon Memorial Park Project

COUNTY OF OAKLAND—PARK DEVELOPMENT AGREEMENT
CITY OF FERNDALE – LENNON PARK IMPROVEMENTS

This Agreement is between the County of Oakland, by and through, its statutory agent, the Oakland County Parks and Recreation Commission ("OCPRC") and the City of Ferndale, 1938 Burdette Street, Ferndale, MI 48220 ("Grantee").

The purpose of this Agreement is to provide funding to Grantee in exchange for the work to be performed by Grantee for the below named project. The Parties agree to the terms and conditions set forth in this Agreement.

Project Title ("Project"): Lennon Park Improvement Project
Grant Amount ("Grant Amount"): One Hundred Thousand Dollars **($100,000)**
Grantee Match Amount ("Match Amount"): One Hundred Thousand Dollars **($100,000)**
Total Project Amount: Two Hundred Thousand Dollars **($200,000)**
Start Date: Effective Date—the date the last Party to this Agreement signs the Agreement
End Date: Three years after the date the last Party to this Agreement signs the Agreement

By signing this Agreement, the below individuals certify they are authorized to sign this Agreement on behalf of their organizations and the Parties will fulfill the terms of this Agreement, including any attached Exhibits.

Grantee:

_____

Name: Colleen O'Toole, City Manager Date
City of Ferndale

County of Oakland:

_____

Name: David T. Woodward, Chairperson Date
Oakland County Board of Commissioners

Oakland County Parks and Recreation Commission:

_____

Name: Ebony Bagley, Chairperson Date
Oakland County Parks and Recreation Commission

1. **Agreement Execution.** Grantee is required to sign the Agreement and return it to the contact person listed in Section 2 within sixty (60) calendar days of the date the Agreement is issued to Grantee. If not, the OCPRC Chairperson may cancel this Agreement and the monies allocated under this Agreement may be issued to another entity, in the County's sole discretion. This Agreement is not effective until both Parties sign the Agreement. The "Effective Date" shall be the date the last Party signs the Agreement.
2. **Contact Information.** This Agreement shall be administered on behalf of the County by the Planning & Resource Development Unit of the OCPRC. All notices, reports, documents, requests, actions, or other communications required between the OCPRC and Grantee shall be in writing and submitted to the contacts identified below. By written notice, the Parties may designate a different contact with correlating information.

   2.1. Grantee Contact

   2.1.1. Organization: City of Ferndale
   2.1.2. Name/Title: LaReina Wheeler, Parks and Recreation Director
   2.1.3. Address: 1938 Burdette Street, Ferndale, MI 48220
   2.1.4. Telephone Number: (248) 544-6767
   2.1.5. E-Mail Address: lwheeler@ferndalemi.org

   2.2. OCPRC Contact

   2.2.1. Name/Title: Simon Rivers, Chief of Strategic Partnerships and Initiatives
   2.2.2. Address: 2800 Watkins Lake Road, Waterford, MI 48328
   2.2.3. Telephone Number: 248-421-9033
   2.2.4. E-Mail Address: riverss@oakgov.com
3. **Project/Project Period.**

   3.1. Grantee shall complete the Project as set forth and described in Exhibit A within the Project Period. Exhibit A is incorporated into this Agreement.
   3.2. As defined in this Agreement, "Project Period" means the period of time beginning on the Effective Date and ending on the End Date listed on page 1 of this Agreement.
   3.3. Grantee shall complete the Project within the Project Period. Requests to extend the Project Period must be made in writing a minimum of thirty (30) calendar days before the Project Period ends. The OCPRC Planning & Resource Development Unit may extend the Project Period, in its sole discretion, and the extension must be codified in an amendment to this Agreement, which amendment shall be signed by the OCPRC Chairperson.
4. **Grantee Reporting Requirements:**

   4.1. Grantee shall complete and submit bi-annual progress reports, including a narrative report and summary of Project expenditures, in accordance with instructions provided by OCPRC.
   4.2. Within sixty (60) days of Project completion, Grantee shall submit final reporting documentation, including a final reimbursement request and narrative report, and copies of written materials and/or photographs of grant recognition signs in accordance with the instructions provided by OCPRC.
5. **Payments/Advances/Project Closeout.** The OCPRC shall make payments of the Grant Amount to Grantee as follows:

5.1. OCPRC shall pay the Grantee fifty percent (50%) of the Grant Amount listed on page 1 of this Agreement within thirty (30) calendar days of the Effective Date. The remaining fifty percent (50%) of the Grant Amount shall be paid by the County within thirty (30) calendar days of the date the Project is complete in accordance with Section 4. Any cost overruns incurred to complete the Project shall be the sole responsibility of the Grantee. To be eligible for payment, Grantee must submit a complete payment request to OCPRC on form(s) provided by OCPRC and have satisfied all progress reporting requirements due prior to the date of the payment request

5.2. Grantee shall submit documentation of all costs incurred, including the value of match and donations made to the Project.

5.3. OCPRC reserves the right to request additional information necessary to substantiate payments.

5.4. Grantee shall be a registered vendor with the County to receive payments. Registration can be accomplished by completing a vendor registration through the County Vendor Registration link on the County Web site. All grant funds will be paid by ACH or Check.

5.5. OCPRC shall not pay any portion of the Grant Amount to a Grantee contractor or subcontractors. Grant Amounts shall only be paid to Grantee.

5.6. Notwithstanding any other provision to the contrary, OCPRC shall hold back ten percent (10%) of the Grant Amount until Project Closeout set forth in this Section. Final payment of the remaining ten percent (10%) of the Grant Amount will be released upon OCPRC's approval of Grantee's Final Report and satisfactory Project completion as determined by OCPRC, in its sole discretion.

5.7. A determination of Project completion, which may include a site inspection and an audit, shall be made by OCPRC after Grantee has met any match obligations, satisfactorily completed the activities, and provided products and deliverables described in Exhibit A.

5.8. Grantee shall immediately refund to OCPRC any payments in excess of the costs allowed by this Agreement.

5.9. Upon issuance of final payment from the OCPRC, Grantee releases the County, OCPRC, and its employee and officers of all claims against the County/OCPRC arising under this Agreement. Unless otherwise provided in this Agreement or by State law, final payment under this Agreement shall not constitute a waiver of the County's claims against Grantee.

6. **<u>Grantee Assurances/Responsibilities.</u>**

6.1. Grantee shall comply with all applicable local, State, and federal laws, rules, ordinances, and regulations in the performance of this Agreement.

6.2. Grantee shall obtain all necessary permits and licenses for construction and maintenance of the Project. Grantee shall solely determine what permits or licenses are required for the Project, secure the needed permits or licenses, and remain in compliance with such permits or licenses. Grantee shall retain a copy of all permits or licenses and make them available to the County upon request.

6.3. Grantee shall have control of the Project area through fee simple title, lease, or other recorded interest, or have written permission from the owner of the Project area to complete Project activities.

6.4. Grantee shall abide by all State and federal threatened and endangered species

regulations when completing Project activities.

6.5. Grantee shall not discriminate against an employee or an applicant for employment in hiring, any terms and conditions of employment or matters related to employment regardless of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, marital status or any other reason, that is unrelated to the person's ability to perform the duties of a particular job or position, in accordance with applicable federal and state laws. Grantee further agrees that any subcontract shall contain non-discrimination provisions, which are not less stringent than this provision and binding upon any and all subcontractors. A breach of this covenant shall be regarded as a material breach of this Agreement.

6.6. Grantee shall require that no individual be denied access to the Project or Project activities on the basis of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, age, genetic information, height, weight, disability, veteran status, familial status, or marital status.

6.7. Grantee is solely responsible for all activities performed under this Agreement and for the construction and maintenance of the Project. Grantee shall be the sole point of contact regarding contractual matters for the Project, including payment of any and all charges resulting from the Project.

6.8. Grantee shall require all contractors and subcontractors constructing or performing the Project to comply with this Agreement.

6.9. Grantee shall ensure all contractors and subcontractors constructing and performing the Project are qualified to perform such work.

6.10. Grantee shall be solely responsible for the installation, operation, repair, and maintenance of the Project.

6.11. All records related to the Project must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by the County.

7. **<u>Liability.</u>**

7.1. The County/OCPRC is not liable or required to install, operate, repair, maintain, or contribute to the installation, operation, repair, or maintenance of the Project and any associated Project activities.

7.2. Grantee shall defend any Claim brought against either Party that involves the Project or associated Project activities or that involves title, ownership, or other specific rights of real property controlled by Grantee and relates to the Project.

7.3. Grantee is responsible for all Claims arising under or in any manner related to the Agreement, the activities authorized by the Agreement, or the use and occupancy of the Project.

7.4. As used in this Agreement, “Claims” mean any alleged losses, claims, complaints, demands for relief or damages, lawsuits, causes of action, proceedings, judgments, deficiencies, liabilities, penalties, litigation, costs, and expenses, including, but not limited to, reimbursement for reasonable attorney fees, witness fees, court costs, investigation expenses, litigation expenses, amounts paid in settlement, and/or other amounts or liabilities of any kind which are incurred by or asserted against a Party, or for which a Party may become legally and/or contractually obligated to pay or defend against, whether direct, indirect or consequential, whether based upon any alleged

violation of the federal or the state constitution, any federal or state statute, rule, regulation, or any alleged violation of federal or state common law, whether commenced or threatened.

7.5. Performance of this Agreement is a governmental function. This Agreement does not, and is not intended to, impair, divest, delegate, or contravene any constitutional, statutory, and/or other legal right, privilege, power, obligation, duty, or immunity of the Parties. Nothing in this Agreement shall be construed as a waiver of governmental immunity.

8. **Insurance.** The Grantee shall acquire and maintain insurance or a program of self-insurance, which Grantee deems necessary, to protect it from liability related to construction and/or operation of the Project. The County/OCPRC shall not obtain any insurance or provide any self-insurance for construction and/or operation of the Project.
9. **Audit and Access to Records.** OCPRC reserves the right to conduct programmatic and financial audits of the Project and may withhold payment until the audit is satisfactorily completed. Grantee shall maintain all pertinent records and evidence pertaining to this Agreement, including grant and any required matching funds, in accordance with generally accepted accounting principles and other procedures specified by OCPRC. OCPRC or any of its duly authorized representatives must have access, upon reasonable notice, to such books, records, documents, and other evidence for the purpose of inspection, audit, and copying. Grantee shall provide proper facilities for such access and inspection. All records must be maintained for a minimum of seven (7) years after the final payment has been issued to Grantee by OCPRC.
10. **Assignability.** Grantee shall not assign or transfer any interest in this Agreement without prior written authorization of OCPRC.
11. **Changes.** Any changes to this Agreement requested by Grantee shall be made in writing and sent to the contact listed in Section 2 of this Agreement. OCPRC may approve or deny such change, in its sole discretion. Any changes related to the grant amount, or any other financial component of this Agreement, will require an amendment to be executed in the same manner as this Agreement. Any changes not related to the grant amount, including modifications to project scope or deadline extensions, can be made by amendment at the discretion of and signed by the OCPRC Chairperson.
12. **Termination.**

12.1. Failure by Grantee to comply with any provision of this Agreement shall be a material breach of this Agreement. Upon breach of the Agreement by Grantee, OCPRC may, in addition to any other remedy provided by law:

12.1.1. Terminate this Agreement;

12.1.2. Withhold and/or cancel future payments to Grantee on any or all current grant projects until the violation is resolved to the satisfaction of OCPRC;

12.1.3. Withhold action on all pending and future grant applications submitted by Grantee; or

12.1.4. Require specific performance of the Agreement.

12.2. Upon the date of termination, all outstanding reports and documents are due to OCPRC and after the termination date OCPRC will no longer be liable to pay or reimburse Grantee any outstanding Grant Amounts.

13. **Governing Laws/Consent to Jurisdiction and Venue.** This Agreement shall be governed, interpreted, and enforced by the laws of the State of Michigan, excluding Michigan's conflict of law principles. Except as otherwise required by law or court rule, any action, complaint, lawsuit,

or other legal or equitable proceeding brought to enforce, interpret, or decide any Claim, as defined herein, arising under or related to this Agreement shall be brought in the Sixth Judicial Circuit Court of the State of Michigan, the 50th District of the State of Michigan, or the United States District Court for the Eastern District of Michigan, Southern Division, as dictated by the applicable jurisdiction of the court. Except as otherwise required by law or court rule, venue is proper in the courts set forth above. The choice of forum set forth above shall not be deemed to preclude the enforcement of any judgment obtained in such forum or taking action under this Agreement to enforce such judgment in any appropriate jurisdiction.

14. **Entire Contract.** This Agreement represents the entire agreement and understanding between the Parties. This Agreement supersedes all other prior oral or written understandings, communications, agreements, or contracts between the Parties regarding the subject matter of this Agreement. The language of this Contract shall be construed as a whole according to its fair meaning and not construed strictly for or against any Party.

Match Amount: $100,000

Total Project Funding (Requested grant amount + total match amount): $200,000

Project Schedule

Anticipated Start Date: 7/12/2027

Anticipated Completion Date: 7/31/2028

Project Description

Need Statement

What is the reason for doing this project? Answer may incorporate documented community and recreational needs, public engagement, condition of current recreation assets, environmental issues or accessibility and inclusion needs. Is the project in the communities 5-Year Parks and Recreation Master Plan or other planning document?

Lennon Memorial Park is one of Ferndale's largest neighborhood parks and serves neighborhood residents, Edison School, City recreation programming, and visitors from surrounding communities. While the City is currently seeking a $100,000 MDNR Recreation grant to replace the park's aging playground, limited project funding required several critical improvements to be removed or reduced from the original project scope, including renovation of the park's existing 26+-year-old full-size basketball court, site amenities such as benches and trash/recycling receptacles, and portions of the planned barrier-free pathway system connecting key park amenities. Oakland County's Strategic Partnership investment is critical to restoring these essential project components and completing the City’s vision for a more accessible, connected, and functional neighborhood park. If awarded, the MDNR grant and Oakland County partnership, together with the City's local investment, will leverage up to $300,000 in park improvements while maximizing the impact of each funding source. Renovating the basketball court will preserve one of the park's heavily used recreational amenities, while

expanded barrier-free pathways will provide ADA-compliant connections between the playground, basketball court, seating areas, drinking fountain, sidewalks, and other park features, ensuring visitors of all ages and abilities can fully experience the park. Lennon Memorial Park also serves as a recreation site for Edison School, which is located adjacent to the park and provides a center-based educationally therapeutic program for students from across Oakland County with support from Oakland Schools. The park also serves as the primary recreation site for the City's Summer Day Camp program, with approximately 50 children ages 5 to 7 utilizing the park daily for nine weeks each summer, significantly increasing the demand for safe, accessible, and functional recreation facilities. The existing playground has exceeded its useful life, lacks modern safety and accessibility features, and no longer meets the recreational needs of today's users. Likewise, the park's basketball court has exceeded its useful lifespan and is deteriorating, with a crumbling and uneven playing surface that prevents residents and program participants from using the court safely and makes a full renovation necessary. The proposed improvements directly implement the goals of the City of Ferndale's 5-Year Parks and Recreation Master Plan, which identifies accessibility, park connectivity, Universal Design, and recreation opportunities for users of all ages and abilities as community priorities. The Master Plan also identifies Lennon Memorial Park as one of the City's least accessible parks, receiving a Barrier Free score of 2 out of 5. Public engagement through City Council, the Parks and Recreation Commission, and the Ferndale Accessibility and Inclusion Advisory Commission confirmed strong community support for these improvements. Oakland County's partnership will allow the City to restore critical accessibility improvements and recreational amenities while leveraging additional state investment, resulting in a more inclusive, connected, and fully accessible community park.

Project Scope

What are the actions that will implement the project? Is the project designed to meet or exceed ADA guidelines or to incorporate Universal Design principles?

The project will renovate Lennon Memorial Park by replacing the aging playground with a modern play area designed for children of multiple ages and abilities while incorporating ADA and Universal Design (UD) principles throughout the park. Project improvements include accessible play features, barrier-free pathways, and universally designed site amenities. Funding from Oakland County will also allow the City to renovate the existing full-size basketball court, install additional park benches with companion seating, accessible trash and recycling receptacles, and barrier-free pathways that connect the playground, basketball court, seating areas, drinking fountain, sidewalks, and other park amenities. The installation of landscaping with native trees will improve the park's appearance while providing shade and environmental benefits. This collaborative funding approach allows each funding source to address complementary project elements while maximizing the overall public investment in Lennon Memorial Park. Oakland County funding will restore project elements that were removed or reduced because of funding limitations, including the basketball court renovation, expanded barrier-free pathways and accessible connections, and additional site amenities. If awarded, the City's pending MDNR Recreation grant will fund replacement of the playground and a portion of the ADA and UD improvements, with Oakland County funding also serving as the required local match. Should the MDNR application not be successful, the City remains committed to completing the basketball court renovation, accessibility improvements, and site amenities through Oakland County’s partnership and local City funding. The project has been designed to exceed ADA requirements and incorporate Universal Design principles creating a welcoming park experience for all visitors. Improvements include universally accessible routes connecting amenities, companion seating, an ADA-accessible drinking fountain with bottle filler, accessible site furnishings, appropriate clearances, and inclusive play opportunities for children with varying physical, sensory, and developmental

abilities. The project design was developed with input from the Ferndale Accessibility and Inclusion Advisory Commission, engineering consultants, Parks and Recreation Commission, and City staff to ensure accessibility, safety, functionality, and long-term sustainability were incorporated throughout the park.

Project Outcomes

What are the anticipated outcomes and who will benefit from the project? Will the project result in greater access to recreation for all residents and visitors? Are any environmental benefits expected? How will the project make the community more sustainable and resilient?

The project will transform Lennon Memorial Park into a safer, more accessible, and more inclusive neighborhood destination that better serves residents and visitors of all ages and abilities. The improvements are expected to increase overall park usage by creating a modern recreation space that encourages active lifestyles, outdoor play, social interaction, and year-round community engagement. The project will also expand opportunities for programming, school activities, community events, and informal neighborhood use while strengthening connections between the park and surrounding neighborhoods, supporting neighborhood revitalization, and encouraging residents to spend more time enjoying their local parks.Edison School, which directly borders the park, provides a center-based educationally therapeutic program for Oakland County students with emotional and behavioral disabilities. The school serves students and families from communities throughout the region, including Avondale, Bloomfield Hills, Birmingham, Clawson, Berkley, Ferndale, Oak Park, Madison Heights, Lamphere, Royal Oak, South Lyon, Walled Lake, and West Bloomfield, with support from Oakland Schools. The enhanced park will provide these students with greater opportunities for outdoor recreation, therapeutic learning, physical activity, social interaction, and emotional well-being in a safe, welcoming, and inclusive environment. The project will also support continued growth of the City's Summer Day Camp program, which serves approximately 50 children ages 5 to 7 at Edison School each summer, while creating new opportunities for future recreation programming and community partnerships. By improving accessibility throughout the park, the project will ensure that residents and visitors of all ages and abilities can participate more fully in recreation opportunities and community life. Environmental benefits include the addition of native trees that will provide shade, improve aesthetics, increase the urban tree canopy, help manage stormwater runoff, and contribute to carbon reduction. The installation of recycling receptacles and a drinking fountain with a bottle filler will encourage sustainable practices and reduce waste. Together, these improvements will create a more resilient public space that promotes environmental stewardship while reducing long-term maintenance needs. Oakland County's investment will create lasting community benefits by increasing participation in recreation, expanding community programming, improving accessibility and inclusion, supporting healthier lifestyles, strengthening partnerships with Edison School, and enhancing the overall quality of life for Ferndale residents and visitors from communities throughout Oakland County.

Acknowledgement

This is a partial reimbursement program. The community will receive fifty percent (50%) of the grant amount when the grant agreement is executed. The community can submit quarterly requests for additional funds throughout the grant period. Final payment of the remaining grant funds will be released upon the County’s approval of the grantee’s final report and satisfactory project completion as defined by the County.

☐ Please check here to acknowledge that this is a reimbursement grant and that a final report will be required to release the final grant funds.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 9

Department: Strategic Partnerships and Initiatives

From: Simon Rivers, Chief – Strategic Partnerships and Initiatives

Subject: Red Oaks Back Lot Purchase

RECOMMENDED MOTION

Move to approve the Purchase Agreement between the County of Oakland and Sharon L Oynskin in the amount of $40,000 for 0.33 acres located at 30526 Winthrop Drive, Madison Heights, MI 48071, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

The property at 30526 Winthrop Drive, is a back lot parcel that has been owned by Sharon L Oynskin for more than 20 years. It is a small private inholding on the west side of Red Oaks Nature Center. The property owner no longer uses the property and would like to downsize. The seller contacted staff earlier this year regarding selling the property to OCP to become part of Red Oaks. The addition of this inholding parcel would increase the opportunity for recreation on the west of the Nature Center and entrance drive along Hales Street.

PURCHASE AGREEMENT

THIS PURCHASE AGREEMENT ("Agreement") is made and entered by and between Sharon L Onyskin, 30526 Winthrop Dr., Madison Heights, MI 48071 ("Seller") and the COUNTY OF OAKLAND, by and through its statutory agent, the Oakland County Parks and Recreation Commission, a Constitutional and Municipal Corporation, 1200 N. Telegraph Road, Pontiac, Michigan 48341 ("Purchaser") for the purchase of real property and structures located thereon, located at in Madison Heights, MI 48071, which are specifically described in Exhibit A ("Premises"), including all rights, title, interests, and mineral rights or mineral royalty interest in the Premises. Exhibit A is fully incorporated into this Agreement. In consideration of the mutual covenants and agreements contained herein, receipt of which is acknowledged by the Parties, the Parties agree as follows:

1. PURCHASE PRICE/DEPOSIT/OTHER COSTS OR FEES.

1.1. Property Transferred. Seller shall sell and Purchaser shall purchase the Premises, subject to the terms and conditions of this Agreement.

1.2. Purchase Price. Subject to the adjustments and prorations provided for in this Agreement, the purchase price of the Premises is forty thousand dollars and no cents ($40,000.00) payable as set forth in this Agreement.

1.3. Effective Date. This Agreement shall be effective on the date it is fully executed by the Parties ("Effective Date").

1.4. Earnest Money Deposit. Within ten (10) calendar days after the Effective Date, Purchaser shall deposit with ATA National Title Group/Seaver Title, 42651 Woodward Avenue, Bloomfield Hills, MI, 48304 (the "Title Company") three thousand dollars and no cents ($3,000.00) ("Deposit"). The Deposit shall be held in a non-interest-bearing account. The Deposit shall be applied toward the purchase price at the time of Closing, if the sale is consummated, or shall be disbursed to Seller or Purchaser in accordance with the terms of this Agreement.

1.5. Payment of Balance of Purchase Price. This is a cash sale. At the time of Closing, after applying the Deposit, the balance of the purchase price minus any costs adjusted at Closing shall be wired by Purchaser to the Title Company.

1.6. Broker's Fee. The Sell and Purchaser did not engage/retain a broker for the purchase of the Premises.

2. TITLE CONVEYED.

2.1. Form of Conveyance. At Closing, Seller shall convey fee simple, marketable title to the Premises to Purchaser by warranty deed showing no exceptions, except for: (i) the "Permitted Exceptions" (as defined in Section 4); (ii) all zoning, building, and

other municipal ordinances, laws, regulations, and restrictions of public authorities; (iii) any matters that an accurate survey or personal inspection of the Premises would disclose; and (iv) all easements, covenants, conditions, restrictions, and other matters of record. The Premises shall include all tenements, hereditaments, privileges and appurtenances belonging or in any way appertaining to the Premises including the following: (1) all future land division rights (2) all right, title and interest of Seller in any street, road or avenue, open or proposed, in front of or adjoining the Premises, or any part thereof, to the centerline thereof, (3) all water, air, riparian and mineral rights originating on or strictly appurtenant to the Premises (4) the use of appurtenant easements, whether or not of record, strips and rights of way abutting, adjacent, contiguous or adjoining the Premises, and (5) all assignable licenses, franchises, rights and governmental or other permits, authorizations, consents and approvals, which are necessary to own and/or operate the Premises, to the extent that the same are legally assignable. Notwithstanding anything to the contrary contained herein or in any document executed in connection herewith, the Premises, its appurtenances, and the rights conveyed hereunder strictly exclude, and Purchaser hereby waives and relinquishes, any and all rights, claims, interests, or implied easements (including easements of necessity, access, light, air, view, drainage, or utility) in, over, under, across, or through the real property with the common address of 30526 Winthrop Drive, Madison Heights Michigan, Parcel Identification Number 25-12-254-008 (the "Seller's Retained Parcel"), which waiver and relinquishment shall survive Closing and the conveyance of title to the Premises to Purchaser. The Premises shall also include the rights of Seller under any express or implied guaranties, warranties, indemnifications and other rights, if any, which Seller may have against suppliers, laborers, materialmen, contractors or subcontractors arising out of or in connection with the installation, construction and maintenance of the improvements, fixtures and personal property on or about the Premises.

Purchaser agrees, covenants, and warrants for as long as Seller's primary residence is 30526 Winthrop Drive, Madison Heights, MI, that Purchaser shall not: (1) construct, install, or permit the placement of any automobile parking lot, driveway, or vehicle parking area of any kind upon the Premises; (2) install any asphalt, concrete, or paved walking paths upon the Premises; (3) construct or install any walking path, trail, or track of any composition whatsoever (including gravel, woodchips, or dirt) within fifty (50) feet from the property line of Seller's Retained Parcel.

2.2. Encumbrances. After Seller's executes this Agreement, Seller shall not lease, assign, or grant a security interest or other lien that would encumber the Premises after the Closing Date, unless approved in writing by Purchaser. Seller warrants that any lease, assignment, security interest or other lien that encumbers or would encumber the Premises shall be terminated prior to the Closing Date or satisfied out of the consideration transferred at the time of Closing.

3. TITLE INSURANCE.

3.1. Within ten (10) calendar days of the Effective Date, Purchaser shall obtain from the Title Company and deliver to Seller, a commitment for an ALTA Owner's Policy of Title Insurance in the amount of the total purchase price (the "Commitment"). The Commitment shall be issued by the Title Company, without standard exceptions, and shall bear a date later than the Effective Date, wherein the Title Company is to insure the title to the Premises in the condition required herein.

3.2. At the time of Closing, Purchaser shall order and have a Policy of Title Insurance issued (in the name of Purchaser) pursuant to the Commitment.

3.3. The cost of the Commitment and the Policy of Title Insurance shall be paid for by Purchaser

3.4. Seller agrees to execute a customary and standard form Owner's Affidavit at the Closing, in a form reasonably acceptable to Seller, to assist in the Purchaser's efforts to obtain coverage without standard exceptions. In addition to the representations and warranties contained in said Owner's Affidavit, Seller agrees to execute an affidavit indicating that to Seller's actual knowledge and without investigation: (1) Seller has not received written notice of any pending claims against Seller that would materially and adversely affect the sale of the Premises, and (2) there are no court orders prohibiting the sale of the Premises.

4. TITLE OBJECTIONS.

4.1. Purchaser shall have fifteen (15) calendar days after receipt of the Commitment to object to the condition of the title, based upon written opinion of Purchaser's attorney, that the title is not marketable or that the Premises are not suitable for Purchaser's intended use (collectively "Title Defects").

4.2. Upon written notice to Seller specifying any bona fide Title Defects that render title to the Premises unmarketable, Seller shall have thirty (30) calendar days from the date Seller is notified of such claimed defect(s) to notify Purchaser in writing whether Seller elects to (1) remedy such defects to Purchaser's reasonable satisfaction or (2) gain from the Title Company a substitute commitment for title insurance insuring, in a manner reasonably satisfactory to Purchaser, Purchaser's title against such Title Defects or (3) not cure the claimed Title Defects. Seller shall have no obligation to cure any Title Defect or incur any expense to do so.

4.3. If Seller fails to remedy the Title Defects or obtain a substitute commitment for title insurance within said period, Purchaser may do any of the following, at its sole option: (1) waive the claimed Title Defects and close subject to same or (2) terminate this Agreement and receive a full refund of the Deposit.

4.4. If Seller remedies the Title Defects or obtains a title policy within the time period and Purchaser does not elect to terminate this Agreement, Purchaser shall complete

the sale of the Premises within fifteen (15) calendar days of written notification thereof, but no sooner than the Closing Date specified herein.

4.5. For all purposes under this Agreement, all matters appearing on the Commitment and the New Survey which are not objected to or are waived or accepted by Purchaser shall be deemed "Permitted Exceptions."

5. INSPECTION PERIOD AND DUE DILIGENCE INVESTIGATIONS.

5.1. Inspection Period and Due Diligence Investigation/Examination. Purchaser shall have ninety (90) calendar days from the Effective Date ("Inspection Period") to conduct due diligence property investigations/examinations at its sole cost and expense, including but not limited to the following: (1) physical inspections, (2) testing of all aspects of the Premises, (3) above and below ground environmental assessments, (4) building inspections, (5) review of easements and restrictions of record, (6) investigation of availability and condition of utility/sewer services, (7) review of any existing service agreements, (8) review of any applicable zoning, building and use restriction, and (9) other examinations as Purchaser may deem necessary.

5.2. Survey. Purchaser shall, at its expense, obtain an ALTA/ACSM boundary survey of the Premises ("New Survey"). Purchaser shall have fifteen (15) calendar days from the receipt of the New Survey to determine if it matches the Premises described in Exhibit A. If in the written opinion of Purchaser's attorney, the New Survey does not match the Premises described in Exhibit A, Seller may, but shall have no obligation to, elect to remedy such defect at Seller's sole discretion. If Seller elects not to remedy the survey defect, or is unable to do so within thirty (30) calendar days of notice, Purchaser's sole and exclusive remedies shall be to either: (1) waive the defect and close subject to same with no reduction in the Purchase Price, or (2) terminate this Agreement, whereupon the Deposit shall be refunded to Purchaser, this Agreement shall become null and void, and neither party shall have any further liability hereunder. If Seller remedies the defects and Purchaser does not elect to terminate the Agreement, then Purchaser shall complete the sale of the Premises within fifteen (15) calendar days of written notification thereof, but no sooner than the Closing Date specified herein. If Purchaser terminates this Agreement pursuant to this Section, it shall receive a full refund of the Deposit.

5.3. Phase I Environmental Assessment.

5.3.1. Purchaser shall, at its sole expense, obtain a Phase I Environmental Site Assessment ("Phase 1") performed consistent with applicable ASTM standards.

5.3.2. If Purchaser is not satisfied with the results of the Phase I, for any reason, then Purchaser may do any of the following, at its sole option and cost: (1)

terminate this Agreement and receive a full refund of the Deposit or (2) commission a Phase II Environmental Site Assessment ("Phase II"). Purchaser shall notify Seller within fifteen (15) calendar days after receipt of the Phase I if it elects to terminate this Agreement for environmental reasons or perform a Phase II. Purchaser shall provide Seller with a copy of all environmental reports at no cost.

5.3.3. If Purchaser elects to perform a Phase II, then the Inspection Period shall automatically extend for another ninety (90) calendar days from the date Purchaser notified Seller of such election. If Purchaser is not satisfied with the results of the Phase II, for any reason, then Purchaser may terminate this Agreement and receive a full refund of the Deposit.

5.4. Purchaser may perform any other investigations during the Inspection Period that it, in its sole discretion, shall deem appropriate. Purchaser shall: (i) conduct all activities in a safe manner and in compliance with all applicable laws; (ii) not damage, materially alter, or harm the Premises or any of Seller's adjacent property; and (iii) immediately repair any disruption to the land and restore the Premises to its pre-investigation condition at Purchaser's sole cost (including, without limitation, backfilling any soil borings or test pits).

5.5. Seller shall, no later than five (5) calendar days after the Effective Date, turn over to Purchaser copies of any and all documents and information related to the Premises, including but not limited to, wetland reports, environmental reports, surveys, soil reports, easements, deed restrictions, past title commitments, that are currently in Seller's actual physical possession and control. Seller makes no representation or warranty as to the accuracy or completeness of any such documents. Should Seller delay in turning over the above-referenced documents/information, Purchaser's sole remedy shall be to request an extension of the Inspection Period, which extension shall not exceed a cumulative total of five (5) additional calendar days.

5.6. Nothing in this Agreement will prohibit the Parties from modifying or extending the Closing Date if such changes are necessary based upon the due diligence property investigations. Such modification or extension must be in writing and signed by both Parties. For Purchaser, a modification or extension under this Section shall be approved and executed by the Oakland County Board of Commissioners Chairperson.

5.7. Notwithstanding any other provision in this Agreement, at any time prior to the expiration of the Inspection Period, Purchaser may terminate this Agreement, in its sole discretion, by giving written notice to Seller that it is not satisfied with the condition of the Premises. If Purchaser terminates this Agreement pursuant to this Section, Purchaser shall be entitled to a full refund of the Deposit, whereupon this Agreement shall become null and void.

5.8. This Agreement is contingent upon the due diligence investigations and requirements set forth in this Section. Seven (7) calendar days after the expiration of the Inspection Period, this contingency shall be deemed fully satisfied and waived by Purchaser for all purposes.

6. CLOSING, AND CLOSING DOCUMENTS.

6.1. If Seller can convey fee simple, marketable title in accordance with this Agreement and provided Seller is not otherwise in material default of its obligations hereunder, then Purchaser shall complete the sale within fifteen (15) calendar days of the expiration of the Inspection Period ("Closing Date" or "Closing").

6.2. The Closing shall be held at the offices of the Title Company. The Title Company will prepare the necessary documents for signatures.

6.3. Seller and Purchaser shall each execute and deliver to the Title Company all standard and customary closing documents required to consummate this transaction in accordance with the Title Company's closing instructions, provided such documents are made available to the parties at least three (3) days prior to the Closing Date.

6.4. Seller shall sign and deliver at Closing, a statutory form warranty deed conveying fee simple, marketable title to the Premises inclusive of all minerals rights or royalties, if any, (pursuant to Michigan law) in the condition required by this Agreement and a Non-Foreign Persons Affidavit.

6.5. All financial encumbrances upon the Premises shall be paid and discharged by Seller prior to the Closing Date or shall be paid and discharged using the purchase money for the Premises.

6.6. Purchaser shall pay for the recording of the Warranty Deed, any notary fees, and any other fees/costs associated with the closing.

6.7. At the Closing, Seller will sign an Affidavit of No Liens on the Title Company's standard form, sufficient to permit the Title Company to delete the standard Schedule B exceptions.

6.8. At the Closing, Seller will sign a Certificate of Accuracy, regarding the Representations made by Seller in Section 12.

6.9. Seller and Purchaser will sign and/or prepare any other documents reasonably necessary to complete the sale and transfer of the Premises.

6.10. Seller will provide to Purchaser an accounting of all rents and fees, if any, that pertain to the Premises and were paid to Seller for periods that extend beyond the Closing Date. Those rents that are for periods that extend beyond the Closing Date shall be prorated back to the Closing Date and Seller shall tender to Purchaser a

cashiers check in the amount of those prorated rents, as well as for any other adjustments or charges as reflected by the closing statement.

6.11. Property taxes for the Premises shall be prorated on a due date basis and assumed to be prepaid. As such, Seller shall be responsible for all current property taxes attributable to the period on and prior to the Closing Date, any delinquent property taxes prior to Closing, unpaid installments of any current special assessments prior to Closing, or IRS liens on the Premises prior to Closing. Seller shall be reimbursed at Closing for any property taxes it has paid attributable to the period after the Closing Date.

7. POSSESSION AND POST-CLOSING WORK. Purchaser shall have possession of the Premises on the Closing Date. Following Closing, Purchaser shall perform the following work at its sole cost and expense:

(a) Relocation of Shed. Purchaser shall remove the existing 10' x 10' storage shed currently located on the Premises and reinstall the same onto the 10' x 10' concrete pad located on Seller's adjacent residential property. Purchaser shall complete all work required under this subsection in a professional, workmanlike manner within sixty (60) calendar days following the Closing Date, weather permitting, or some other period of time as the parties may agree.

(b) Relocation of Privacy Fence. Purchaser shall remove the existing privacy fence currently located along the approximate Northern property line of the Premises and reinstall the same along the boundary line separating the Premises being conveyed to Purchaser and Seller's adjacent residential property. Purchaser shall ensure the fence is structurally sound and aligned properly upon reinstallation. All work associated with removing and reinstalling the privacy fence shall be completed within sixty (60) calendar days following the Closing Date, weather permitting, or some other period of time as the parties may agree.

8. RIGHT OF ENTRY AND ACCESS.

8.1. During this Agreement, Purchaser and its employees, contractors, and agents shall have the right to enter and access the Premises at reasonable times for the purpose of surveying, testing, performing environmental impact studies, site planning, and other inspections or testing Purchaser deems necessary or desirable to determine if the Premises are suitable for Purchaser's use.

8.2. All inspections or testing shall be coordinated with Seller.

8.3. In the event that this sale does not take place, Purchaser, at its own expense, shall restore the Premises to substantially the same condition that existed on the date this Agreement was executed; to the extent such restoration is necessary due to Purchaser's actions.

9. DEFAULT OF SELLER. In the event Seller shall materially default in the performance of its obligations herein, Purchaser shall have the right, as its sole and exclusive remedies and in its sole discretion, elect to proceed under either 9.1 or 9.2, but not both.

9.1. Purchaser may specifically enforce this Agreement and require specific performance of this Agreement by judicial decree; or

9.2. Purchaser may terminate this Agreement and receive a full refund of the Deposit.

DEFAULT OF PURCHASER. In the event Purchaser shall materially default in the performance of its obligations herein to close on the purchase of the Premises, Seller may declare that Purchaser has forfeited all rights hereunder and retain the Deposit as liquidated damages. The retention of the deposit by Seller shall cancel this Agreement and be in full and final satisfaction of any and all claims that Seller may bring against Purchaser.

10. RISK OF LOSS. No risk of loss shall pass to Purchaser prior to the Closing Date. Except as otherwise provided in this Agreement, Purchaser acknowledges the following: (1) Seller has made no representations or warranties with respect to the Premises; (2) the inspection rights set forth in this Agreement are sufficient to enable Purchaser to inspect the Premises to determine if they are satisfactory to Purchaser; and (3) Purchaser is purchasing the Premises in its strictly 'AS IS, WHERE IS' condition, with all faults, as of the Closing Date. Seller explicitly disclaims, and Purchaser hereby waives, any and all representations or warranties of any kind, express or implied, oral or written, concerning the Premises, including, without limitation, any warranties regarding the physical, environmental, or geological condition of the land, the presence or absence of hazardous substances, or the suitability, adequacy, or fitness of the Premises for any particular purpose or intended use by Purchaser (including use as a public park or nature preserve). Purchaser relies entirely on its own due diligence investigations and assumes all risks associated with the utility, condition, and development of the Premises.

11. WARRANTIES BY SELLER. Seller warrants to Purchaser and certifies the following by execution of this Agreement:

11.1. Seller has full authority to enter into and perform this Agreement in accordance with its conditions, without breaching or defaulting any obligation or commitment that Seller has to any third parties; Seller will provide Purchaser with any reasonably necessary resolutions, waivers and consents or other documents that verify Seller has the requisite authority;

11.2. Seller is the fee simple owner of the Premises and will discharge any liens or other encumbrances prior to the Closing Date;

11.3. To Seller's knowledge, the legal description set forth in Exhibit A is an accurate description of the Premises and does not include any adjacent or contiguous land owned by Seller or any third party;

11.4. To Seller's knowledge, there are no leases, rights of first refusal, contracts, or other agreements of any kind with respect to the Premises, which would impair Purchaser's right to receive fee title absolute;

11.5. To Seller's knowledge, there are no lawsuits, actions, or proceedings pending or threatened by any party, including governmental authorities or agencies, against or involving the Premises which would affect Seller's ability to convey the Premises;

11.6. Seller has no notice or knowledge of any of the following:

11.6.1. any planned or commenced public improvements that might result in special assessments or otherwise directly and materially affect the Premises;

11.6.2. any government agency or court order requiring corrections of any existing conditions; and

11.6.3. any request by an insurer or a mortgagee of the Premises requiring correction of any existing conditions; and

11.7. Seller has not used the Premises for the purpose of disposing, refining, generating, manufacturing, producing, storing, handling, treating, transferring, processing or transporting Hazardous Materials. As used in this Agreement, the term "Hazardous Materials" shall mean any hazardous or toxic substances, wastes or materials, or flammable explosives, including, without limitation, those described in the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, the Hazardous Materials Transportation Act, as amended, the Resource Conservation and Recovery Act, Parts 20, 211 and 213 of the Natural Resources Environmental Protection Act, and all rules, regulations and policies promulgated thereto (collectively, the "Environmental Laws").

12. WARRANTIES BY THE PURCHASER. Purchaser warrants the following to Seller:

12.1. Purchaser is a Michigan Constitutional and Municipal Corporation; and

12.2. Purchaser has full authority and funding to enter into and perform this Agreement in accordance with its conditions.

13. SURVIVAL OF THE WARRANTIES. The warranties of the Parties contained in this Agreement which are not otherwise merged into the deed shall survive for one (1) after the Closing Date.

14. LIABILITY. Seller shall indemnify, hold harmless, and defend Purchaser from any actual third-party liabilities, proven property damage, or bodily injury claims directly caused by the acts or omissions of Seller on the Premises prior to the Closing Date, except to the extent arising out of the acts of Purchaser or its employees, contractors, or agent(s). Seller shall be responsible for paying any and all judgments, damages awarded, costs and expenses

(including attorney fees and court costs) and any other liabilities that result from any such actual losses, claims, suits, causes of action, litigation, or other demands for damages of any kind directly caused by the acts or omissions of Seller on the Premises prior to the Closing Date.

15. CONDEMNATION/EMINENT DOMAIN.

15.1. In the event that all or any portion of the Premises shall be taken by the exercise of eminent domain or condemnation proceedings prior to the Closing Date, Purchaser may, at its option, terminate this Agreement by giving written notice to Seller. If Purchaser elects to terminate this Agreement as a result of a condemnation proceeding or exercise of eminent domain, then Purchaser shall receive a full refund of the Deposit.

15.2. If Purchaser does not elect to terminate this Agreement in the event of the exercise of eminent domain or condemnation, Purchaser shall accept title to the Premises without any reduction of the purchase price and Seller shall assign to Purchaser at Closing all of Seller's right, title, and interest in and to any resulting condemnation award.

16. NOTICE. Any notice, request, demand, consent, approval or other communication given hereunder shall be in writing and shall be sent by registered or certified mail, return receipt requested, addressed to the other Party at its address as set forth below:

16.1. Any Party may change its address for notice by providing notice as required by this Section. Any notice by either Party shall be sufficient if signed on behalf of said Party by any elected or appointed official thereof.

17. TIME OF THE ESSENCE. Time is of the essence for this Agreement.

18. COMPLIANCE WITH LAWS. The Parties shall comply with all federal, state, and local laws, statutes, ordinances, and regulations, applicable to their activities under this Agreement.

19. NO IMPLIED WAIVER. Absent a written waiver, no act, failure to act, or delay to act by a Party to pursue or enforce any right or remedy under this Agreement shall constitute a waiver of those rights with regard to any existing or subsequent breach of this Agreement. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement. No waiver by either Party shall subsequently affect its right to require strict performance of this Agreement.

20. SEVERABILITY. If a court of competent jurisdiction finds a term, condition, or provision of this Agreement to be illegal or invalid, then the term, condition, or provision shall be deemed severed from this Agreement. All other terms, conditions, and provisions of this Agreement shall remain in full force and effect.

21. CAPTIONS. The section and subsection numbers, captions, and any index to such sections and subsections contained in this Agreement are intended for the convenience of the reader and are not intended to have any substantive meaning and shall not be interpreted to limit or modify any substantive provisions of this Agreement. Any use of the singular or plural number, any reference to the male, female, or neuter genders, and any possessive or nonpossessive use in this Agreement shall be deemed the appropriate plurality, gender or possession as the context requires.

22. AGREEMENT MODIFICATIONS OR AMENDMENTS. Any modifications, amendments, rescissions, waivers, or releases to this Agreement must be in writing and signed by both Parties.

23. GOVERNING LAWS/CONSENT TO JURISDICTION AND VENUE. This Agreement shall be governed, interpreted, and enforced by the laws of the State of Michigan. Except as otherwise required by law or court rule, any action brought to enforce, interpret, or decide any claim arising under or related to this Agreement shall be brought in the Sixth Judicial Circuit Court of the State of Michigan, the 50th District Court of the State of Michigan, or the United States District Court for the Eastern District of Michigan, Southern Division, as dictated by the applicable jurisdiction of the court. Except as otherwise required by law or court rule, venue is proper in the courts set forth above. The choice of forum set forth above shall not be deemed to preclude the enforcement of any judgment obtained in such forum or taking action under this Agreement to enforce such judgment in any appropriate jurisdiction.

24. COUNTERPARTS. This Agreement may be executed in one or more counterpart copies, all of which together shall constitute and be deemed an original and shall constitute one and the same instrument binding on the Parties.

25. ENTIRE AGREEMENT. This document represents the entire agreement and understanding between the Parties. This Agreement supersedes all other prior oral or written understandings, communications, agreements or contracts between the Parties. The language of this Agreement shall be construed as a whole according to its fair meaning and not construed strictly for or against any Party.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 10

Department: Administration

From: Thomas Hughes, Interim Manager – Park & Enterprise Operations

Subject: Springfield Oaks Residential Lease – Terry Foshia

RECOMMENDED MOTION

Move to approve the Residential Lease Agreement between the County of Oakland and Terry Foshia for property located at 12080 Clark Road, Davisburg, MI 48350, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In October 2026, the Oakland County Parks and Recreation Commission approved the Residential Property Lease Policy. The purpose of the policy is to set forth procedures and guidelines to manage residential properties located on Oakland County Parks property. The Oakland County Parks and Recreation Director shall oversee the implementation and interpretation of this policy. Under the new policy, residential lease rates will be adjusted to reflect current fair market value. To avoid a substantial and immediate financial impact on existing long-term tenants, any required rate increases will be phased in over a 5-year period.

The property under consideration is located within Springfield Oaks County Park at 12080 Clark Rd., Davisburg, MI 48350. The residence is 1,344 square feet, built in 1972, with 3 bedrooms, 2 baths, a 2-car garage, and a basement. The house has been occupied by Terry Foshia for several years and has been well-maintained.

We are requesting to move forward with a 5-year lease for Terry Foshia, incorporating the phased market-rate adjustment schedule. The lease includes the standard terms for early termination by either party as outlined in the Residential Property Lease Policy.

The attached lease agreement has been prepared and reviewed by Oakland County Corporation Counsel.

ATTACHMENTS

1. Residential Lease with Aerial Map – Foshia – Springfield Oaks

RESIDENTIAL LEASE AGREEMENT

NOTICE: MICHIGAN LAW ESTABLISHES RIGHTS AND OBLIGATIONS FOR PARTIES TO RENTAL AGREEMENTS. THIS AGREEMENT IS REQUIRED TO COMPLY WITH THE TRUTH IN RENTING ACT. IF YOU HAVE A QUESTION ABOUT THE INTERPRETATION OR LEGALITY OF A PROVISION OF THIS AGREEMENT, YOU MAY WANT TO SEEK ASSISTANCE FROM A LAWYER OR OTHER QUALIFIED PERSON.

This Lease Agreement ("Lease") is entered into between the County of Oakland, 1200 North Telegraph, Pontiac, MI 48341 ("Landlord"), by the through its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and **Terry Foshia, 12080 Clark Road, Davisburg, MI 48350** ("Tenant") according to the terms and conditions set forth below.

1. Premises. Tenant leases from landlord the real property located at **, 12080 Clark Road, Davisburg, MI 48350** ("Premises"), together with any furnishings, fixtures, personal property, and appurtenances provided by Landlord for Tenant's use.

2. Term. The term of this Lease shall be for five (5) years, beginning on **January 1, 2027** and ending on **December 31, 2031**. References in this Lease to the term of the Lease shall include any renewal term(s). Tenant shall receive possession of the Premises upon execution of the Lease.

3. Tenant Monetary Obligations.

   3.1. Tenant shall pay Landlord the following rent on or before the first day of each month during the term of this Lease:

January 1, 2027 – December 31, 2027	**$ 1131.00**
January 1, 2028 – December 31, 2028	**$ 1226.00**
January 1, 2029 – December 31, 2029	**$ 1329.00**
January 1, 2030 – December 31, 2030	**$ 1440.00**
January 1, 2031 – December 31, 2031	**$ 1561.00**

   3.2. The rent shall be paid by check or money order made payable to the "County of Oakland" and sent to the following address: Oakland County Parks and Recreation, 2800 Watkins Lake Road, Waterford, Michigan 48328 or another address designated by Landlord in writing.

   3.3. Tenant shall pay the first monthly installment when Tenant executes this Lease. The first monthly installment shall be pro-rated for such month, if the Lease is executed on another day than the first day of the month.

   3.4. Tenant shall pay Landlord a late fee of $25 for each monthly installment not received by Landlord within five days of its due date. This increase shall be considered additional rent and shall compensate Landlord for costs incurred because of late payments. Landlord's right to collect this additional rent shall be in addition to Landlord's right to take action under other provisions of this Lease for Tenant's default in paying rent. Tenant shall pay all additional rent to Landlord promptly after the due date of the delinquent installment. All rent paid

after the due date and payments to cover checks that have been returned for insufficient funds must be paid at the place designated for payment, by cashier's check, certified check, or money order.

3.5. During the term of this Lease, Tenant shall obtain and maintain comprehensive personal liability or tenant's form insurance coverage in the minimum amount of One Hundred Thousand Dollars ($100,000.00). Tenant shall also provide the Landlord with a certificate of insurance coverage listing the County of Oakland and its employees, officers, and elected and appointed officials as additional insureds.

3.6. A tenant who has a reasonable apprehension of present danger to him or her or his or her child from domestic violence, sexual assault, or stalking may have special statutory rights to seek a release of rental obligation under MCL 554.601 b.

4. Use of Premises.

4.1. Tenant shall use the Premises for private residential purposes only. No persons other than the following listed person(s) shall occupy the Premises for more than fourteen (14) days during the term of this Lease without the prior written approval of Landlord:

Martha Foshia

Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.2. Tenant shall not do any of the following or allow another person to do any of the following:

4.2.1 Create any excessive noise or public nuisance;
4.2.2 Do anything to the Premises or its surroundings that may be hazardous or that will cause Landlord's insurance to be cancelled or premiums to increase;
4.2.3 Deface or damage any part of the Premises;
4.2.4 Change the locks or install any additional locks or bolts without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.5 Place a waterbed or other heavy article on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.6 Install any equipment or appliances that, in Landlord's opinion, would cause any unsafe conditions on or around the Premises;
4.2.7 Accumulate refuse on or around the Premises that might pose a health hazard to Tenant or to the surrounding properties;
4.2.8 Permit any flammable liquids or explosives to be kept on or around the Premises; and
4.2.9 Bring any animals on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.3 Tenant Duties.

4.3.1 To the extent permitted by law, Tenant shall secure and protect the Park

Property and facilities therein, especially during "Park Closed" hours. This shall include contacting and coordinating with police, fire or other agencies as may be required and the preparation of an Unusual Incident Report as required by Landlord.

4.3.2 Tenant shall arrange for emergency repair and maintenance services for Park Property and facilities, as needed.

4.3.3 Tenant shall make reports to the Park Supervisor or other entity as may be required by Landlord.

4.3.4 Landlord shall install smoke-detection devices for the Premises along with batteries at the time of installation. Tenant must regularly test the devices to ensure that they are operational and if not notify Landlord immediately. Tenants must never remove batteries from smoke-detection devices, except when necessary to replace the batteries.

4.3.5 Tenant shall be responsible for performing routine household maintenance necessary to maintain the Premises, including:

- Adding salt to the water softener, when applicable
- Replacing water filters for sinks, refrigerators, or other Landlord provided potable water systems
- Replacing HVAC furnace filters at recommended intervals.
- Replacing interior and exterior light bulbs serving the Premises.
- Replacing smoke detector and carbon monoxide detector batteries, unless equipped with sealed 10-year batteries.
- Maintaining sidewalks, porches, patios, and other residential areas in a clean and orderly condition.

4.3.6 The performance of "tenant duties," set forth in the Lease does not and is not intended to create an employee/employer relationship between Landlord and Tenant.

5. Use of Illegal Substances. Tenant shall not violate or knowingly allow another person to violate federal, state, or local laws regarding the use of controlled substances or the use of alcohol by minors in or around the Premises. When aware of a violation of this section, Landlord will file a formal police report.

6. Condition of Premises.

6.1. Except as otherwise expressly stated herein or in an Amendment to this Lease, Tenant acknowledges that no representations were made by Landlord about the condition of the Premises or promises to alter or to improve the Premises before or during the term of the Lease.

6.2. Throughout the term of the Lease, Tenant shall keep the Premises in a good and clean condition and shall allow no waste of the Premises or any utilities.

6.3. Except for normal wear and tear, Tenants shall return the Premises to Landlord in the same condition as they were upon commencement of this Lease, including cleanliness.

7. Utilities and Services for Premises. Tenant is responsible for the costs of utilities and services for the Premises and for establishing accounts, if they are not already established for the term of this Lease including but not limited to the following: (a) garbage removal; (b) water and sewer; (c) gas; (d) electricity; (e) ice removal, including salting the driveway and any walks surrounding the Premises or on the Premises; (f) telephones; (g) cable television; (h) Internet; and (i) cleaning for the interior of the building located on the Premises. All accounts for utilities and services shall be in the name of Tenant.

8. Maintenance, Repairs, and Damage to Premises.

8.1. Landlord shall provide snow removal services for the driveway on the Premises, including plowing and de-icing as follows: Snow removal will generally occur only when snow removal operations are being conducted for parking lots and roadways. Public park facilities, including parking lots, roads, and other public access areas, shall always receive priority over residential properties. Landlord is not obligated to dispatch equipment solely for snow removal at the Premises.

8.2. Landlord shall provide general lawn mowing for the Premises and line trimming services on a schedule consistent with OCPRC maintenance operations. Mowing frequency shall be determined solely by Landlord based on operational needs and weather conditions.

8.3. Tenant shall be responsible for clearing snow and applying de-icing materials to sidewalks, entry walkways, porch areas, and all door access points serving the Premises.

8.4. Tenant shall provide routine landscape maintenance of the Premises, including, but not limited to, weeding, maintaining landscape beds, replenishing mulch as needed, applying fertilizer at Tenant's discretion, trimming small shrubs and bushes, and performing other routine cosmetic landscape upkeep necessary to maintain the Premises.

8.5. Landlord shall provide repair and maintenance for the Premises and its parking lot or parking area, including but not limited to, building infrastructure, HVAC system, utility infrastructure, plumbing and electrical system. Tenant shall notify Landlord, in a timely manner and without delay, when there is a need for repairs to the Premises.

8.6. Except for normal wear and tear to the Premises, Tenant shall be liable for any damage to the Premises or other property of Landlord that is caused by the acts or omissions of Tenant or Tenant’s guests, including but not limited to broken glass and lost or broken keys. If damage occurs, Landlord or its agents shall make the necessary repairs and Tenant shall reimburse Landlord for all costs associated with the repairs. Such reimbursement shall be paid by Tenant within thirty (30) days of receiving an invoice from Landlord. If Landlord makes a claim and receives payment under its property insurance for damage to the Premises, then

Tenant shall only be liable to Landlord for the amount of the deductible for the property insurance for the Premises. Landlord shall send an invoice to Tenant for the amount of the deductible and Tenant shall pay this amount within thirty (30) days of receiving the invoice.

8.7. To the extent permitted by law, Landlord and Landlord's agents shall not be liable for any damage to property or loss of property that is caused by theft or casualty on the Premises. Landlord recommends that Tenant obtain insurance to protect Tenant's personal property against such loss or damage.

9. Decorations and Alterations to Premises. Tenant shall not alter or decorate the Premises, including but not limited to, removing any furnishings Landlord provides to Tenant, driving nails into the woodwork, painting or using any adhesive material on the walls without prior written approval from Landlord. Landlord's approval shall be given by the OCPRC Director or his or her designee. Landlord's approval of a particular decoration or alteration shall not be deemed consent to future decorations or alterations.

10. Assignment and Sublease of Premises. Tenant shall not assign or sublease the Premises or any portion thereof.

11. Access to the Premises. Tenant shall allow Landlord and Landlord's agents reasonable access to the Premises to inspect, repair, alter, or improve the Premises. Landlord and Landlord's agents shall have immediate access to the Premises in case of an emergency or if an emergency repair to the Premises is required. Tenant shall also allow insurance carriers and representatives, fire department inspectors, police, or local health authorities to inspect the Premises. Tenant shall allow Landlord or Landlord's agents to show the Premises to prospective tenants or purchasers at reasonable times during the sixty (60) days prior to the expiration of this Lease.

12. Vacation or Abandonment of the Premises. If Tenant removes substantially all Tenant's property from the Premises for a period of thirty (30) days, Landlord may immediately enter and redecorate the Premises without abatement of rent and proceed as if Tenant terminated this Lease. These acts by Landlord shall not affect Tenant's obligations under this Lease. If Tenant abandons the Premises before the Lease expires, all rent for the remainder of the term of the Lease shall immediately become due.

13. Damage or Destruction of the Premises. If a casualty partially destroys the Premises but they can be restored to a tenantable condition within thirty (30) days, Landlord shall repair the Premises with reasonable dispatch; however, Landlord's obligation to repair the Premises shall be limited to the amount of insurance proceeds actually received by Landlord. Tenant's obligation to pay rent shall be suspended while the Premises are untenantable. If a casualty damages the Premises to the extent that they cannot be restored to a habitable condition within thirty (30) days, either Party may terminate this Lease by giving the other party written notice within fifteen (15) days after the casualty. Landlord shall not be liable for any reasonable delay or for providing housing for Tenant during repairs.

14. Termination of Lease.

14.1. Tenant may terminate this Lease for any reason upon thirty (30) days written notice to Landlord.

14.2. Landlord may terminate this Lease for any reason upon ninety (90) days written notice to Tenant.

14.3. Upon termination of this Lease, Tenant shall surrender the Premises to Landlord in the same condition they were upon commencement of Lease, normal wear and tear excepted. Upon termination of this Lease, Tenant shall also notify Landlord of the move-out date, return all keys to the Premises to Landlord, and transfer all utility and service accounts into the name of the "County of Oakland."

15. Default of Lease and Landlord's Remedies.

16.1 If Tenant defaults on any obligations under this Lease or misrepresents any information in the application for this lease, Landlord may, on written notice to Tenant, terminate the Lease and enter the Premises as permitted by law; Tenant and any other occupants shall surrender the Premises to Landlord by the date stated in the notice. If Landlord terminates the Lease, Landlord may recover Landlord's expenses for enforcing Landlord's rights under the Lease and applicable law, including court costs and attorney fees, from Tenant, as permitted by statute; and rent for the rest of the term of the Lease shall immediately become due. Tenant may not be liable for the total accelerated amount because of Landlord's obligation to minimize damages, and either party may ask a court to determine the actual amount owed, if any. If Tenant fails to pay rent or any other sums when due to Landlord, Landlord serves a notice of default on Tenant as required by law, and Tenant fails to remit the amounts due before the notice period expires, the amount of court costs and attorney fees incurred by Landlord in enforcing Landlord's remedies and allowed by statute shall be added to the amount of the arrearage.

16.2 It is a violation of this Lease if Tenant, a member of Tenant's household, or any other person under Tenant's control unlawfully manufactures, delivers, possesses with intent to deliver, or possesses a controlled substance as defined by Michigan law anywhere on the Premises or surrounding the Premises. Pursuant to Michigan law, if Tenant violates this provision Landlord may serve a written demand for possession for termination of this Lease giving Tenant 24 hours' notice of the Lease termination and demand for possession. Tenant acknowledges that an order of eviction/writ of restitution may be issued by the court immediately after the entry of a judgment for possession. Tenant's initials:_____.

16. Hold Over. Tenant may, with Landlord's permission, continue to occupy the Premises after the term of this Lease expires without renewing this Lease or signing another Lease for the Premises. Such tenancy shall be on a month-to-month basis and subject to the provisions of this Lease except that the monthly rent shall increase by ten (10) percent from the rent for the last month of the term of the Lease, and Landlord may increase rent on thirty (30) days' notice to Tenant.

17. Notices. Any notices under this Lease shall be in writing and delivered to the recipient personally or by first class mail fully prepaid at the following locations:

Tenant: **Terry Foshia**

12080 Clark Road
Davisburg, MI 48350

Landlord: Oakland County Department of
Facilities Management Property Management
One Public Works Drive, Bldg. 95W
Waterford, MI 48328

and

Oakland County Parks and Recreation
Director
2800 Watkins Lake Road, Bldg. 97W
Waterford, MI 48328

Unless otherwise required by law, the date of service shall be the date of hand delivery or the mailing date.

18. Modifications. No modifications of this Lease shall be binding unless they are in writing and signed by Landlord and Tenant.

19. Whole Agreement. This Lease sets forth the entire agreement between Landlord and Tenant. There are no verbal or written agreements that are not contained in this Lease between the parties.

20. Binding Effect. This Lease shall bind and benefit the parties to the Lease and their heirs, personal representatives, successors, and permitted assigns.

21. Severability. If any provision of this Lease is invalid, unlawful, or unenforceable to any extent, the rest of the Lease and the application of the provision to the persons or circumstances other than those for which it is invalid, unlawful, or unenforceable are not affected.

22. Time of the Essence. Time shall be deemed to be of the essence in the performance of this Lease.

23. Effective Date. This Lease is effective on the date stated in Section 2.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 11

Department: Administration

From: Thomas Hughes, Interim Manager – Park & Enterprise Operations

Subject: Groveland Oaks Residential Lease – Robert Hatt

RECOMMENDED MOTION

Move to approve the Residential Lease Agreement between the County of Oakland and Robert Hatt for property at 6000 Grange Hall Road, Holly, MI 48442, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In October 2026, the Oakland County Parks and Recreation Commission approved the Residential Property Lease Policy. The purpose of the policy is to set forth procedures and guidelines to manage residential properties located on Oakland County Parks property. The Oakland County Parks and Recreation Director shall oversee the implementation and interpretation of this policy. Under the new policy, residential lease rates will be adjusted to reflect current fair market value. To avoid a substantial and immediate financial impact on existing long-term tenants, any required rate increases will be phased in over a 5-year period.

The property under consideration is located within Groveland Oaks County Park at 6000 Grange Hall Road, Holly, MI 48442. The house has been occupied by Robert Hatt for several years and has been well-maintained. We are requesting to move forward with a 5-year lease for Robert Hatt, incorporating the phased market-rate adjustment schedule. The lease includes the standard terms for early termination by either party as outlined in the Residential Property Lease Policy.

The attached lease agreement has been prepared and reviewed by Oakland County Corporation Counsel.

ATTACHMENTS

1. Residential Lease with Aerial Map – Hatt – Groveland Oaks

RESIDENTIAL LEASE AGREEMENT

NOTICE: MICHIGAN LAW ESTABLISHES RIGHTS AND OBLIGATIONS FOR PARTIES TO RENTAL AGREEMENTS. THIS AGREEMENT IS REQUIRED TO COMPLY WITH THE TRUTH IN RENTING ACT. IF YOU HAVE A QUESTION ABOUT THE INTERPRETATION OR LEGALITY OF A PROVISION OF THIS AGREEMENT, YOU MAY WANT TO SEEK ASSISTANCE FROM A LAWYER OR OTHER QUALIFIED PERSON.

This Lease Agreement ("Lease") is entered into between the County of Oakland, 1200 North Telegraph, Pontiac, MI 48341 ("Landlord"), by the through its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and **Robert Hatt, 6000 Grange Hall Road, Holly, MI 48442** ("Tenant") according to the terms and conditions set forth below.

1. Premises. Tenant leases from landlord the real property located at **, 6000 Grange Hall Road, Holly, MI 48442** ("Premises"), together with any furnishings, fixtures, personal property, and appurtenances provided by Landlord for Tenant's use.

2. Term. The term of this Lease shall be for five (5) years, beginning on **January 1, 2027** and ending on **December 31, 2031**. References in this Lease to the term of the Lease shall include any renewal term(s). Tenant shall receive possession of the Premises upon execution of the Lease.

3. Tenant Monetary Obligations.

   3.1. Tenant shall pay Landlord the following rent on or before the first day of each month during the term of this Lease:

January 1, 2027 – December 31, 2027	**$ 955.00**
January 1, 2028 – December 31, 2028	**$ 1053.00**
January 1, 2029 – December 31, 2029	**$ 1115.00**
January 1, 2030 – December 31, 2030	**$ 1180.00**
January 1, 2031 – December 31, 2031	**$ 1249.00**

   3.2. The rent shall be paid by check or money order made payable to the "County of Oakland" and sent to the following address: Oakland County Parks and Recreation, 2800 Watkins Lake Road, Waterford, Michigan 48328 or another address designated by Landlord in writing.

   3.3. Tenant shall pay the first monthly installment when Tenant executes this Lease. The first monthly installment shall be pro-rated for such month, if the Lease is executed on another day than the first day of the month.

   3.4. Tenant shall pay Landlord a late fee of $25 for each monthly installment not received by Landlord within five days of its due date. This increase shall be considered additional rent and shall compensate Landlord for costs incurred because of late payments. Landlord's right to collect this additional rent shall be in addition to Landlord's right to take action under other provisions of this Lease for Tenant's default in paying rent. Tenant shall pay all additional rent to Landlord promptly after the due date of the delinquent installment. All rent paid

after the due date and payments to cover checks that have been returned for insufficient funds must be paid at the place designated for payment, by cashier's check, certified check, or money order.

3.5. During the term of this Lease, Tenant shall obtain and maintain comprehensive personal liability or tenant's form insurance coverage in the minimum amount of One Hundred Thousand Dollars ($100,000.00). Tenant shall also provide the Landlord with a certificate of insurance coverage listing the County of Oakland and its employees, officers, and elected and appointed officials as additional insureds.

3.6. A tenant who has a reasonable apprehension of present danger to him or her or his or her child from domestic violence, sexual assault, or stalking may have special statutory rights to seek a release of rental obligation under MCL 554.601 b.

4. Use of Premises.

4.1. Tenant shall use the Premises for private residential purposes only. No persons other than the following listed person(s) shall occupy the Premises for more than fourteen (14) days during the term of this Lease without the prior written approval of Landlord:

Cattie Hatt

Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.2. Tenant shall not do any of the following or allow another person to do any of the following:

4.2.1 Create any excessive noise or public nuisance;
4.2.2 Do anything to the Premises or its surroundings that may be hazardous or that will cause Landlord's insurance to be cancelled or premiums to increase;
4.2.3 Deface or damage any part of the Premises;
4.2.4 Change the locks or install any additional locks or bolts without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.5 Place a waterbed or other heavy article on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.6 Install any equipment or appliances that, in Landlord's opinion, would cause any unsafe conditions on or around the Premises;
4.2.7 Accumulate refuse on or around the Premises that might pose a health hazard to Tenant or to the surrounding properties;
4.2.8 Permit any flammable liquids or explosives to be kept on or around the Premises; and
4.2.9 Bring any animals on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.3 Tenant Duties.

4.3.1 To the extent permitted by law, Tenant shall secure and protect the Park

Property and facilities therein, especially during "Park Closed" hours. This shall include contacting and coordinating with police, fire or other agencies as may be required and the preparation of an Unusual Incident Report as required by Landlord.

4.3.2 Tenant shall arrange for emergency repair and maintenance services for Park Property and facilities, as needed.

4.3.3 Tenant shall make reports to the Park Supervisor or other entity as may be required by Landlord.

4.3.4 Landlord shall install smoke-detection devices for the Premises along with batteries at the time of installation. Tenant must regularly test the devices to ensure that they are operational and if not notify Landlord immediately. Tenants must never remove batteries from smoke-detection devices, except when necessary to replace the batteries.

4.3.5 Tenant shall be responsible for performing routine household maintenance necessary to maintain the Premises, including:

- Adding salt to the water softener, when applicable
- Replacing water filters for sinks, refrigerators, or other Landlord provided potable water systems
- Replacing HVAC furnace filters at recommended intervals.
- Replacing interior and exterior light bulbs serving the Premises.
- Replacing smoke detector and carbon monoxide detector batteries, unless equipped with sealed 10-year batteries.
- Maintaining sidewalks, porches, patios, and other residential areas in a clean and orderly condition.

4.3.6 The performance of "tenant duties," set forth in the Lease does not and is not intended to create an employee/employer relationship between Landlord and Tenant.

5. Use of Illegal Substances. Tenant shall not violate or knowingly allow another person to violate federal, state, or local laws regarding the use of controlled substances or the use of alcohol by minors in or around the Premises. When aware of a violation of this section, Landlord will file a formal police report.

6. Condition of Premises.

6.1. Except as otherwise expressly stated herein or in an Amendment to this Lease, Tenant acknowledges that no representations were made by Landlord about the condition of the Premises or promises to alter or to improve the Premises before or during the term of the Lease.

6.2. Throughout the term of the Lease, Tenant shall keep the Premises in a good and clean condition and shall allow no waste of the Premises or any utilities.

6.3. Except for normal wear and tear, Tenants shall return the Premises to Landlord in the same condition as they were upon commencement of this Lease, including cleanliness.

7. Utilities and Services for Premises. Tenant is responsible for the costs of utilities and services for the Premises and for establishing accounts, if they are not already established for the term of this Lease including but not limited to the following: (a) garbage removal; (b) water and sewer; (c) gas; (d) electricity; (e) ice removal, including salting the driveway and any walks surrounding the Premises or on the Premises; (f) telephones; (g) cable television; (h) Internet; and (i) cleaning for the interior of the building located on the Premises. All accounts for utilities and services shall be in the name of Tenant.

8. Maintenance, Repairs, and Damage to Premises.

8.1. Landlord shall provide snow removal services for the driveway on the Premises, including plowing and de-icing as follows: Snow removal will generally occur only when snow removal operations are being conducted for parking lots and roadways. Public park facilities, including parking lots, roads, and other public access areas, shall always receive priority over residential properties. Landlord is not obligated to dispatch equipment solely for snow removal at the Premises.

8.2. Landlord shall provide general lawn mowing for the Premises and line trimming services on a schedule consistent with OCPRC maintenance operations. Mowing frequency shall be determined solely by Landlord based on operational needs and weather conditions.

8.3. Tenant shall be responsible for clearing snow and applying de-icing materials to sidewalks, entry walkways, porch areas, and all door access points serving the Premises.

8.4. Tenant shall provide routine landscape maintenance of the Premises, including, but not limited to, weeding, maintaining landscape beds, replenishing mulch as needed, applying fertilizer at Tenant's discretion, trimming small shrubs and bushes, and performing other routine cosmetic landscape upkeep necessary to maintain the Premises.

8.5. Landlord shall provide repair and maintenance for the Premises and its parking lot or parking area, including but not limited to, building infrastructure, HVAC system, utility infrastructure, plumbing and electrical system. Tenant shall notify Landlord, in a timely manner and without delay, when there is a need for repairs to the Premises.

8.6. Except for normal wear and tear to the Premises, Tenant shall be liable for any damage to the Premises or other property of Landlord that is caused by the acts or omissions of Tenant or Tenant’s guests, including but not limited to broken glass and lost or broken keys. If damage occurs, Landlord or its agents shall make the necessary repairs and Tenant shall reimburse Landlord for all costs associated with the repairs. Such reimbursement shall be paid by Tenant within thirty (30) days of receiving an invoice from Landlord. If Landlord makes a claim and receives payment under its property insurance for damage to the Premises, then

Tenant shall only be liable to Landlord for the amount of the deductible for the property insurance for the Premises. Landlord shall send an invoice to Tenant for the amount of the deductible and Tenant shall pay this amount within thirty (30) days of receiving the invoice.

8.7. To the extent permitted by law, Landlord and Landlord's agents shall not be liable for any damage to property or loss of property that is caused by theft or casualty on the Premises. Landlord recommends that Tenant obtain insurance to protect Tenant's personal property against such loss or damage.

9. Decorations and Alterations to Premises. Tenant shall not alter or decorate the Premises, including but not limited to, removing any furnishings Landlord provides to Tenant, driving nails into the woodwork, painting or using any adhesive material on the walls without prior written approval from Landlord. Landlord's approval shall be given by the OCPRC Director or his or her designee. Landlord's approval of a particular decoration or alteration shall not be deemed consent to future decorations or alterations.

10. Assignment and Sublease of Premises. Tenant shall not assign or sublease the Premises or any portion thereof.

11. Access to the Premises. Tenant shall allow Landlord and Landlord's agents reasonable access to the Premises to inspect, repair, alter, or improve the Premises. Landlord and Landlord's agents shall have immediate access to the Premises in case of an emergency or if an emergency repair to the Premises is required. Tenant shall also allow insurance carriers and representatives, fire department inspectors, police, or local health authorities to inspect the Premises. Tenant shall allow Landlord or Landlord's agents to show the Premises to prospective tenants or purchasers at reasonable times during the sixty (60) days prior to the expiration of this Lease.

12. Vacation or Abandonment of the Premises. If Tenant removes substantially all Tenant's property from the Premises for a period of thirty (30) days, Landlord may immediately enter and redecorate the Premises without abatement of rent and proceed as if Tenant terminated this Lease. These acts by Landlord shall not affect Tenant's obligations under this Lease. If Tenant abandons the Premises before the Lease expires, all rent for the remainder of the term of the Lease shall immediately become due.

13. Damage or Destruction of the Premises. If a casualty partially destroys the Premises but they can be restored to a tenantable condition within thirty (30) days, Landlord shall repair the Premises with reasonable dispatch; however, Landlord's obligation to repair the Premises shall be limited to the amount of insurance proceeds actually received by Landlord. Tenant's obligation to pay rent shall be suspended while the Premises are untenantable. If a casualty damages the Premises to the extent that they cannot be restored to a habitable condition within thirty (30) days, either Party may terminate this Lease by giving the other party written notice within fifteen (15) days after the casualty. Landlord shall not be liable for any reasonable delay or for providing housing for Tenant during repairs.

14. Termination of Lease.

14.1. Tenant may terminate this Lease for any reason upon thirty (30) days written notice to Landlord.

14.2. Landlord may terminate this Lease for any reason upon ninety (90) days written notice to Tenant.

14.3. Upon termination of this Lease, Tenant shall surrender the Premises to Landlord in the same condition they were upon commencement of Lease, normal wear and tear excepted. Upon termination of this Lease, Tenant shall also notify Landlord of the move-out date, return all keys to the Premises to Landlord, and transfer all utility and service accounts into the name of the "County of Oakland."

15. Default of Lease and Landlord's Remedies.

16.1 If Tenant defaults on any obligations under this Lease or misrepresents any information in the application for this lease, Landlord may, on written notice to Tenant, terminate the Lease and enter the Premises as permitted by law; Tenant and any other occupants shall surrender the Premises to Landlord by the date stated in the notice. If Landlord terminates the Lease, Landlord may recover Landlord's expenses for enforcing Landlord's rights under the Lease and applicable law, including court costs and attorney fees, from Tenant, as permitted by statute; and rent for the rest of the term of the Lease shall immediately become due. Tenant may not be liable for the total accelerated amount because of Landlord's obligation to minimize damages, and either party may ask a court to determine the actual amount owed, if any. If Tenant fails to pay rent or any other sums when due to Landlord, Landlord serves a notice of default on Tenant as required by law, and Tenant fails to remit the amounts due before the notice period expires, the amount of court costs and attorney fees incurred by Landlord in enforcing Landlord's remedies and allowed by statute shall be added to the amount of the arrearage.

16.2 It is a violation of this Lease if Tenant, a member of Tenant's household, or any other person under Tenant's control unlawfully manufactures, delivers, possesses with intent to deliver, or possesses a controlled substance as defined by Michigan law anywhere on the Premises or surrounding the Premises. Pursuant to Michigan law, if Tenant violates this provision Landlord may serve a written demand for possession for termination of this Lease giving Tenant 24 hours' notice of the Lease termination and demand for possession. Tenant acknowledges that an order of eviction/writ of restitution may be issued by the court immediately after the entry of a judgment for possession. Tenant's initials:_____.

16. Hold Over. Tenant may, with Landlord's permission, continue to occupy the Premises after the term of this Lease expires without renewing this Lease or signing another Lease for the Premises. Such tenancy shall be on a month-to-month basis and subject to the provisions of this Lease except that the monthly rent shall increase by ten (10) percent from the rent for the last month of the term of the Lease, and Landlord may increase rent on thirty (30) days' notice to Tenant.

17. Notices. Any notices under this Lease shall be in writing and delivered to the recipient personally or by first class mail fully prepaid at the following locations:

Tenant: **Robert Hatt**

6000 Grange Hall Road
Holly, MI 48442

Landlord: Oakland County Department of
Facilities Management Property Management
One Public Works Drive, Bldg. 95W
Waterford, MI 48328

and

Oakland County Parks and Recreation
Director
2800 Watkins Lake Road, Bldg. 97W
Waterford, MI 48328

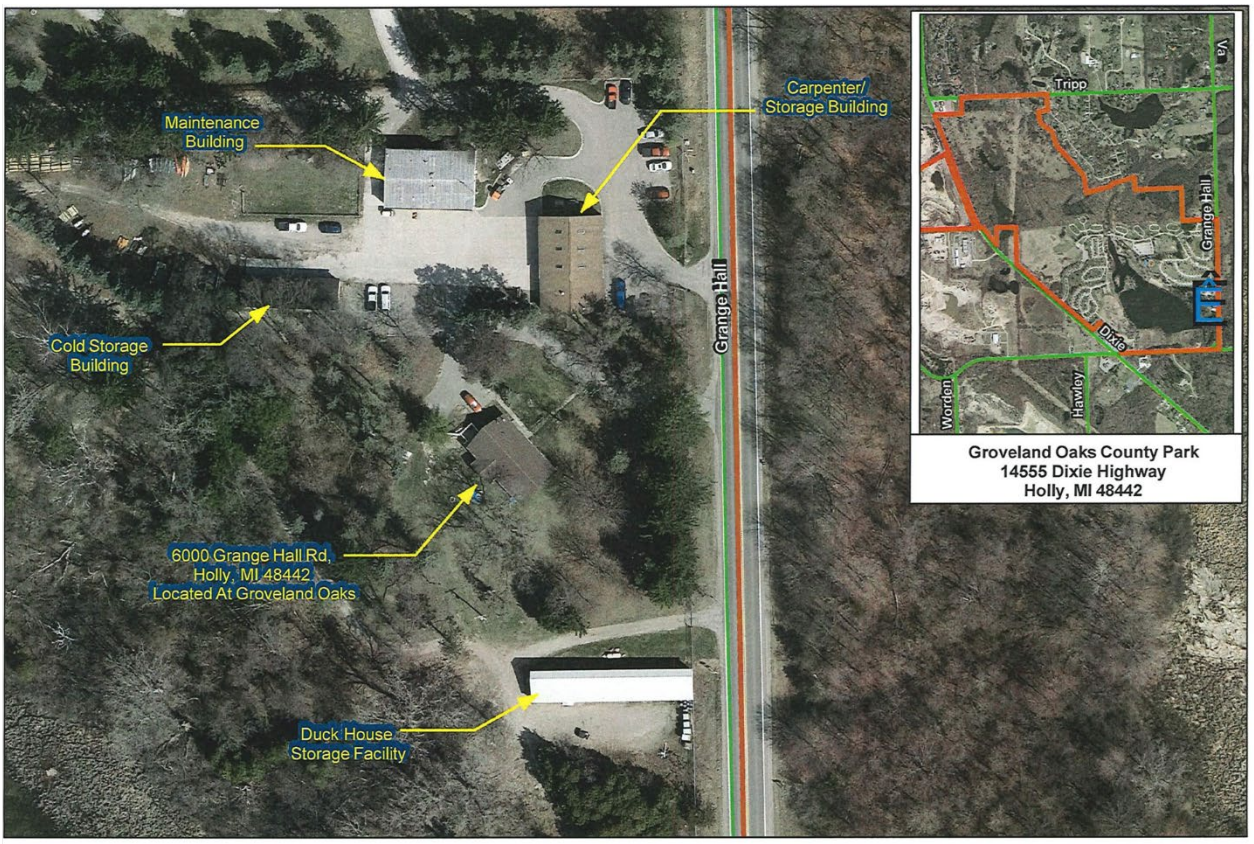
Unless otherwise required by law, the date of service shall be the date of hand delivery or the mailing date.

18. Modifications. No modifications of this Lease shall be binding unless they are in writing and signed by Landlord and Tenant.

19. Whole Agreement. This Lease sets forth the entire agreement between Landlord and Tenant. There are no verbal or written agreements that are not contained in this Lease between the parties.

20. Binding Effect. This Lease shall bind and benefit the parties to the Lease and their heirs, personal representatives, successors, and permitted assigns.

21. Severability. If any provision of this Lease is invalid, unlawful, or unenforceable to any extent, the rest of the Lease and the application of the provision to the persons or circumstances other than those for which it is invalid, unlawful, or unenforceable are not affected.



22. Time of the Essence. Time shall be deemed to be of the essence in the performance of this Lease.

23. Effective Date. This Lease is effective on the date stated in Section 2.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 12

Department: Administration

From: Thomas Hughes, Interim Manager – Park & Enterprise Operations

Subject: Waterford Oaks Residential Lease – Brad Lowe

RECOMMENDED MOTION

Move to approve the Residential Lease Agreement between the County of Oakland and Brad Lowe for property located at 2930 Watkins Lake Road, Waterford, MI 48328, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In October 2026, the Oakland County Parks and Recreation Commission approved the Residential Property Lease Policy. The purpose of the policy is to set forth procedures and guidelines to manage residential properties located on Oakland County Parks property. The Oakland County Parks and Recreation Director shall oversee the implementation and interpretation of this policy. Under the new policy, residential lease rates will be adjusted to reflect current fair market value. To avoid a substantial and immediate financial impact on existing long-term tenants, any required rate increases will be phased in over a 5-year period.

The property under consideration is located within Waterford Oaks County Park at 2930 Watkins Lake Road, Waterford, MI 48328. The house has been occupied by Brad Lowe for several years and has been well-maintained. We are requesting to move forward with a 5-year lease for Brad Lowe, incorporating the phased market-rate adjustment schedule. The lease includes the standard terms for early termination by either party as outlined in the Residential Property Lease Policy.

The attached lease agreement has been prepared and reviewed by Oakland County Corporation Counsel.

ATTACHMENTS

1. Residential Lease with Aerial Map – Lowe Waterford Oaks

RESIDENTIAL LEASE AGREEMENT

NOTICE: MICHIGAN LAW ESTABLISHES RIGHTS AND OBLIGATIONS FOR PARTIES TO RENTAL AGREEMENTS. THIS AGREEMENT IS REQUIRED TO COMPLY WITH THE TRUTH IN RENTING ACT. IF YOU HAVE A QUESTION ABOUT THE INTERPRETATION OR LEGALITY OF A PROVISION OF THIS AGREEMENT, YOU MAY WANT TO SEEK ASSISTANCE FROM A LAWYER OR OTHER QUALIFIED PERSON.

This Lease Agreement ("Lease") is entered into between the County of Oakland, 1200 North Telegraph, Pontiac, MI 48341 ("Landlord"), by the through its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and **Brad Lowe, 2930 Watkins Lake Road, Waterford, MI 48328** ("Tenant") according to the terms and conditions set forth below.

1. Premises. Tenant leases from landlord the real property located at **, 2930 Watkins Lake Road, Waterford, MI 48328** ("Premises"), together with any furnishings, fixtures, personal property, and appurtenances provided by Landlord for Tenant's use.

2. Term. The term of this Lease shall be for five (5) years, beginning on **January 1, 2027** and ending on **December 31, 2031**. References in this Lease to the term of the Lease shall include any renewal term(s). Tenant shall receive possession of the Premises upon execution of the Lease.

3. Tenant Monetary Obligations.

   3.1. Tenant shall pay Landlord the following rent on or before the first day of each month during the term of this Lease:

January 1, 2027 – December 31, 2027	**$ 1266.00**
January 1, 2028 – December 31, 2028	**$ 1418.00**
January 1, 2029 – December 31, 2029	**$1570.00**
January 1, 2030 – December 31, 2030	**$ 1722.00**
January 1, 2031 – December 31, 2031	**$ 1873.00**

   3.2. The rent shall be paid by check or money order made payable to the "County of Oakland" and sent to the following address: Oakland County Parks and Recreation, 2800 Watkins Lake Road, Waterford, Michigan 48328 or another address designated by Landlord in writing.

   3.3. Tenant shall pay the first monthly installment when Tenant executes this Lease. The first monthly installment shall be pro-rated for such month, if the Lease is executed on another day than the first day of the month.

   3.4. Tenant shall pay Landlord a late fee of $25 for each monthly installment not received by Landlord within five days of its due date. This increase shall be considered additional rent and shall compensate Landlord for costs incurred because of late payments. Landlord's right to collect this additional rent shall be in addition to Landlord's right to take action under other provisions of this Lease for Tenant's default in paying rent. Tenant shall pay all additional rent to Landlord promptly after the due date of the delinquent installment. All rent paid

after the due date and payments to cover checks that have been returned for insufficient funds must be paid at the place designated for payment, by cashier's check, certified check, or money order.

3.5. During the term of this Lease, Tenant shall obtain and maintain comprehensive personal liability or tenant's form insurance coverage in the minimum amount of One Hundred Thousand Dollars ($100,000.00). Tenant shall also provide the Landlord with a certificate of insurance coverage listing the County of Oakland and its employees, officers, and elected and appointed officials as additional insureds.

3.6. A tenant who has a reasonable apprehension of present danger to him or her or his or her child from domestic violence, sexual assault, or stalking may have special statutory rights to seek a release of rental obligation under MCL 554.601 b.

4. Use of Premises.

4.1. Tenant shall use the Premises for private residential purposes only. No persons other than the following listed person(s) shall occupy the Premises for more than fourteen (14) days during the term of this Lease without the prior written approval of Landlord:

Brad Lowe

Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.2. Tenant shall not do any of the following or allow another person to do any of the following:

4.2.1 Create any excessive noise or public nuisance;
4.2.2 Do anything to the Premises or its surroundings that may be hazardous or that will cause Landlord's insurance to be cancelled or premiums to increase;
4.2.3 Deface or damage any part of the Premises;
4.2.4 Change the locks or install any additional locks or bolts without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.5 Place a waterbed or other heavy article on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.6 Install any equipment or appliances that, in Landlord's opinion, would cause any unsafe conditions on or around the Premises;
4.2.7 Accumulate refuse on or around the Premises that might pose a health hazard to Tenant or to the surrounding properties;
4.2.8 Permit any flammable liquids or explosives to be kept on or around the Premises; and
4.2.9 Bring any animals on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.3 Tenant Duties.

4.3.1 To the extent permitted by law, Tenant shall secure and protect the Park

Property and facilities therein, especially during "Park Closed" hours. This shall include contacting and coordinating with police, fire or other agencies as may be required and the preparation of an Unusual Incident Report as required by Landlord.

4.3.2 Tenant shall arrange for emergency repair and maintenance services for Park Property and facilities, as needed.

4.3.3 Tenant shall make reports to the Park Supervisor or other entity as may be required by Landlord.

4.3.4 Landlord shall install smoke-detection devices for the Premises along with batteries at the time of installation. Tenant must regularly test the devices to ensure that they are operational and if not notify Landlord immediately. Tenants must never remove batteries from smoke-detection devices, except when necessary to replace the batteries.

4.3.5 Tenant shall be responsible for performing routine household maintenance necessary to maintain the Premises, including:

- Adding salt to the water softener, when applicable
- Replacing water filters for sinks, refrigerators, or other Landlord provided potable water systems
- Replacing HVAC furnace filters at recommended intervals.
- Replacing interior and exterior light bulbs serving the Premises.
- Replacing smoke detector and carbon monoxide detector batteries, unless equipped with sealed 10-year batteries.
- Maintaining sidewalks, porches, patios, and other residential areas in a clean and orderly condition.

4.3.6 The performance of "tenant duties," set forth in the Lease does not and is not intended to create an employee/employer relationship between Landlord and Tenant.

5. Use of Illegal Substances. Tenant shall not violate or knowingly allow another person to violate federal, state, or local laws regarding the use of controlled substances or the use of alcohol by minors in or around the Premises. When aware of a violation of this section, Landlord will file a formal police report.

6. Condition of Premises.

6.1. Except as otherwise expressly stated herein or in an Amendment to this Lease, Tenant acknowledges that no representations were made by Landlord about the condition of the Premises or promises to alter or to improve the Premises before or during the term of the Lease.

6.2. Throughout the term of the Lease, Tenant shall keep the Premises in a good and clean condition and shall allow no waste of the Premises or any utilities.

6.3. Except for normal wear and tear, Tenants shall return the Premises to Landlord in the same condition as they were upon commencement of this Lease, including cleanliness.

7. Utilities and Services for Premises. Tenant is responsible for the costs of utilities and services for the Premises and for establishing accounts, if they are not already established for the term of this Lease including but not limited to the following: (a) garbage removal; (b) water and sewer; (c) gas; (d) electricity; (e) ice removal, including salting the driveway and any walks surrounding the Premises or on the Premises; (f) telephones; (g) cable television; (h) Internet; and (i) cleaning for the interior of the building located on the Premises. All accounts for utilities and services shall be in the name of Tenant.

8. Maintenance, Repairs, and Damage to Premises.

8.1. Landlord shall provide snow removal services for the driveway on the Premises, including plowing and de-icing as follows: Snow removal will generally occur only when snow removal operations are being conducted for parking lots and roadways. Public park facilities, including parking lots, roads, and other public access areas, shall always receive priority over residential properties. Landlord is not obligated to dispatch equipment solely for snow removal at the Premises.

8.2. Landlord shall provide general lawn mowing for the Premises and line trimming services on a schedule consistent with OCPRC maintenance operations. Mowing frequency shall be determined solely by Landlord based on operational needs and weather conditions.

8.3. Tenant shall be responsible for clearing snow and applying de-icing materials to sidewalks, entry walkways, porch areas, and all door access points serving the Premises.

8.4. Tenant shall provide routine landscape maintenance of the Premises, including, but not limited to, weeding, maintaining landscape beds, replenishing mulch as needed, applying fertilizer at Tenant's discretion, trimming small shrubs and bushes, and performing other routine cosmetic landscape upkeep necessary to maintain the Premises.

8.5. Landlord shall provide repair and maintenance for the Premises and its parking lot or parking area, including but not limited to, building infrastructure, HVAC system, utility infrastructure, plumbing and electrical system. Tenant shall notify Landlord, in a timely manner and without delay, when there is a need for repairs to the Premises.

8.6. Except for normal wear and tear to the Premises, Tenant shall be liable for any damage to the Premises or other property of Landlord that is caused by the acts or omissions of Tenant or Tenant’s guests, including but not limited to broken glass and lost or broken keys. If damage occurs, Landlord or its agents shall make the necessary repairs and Tenant shall reimburse Landlord for all costs associated with the repairs. Such reimbursement shall be paid by Tenant within thirty (30) days of receiving an invoice from Landlord. If Landlord makes a claim and receives payment under its property insurance for damage to the Premises, then

Tenant shall only be liable to Landlord for the amount of the deductible for the property insurance for the Premises. Landlord shall send an invoice to Tenant for the amount of the deductible and Tenant shall pay this amount within thirty (30) days of receiving the invoice.

8.7. To the extent permitted by law, Landlord and Landlord's agents shall not be liable for any damage to property or loss of property that is caused by theft or casualty on the Premises. Landlord recommends that Tenant obtain insurance to protect Tenant's personal property against such loss or damage.

9. Decorations and Alterations to Premises. Tenant shall not alter or decorate the Premises, including but not limited to, removing any furnishings Landlord provides to Tenant, driving nails into the woodwork, painting or using any adhesive material on the walls without prior written approval from Landlord. Landlord's approval shall be given by the OCPRC Director or his or her designee. Landlord's approval of a particular decoration or alteration shall not be deemed consent to future decorations or alterations.

10. Assignment and Sublease of Premises. Tenant shall not assign or sublease the Premises or any portion thereof.

11. Access to the Premises. Tenant shall allow Landlord and Landlord's agents reasonable access to the Premises to inspect, repair, alter, or improve the Premises. Landlord and Landlord's agents shall have immediate access to the Premises in case of an emergency or if an emergency repair to the Premises is required. Tenant shall also allow insurance carriers and representatives, fire department inspectors, police, or local health authorities to inspect the Premises. Tenant shall allow Landlord or Landlord's agents to show the Premises to prospective tenants or purchasers at reasonable times during the sixty (60) days prior to the expiration of this Lease.

12. Vacation or Abandonment of the Premises. If Tenant removes substantially all Tenant's property from the Premises for a period of thirty (30) days, Landlord may immediately enter and redecorate the Premises without abatement of rent and proceed as if Tenant terminated this Lease. These acts by Landlord shall not affect Tenant's obligations under this Lease. If Tenant abandons the Premises before the Lease expires, all rent for the remainder of the term of the Lease shall immediately become due.

13. Damage or Destruction of the Premises. If a casualty partially destroys the Premises but they can be restored to a tenantable condition within thirty (30) days, Landlord shall repair the Premises with reasonable dispatch; however, Landlord's obligation to repair the Premises shall be limited to the amount of insurance proceeds actually received by Landlord. Tenant's obligation to pay rent shall be suspended while the Premises are untenantable. If a casualty damages the Premises to the extent that they cannot be restored to a habitable condition within thirty (30) days, either Party may terminate this Lease by giving the other party written notice within fifteen (15) days after the casualty. Landlord shall not be liable for any reasonable delay or for providing housing for Tenant during repairs.

14. Termination of Lease.

14.1. Tenant may terminate this Lease for any reason upon thirty (30) days written notice to Landlord.

14.2. Landlord may terminate this Lease for any reason upon ninety (90) days written notice to Tenant.

14.3. Upon termination of this Lease, Tenant shall surrender the Premises to Landlord in the same condition they were upon commencement of Lease, normal wear and tear excepted. Upon termination of this Lease, Tenant shall also notify Landlord of the move-out date, return all keys to the Premises to Landlord, and transfer all utility and service accounts into the name of the "County of Oakland."

15. Default of Lease and Landlord's Remedies.

16.1 If Tenant defaults on any obligations under this Lease or misrepresents any information in the application for this lease, Landlord may, on written notice to Tenant, terminate the Lease and enter the Premises as permitted by law; Tenant and any other occupants shall surrender the Premises to Landlord by the date stated in the notice. If Landlord terminates the Lease, Landlord may recover Landlord's expenses for enforcing Landlord's rights under the Lease and applicable law, including court costs and attorney fees, from Tenant, as permitted by statute; and rent for the rest of the term of the Lease shall immediately become due. Tenant may not be liable for the total accelerated amount because of Landlord's obligation to minimize damages, and either party may ask a court to determine the actual amount owed, if any. If Tenant fails to pay rent or any other sums when due to Landlord, Landlord serves a notice of default on Tenant as required by law, and Tenant fails to remit the amounts due before the notice period expires, the amount of court costs and attorney fees incurred by Landlord in enforcing Landlord's remedies and allowed by statute shall be added to the amount of the arrearage.

16.2 It is a violation of this Lease if Tenant, a member of Tenant's household, or any other person under Tenant's control unlawfully manufactures, delivers, possesses with intent to deliver, or possesses a controlled substance as defined by Michigan law anywhere on the Premises or surrounding the Premises. Pursuant to Michigan law, if Tenant violates this provision Landlord may serve a written demand for possession for termination of this Lease giving Tenant 24 hours' notice of the Lease termination and demand for possession. Tenant acknowledges that an order of eviction/writ of restitution may be issued by the court immediately after the entry of a judgment for possession. Tenant's initials:_____.

16. Hold Over. Tenant may, with Landlord's permission, continue to occupy the Premises after the term of this Lease expires without renewing this Lease or signing another Lease for the Premises. Such tenancy shall be on a month-to-month basis and subject to the provisions of this Lease except that the monthly rent shall increase by ten (10) percent from the rent for the last month of the term of the Lease, and Landlord may increase rent on thirty (30) days' notice to Tenant.

17. Notices. Any notices under this Lease shall be in writing and delivered to the recipient personally or by first class mail fully prepaid at the following locations:

Tenant: **Brad Lowe**

2930 Watkins Lake Road
Waterford, MI 48328

Landlord: Oakland County Department of
Facilities Management Property Management
One Public Works Drive, Bldg. 95W
Waterford, MI 48328

and

Oakland County Parks and Recreation
Director
2800 Watkins Lake Road, Bldg. 97W
Waterford, MI 48328

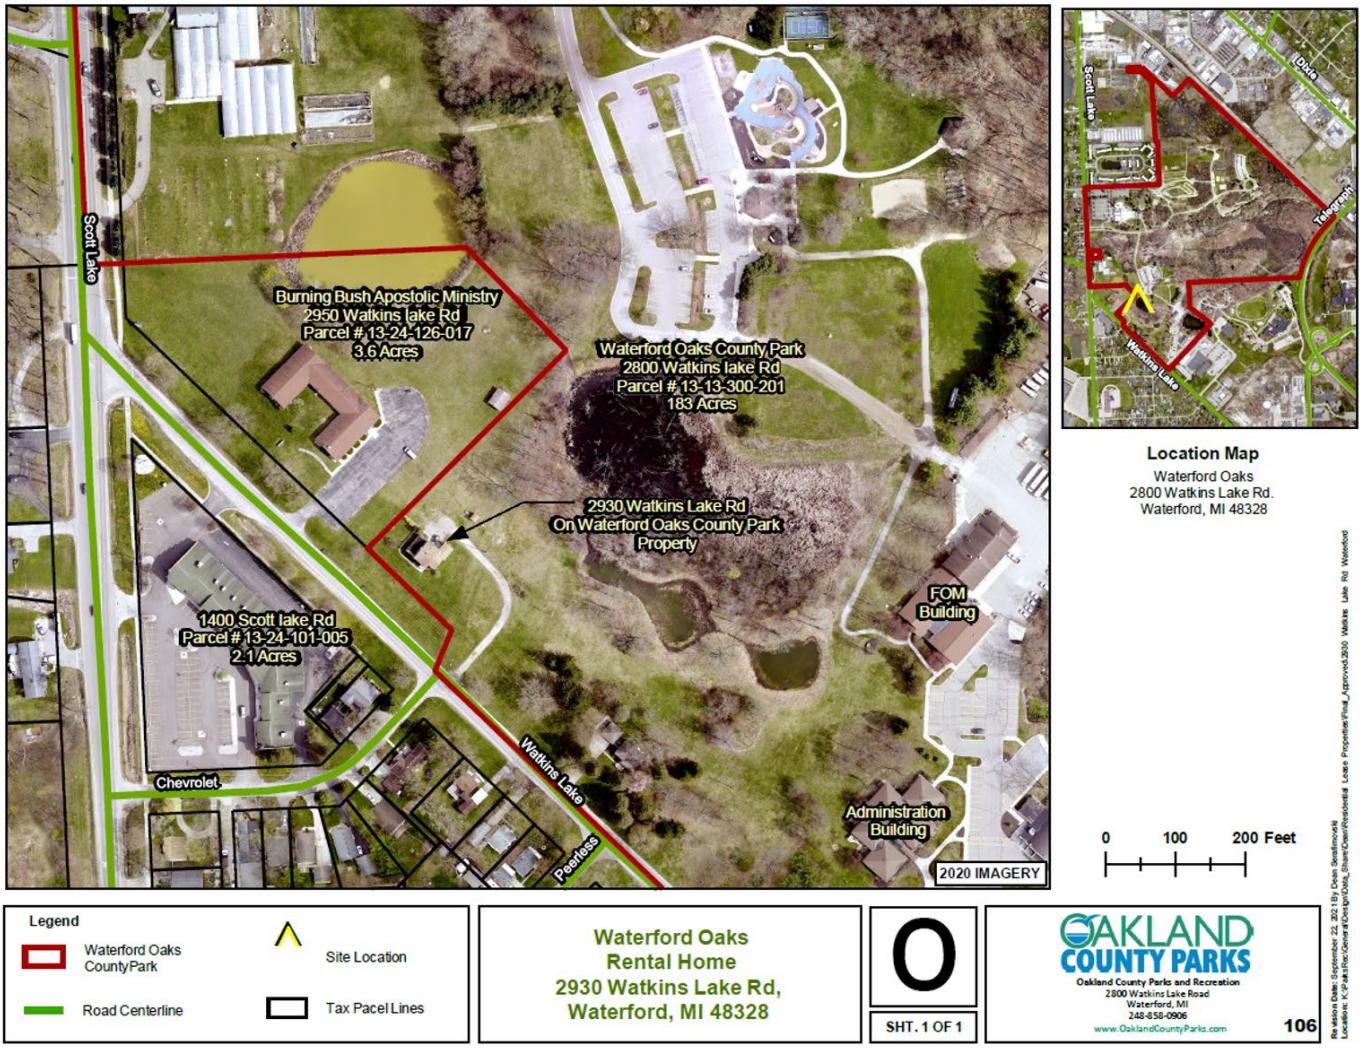
Unless otherwise required by law, the date of service shall be the date of hand delivery or the mailing date.

18. Modifications. No modifications of this Lease shall be binding unless they are in writing and signed by Landlord and Tenant.

19. Whole Agreement. This Lease sets forth the entire agreement between Landlord and Tenant. There are no verbal or written agreements that are not contained in this Lease between the parties.

20. Binding Effect. This Lease shall bind and benefit the parties to the Lease and their heirs, personal representatives, successors, and permitted assigns.

21. Severability. If any provision of this Lease is invalid, unlawful, or unenforceable to any extent, the rest of the Lease and the application of the provision to the persons or circumstances other than those for which it is invalid, unlawful, or unenforceable are not affected.



22. Time of the Essence. Time shall be deemed to be of the essence in the performance of this Lease.

23. Effective Date. This Lease is effective on the date stated in Section 2.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 13

Department: Administration

From: Thomas Hughes, Interim Manager – Park & Enterprise Operations

Subject: Waterford Oaks Residential Lease – Chris Rowland

RECOMMENDED MOTION

Move to approve the Residential Lease Agreement between the County of Oakland and Chris Rowland for property at 2866 Watkins Lake Road, Waterford, MI 48328, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In October 2026, the Oakland County Parks and Recreation Commission approved the Residential Property Lease Policy. The purpose of the policy is to set forth procedures and guidelines to manage residential properties located on Oakland County Parks property. The Oakland County Parks and Recreation Director shall oversee the implementation and interpretation of this policy. Under the new policy, residential lease rates will be adjusted to reflect current fair market value. To avoid a substantial and immediate financial impact on existing long-term tenants, any required rate increases will be phased in over a 5-year period.

The property under consideration is located within Waterford Oaks County Park at 2866 Watkins Lake Road, Waterford, MI 48328. The house has been occupied by Chris Rowland for several years and has been well-maintained. We are requesting to move forward with a 5-year lease for Chris Rowland, incorporating the phased market-rate adjustment schedule. The lease includes the standard terms for early termination by either party as outlined in the Residential Property Lease Policy.

The attached lease agreement has been prepared and reviewed by Oakland County Corporation Counsel.

ATTACHMENTS

1. Residential Lease with Aerial Map – Rowland Waterford Oaks

RESIDENTIAL LEASE AGREEMENT

NOTICE: MICHIGAN LAW ESTABLISHES RIGHTS AND OBLIGATIONS FOR PARTIES TO RENTAL AGREEMENTS. THIS AGREEMENT IS REQUIRED TO COMPLY WITH THE TRUTH IN RENTING ACT. IF YOU HAVE A QUESTION ABOUT THE INTERPRETATION OR LEGALITY OF A PROVISION OF THIS AGREEMENT, YOU MAY WANT TO SEEK ASSISTANCE FROM A LAWYER OR OTHER QUALIFIED PERSON.

This Lease Agreement ("Lease") is entered into between the County of Oakland, 1200 North Telegraph, Pontiac, MI 48341 ("Landlord"), by the through its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and **Chris Rowland, 2866 Watkins Lake Road, Waterford, MI 48328** ("Tenant") according to the terms and conditions set forth below.

1. Premises. Tenant leases from landlord the real property located at **, 2866 Watkins Lake Road, Waterford, MI 48328** ("Premises"), together with any furnishings, fixtures, personal property, and appurtenances provided by Landlord for Tenant's use.

2. Term. The term of this Lease shall be for five (5) years, beginning on **January 1, 2027** and ending on **December 31, 2031**. References in this Lease to the term of the Lease shall include any renewal term(s). Tenant shall receive possession of the Premises upon execution of the Lease.

3. Tenant Monetary Obligations.

   3.1. Tenant shall pay Landlord the following rent on or before the first day of each month during the term of this Lease:

January 1, 2027 – December 31, 2027	**$ 808.00**
January 1, 2028 – December 31, 2028	**$ 918.00**
January 1, 2029 – December 31, 2029	**$ 1028.00**
January 1, 2030 – December 31, 2030	**$ 1138.00**
January 1, 2031 – December 31, 2031	**$ 1249.00**

   3.2. The rent shall be paid by check or money order made payable to the "County of Oakland" and sent to the following address: Oakland County Parks and Recreation, 2800 Watkins Lake Road, Waterford, Michigan 48328 or another address designated by Landlord in writing.

   3.3. Tenant shall pay the first monthly installment when Tenant executes this Lease. The first monthly installment shall be pro-rated for such month, if the Lease is executed on another day than the first day of the month.

   3.4. Tenant shall pay Landlord a late fee of $25 for each monthly installment not received by Landlord within five days of its due date. This increase shall be considered additional rent and shall compensate Landlord for costs incurred because of late payments. Landlord's right to collect this additional rent shall be in addition to Landlord's right to take action under other provisions of this Lease for Tenant's default in paying rent. Tenant shall pay all additional rent to

Landlord promptly after the due date of the delinquent installment. All rent paid after the due date and payments to cover checks that have been returned for insufficient funds must be paid at the place designated for payment, by cashier's check, certified check, or money order.

3.5. During the term of this Lease, Tenant shall obtain and maintain comprehensive personal liability or tenant's form insurance coverage in the minimum amount of One Hundred Thousand Dollars ($100,000.00). Tenant shall also provide the Landlord with a certificate of insurance coverage listing the County of Oakland and its employees, officers, and elected and appointed officials as additional insureds.

3.6. A tenant who has a reasonable apprehension of present danger to him or her or his or her child from domestic violence, sexual assault, or stalking may have special statutory rights to seek a release of rental obligation under MCL 554.601 b.

4. Use of Premises.

4.1. Tenant shall use the Premises for private residential purposes only. No persons other than the following listed person(s) shall occupy the Premises for more than fourteen (14) days during the term of this Lease without the prior written approval of Landlord:

Chris Rowland

Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.2. Tenant shall not do any of the following or allow another person to do any of the following:

4.2.1 Create any excessive noise or public nuisance;
4.2.2 Do anything to the Premises or its surroundings that may be hazardous or that will cause Landlord's insurance to be cancelled or premiums to increase;
4.2.3 Deface or damage any part of the Premises;
4.2.4 Change the locks or install any additional locks or bolts without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.5 Place a waterbed or other heavy article on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.6 Install any equipment or appliances that, in Landlord's opinion, would cause any unsafe conditions on or around the Premises;
4.2.7 Accumulate refuse on or around the Premises that might pose a health hazard to Tenant or to the surrounding properties;
4.2.8 Permit any flammable liquids or explosives to be kept on or around the Premises; and
4.2.9 Bring any animals on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.3 Tenant Duties.

4.3.1 To the extent permitted by law, Tenant shall secure and protect the Park Property and facilities therein, especially during "Park Closed" hours. This shall include contacting and coordinating with police, fire or other agencies as may be required and the preparation of an Unusual Incident Report as required by Landlord.

4.3.2 Tenant shall arrange for emergency repair and maintenance services for Park Property and facilities, as needed.

4.3.3 Tenant shall make reports to the Park Supervisor or other entity as may be required by Landlord.

4.3.4 Landlord shall install smoke-detection devices for the Premises along with batteries at the time of installation. Tenant must regularly test the devices to ensure that they are operational and if not notify Landlord immediately. Tenants must never remove batteries from smoke-detection devices, except when necessary to replace the batteries.

4.3.5 Tenant shall be responsible for performing routine household maintenance necessary to maintain the Premises, including:

- Adding salt to the water softener, when applicable
- Replacing water filters for sinks, refrigerators, or other Landlord provided potable water systems
- Replacing HVAC furnace filters at recommended intervals.
- Replacing interior and exterior light bulbs serving the Premises.
- Replacing smoke detector and carbon monoxide detector batteries, unless equipped with sealed 10-year batteries.
- Maintaining sidewalks, porches, patios, and other residential areas in a clean and orderly condition.

4.3.6 The performance of "tenant duties," set forth in the Lease does not and is not intended to create an employee/employer relationship between Landlord and Tenant.

5. Use of Illegal Substances. Tenant shall not violate or knowingly allow another person to violate federal, state, or local laws regarding the use of controlled substances or the use of alcohol by minors in or around the Premises. When aware of a violation of this section, Landlord will file a formal police report.

6. Condition of Premises.

6.1. Except as otherwise expressly stated herein or in an Amendment to this Lease, Tenant acknowledges that no representations were made by Landlord about the condition of the Premises or promises to alter or to improve the Premises before or during the term of the Lease.

6.2. Throughout the term of the Lease, Tenant shall keep the Premises in a good and clean condition and shall allow no waste of the Premises or any utilities.

6.3. Except for normal wear and tear, Tenants shall return the Premises to Landlord in the same condition as they were upon commencement of this Lease, including cleanliness.

7. Utilities and Services for Premises. Tenant is responsible for the costs of utilities and services for the Premises and for establishing accounts, if they are not already established for the term of this Lease including but not limited to the following: (a) garbage removal; (b) water and sewer; (c) gas; (d) electricity; (e) ice removal, including salting the driveway and any walks surrounding the Premises or on the Premises; (f) telephones; (g) cable television; (h) Internet; and (i) cleaning for the interior of the building located on the Premises. All accounts for utilities and services shall be in the name of Tenant.

8. Maintenance, Repairs, and Damage to Premises.

8.1. Landlord shall provide snow removal services for the driveway on the Premises, including plowing and de-icing as follows: Snow removal will generally occur only when snow removal operations are being conducted for parking lots and roadways. Public park facilities, including parking lots, roads, and other public access areas, shall always receive priority over residential properties. Landlord is not obligated to dispatch equipment solely for snow removal at the Premises.

8.2. Landlord shall provide general lawn mowing for the Premises and line trimming services on a schedule consistent with OCPRC maintenance operations. Mowing frequency shall be determined solely by Landlord based on operational needs and weather conditions.

8.3. Tenant shall be responsible for clearing snow and applying de-icing materials to sidewalks, entry walkways, porch areas, and all door access points serving the Premises.

8.4. Tenant shall provide routine landscape maintenance of the Premises, including, but not limited to, weeding, maintaining landscape beds, replenishing mulch as needed, applying fertilizer at Tenant's discretion, trimming small shrubs and bushes, and performing other routine cosmetic landscape upkeep necessary to maintain the Premises.

8.5. Landlord shall provide repair and maintenance for the Premises and its parking lot or parking area, including but not limited to, building infrastructure, HVAC system, utility infrastructure, plumbing and electrical system. Tenant shall notify Landlord, in a timely manner and without delay, when there is a need for repairs to the Premises.

8.6. Except for normal wear and tear to the Premises, Tenant shall be liable for any damage to the Premises or other property of Landlord that is caused by the acts or omissions of Tenant or Tenant’s guests, including but not limited to broken glass and lost or broken keys. If damage occurs, Landlord or its agents shall make the necessary repairs and Tenant shall reimburse Landlord for all costs associated with the repairs. Such reimbursement shall be paid by Tenant within thirty (30)

days of receiving an invoice from Landlord. If Landlord makes a claim and receives payment under its property insurance for damage to the Premises, then Tenant shall only be liable to Landlord for the amount of the deductible for the property insurance for the Premises. Landlord shall send an invoice to Tenant for the amount of the deductible and Tenant shall pay this amount within thirty (30) days of receiving the invoice.

8.7. To the extent permitted by law, Landlord and Landlord's agents shall not be liable for any damage to property or loss of property that is caused by theft or casualty on the Premises. Landlord recommends that Tenant obtain insurance to protect Tenant's personal property against such loss or damage.

9. Decorations and Alterations to Premises. Tenant shall not alter or decorate the Premises, including but not limited to, removing any furnishings Landlord provides to Tenant, driving nails into the woodwork, painting or using any adhesive material on the walls without prior written approval from Landlord. Landlord's approval shall be given by the OCPRC Director or his or her designee. Landlord's approval of a particular decoration or alteration shall not be deemed consent to future decorations or alterations.

10. Assignment and Sublease of Premises. Tenant shall not assign or sublease the Premises or any portion thereof.

11. Access to the Premises. Tenant shall allow Landlord and Landlord's agents reasonable access to the Premises to inspect, repair, alter, or improve the Premises. Landlord and Landlord's agents shall have immediate access to the Premises in case of an emergency or if an emergency repair to the Premises is required. Tenant shall also allow insurance carriers and representatives, fire department inspectors, police, or local health authorities to inspect the Premises. Tenant shall allow Landlord or Landlord's agents to show the Premises to prospective tenants or purchasers at reasonable times during the sixty (60) days prior to the expiration of this Lease.

12. Vacation or Abandonment of the Premises. If Tenant removes substantially all Tenant's property from the Premises for a period of thirty (30) days, Landlord may immediately enter and redecorate the Premises without abatement of rent and proceed as if Tenant terminated this Lease. These acts by Landlord shall not affect Tenant's obligations under this Lease. If Tenant abandons the Premises before the Lease expires, all rent for the remainder of the term of the Lease shall immediately become due.

13. Damage or Destruction of the Premises. If a casualty partially destroys the Premises but they can be restored to a tenantable condition within thirty (30) days, Landlord shall repair the Premises with reasonable dispatch; however, Landlord's obligation to repair the Premises shall be limited to the amount of insurance proceeds actually received by Landlord. Tenant's obligation to pay rent shall be suspended while the Premises are untenantable. If a casualty damages the Premises to the extent that they cannot be restored to a habitable condition within thirty (30) days, either Party may terminate this Lease by giving the other party written notice within fifteen (15) days after the casualty. Landlord shall not be liable for any reasonable delay or for providing housing for Tenant during repairs.

14. Termination of Lease.

14.1. Tenant may terminate this Lease for any reason upon thirty (30) days written notice to Landlord.

14.2. Landlord may terminate this Lease for any reason upon ninety (90) days written notice to Tenant.

14.3. Upon termination of this Lease, Tenant shall surrender the Premises to Landlord in the same condition they were upon commencement of Lease, normal wear and tear excepted. Upon termination of this Lease, Tenant shall also notify Landlord of the move-out date, return all keys to the Premises to Landlord, and transfer all utility and service accounts into the name of the "County of Oakland."

15. Default of Lease and Landlord's Remedies.

16.1 If Tenant defaults on any obligations under this Lease or misrepresents any information in the application for this lease, Landlord may, on written notice to Tenant, terminate the Lease and enter the Premises as permitted by law; Tenant and any other occupants shall surrender the Premises to Landlord by the date stated in the notice. If Landlord terminates the Lease, Landlord may recover Landlord's expenses for enforcing Landlord's rights under the Lease and applicable law, including court costs and attorney fees, from Tenant, as permitted by statute; and rent for the rest of the term of the Lease shall immediately become due. Tenant may not be liable for the total accelerated amount because of Landlord's obligation to minimize damages, and either party may ask a court to determine the actual amount owed, if any. If Tenant fails to pay rent or any other sums when due to Landlord, Landlord serves a notice of default on Tenant as required by law, and Tenant fails to remit the amounts due before the notice period expires, the amount of court costs and attorney fees incurred by Landlord in enforcing Landlord's remedies and allowed by statute shall be added to the amount of the arrearage.

16.2 It is a violation of this Lease if Tenant, a member of Tenant's household, or any other person under Tenant's control unlawfully manufactures, delivers, possesses with intent to deliver, or possesses a controlled substance as defined by Michigan law anywhere on the Premises or surrounding the Premises. Pursuant to Michigan law, if Tenant violates this provision Landlord may serve a written demand for possession for termination of this Lease giving Tenant 24 hours' notice of the Lease termination and demand for possession. Tenant acknowledges that an order of eviction/writ of restitution may be issued by the court immediately after the entry of a judgment for possession. Tenant's initials:_____.

16. Hold Over. Tenant may, with Landlord's permission, continue to occupy the Premises after the term of this Lease expires without renewing this Lease or signing another Lease for the Premises. Such tenancy shall be on a month-to-month basis and subject to the provisions of this Lease except that the monthly rent shall increase by ten (10) percent from the rent for the last month of the term of the Lease, and Landlord may increase rent on thirty (30) days' notice to Tenant.

17. Notices. Any notices under this Lease shall be in writing and delivered to the recipient personally or by first class mail fully prepaid at the following locations:

Tenant: **Chris Rowland**
2866 Watkins Lake Road
Waterford, MI 48328

Landlord: Oakland County Department of

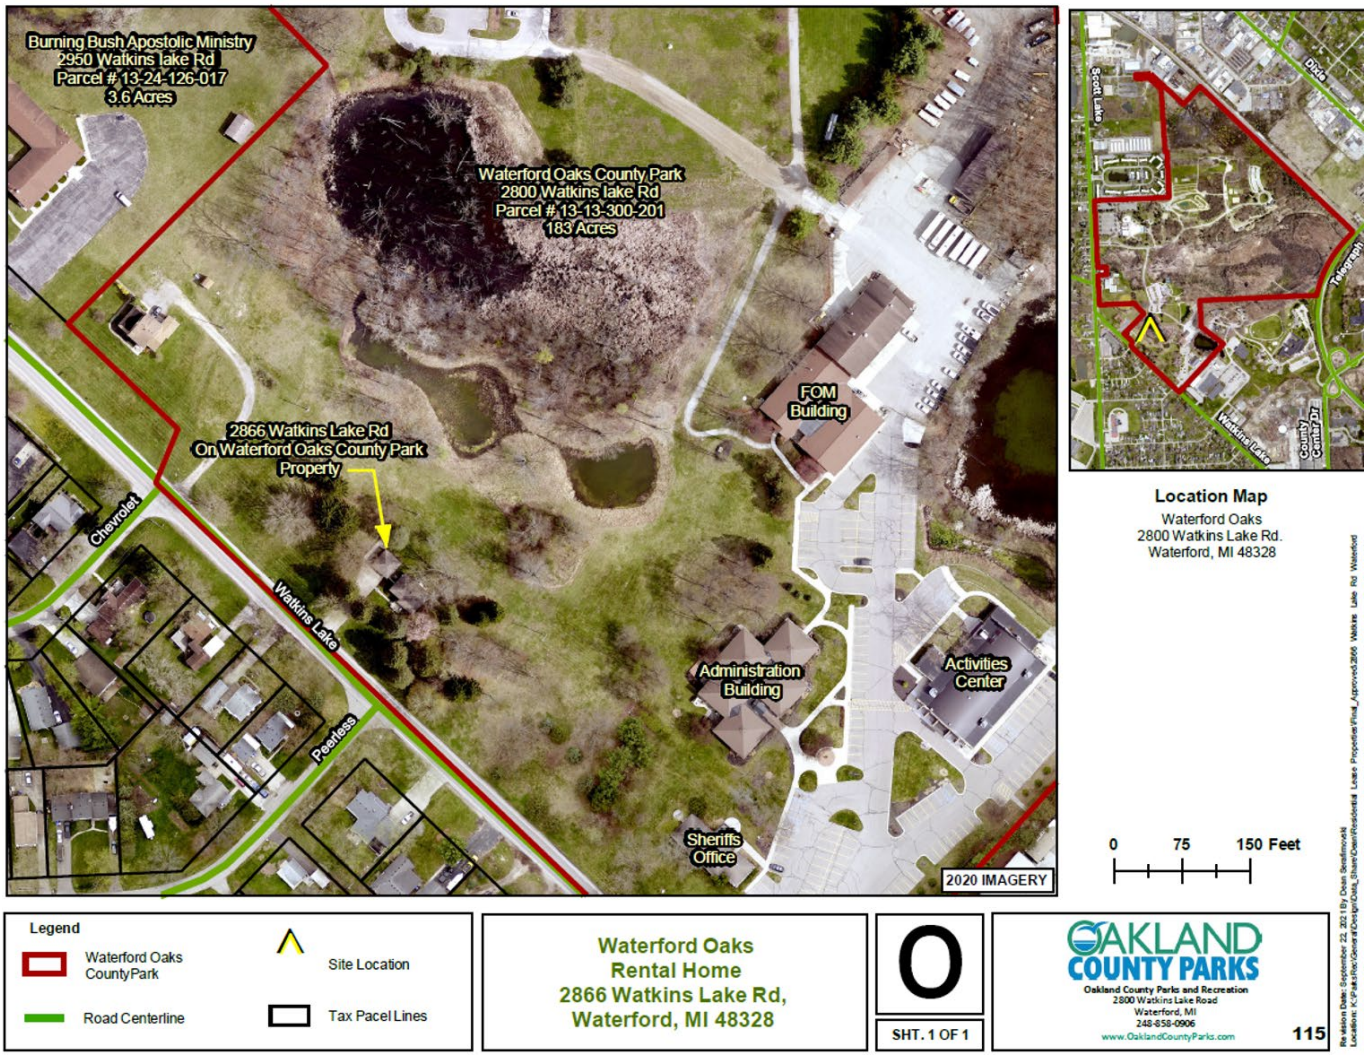
Unless otherwise required by law, the date of service shall be the date of hand delivery or the mailing date.

18. Modifications. No modifications of this Lease shall be binding unless they are in writing and signed by Landlord and Tenant.

19. Whole Agreement. This Lease sets forth the entire agreement between Landlord and Tenant. There are no verbal or written agreements that are not contained in this Lease between the parties.

20. Binding Effect. This Lease shall bind and benefit the parties to the Lease and their heirs, personal representatives, successors, and permitted assigns.

21. Severability. If any provision of this Lease is invalid, unlawful, or unenforceable to any extent, the rest of the Lease and the application of the provision to the persons or circumstances other than those for which it is invalid, unlawful, or unenforceable are not affected.



22. Time of the Essence. Time shall be deemed to be of the essence in the performance of this Lease.

23. Effective Date. This Lease is effective on the date stated in Section 2.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 14

Department: Administration

From: Thomas Hughes, Interim Manager – Park & Enterprise Operations

Subject: Highland Oaks Residential Lease – John Podina

RECOMMENDED MOTION

Move to approve the Residential Lease Agreement between the County of Oakland and John Podina for property at 6555 North Milford Road, Holly, MI 48342, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

In October 2026, the Oakland County Parks and Recreation Commission approved the Residential Property Lease Policy. The purpose of the policy is to set forth procedures and guidelines to manage residential properties located on Oakland County Parks property. The Oakland County Parks and Recreation Director shall oversee the implementation and interpretation of this policy. Under the new policy, residential lease rates will be adjusted to reflect current fair market value. To avoid a substantial and immediate financial impact on existing long-term tenants, any required rate increases will be phased in over a 5-year period.

The property under consideration is located within Highland Oaks County Park at 6555 North Milford Road, Holly, MI 48342. The house has been occupied by John and Carolyn Podina for several years and has been well-maintained. We are requesting to move forward with a 5-year lease for John and Carolyn Podina, incorporating the phased market-rate adjustment schedule. The lease includes the standard terms for early termination by either party as outlined in the Residential Property Lease Policy.

The attached lease agreement has been prepared and reviewed by Oakland County Corporation Counsel.

ATTACHMENTS

1. Residential Lease with Aerial Map – Podina – Highland Oaks

RESIDENTIAL LEASE AGREEMENT

NOTICE: MICHIGAN LAW ESTABLISHES RIGHTS AND OBLIGATIONS FOR PARTIES TO RENTAL AGREEMENTS. THIS AGREEMENT IS REQUIRED TO COMPLY WITH THE TRUTH IN RENTING ACT. IF YOU HAVE A QUESTION ABOUT THE INTERPRETATION OR LEGALITY OF A PROVISION OF THIS AGREEMENT, YOU MAY WANT TO SEEK ASSISTANCE FROM A LAWYER OR OTHER QUALIFIED PERSON.

This Lease Agreement ("Lease") is entered into between the County of Oakland, 1200 North Telegraph, Pontiac, MI 48341 ("Landlord"), by the through its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and **John and Carolyn Podina, 6555 North Milford Road, Holly, MI 48342** ("Tenant") according to the terms and conditions set forth below.

1. Premises. Tenant leases from landlord the real property located at **, 6555 North Milford Road, Holly, MI 48342** ("Premises"), together with any furnishings, fixtures, personal property, and appurtenances provided by Landlord for Tenant's use.

   The detached pole barn and associated storage areas are specifically excluded from this Lease. These facilities remain under the exclusive possession and control of OCPRC and may be accessed and used by OCPRC staff and authorized personnel at any time. Tenant shall not have access to or store personal property within the pole barn or other excluded facilities. Tenant shall not store equipment, vehicles, or trailers outside of the detached pole barn or connect to the pole barn's utilities for any purpose.

2. Term. The term of this Lease shall be for five (5) years, beginning on **January 1, 2027** and ending on **December 31, 2031**. References in this Lease to the term of the Lease shall include any renewal term(s). Tenant shall receive possession of the Premises upon execution of the Lease.

3. Tenant Monetary Obligations.

   3.1. Tenant shall pay Landlord the following rent on or before the first day of each month during the term of this Lease:

January 1, 2027 – December 31, 2027	**$ 947.00**
January 1, 2028 – December 31, 2028	**$ 1073.00**
January 1, 2029 – December 31, 2029	**$ 1216.00**
January 1, 2030 – December 31, 2030	**$ 1378.00**
January 1, 2031 – December 31, 2031	**$ 1561.00**

   3.2. The rent shall be paid by check or money order made payable to the "County of Oakland" and sent to the following address: Oakland County Parks and Recreation, 2800 Watkins Lake Road, Waterford, Michigan 48328 or another address designated by Landlord in writing.

3.3. Tenant shall pay the first monthly installment when Tenant executes this Lease. The first monthly installment shall be pro-rated for such month, if the Lease is executed on another day than the first day of the month.

3.4. Tenant shall pay Landlord a late fee of $25 for each monthly installment not received by Landlord within five days of its due date. This increase shall be considered additional rent and shall compensate Landlord for costs incurred because of late payments. Landlord's right to collect this additional rent shall be in addition to Landlord's right to take action under other provisions of this Lease for Tenant's default in paying rent. Tenant shall pay all additional rent to Landlord promptly after the due date of the delinquent installment. All rent paid after the due date and payments to cover checks that have been returned for insufficient funds must be paid at the place designated for payment, by cashier's check, certified check, or money order.

3.5. During the term of this Lease, Tenant shall obtain and maintain comprehensive personal liability or tenant's form insurance coverage in the minimum amount of One Hundred Thousand Dollars ($100,000.00). Tenant shall also provide the Landlord with a certificate of insurance coverage listing the County of Oakland and its employees, officers, and elected and appointed officials as additional insureds.

3.6. A tenant who has a reasonable apprehension of present danger to him or her or his or her child from domestic violence, sexual assault, or stalking may have special statutory rights to seek a release of rental obligation under MCL 554.601 b.

4. Use of Premises.

4.1. Tenant shall use the Premises for private residential purposes only. No persons other than the following listed person(s) shall occupy the Premises for more than fourteen (14) days during the term of this Lease without the prior written approval of Landlord:

None

Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.2. Tenant shall not do any of the following or allow another person to do any of the following:

4.2.1 Create any excessive noise or public nuisance;
4.2.2 Do anything to the Premises or its surroundings that may be hazardous or that will cause Landlord's insurance to be cancelled or premiums to increase;
4.2.3 Deface or damage any part of the Premises;
4.2.4 Change the locks or install any additional locks or bolts without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;
4.2.5 Place a waterbed or other heavy article on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee;

4.2.6 Install any equipment or appliances that, in Landlord's opinion, would cause any unsafe conditions on or around the Premises;

4.2.7 Accumulate refuse on or around the Premises that might pose a health hazard to Tenant or to the surrounding properties;

4.2.8 Permit any flammable liquids or explosives to be kept on or around the Premises; and

4.2.9 Bring any animals on the Premises without Landlord's prior written approval. Landlord's approval shall be given by the OCPRC Director or his or her designee.

4.3 Tenant Duties.

4.3.1 To the extent permitted by law, Tenant shall secure and protect the Park Property and facilities therein, especially during "Park Closed" hours. This shall include contacting and coordinating with police, fire or other agencies as may be required and the preparation of an Unusual Incident Report as required by Landlord.

4.3.2 Tenant shall arrange for emergency repair and maintenance services for Park Property and facilities, as needed.

4.3.3 Tenant shall make reports to the Park Supervisor or other entity as may be required by Landlord.

4.3.4 Landlord shall install smoke-detection devices for the Premises along with batteries at the time of installation. Tenant must regularly test the devices to ensure that they are operational and if not notify Landlord immediately. Tenants must never remove batteries from smoke-detection devices, except when necessary to replace the batteries.

4.3.5 Tenant shall be responsible for performing routine household maintenance necessary to maintain the Premises, including:

- Adding salt to the water softener, when applicable
- Replacing water filters for sinks, refrigerators, or other Landlord provided potable water systems
- Replacing HVAC furnace filters at recommended intervals.
- Replacing interior and exterior light bulbs serving the Premises.
- Replacing smoke detector and carbon monoxide detector batteries, unless equipped with sealed 10-year batteries.
- Maintaining sidewalks, porches, patios, and other residential areas in a clean and orderly condition.

4.3.6 The performance of "tenant duties," set forth in the Lease does not and is not intended to create an employee/employer relationship between Landlord and Tenant.

5. Use of Illegal Substances. Tenant shall not violate or knowingly allow another person to violate federal, state, or local laws regarding the use of controlled substances or the use of alcohol by minors in or around the Premises. When aware of a violation of this section, Landlord will file a formal police report.

6. Condition of Premises.

   6.1. Except as otherwise expressly stated herein or in an Amendment to this Lease, Tenant acknowledges that no representations were made by Landlord about the condition of the Premises or promises to alter or to improve the Premises before or during the term of the Lease.

   6.2. Throughout the term of the Lease, Tenant shall keep the Premises in a good and clean condition and shall allow no waste of the Premises or any utilities.

   6.3. Except for normal wear and tear, Tenants shall return the Premises to Landlord in the same condition as they were upon commencement of this Lease, including cleanliness.

7. Utilities and Services for Premises. Tenant is responsible for the costs of utilities and services for the Premises and for establishing accounts, if they are not already established for the term of this Lease including but not limited to the following: (a) garbage removal; (b) water and sewer; (c) gas; (d) electricity; (e) ice removal, including salting the driveway and any walks surrounding the Premises or on the Premises; (f) telephones; (g) cable television; (h) Internet; and (i) cleaning for the interior of the building located on the Premises. All accounts for utilities and services shall be in the name of Tenant.

8. Maintenance, Repairs, and Damage to Premises.

   8.1. Landlord shall provide snow removal services for the driveway on the Premises, including plowing and de-icing as follows: Snow removal will generally occur only when snow removal operations are being conducted for parking lots and roadways. Public park facilities, including parking lots, roads, and other public access areas, shall always receive priority over residential properties. Landlord is not obligated to dispatch equipment solely for snow removal at the Premises.

   8.2. Landlord shall provide general lawn mowing for the Premises and line trimming services on a schedule consistent with OCPRC maintenance operations. Mowing frequency shall be determined solely by Landlord based on operational needs and weather conditions.

   8.3. Tenant shall be responsible for clearing snow and applying de-icing materials to sidewalks, entry walkways, porch areas, and all door access points serving the Premises.

   8.4. Tenant shall provide routine landscape maintenance of the Premises, including, but not limited to, weeding, maintaining landscape beds, replenishing mulch as needed, applying fertilizer at Tenant's discretion, trimming small shrubs and bushes, and performing other routine cosmetic landscape upkeep necessary to maintain the Premises.

8.5. Landlord shall provide repair and maintenance for the Premises and its parking lot or parking area, including but not limited to, building infrastructure, HVAC system, utility infrastructure, plumbing and electrical system. Tenant shall notify Landlord, in a timely manner and without delay, when there is a need for repairs to the Premises.

8.6. Except for normal wear and tear to the Premises, Tenant shall be liable for any damage to the Premises or other property of Landlord that is caused by the acts or omissions of Tenant or Tenant's guests, including but not limited to broken glass and lost or broken keys. If damage occurs, Landlord or its agents shall make the necessary repairs and Tenant shall reimburse Landlord for all costs associated with the repairs. Such reimbursement shall be paid by Tenant within thirty (30) days of receiving an invoice from Landlord. If Landlord makes a claim and receives payment under its property insurance for damage to the Premises, then Tenant shall only be liable to Landlord for the amount of the deductible for the property insurance for the Premises. Landlord shall send an invoice to Tenant for the amount of the deductible and Tenant shall pay this amount within thirty (30) days of receiving the invoice.

8.7. To the extent permitted by law, Landlord and Landlord's agents shall not be liable for any damage to property or loss of property that is caused by theft or casualty on the Premises. Landlord recommends that Tenant obtain insurance to protect Tenant's personal property against such loss or damage.

9. Decorations and Alterations to Premises. Tenant shall not alter or decorate the Premises, including but not limited to, removing any furnishings Landlord provides to Tenant, driving nails into the woodwork, painting or using any adhesive material on the walls without prior written approval from Landlord. Landlord's approval shall be given by the OCPRC Director or his or her designee. Landlord's approval of a particular decoration or alteration shall not be deemed consent to future decorations or alterations.

10. Assignment and Sublease of Premises. Tenant shall not assign or sublease the Premises or any portion thereof.

11. Access to the Premises. Tenant shall allow Landlord and Landlord's agents reasonable access to the Premises to inspect, repair, alter, or improve the Premises. Landlord and Landlord's agents shall have immediate access to the Premises in case of an emergency or if an emergency repair to the Premises is required. Tenant shall also allow insurance carriers and representatives, fire department inspectors, police, or local health authorities to inspect the Premises. Tenant shall allow Landlord or Landlord's agents to show the Premises to prospective tenants or purchasers at reasonable times during the sixty (60) days prior to the expiration of this Lease.

12. Vacation or Abandonment of the Premises. If Tenant removes substantially all Tenant's property from the Premises for a period of thirty (30) days, Landlord may immediately enter and redecorate the Premises without abatement of rent and proceed as if Tenant terminated this Lease. These acts by Landlord shall not affect Tenant's obligations under this Lease. If Tenant abandons the Premises before the Lease expires, all rent for the remainder of the term of the Lease shall immediately become due.

13. Damage or Destruction of the Premises. If a casualty partially destroys the Premises but they can be restored to a tenantable condition within thirty (30) days, Landlord shall repair the Premises with reasonable dispatch; however, Landlord's obligation to repair the Premises shall be limited to the amount of insurance proceeds actually received by Landlord. Tenant's obligation to pay rent shall be suspended while the Premises are untenantable. If a casualty damages the Premises to the extent that they cannot be restored to a habitable condition within thirty (30) days, either Party may terminate this Lease by giving the other party written notice within fifteen (15) days after the casualty. Landlord shall not be liable for any reasonable delay or for providing housing for Tenant during repairs.

14. Termination of Lease.

14.1. Tenant may terminate this Lease for any reason upon thirty (30) days written notice to Landlord.

14.2. Landlord may terminate this Lease for any reason upon ninety (90) days written notice to Tenant.

14.3. Upon termination of this Lease, Tenant shall surrender the Premises to Landlord in the same condition they were upon commencement of Lease, normal wear and tear excepted. Upon termination of this Lease, Tenant shall also notify Landlord of the move-out date, return all keys to the Premises to Landlord, and transfer all utility and service accounts into the name of the "County of Oakland."

15. Default of Lease and Landlord's Remedies.

16.1 If Tenant defaults on any obligations under this Lease or misrepresents any information in the application for this lease, Landlord may, on written notice to Tenant, terminate the Lease and enter the Premises as permitted by law; Tenant and any other occupants shall surrender the Premises to Landlord by the date stated in the notice. If Landlord terminates the Lease, Landlord may recover Landlord's expenses for enforcing Landlord's rights under the Lease and applicable law, including court costs and attorney fees, from Tenant, as permitted by statute; and rent for the rest of the term of the Lease shall immediately become due. Tenant may not be liable for the total accelerated amount because of Landlord's obligation to minimize damages, and either party may ask a court to determine the actual amount owed, if any. If Tenant fails to pay rent or any other sums when due to Landlord, Landlord serves a notice of default on Tenant as required by law, and Tenant fails to remit the amounts due before the notice period expires, the amount of court costs and attorney fees incurred by Landlord in enforcing Landlord's remedies and allowed by statute shall be added to the amount of the arrearage.

16.2 It is a violation of this Lease if Tenant, a member of Tenant's household, or any other person under Tenant's control unlawfully manufactures, delivers, possesses with intent to deliver, or possesses a controlled substance as defined by Michigan law anywhere on the Premises or surrounding the Premises. Pursuant to Michigan law, if Tenant violates this provision Landlord may serve a written demand for possession for termination of this Lease giving Tenant 24 hours'

notice of the Lease termination and demand for possession. Tenant acknowledges that an order of eviction/writ of restitution may be issued by the court immediately after the entry of a judgment for possession. Tenant's initials:_____.

16. Hold Over. Tenant may, with Landlord's permission, continue to occupy the Premises after the term of this Lease expires without renewing this Lease or signing another Lease for the Premises. Such tenancy shall be on a month-to-month basis and subject to the provisions of this Lease except that the monthly rent shall increase by ten (10) percent from the rent for the last month of the term of the Lease, and Landlord may increase rent on thirty (30) days' notice to Tenant.

17. Notices. Any notices under this Lease shall be in writing and delivered to the recipient personally or by first class mail fully prepaid at the following locations:

Tenant: **John and Carolyn Podina**
6555 North Milford Road
Holly, MI 48342

Landlord: Oakland County Department of
Facilities Management Property Management
One Public Works Drive, Bldg. 95W
Waterford, MI 48328

and

Oakland County Parks and Recreation
Director
2800 Watkins Lake Road, Bldg. 97W
Waterford, MI 48328

Unless otherwise required by law, the date of service shall be the date of hand delivery or the mailing date.

18. Modifications. No modifications of this Lease shall be binding unless they are in writing and signed by Landlord and Tenant.

19. Whole Agreement. This Lease sets forth the entire agreement between Landlord and Tenant. There are no verbal or written agreements that are not contained in this Lease between the parties.

20. Binding Effect. This Lease shall bind and benefit the parties to the Lease and their heirs, personal representatives, successors, and permitted assigns.

21. Severability. If any provision of this Lease is invalid, unlawful, or unenforceable to any extent, the rest of the Lease and the application of the provision to the persons or circumstances other than those for which it is invalid, unlawful, or unenforceable are not affected.

22. Time of the Essence. Time shall be deemed to be of the essence in the performance of this Lease.

23. Effective Date. This Lease is effective on the date stated in Section 2.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission Agenda Item Memo

Agenda #: 15

Department: Administration

From: Tom Hughes, Interim Manager – Park & Enterprise Operations

Subject: FY 2027 MDNR ORV Law Enforcement Grant Acceptance

RECOMMENDED MOTION

Move to accept the Michigan Department of Natural Resources (MDNR) FY 2027 Off-Road Vehicle (ORV) Law Enforcement Grant in the amount of $15,000, and forward to the Oakland County Board of Commissioners for approval.

INTRODUCTION AND HISTORY

Oakland County Parks (OCP) has been awarded a $15,000 FY 2027 Off-Road Vehicle (ORV) Law Enforcement Grant from the Michigan Department of Natural Resources (MDNR). The funding will support wages for Oakland County Sheriff's Office (OCSO) deputies providing patrol and law enforcement services at Holly Oaks ORV Park.

This marks the eighth consecutive year OCP has applied for this funding. The grant period runs from October 1, 2026, through September 30, 2027.

ATTACHMENTS

1. FY 2027 MDNR ORV Law Enforcement Grant Agreement

Michigan Department of Natural Resources
Law Enforcement Division / Parks and Recreation Division

FY 2026-2027 OFF-ROAD VEHICLE (ORV) LAW ENFORCEMENT PROGRAM
GRANT AGREEMENT

By authority of Part 811 Off-Road Vehicles, 1994 PA 451, as amended.

This Agreement is between the Department of Natural Resources for, and on behalf of, the State of Michigan (DEPARTMENT) and the Oakland County
Federal Tax Identification Number 38-6004876 (GRANTEE).

1. The Agreement period is **October 1, 2026** through **September 30, 2027**.

2. The GRANTEE has been approved by the DEPARTMENT to receive Off-Road Vehicle (ORV) Law Enforcement funding for the following scope of work:

   a. ORV law enforcement and related activities with emphasis on the state-designated ORV trail system and other public land. This funding is not meant to support enforcement of local ordinances enacted pursuant to Section 81131, Part 811 Off-Road Vehicles 1994 PA 451, as amended.
   b. ORV law enforcement program operating expenses.
   c. Contractual services, supplies and materials (CSS&M), including purchase of personal gear, such as boots, gloves, goggles, uniforms, and first aid kits; purchase of parts for equipment used in the program and cost of labor for installation or repair work; purchase of electronics and associated items costing $1,000 or less each.
   d. Purchase of the following equipment for ORV law enforcement purposes:

      None

3. The DEPARTMENT agrees as follows:

   a. To grant to the GRANTEE a sum of money up to 100 percent of the total eligible cost of ORV law enforcement and related activities, operating expenses and CSS&M, but not to exceed

      Fifteen Thousand Dollars **$ 15,000**

   b. To grant to the GRANTEE a sum of money up to 100 percent of the total eligible cost of equipment purchased for ORV law enforcement purposes and authorized under item 2.d. in this Agreement, but not to exceed

      None Dollars **$**

4. This Agreement shall be administered on behalf of the DEPARTMENT through Parks and Recreation Division (PRD).

   a. All reports, documents, or actions required of the GRANTEE are to be submitted to PRD, Department of Natural Resources, P.O. Box 30257, Lansing, MI 48909-7757.

   b. The GRANTEE'S contact for this grant is:

      Name _____ Title _____

      Address _____

      City, State, ZIP _____

      Telephone No. _____ FAX No. _____

      E-mail _____

5. The GRANTEE may not assign or transfer any interest in this Agreement to any other agency, group or individual.
6. To receive reimbursement under this Agreement, the GRANTEE shall submit a completed State Aid Voucher (form PR1988-2) along with required documentation of expenditures and an activity report to the DEPARTMENT by October 6, 2027.
7. The Agreement may be executed separately by the parties. This Agreement is not effective until:
   a) the GRANTEE has signed it and returned it, and
   b) the DEPARTMENT has signed it.

The individuals signing for the parties indicated below certify by their signatures that they have the authority to do so and will ensure the terms of the Agreement are fulfilled.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission
Agenda Item Brief

Meeting date	November 4, 2026
Agenda item	16 - Bloomfield Oaks-Johnson Nature Center Integrated Park Plan
Item type	Action
Lead staff	Alan Jaros, Deputy Director

ACTION REQUESTED

Recommended motion: Move to:

- Approve submission of the Bloomfield Oaks–Johnson Nature Center Integrated Park Plan, encompassing the Park Action Plan, Capital Improvement Plan and Park Operations and Management Plan, to Bloomfield Hills Schools for review under the interlocal agreement; and
- Authorize the Director to make revisions needed to complete the review and approval process, including updates to supporting information, schedules and operating arrangements and changes responding to BHS comments, consistent with the plan's purpose and the interlocal agreement.

This authorization does not amend the interlocal agreement or authorize expenditures beyond approved budgets. Existing BHS, County and Commission approval requirements remain in effect.

AT A GLANCE

The IPP establishes the capital, operating and stewardship framework for Bloomfield Oaks–Johnson Nature Center. It supports accessible outdoor learning, ecological stewardship and facility renewal while preserving the nature center's educational purpose. Staff recommends submission to BHS and authority for the Director to make necessary revisions through the review and approval process.

BACKGROUND AND CONTEXT

- The executed interlocal agreement establishes a 30-year partnership in which BHS retains property ownership and specified school-use rights, while OCP operates, manages, maintains and plans for the park. The IPP brings these responsibilities together through the required Park Action Plan (PAP), Capital Improvement Plan (CIP), and Park Operations and Management Plan (POMP).
- The PAP draws on the property's history, community engagement, visitor information and technical assessments. The CIP describes anticipated improvement types, general locations and intended uses. The POMP establishes the management framework for TreeSchool, public programs, facilities, natural resources, educational animals, maple production and partnerships.
- The initial PAP requires BHS review before OCP final approval and implementation. Section 4.7.6 provides 30 calendar days from receipt for BHS response and establishes the applicable written-approval and deemed-approval provisions. The proposed November 4 action advances the draft for that review; it does not represent completion of the approval process.

PUBLIC VALUE AND STRATEGIC ALIGNMENT

Bloomfield Oaks advances Mission 26 through accessible outdoor experiences, place-based discovery and care of natural resources. The plan preserves the nature center's educational role while broadening the ways residents can participate:

- School field trips, TreeSchool preschool, summer camps, public programs and independent exploration connect visitors with woodland, water, wildlife and the sugarbush. Staff facilitate discovery and investigation through direct experiences with nature.

- Accessible trails, connected learning spaces and participation assistance can reduce barriers for schools and communities. Friends of the Johnson Nature Center and other partners can support outreach, volunteer stewardship and opportunities for people who would otherwise have difficulty participating.

Public subsidy, program revenue, grants and partner support will serve different purposes. Entry and parking remain free for BHS and Oakland County residents under the agreement; program and service fees are distinct. Capital decisions will account for continuing staffing, maintenance, utilities and stewardship needs.

IMPACTS AND COMMITMENTS

Area	Key information
Financial	The Johnson Nature Center agreement establishes no fixed capital contribution. This action creates no additional appropriation. Potential improvements will be evaluated through annual capital and operating budgets, with expenditures subject to applicable Commission, County and procurement processes. Historical estimates and proposed partner support do not establish current funding commitments.
Operating	OCP leads park operations and outdoor learning while BHS retains ownership and specified school-use rights. The POMP coordinates TreeSchool continuity, visitor services, facilities, educational animal care and stewardship. Natural Resources leads maple production; Outdoor Learning leads maple education and heritage programming.
Long-term	The CIP establishes a broad framework for accessibility, trails, learning spaces, animal habitats, maple facilities, buildings, utilities, heritage and natural areas. Inclusion does not guarantee funding or completion. Once approved through the agreement's process, the CIP provides BHS preapproval for included project types to the extent authorized by Section 4.7.4. County authorizations, permitting and reserved BHS rights still apply.
Partners and public	The plan supports school and public participation while preserving the nature center's educational and conservation purposes. Friends of the Johnson Nature Center remains an independent partner. Contributions, volunteer activities and fundraising priorities will be coordinated through documented arrangements that respect donor restrictions and organizational responsibilities.
Risks and dependencies	Timely submission and documented BHS review are necessary to complete the approval process. Remaining coordination includes TreeSchool licensing, animal permits and reconciled equipment and animal transfer schedules. The master includes 30 equipment inventory entries, but transfer designations require confirmation. Ownership transfer does not itself transfer permit authority.

ALTERNATIVES CONSIDERED

- The interlocal agreement requires delivery of the IPP, so taking no action does not fulfill OCP's obligation. The Commission may advance the draft as presented or direct revisions.

NEXT STEPS

Following Commission action, staff will submit the plan to the BHS Representative and document receipt to establish the 30-calendar-day response period. The Director will coordinate responses, incorporate revisions within the authority granted by the Commission, and advance the plan through the agreement's final approval process.

Executive Summary

Bloomfield Oaks–Johnson Nature Center will provide welcoming opportunities to discover, explore and learn through direct experiences with nature. Its woodland, water, wildlife, sugarbush and learning spaces support school field trips, TreeSchool preschool, public programs and independent exploration. Staff facilitate experiences that spark curiosity, encourage investigation and bring learning to life in the places visitors encounter.

This Integrated Park Plan guides the partnership between Oakland County Parks and Bloomfield Hills Schools. BHS retains ownership of the premises, while OCP manages park operations under the partnership agreement. The plan preserves the nature center's educational purpose and establishes direction for public access, investment and continuing care.

The plan has three coordinated components:

- Park Action Plan: establishes the site's purpose, strategic direction, public benefits and partnership framework.
- Attachment A—Capital Improvement Plan: identifies the scope of potential improvements to accessibility, learning spaces, animal habitats, maple production, buildings, utilities, heritage resources and natural areas.
- Attachment B—Park Operations and Management Plan: establishes the operating framework for visitor services, TreeSchool, facilities, stewardship, educational animals, maple sugaring, partnerships and emergency readiness.

Investment will build on existing facilities and verified prior work. Priorities include connected accessible experiences, dependable infrastructure, effective learning environments, animal welfare and ecological resilience. Capital scope will remain distinct from funding authorization and construction scheduling. The Conceptual Site Layout illustrates potential learning areas, heritage experiences, trail connections and supporting facilities. These include a proposed Nature School near the caretaker-house site. Renovation, reuse or replacement of the caretaker house will be evaluated as projects are developed.

TreeSchool continuity is a central operating priority. The documented transition approach provides for BHS to maintain its existing license until OCP's original license is approved and the formal transition is complete, unless the licensing authority directs otherwise. Staffing, facilities, records and family communication will be coordinated throughout that process. [BO-T01]

Operating responsibilities will connect educational programming with dependable site care. Natural Resources will lead maple sugaring production, with Outdoor Learning leading maple education and heritage programming. Friends of the Johnson Nature Center will remain an independent community partner, with contributions and activities coordinated through clearly documented arrangements.

Implementation will proceed through annual operating and capital work programs supported by verified conditions, available resources and evidence of public benefit. Participation, visitor feedback, visitation information, asset condition and stewardship results will inform adjustments over time.

Park Action Plan

The Park Action Plan establishes the direction for managing, maintaining and improving Bloomfield Oaks–Johnson Nature Center. It guides OCP in providing accessible, welcoming opportunities for outdoor learning and recreation while protecting natural resources. The plan brings together the park's public purpose, existing conditions, priorities and partnership responsibilities to guide decisions about programs, stewardship, operations and investment.

1.1 Purpose and Controlling Framework

This Integrated Park Plan provides a coordinated framework for Oakland County Parks and Bloomfield Hills Schools to sustain Johnson Nature Center's conservation and educational purposes, serve the wider community and responsibly manage the property. It guides OCP's management of Bloomfield Oaks while preserving BHS ownership, school use and other rights established in the interlocal agreement. [BO-A01, Introduction; §§2.3–2.6, 4.3, 4.18.1]

The plan follows the structure required by the agreement:

- Park Action Plan (PAP): Establishes the park's purpose, conditions, strategic direction and management priorities.
- Attachment A — Capital Improvement Plan (CIP): Identifies anticipated improvement types, locations and intended uses, providing a framework for evaluating and advancing investments.
- Attachment B — Park Operations and Management Plan (POMP): Establishes the framework for daily operations, maintenance, staffing, programming and coordination.

These components work together. The PAP establishes direction; the CIP describes the improvements OCP may pursue within the approved scope; and the POMP explains how the park will be managed. [BO-A01 §4.7]

The interlocal agreement and its executed amendments establish the parties' responsibilities and govern the plan's approval and update requirements. Approval of this plan provides the planning authority described in those documents, including BHS preapproval of included capital project types to the extent provided in §4.7.4. Applicable County authorizations, permits and expressly reserved BHS rights continue to apply. [BO-A01 §§4.4, 4.7.2–4.7.6, 6.12]

The plan addresses near-term needs within the longer perspective of the 30-year partnership. The CIP establishes a five-year capital planning framework. Some needs will be addressed through routine maintenance and operations. Others may advance as funded improvements or remain longer-term concepts for further evaluation. Inclusion in the CIP does not guarantee funding or implementation, and the plan does not require every potential improvement to be completed within the planning period. [BO-A01 §§2.1, 4.7.4]

The July 2023 Johnson Nature Center Master Plan provides the starting point for identifying potential capital improvements. Its proposals will be evaluated for continued relevance, current conditions, public benefit, operating needs and available resources. The CIP will identify the improvements carried forward, refined or added through this planning process. The earlier plan's recommendations and estimates do not, by themselves, establish current funding or implementation commitments. [BO-B01; BO-A01 §4.7.4]

The appendix binder will preserve supporting assessments, maps, historical plans and other records, with references in the report directing readers to the relevant evidence. These records retain their original dates, scope and limitations; their inclusion does not adopt every recommendation, estimate, schedule or proposed term. The plan distinguishes existing conditions, approved commitments and potential improvements. Proposed partner terms remain proposals until accepted through the appropriate process.

If this plan conflicts with the signed interlocal agreement or an executed amendment, the agreement or amendment takes precedence. OCP and BHS representatives will clarify how it applies, seeking legal or technical advice when needed.

1.2 Property History and Public Purpose

Johnson Nature Center developed through Bloomfield Hills Schools' commitment to learning beyond the classroom. The July 2023 master plan identifies 1968 as the year the district acquired the property and describes its subsequent development as a place where students and community members could learn through direct experiences with nature. This educational purpose remains central to the site's identity. [BO-B01, Phase 1, p. 4]

The nature center's published history describes Richard and Carol Olsen's planting and pond development before their 1968 sale to BHS. Additional district acquisitions supported a nature center dedicated in 1970 to advance science education. These changes illustrate how human care and land use helped shape today's landscape. [BO-H03]

The landscape reflects both natural processes and human use. Woodlands, water features and trails provide settings for observing wildlife, exploring seasonal change and understanding relationships among people, land and water. The visitor center, maple sugaring facilities and log cabin support interpretation and hands-on learning. The cabin was built in the 1980s as a reproduction for historical interpretation; it is not an original nineteenth-century building. Together, these resources allow the nature center to connect environmental education with the ways people have used and cared for the landscape. [BO-B01; BO-B02, Appendix A, building inventory; BO-H03]

Earlier planning established a foundation for this work. The 2018 joint strategic plan for Bowers School Farm and Johnson Nature Center emphasized learning through experience, closer coordination with classroom instruction, community participation and conservation of green space. The 2023 Johnson master plan continued that direction while identifying opportunities to improve accessibility, visitor experiences, facilities and operational sustainability. Its engagement findings also emphasized the value visitors placed on the site's peaceful character and opportunities to experience nature. [BO-B02; BO-B01, Phase 1, pp. 4–5]

The partnership between Oakland County Parks and Bloomfield Hills Schools carries this educational legacy into Bloomfield Oaks' role within the county park system. BHS retains ownership and the school-use rights established in the interlocal agreement, while OCP's management provides a framework for sustaining the property and serving the wider community. [BO-A01, Introduction; §§2.3–2.6, 4.3, 4.18.1]

The public purpose of Bloomfield Oaks is to protect the natural setting that makes these experiences possible and help people develop knowledge, confidence and a lasting connection to the outdoors. School field trips and place-based discovery, community programs and informal visits should reinforce that purpose. Future improvements should remove barriers to participation, support meaningful outdoor experiences and sustain the landscape's ecological health and quiet character.

1.3 Location and Existing Conditions

Location and Landscape Character

Bloomfield Oaks–Johnson Nature Center is located at 3325 Franklin Road in Oakland County. The interlocal agreement describes approximately 43.4 acres owned by Bloomfield Hills Schools, with the premises subject to confirmation by survey and title review. The property combines wooded landscapes, pond and stream environments, trails, educational facilities and supporting operational spaces. These features provide the setting for school field trips and place-based discovery, community programs and informal outdoor recreation. [BO-A01; BO-B01; BO-E01]

The nature center's character comes from the relationship between its natural areas and places for learning. Visitors move between indoor classrooms, wildlife observation areas, maple sugaring facilities, the interpretive log cabin and outdoor activity spaces. Much of the visitor experience depends on the landscape itself: its seasonal changes, wildlife, water and opportunities for quiet exploration.

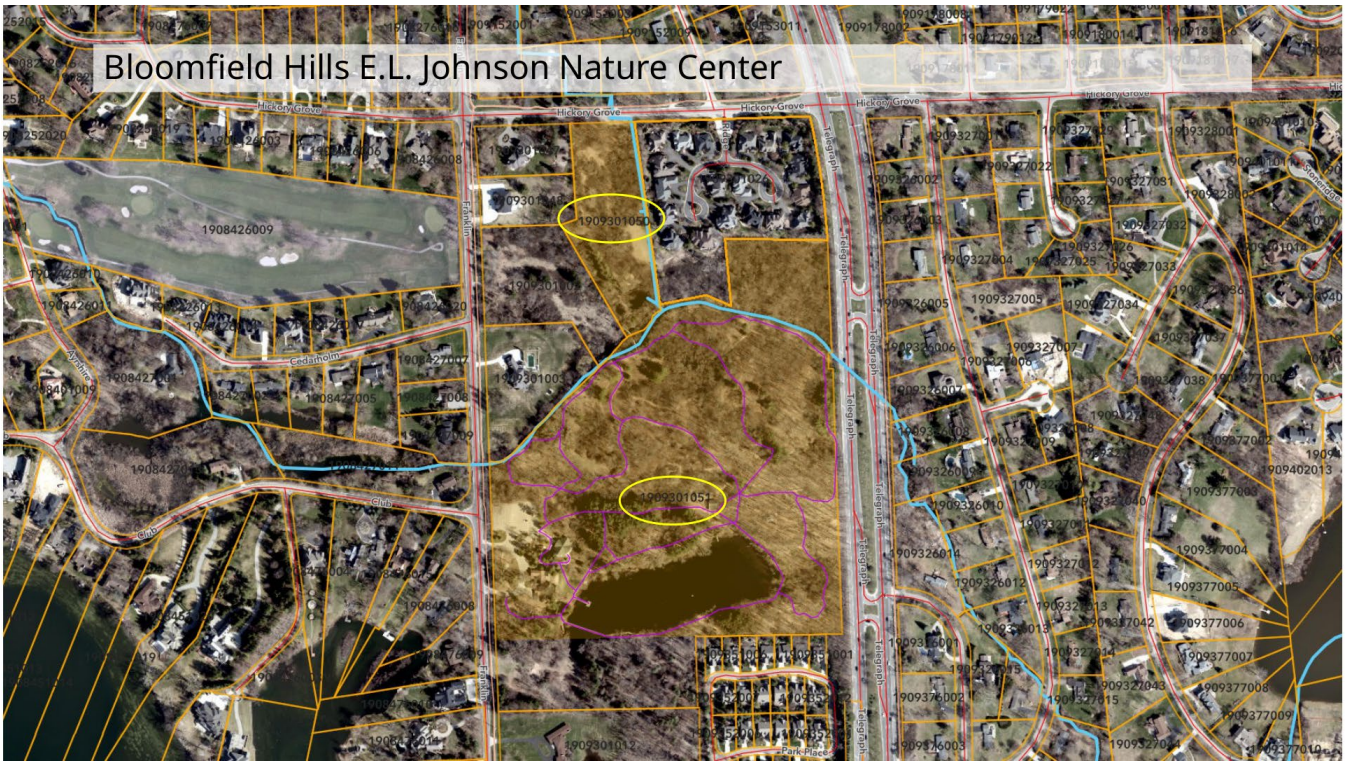

Figure 1. Aerial context for Johnson Nature Center. Supplied aerial slide; imagery date and boundary currency are unverified. Parcel lines and highlights are contextual and do not establish the agreement premises or authorize acquisition. [BO-V01]

Arrival and Principal Facilities

Principal buildings and visitor facilities are concentrated along the western side of the property near Franklin Road. These include the Visitor Center, the caretaker house—a 2,100-square-foot residential ranch—service facilities and animal enclosures. Trails connect this area with the pond, cabin and barn, sugar shack, observation areas and other outdoor destinations. [BO-B01, Phase 1, pp. 11–17; BO-U01]

The Visitor Center provides indoor learning, exhibit and support spaces. Outdoor facilities extend those experiences into the landscape through wildlife observation, maple sugaring, historical interpretation and nature exploration. The Outdoor Classroom is part of this learning environment. Its current configuration and improvements completed since the master plan will be documented in the updated facility inventory.

Parking, service access, storage and utilities support these public and educational uses. Their condition and arrangement should be considered together with visitor circulation, school-group movements and maintenance access.

Accessibility Circulation and Water Management

The 2023 master plan documented barriers to movement between the Visitor Center and outdoor destinations. Drawing on the October 2022 accessibility evaluation, it identified disconnected accessible routes, unstable trail surfaces, steep sections and insufficient information to help visitors understand route conditions. It also identified drainage and periodic flooding affecting portions of the trail system and several activity areas. These

are dated findings that require reconciliation with subsequent improvements and current conditions. [BO-B01, Phase 1, pp. 14–19]

Accessibility and drainage are closely related planning considerations. Routes must support participation while accommodating slopes, water movement, maintenance needs and protection of natural resources. Improvements should connect meaningful experiences across the property and provide reliable information about the conditions visitors can expect.

Facility Condition and Maintenance Baseline

The 2023 facility evaluation identified concerns involving the caretaker house, garage, bridges and docks, portions of the trail system, maple sugaring facilities and other visitor amenities. The assessment considered physical condition, operational usefulness and visitor experience. It provides a starting point for evaluating needs, rather than a statement that every identified deficiency remains unresolved. [BO-B01, Phase 1, p. 17; BO-U01]

The updated facility inventory will distinguish completed work, outstanding needs and changed conditions, with the date and source of each status recorded. This reconciliation will inform the CIP and POMP without treating historical recommendations as current commitments.

The August 3, 2026 fire inspection identified four corrective items: stairwell emergency lighting, sprinkler-system testing and certification, mounting a fire extinguisher in the Bat Cave, and clearing access to the exterior fire department connection. Completion and reinspection records have not yet been verified for this plan. These items should be tracked through operations and maintenance, with capital work identified only where the necessary remedy warrants it. [BO-C01]

Environmental Assessment and Property Documentation

ASTI's June 15, 2026 Phase I Environmental Site Assessment reported no recognized environmental conditions, controlled recognized environmental conditions or significant data gaps within its assessed property. It treated the former orchard as a de minimis condition in the context of continued use. The report did not include soil, water or air sampling. [BO-E01, pp. 1–4]

The assessment describes approximately 34.57 acres and parcel identifiers that differ from the interlocal agreement. Its findings therefore must be tied to the area actually assessed until the survey, title information and assessment boundary are reconciled. Future project evaluation should consider the report's scope and assumptions alongside the location and nature of proposed work.

1.4 Community Engagement and Visitors

Community Setting and Public Use

Bloomfield Oaks serves students, families and community members through school field trips and place-based discovery, public programs, camps, volunteer stewardship and informal visits. Trails and natural areas support everyday experiences alongside organized activities. The county partnership creates an opportunity to broaden participation while sustaining the educational relationships and quiet natural setting that people value.

Understanding this public role requires several distinct perspectives: who participates in engagement, who attends organized programs, who visits independently, and who is not yet being reached. Survey responses, program attendance and estimates of total visitation describe different things and should remain separately identified.

The supplied community profile estimates 71,176 residents and 28,625 households within a modeled 10-minute drive, compared with 113 residents and 38 households within a modeled 10-minute walk. Median household

income is $125,167 in the drive area and $241,867 in the walk area, compared with $105,660 countywide. These 2026 Esri estimates describe surrounding residents, not actual visitors or a verified walking route. The small walk-area population reinforces the importance of arrival options beyond walking. [BO-V02, p. 1]

The drive-area profile also reports 9% of households below poverty, 24% with one or more people with a disability, and 10% receiving SNAP, using 2023 ACS five-year data. Its comparatively high median income does not remove the need for affordable participation and accessible experiences. The attached figures provide race and ethnicity, language, age and income context for outreach; they do not establish the demographics of people currently using the park. [BO-V02, pp. 1–2]

What Community Engagement Tells Us

The 2022–2023 master-planning process included stakeholder workshops and a digital survey. The published plan identifies 425 respondents in its Johnson Nature Center visitor segment. Those respondents valued the site as a place for quiet, recreation and connection with nature. The findings also identified limited awareness of available experiences and interest in clearer communication, additional programs and more affordable participation. Some respondents preferred little change and expressed concern that increased attendance or development could diminish the natural setting. [BO-B01, Phase 1, pp. 50–68]

The October 2025 BHS–OCP engagement included an October 20 event at Johnson Nature Center and an online survey open October 6–31. The November 24 summary reports 646 complete, valid online responses across the two facilities and 80 in-person participants. Across the combined survey, 61% supported the potential partnership, 25% needed more information and 14% opposed it. These results concern the partnership discussion at that time and are not Johnson-only results or approval of this plan. [BO-D02, pp. 2–6]

Johnson-specific survey findings provide a clearer basis for priorities. The published report gives the following rounded results; question-specific response counts are not shown in the summary and remain to be verified. [BO-D02, pp. 17–22]

- Existing experiences: 59% reported using trails and hiking opportunities, 46% reported participating in K–12 environmental education programming, and 45% reported visiting the deer pen or rescued animals.
- Offerings rated very important: no-cost trails and hiking and K–12 environmental education each received 82%; maple sugaring events received 59%. The survey's educational category is retained here as a source label. The plan describes OCP's role as facilitating school field trip discovery and experiences where learning comes alive in place.
- Features rated very important: healthy forests and natural areas received 83%, quiet areas and scenic views 73%, boardwalk repairs and improvements 70%, and wildlife viewing areas 62%.
- Ownership and support: 54% considered continued BHS ownership very important and 18% somewhat important. Half reported supporting Johnson in some way, including donations (13%) and volunteering (12%); these are overlapping forms of support, not commitments to future funding.

Written comments called for extended hours, guided hikes, wildlife interpretation and greater awareness, while others sought lower program costs and protection from crowding or development. These comments describe competing expectations rather than a mandate for every suggested improvement. The plan responds by prioritizing natural-area care, quiet access, boardwalk condition, place-based discovery and clear visitor information, with expanded programming evaluated against site capacity. [BO-D02, pp. 23–24]

Both engagement efforts have representation limits. The earlier master plan identified limited responses from nonvisitors and underrepresentation of several demographic groups. The 2025 summary identifies overrepresentation of ages 35–54, women and White respondents, and underrepresentation of ages 25–34 and Black, Hispanic and Asian respondents relative to the service areas. The voluntary engagement results should not be treated as statistically representative of all residents or visitors. These findings support continued

outreach to people whose experiences are less visible in the available responses; they do not establish the demographic composition of all park visitors. [BO-B01, Phase 1, p. 61; BO-D02, Representation]

What Participation Records Show

The Johnson Nature Center Community Report 2025–2026 reports 5,689 school-program participants, 3,101 participants in community programs and events, and 248 camp participants. These are reported program counts, not a verified count of unique individuals or all visits to the property. They should not be added together and labeled annual park visitation without confirming the counting method and overlap. [BO-G01]

The same report documents outreach involving Pontiac's Police Athletic League and Brilliant Cities Pontiac, illustrating ways the nature center has connected with communities beyond its immediate surroundings. It also reports 2,372 stewardship hours contributed by a group of 12 volunteers. Program and volunteer records demonstrate forms of participation that a single attendance total would not adequately describe. [BO-G01]

An anonymized, aggregated mobile location data source estimates approximately 20,000 visits in 2023, 23,000 in 2024 and 30,000 in 2025. These modeled visits are not a direct attendance count or a count of unique visitors. Staff advise that this source appears to capture visitation less reliably at Bloomfield Oaks than at Discovery Oaks; accuracy varies among properties. The figures provide a provisional indication of relative change, rather than a verified total or a basis for setting attendance targets. [Bloomfield Oaks Visitor Data summary, p. 1; staff interpretation supplied October 28, 2026]

The 2025 summary attributes 43% of modeled visits to Bloomfield Hills, 9% to Birmingham, 5% to Waterford and 4% to West Bloomfield. It reports a modeled visitor median household income of $161,000. These estimates offer useful context for outreach and affordability planning, but do not establish the characteristics of every visitor or family. They remain distinct from the surrounding-resident profile and voluntary survey results. [Bloomfield Oaks Visitor Data summary, p. 2]

Year-to-year patterns should be interpreted only after checking that the reporting boundary, coverage and methods are comparable. Staff should consider the mobility estimates alongside program records, visitor feedback and available direct observations. Neither an apparent increase nor a low modeled total establishes remaining site capacity; decisions about growth must also consider habitat condition, visitor experience and operating resources.

Implications for the Plan

The engagement supports a direction that strengthens outdoor learning, access to nature and stewardship while protecting the qualities that make the site distinctive. Clearer information, accessible experiences and targeted outreach can help more people participate. Increased attendance should be considered alongside habitat condition, visitor experience and operating capacity. Success should be measured through who is reached, the quality of the experience and the condition of the place, as well as participation levels.

Community Profile

1.5 Strategic Direction and Mission 26

A Nature Center for Learning and Everyday Use

The proposed long-term direction is for Bloomfield Oaks–Johnson Nature Center to serve as an accessible place for outdoor learning, everyday contact with nature and ecological stewardship. School field trips and place-based discovery, public programs and informal visits should reinforce one another while preserving the quiet setting and natural features that give the property its character.

The plan should strengthen opportunities to observe, explore and care for the natural world. Improvements to buildings, trails and outdoor learning spaces should support that purpose. Program growth and capital investment should be evaluated for their contribution to learning, access and stewardship, together with their demands on the site and its operating capacity.

Access That Broadens Participation

Access should be considered across the full visitor experience: learning that the park exists, understanding what is available, reaching the property, navigating its spaces and participating comfortably. Clear information, accessible routes, welcoming arrival areas and appropriate accommodations should guide improvements. Transportation partnerships and targeted outreach could help connect schools and communities that face barriers to visiting.

Informal visits and organized programs should provide complementary ways to participate. The operating plan should clearly explain general access, program registration and any applicable fees, consistent with the Johnson agreement and OCP policies. Potential improvements to entrances, wayfinding and trail connections should be developed from verified site conditions, property rights and accessibility needs. This section proposes no new fee or access restriction.

Learning That Grows with Participation

Bloomfield Oaks should offer inspirational, educational and aspirational experiences that provide several ways to connect with nature. Each provides value independently. People should be able to enjoy an informal visit, participate in structured learning or pursue sustained involvement according to their interests and circumstances.

Inspirational experiences invite curiosity through a walk, wildlife observation, seasonal discovery or time in a natural setting. Educational experiences develop understanding through school programs, camps, guided exploration and learning for families and adults. Aspirational experiences allow people to pursue an interest through sustained projects, volunteer stewardship, mentorship and deeper study.

The Outdoor Classroom should be considered within this broader learning framework. Its future use and any potential improvements should respond to educational purpose, inclusive participation, supervision needs and documented site conditions. Detailed program and facility proposals belong in the public-services section and CIP.

Stewardship and the Visitor Experience

Quiet enjoyment should be an explicit planning consideration alongside outdoor learning and community participation. Decisions about activity locations, group sizes, scheduling and simultaneous uses should account for effects on habitat and other visitors. Trails, learning areas and quiet spaces should be planned together, with recovery or maintenance periods where conditions warrant. The POMP should translate these considerations into operating practices informed by site conditions and experience.

Potential changes in program scale or physical development should be evaluated against habitat condition, drainage, accessibility, visitor experience and staffing capacity. Restoration and maintenance should be part of the planning and cost of an improvement from the outset. Greater attendance alone should not determine whether a proposal advances.

Mission 26 and Sustainable Public Value

The proposed direction translates Mission 26 into practical choices for Bloomfield Oaks: broaden opportunities to reach and use the park; support active outdoor experiences and community connections; make the landscape a setting for learning; and care for natural resources and public assets over time.

Success should be measured through a small set of practical indicators covering visitation, communities reached, learning, accessibility, visitor experience and ecological condition. Anonymized, aggregated mobile location data can inform visitor origins, demographic patterns and relative changes over time, subject to site-specific coverage and methodological review. Program records should document participation and community reach; participant feedback should help assess learning and visitor experience; accessibility reviews and condition monitoring should identify barriers and resource needs. Each selected indicator should have a defined method, reporting interval and responsible role in the POMP. Numerical targets should follow credible baselines and a realistic assessment of operating capacity.

The five-year CIP should begin with the 2023 master-plan proposals and reconcile each against completed work, current needs and this strategic direction. Each proposal carried forward should identify its intended public benefit, capital scope and estimated ongoing requirements for staffing, maintenance, utilities, supplies and eventual renewal. Assumptions and costs requiring further verification should remain clearly identified. These requirements should inform project selection and sequencing and carry into the POMP and budget development. CIP inclusion does not establish a funding commitment or implementation date.

1.6 Outdoor Learning and Public Services

Bloomfield Oaks should connect people to the natural world through direct experience, facilitated discovery and stewardship. School field trips, early childhood experiences, camps and programs for families and adults should use the woodland, water, wildlife and seasons to encourage curiosity, confidence and deeper connection.

School field trips and place-based discovery remain central to the site’s purpose. Experiences should connect with classroom learning through observation, investigation and opportunities to return across seasons and grade levels. BHS school-use rights will be honored under the agreement alongside opportunities to serve other schools. [BO-A01 §4.18.1]

TreeSchool Nature Based Preschool

TreeSchool is the licensed nature-based preschool program and a central part of outdoor learning at the site. Child-led exploration, play, seasonal investigation and intentional teaching support relationships, independence, problem-solving and comfort outdoors.

The 2026–27 family handbook emphasizes small groups, consistent educators, family communication and an emergent curriculum. Ongoing observation and developmentally appropriate assessment guide individualized learning. The assessment tool may vary by year; families receive developmental information at the beginning of the year and in spring, with assessment continuing throughout the year. [BO-T02, pp. 4–5]

The handbook identifies the Outdoor Classroom as the designated fenced licensed outdoor area and describes exploration elsewhere as field trips requiring family authorization. Approved spaces, restrooms, handwashing, weather shelter, arrival and dismissal, and safe movement will be coordinated with public use and supervision requirements. Current approved boundaries and conditions require license verification. [BO-T02]

The August 2026 transition plan provides for BHS to retain existing licensing until a new OCP license is approved and the formal transition is complete, unless the licensing authority directs otherwise. It identifies the BHS Superintendent as licensee designee and the site director as program leadership at that time. OCP requires an original license, rather than a transfer or variance; the intended transition is the 2027–28 school year, subject to approval and readiness. [BO-T01]

OCP and BHS should coordinate the application, inspections, records and family communication to support uninterrupted operation. Management or employment changes do not complete the licensing transition. The POMP addresses interim compliance, staffing, approved spaces and capacity, child records, emergency arrangements and the effective transition date. Current ages, schedules, tuition and capacity will be verified against current materials.

Public Experiences and Participation

Public programs, camps, guided walks and seasonal experiences should offer opportunities for families and adults alongside informal orientation and interpretation. Wildlife, maple sugaring, pond and woodland ecology, and site history provide themes for discovery. Outdoor Classroom improvements should respond to actual use, accessibility, supervision and maintenance needs.

Program planning should address transportation, price, scheduling, registration, language and disability-related barriers. Practical opportunities for repeat participation should help visitors build familiarity and confidence. Partnerships should have a clear purpose and defined responsibilities; volunteer stewardship should be supported by training and supervision.

Each offering should have an identified purpose, audience, staffing and cost assumptions, and a method for assessing results. Fees and subsidies should follow the agreement and applicable policy. Manageable pilots may test new experiences before expansion. Scheduling should account for school and public use, quiet enjoyment and ecological conditions. Detailed enrollment, staffing and schedules belong in the POMP and operating resources.

1.7 Environment and Heritage Stewardship

Natural resources are the foundation of outdoor learning and the quiet visitor experience. Stewardship should build on the site's restoration history. The 2023 management record identifies 34 management zones; it is a historical baseline to be checked against current conditions. [BO-E02]

Management should protect woodland, prairie, thicket, pond and stream habitats through native vegetation, invasive-species management, regeneration and structural diversity. Vegetation removal should be phased with planting and follow-up work, preserving appropriate screening, wildlife cover and separation between trails and adjacent uses.

Tree care should combine safety with succession and habitat objectives. Inspection and routine care belong in the POMP; substantial renewal may require CIP investment. Pond, stream and wetland areas should be managed as connected resources, with attention to buffers, erosion, drainage and trail impacts. Wet conditions should prompt evaluation of route and design choices rather than automatic filling or widening.

Sugarbush stewardship should connect tree health, regeneration, soil protection and visitor impacts with production practices. Proposed thinning or expansion should receive current forestry review. Volunteer assignments should have defined objectives, training and follow-up care.

Learning activity near the visitor center and Outdoor Classroom should be coordinated with quieter experiences across the woodland, trails, pond, stream and sugarbush. This is planning direction rather than a claim that formal management zones have been adopted. Deer browsing, native regeneration, water monitoring and

prairie treatments, including prescribed fire where appropriate, should be evaluated through qualified review and applicable authorizations. [BO-H05; BO-E02]

Resident educational animals require a separate care program, including inventories, permits, daily care, veterinary support, enclosure maintenance and emergency arrangements. Their educational role complements stewardship of free-ranging wildlife but does not replace it.

Heritage interpretation should explain the people and practices that shaped the landscape, including founding plantings, maple sugaring and the cabin. It should distinguish verified history from reproduction structures and demonstrations of historical periods. Historical and technical review should inform changes to the cabin and related features. An updated management-zone map and prioritized work program should connect stewardship objectives with the POMP and CIP.

1.8 Financial Sustainability and Investment

Public funding, participant fees, gifts, grants and partnerships should sustain the park's educational and conservation purposes. Subsidy may be appropriate when an activity produces clear community benefit or removes barriers. Each offering should have a clear purpose, realistic budget, intentional funding approach and evidence of results.

OCP has fee authority under the agreement. Entry and parking are free for BHS and Oakland County residents; program, rental and other service fees are distinct. All Park Revenue belongs to OCP unless an exception agreed during transition is codified in the PAP. No alternative revenue arrangement is established by this draft. [BO-A01 §§5.1–5.2]

Budgets should recognize full operating costs, including staffing, utilities, buildings, habitat and animal care even when public facilities are closed. TreeSchool costs should be separately identifiable, including teaching, preparation, administration, licensing, supplies and facility support, alongside tuition and any subsidy. Direct program costs and shared site costs should be distinguished. Historical BHS expenditures require adjustment before use as current OCP assumptions.

The Johnson agreement establishes no fixed capital contribution. The CIP reconciles earlier proposals and current needs into project types, locations and intended uses. BHS project-type preapproval under §4.7.4 is distinct from funding authorization or a commitment to implement. Safety, accessibility, condition, educational value, ecology and operating requirements should inform selection. Maintenance and new opportunities may proceed concurrently when resources allow. [BO-A01 §§4.4, 4.7.4]

Gifts Grants and Friends Partnership

Friends of the Johnson Nature Center is an important community and philanthropic partner whose mission aligns with ecological conservation, community outreach, volunteerism and fundraising. Its bylaws provide for administering funds and property for charitable, scientific and educational purposes related to conservation, including land, flora and fauna in the Rouge watershed. [BO-F01; BO-F02]

Friends' financial resources and fundraising relationships can support shared priorities. OCP and Friends should identify opportunities for restoration, outdoor learning, participation assistance and improvements. An annual discussion of priorities can connect potential support with the CIP and program needs while respecting Friends' independence.

Friends' funds remain under its control. Contributions require the organization's authorized decisions and compliance with donor restrictions. Amount, purpose, timing and responsibilities should be confirmed before contributions enter project budgets. OCP and BHS should similarly reconcile ownership, available balances,

restrictions and outstanding commitments associated with other gifts, grants and funds. Reported balances should not be treated as unrestricted resources without that review. [BO-I01]

1.9 Implementation Priorities and Measures

Implementation should sustain life safety, TreeSchool licensing continuity, animal care, utilities and dependable circulation while advancing facility renewal, access and restoration. Priorities should reflect urgency, public benefit and delivery capacity. New experiences need not wait for every maintenance item to be resolved.

Work affecting TreeSchool should be coordinated with the applicable staff. Effects on licensed spaces, utilities and access should be evaluated before work begins, with licensing milestones treated separately from management changes. Construction should account for school visits, camps and public schedules, including temporary closures, communication, alternative arrangements and uninterrupted animal care.

An annual work program should identify tasks, intended results, coordinating leads, supporting roles, resources and dates. It should distinguish recurring operating responsibilities, approved and funded work, and potential improvements requiring assessment. Completed or changed projects should be reconciled against earlier plans, with Friends engaged early where partnership opportunities exist.

Measures should address public access and community reach; learning and repeat participation; TreeSchool licensing and service continuity; restoration and ecological condition; facility condition and service interruptions; and financial performance, subsidy and confirmed external support. Each measure should have a defined method, source, reporting interval and responsible role. Numerical targets should follow credible baselines. Mobility estimates may inform trends and outreach but should not independently establish attendance targets.

Annual review should inform adjustments to programs, maintenance and investment. It does not replace amendment procedures, expenditure authorization or other required approvals.

1.10 Plan Administration and Approval

The agreement is administered by the OCP Director and BHS Superintendent or their successors or written designees. Each party must notify the other of changes to written designees. Applicable staff should coordinate delivery and elevate interpretation or proposed changes to the agreement administrators. [BO-A01 §4.1]

The PAP must be based on Exhibit B, the Preliminary Park Use and Improvement Framework, and prepared under current OCP policies and procedures. The CIP should define improvement types, locations and intended uses with sufficient clarity to preserve the project-type preapproval provided by the agreement. Detailed implementation remains subject to applicable authorization processes. Operating coordination documents do not alter or delegate agreement rights without required consent. [BO-A01 §§4.7.2, 4.7.4, 7.2]

Plan action	Agreement procedure
Initial PAP submission	BHS has 30 days after receipt to submit comments and recommendations. OCP must consider and endeavor to address them. Prior written BHS approval is required before OCP approval or implementation; no response within 30 days constitutes deemed approval under §4.7.6.
PAP update	At least every five years, with at least 60 days for BHS review and comment under §4.7.6.

Plan action	Agreement procedure
CIP update	At least every four years, maintaining a five-year framework, with at least 60 days for BHS review and approval. If not approved, the improvement may not be made unless the parties otherwise agree.
POMP update	At least every five years, with at least 60 days for BHS review and approval. If not approved, the change may not be made unless the parties otherwise agree.

On September 30, 2026, the parties executed the joint extension establishing December 15, 2026 as the deadline for delivery of the final Park Action Plan. The extension does not change the agreement's review and approval requirements. The 60-day update review periods do not establish automatic deemed approval. The approval record will retain submitted versions, receipt dates, comments, responses and approval evidence. [BO-A04; BO-A01 §4.7]

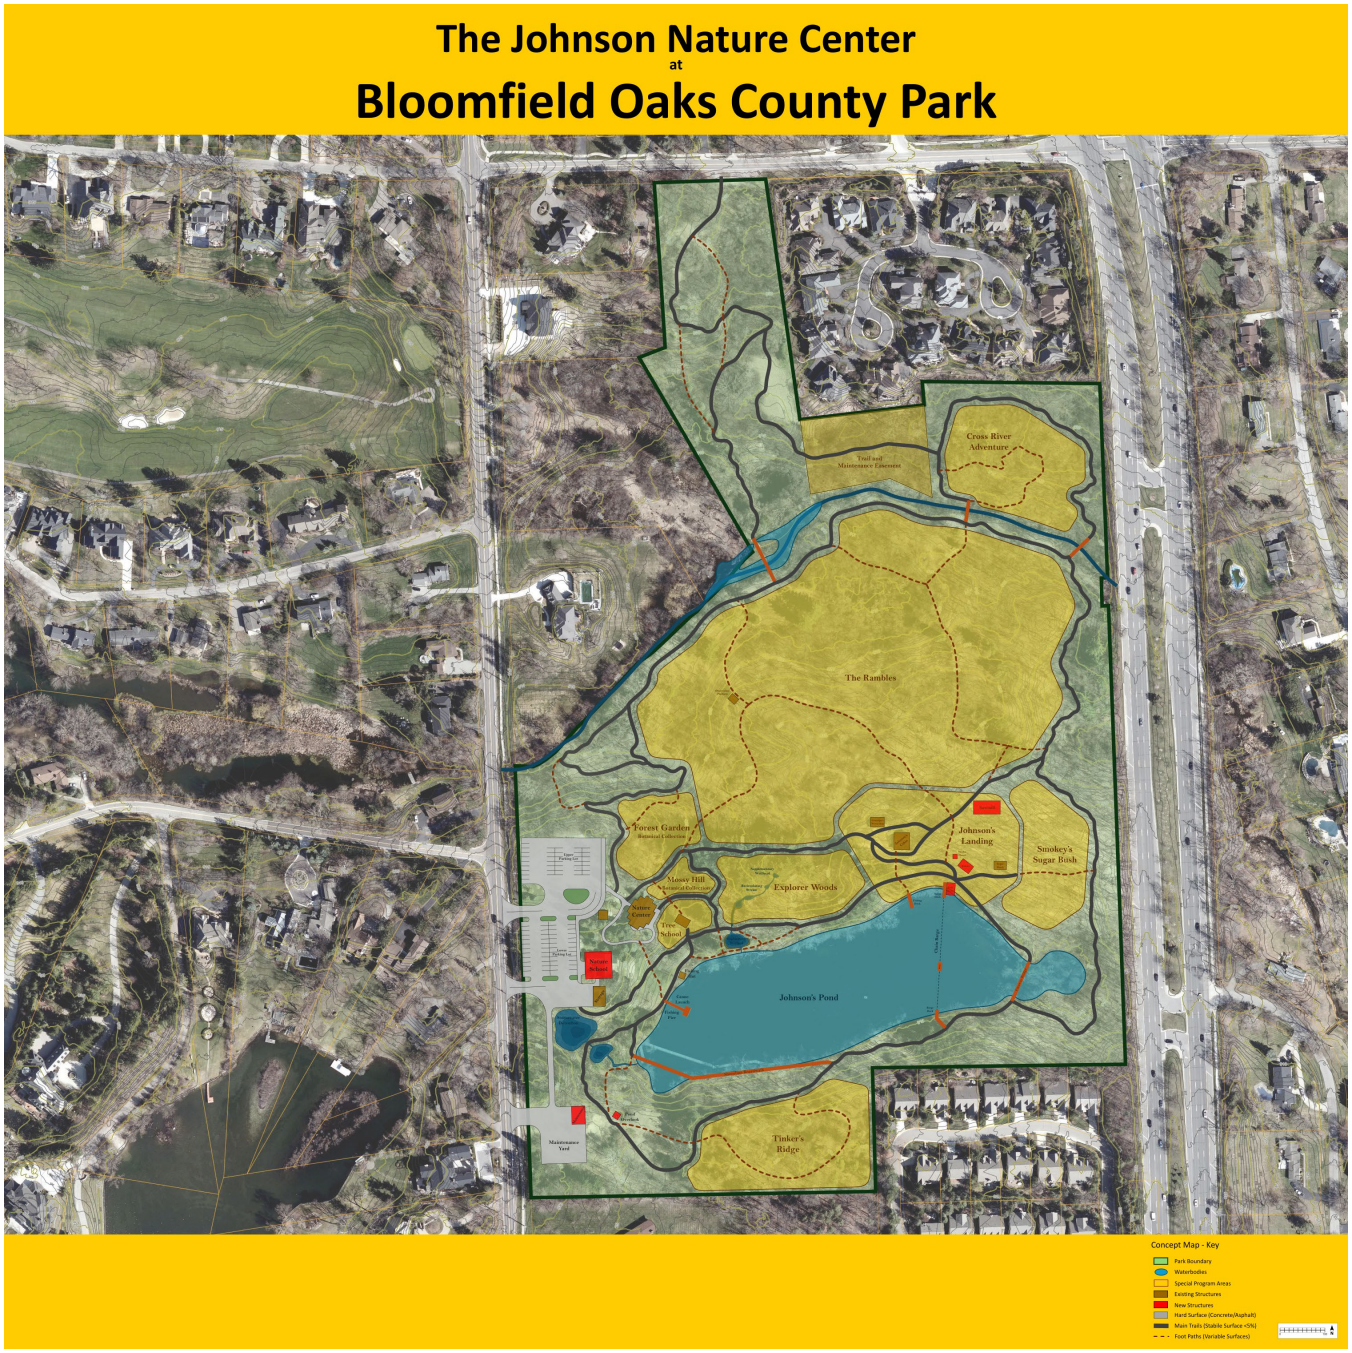
BHS educational activities and events may use the park without charge where they do not conflict with other scheduled uses, with reservations coordinated through OCP and BHS responsible for setup, operation and cleanup as provided in the agreement. The parties will mutually promote the partnership. TreeSchool interim licensing arrangements require separate coordination. [BO-A01 §4.18.1]

Disputes concerning the agreement first go to the parties' representatives, then to non-binding mediation with costs shared equally if unresolved. Applicable restrictions, grants, authorizations and partner records should be maintained with the plan's supporting records. [BO-A01 §4.2]

1.11 Ownership and Continuing Responsibilities

BHS retains ownership of the premises. OCP manages and operates the park under the agreement and the PAP, CIP and POMP. Attached capital improvements are owned by BHS; cost responsibilities should be documented consistently with the agreement. Potential improvements do not establish funding commitments. [BO-A01 §§4.3–4.5]

BHS will transfer the equipment, personal property and animals listed in the Final PAP at no cost to OCP. The agreement and Final PAP together operate as the bill of sale. The final plan therefore requires reconciled schedules identifying the property and animals being transferred; generic descriptions do not substitute for agreed lists. [BO-A01 §§4.10–4.11]



All Bloomfield Oaks equipment, personal property and animals are included in the transfer to OCP, as confirmed by Alan on October 30, 2026. The Equipment Transfer Inventory identifies all 30 source entries as Transfer to OCP: Yes. Final schedules must retain sufficient identifying details and match the versions approved with the PAP; the Animal Transfer Inventory identifies the five animals confirmed by Alan, each included in the transfer. Transfer of ownership does not itself transfer permit authority.

The POMP will identify responsibility for buildings, utilities, grounds, trails, learning spaces and animal care. Temporary or shared transition services should be distinguished from continuing responsibilities. TreeSchool licensing remains separately documented.

At expiration or termination, ownership, return of property and any applicable reimbursement will follow the agreement. This plan creates no additional reimbursement entitlement. [BO-A01 §2.7]

Attachment A Capital Improvement Plan

Conceptual Site Layout

Conceptual Site Layout. Reproduced as supplied. The map illustrates potential project locations, trail connections and program areas. Read it together with the capital scope and implementation provisions in this attachment. Depicted boundaries, alignments, grades and footprints remain subject to verification and project design. The original full-size map and accompanying description are retained in the separate appendix. [BO-V03; BO-B03]

A.1 Capital Planning Framework

The Bloomfield Oaks–Johnson Nature Center Capital Improvement Plan establishes a five-year framework for investment in facilities, accessibility, outdoor learning and natural resources. Projects should support the park's educational purpose, protect its natural character and account for the staffing and maintenance needed to sustain improvements.

The 2023 Johnson Nature Center Master Plan provides the starting project list. Its recommendations will be reconciled with completed work, current conditions, operating needs and the partnership agreement. The master plan's original schedules and cost estimates are historical planning information; they do not establish current budgets or funding commitments. Land acquisition is excluded from this plan. The unsuccessful historical preservation proposal is retained in the source register only. [BO-B01; BO-U03]

The Conceptual Site Layout and accompanying description provide an updated spatial framework for the project types described in this CIP. The following sections incorporate the proposed learning areas, facilities and infrastructure into the scope submitted for BHS project-type preapproval. Locations shown on the map are conceptual and may be refined through site assessment and design, consistent with the governing agreement and applicable property restrictions. Program-area names are working names. Funding, final design and implementation timing will be established through the processes described in this attachment. [BO-V03; BO-B03]

The project types described in Sections A.2–A.8 and the capital reconciliation table are included in the capital scope submitted for BHS preapproval. Design, cost, funding and sequencing may remain to be developed without excluding a project type from that scope. Completed components and recommendations no longer pursued will be identified through reconciliation.

Project recommendations should identify their purpose, location, anticipated use, supporting evidence, estimated cost and funding status. Evaluation should consider safety, accessibility, educational benefit, ecological effects, condition, operating costs and coordination with ongoing programs. Work affecting TreeSchool should be coordinated with the applicable staff.

Section 4.7.4 of the Johnson Nature Center interlocal agreement provides: "The CIP shall establish a five (5) year framework to identify, evaluate, and prioritize potential capital investments at the Park. The CIP serves as a planning and evaluation tool, not a guarantee of implementation. Inclusion of an item in the CIP does not constitute project approval, funding authorization, or a commitment to proceed. The CIP will set forth a process for approvals, authorizations, and commitments to proceed. Inclusion of an item in the CIP constitutes BHS pre-approval for the project type to proceed when funding is available, without requiring additional BHS approval. The CIP may be amended as set forth in the Park Action Plan, but at least every four (4) years OCPRC shall create an updated CIP, which the BHS Representative shall have at least sixty (60) days to review and approve. If the BHS Representative does not approve the CIP, the improvement may not be made, unless otherwise agreed to by the Parties. The updated CIP, approved by the BHS Representative, shall replace the existing CIP and be incorporated into the Park Action Plan as Attachment A." [BO-A01 §4.7.4]

Individual projects will advance through applicable OCP and County planning, budgeting, procurement and project-authorization processes. Recommendations will identify the intended public benefit, proposed scope, estimated capital and continuing operating costs, funding and relevant site constraints. The Director will administer implementation within delegated authority; matters reserved to the Commission or other County authorities will be submitted for approval. Projects outside the approved capital scope and amendments will follow the governing agreement.

A.2 Accessibility Trails Bridges and Boardwalks

Capital improvements may provide a more accessible, dependable and connected route through Bloomfield Oaks–Johnson Nature Center while protecting its natural character and outdoor learning experience.

The proposed capital scope includes:

- Accessible routes: construction or improvement of connections among arrival areas, the visitor center, Outdoor Classroom, pond viewing areas and other learning destinations.
- Trails: rehabilitation, selective realignment and connecting segments, including surface, grading and drainage improvements.
- Bridges and boardwalks: repair, rehabilitation or replacement, with adjustments to alignment, width, approaches and protective features where supported by assessment and design.
- Supporting amenities: wayfinding, route information, resting places and accessible viewing or gathering areas.
- Mobility equipment: acquisition or replacement of equipment that expands access, supported by provisions for storage, charging, maintenance and visitor assistance.

Trail network and connections: development of connected walking loops, selective realignment, seasonal paths and trail connections shown on the Conceptual Site Layout. Main-loop design will pursue the concept's less-than-five-percent slope objective, subject to survey and accessibility review.

Water access and observation: construction or improvement of bridges, boardwalks, fishing docks and piers, canoe access, pond overlooks and observation platforms, with associated approaches and protective features.

Project design should consider the complete visitor journey, including arrival, route continuity and access to meaningful experiences. Improvements should respond to terrain, wet conditions, habitat sensitivity and maintenance capacity. Construction affecting learning spaces should be coordinated with the applicable staff.

Accessibility investment will be informed by the documented barrier assessment and an updated review of current conditions. Project planning will connect arrival areas, buildings and outdoor learning destinations, addressing route continuity alongside individual facility improvements. Recommendations will be evaluated for current applicability, technical feasibility and compatibility with property restrictions before design and budgeting. [BO-C02]

Routine inspections, surface maintenance, vegetation clearance and temporary closures will be addressed in the POMP. Capital rehabilitation and replacement will be addressed in the CIP. Project limits, costs and sequencing will follow condition and accessibility assessments. External pathway connections remain subject to verification of alignment, ownership and feasibility.

A.3 Outdoor Learning Interpretation and Nature Play

Bloomfield Oaks–Johnson Nature Center will strengthen outdoor learning through dedicated learning spaces, nature play and interpretation. The capital scope accommodates improvements to the Outdoor Classroom, a central nature play area, selected play opportunities along trails and interpretive features. Projects will be developed around educational value, accessibility, environmental compatibility and long-term operating needs.

The proposed capital scope includes:

- Outdoor Classroom: renovation or enhancement of learning and play areas, shelter, storage, seating, fencing, gates and supporting access, drainage and sanitation infrastructure.
- Nature play: development of a central play area and selected smaller installations along trails, using landscape features and materials appropriate to the setting, intended ages, accessibility and maintenance requirements.

- Outdoor learning spaces: gathering areas, demonstration gardens, observation stations and supporting amenities for school groups, camps, families and other learners.
- Interpretation: replacement or installation of signs, exhibits and interactive features addressing local ecology, wildlife, water, seasonal change and the site's documented history.

The Outdoor Classroom is an existing learning setting supporting TreeSchool and other appropriate educational uses. Future investment may renew or enhance its learning, play, shelter, storage, enclosure and accessibility features. Project planning will distinguish existing installations from unfinished proposals and new improvements.

The mini treehouse will be evaluated as a separate potential improvement. Before implementation, its construction status, design suitability, applicable licensing and inspection requirements, funding and ongoing maintenance responsibilities will be confirmed. [BO-O01–BO-O03]

Improvements should support both facilitated programs and independent exploration. Locations and designs should preserve quiet experiences, protect sensitive habitats and allow groups to gather without obstructing trails.

Work affecting TreeSchool's licensed spaces should be coordinated with the applicable staff and evaluated against applicable licensing requirements before implementation. Capital work must account for supervision, secure boundaries, arrival and dismissal, restroom access and weather shelter. Shared use should be planned around the preschool's operating needs.

Interpretive and wayfinding improvements will build on an inventory of existing installations, with content reviewed for accuracy, current operating policies, accessibility information and appropriate partner recognition before replacement or reproduction. [BO-O04]

Permanent construction and substantial site improvements will be addressed through the CIP. Curriculum, movable learning supplies, program schedules, inspections and routine maintenance will be addressed through operating budgets and the POMP.

Conceptual Learning Areas

The capital scope includes the following learning settings shown on the Conceptual Site Layout:

TreeSchool: renewal and enhancement of the fenced Outdoor Classroom and its supporting facilities, coordinated with approved licensed spaces.

Explorer Woods: exploratory nature play, wayfinding and opportunities to climb, crawl, create and investigate.

Tinker's Ridge: a nature-based building and creative-play area using managed supplies of logs, branches, stone, sand and other suitable materials.

The Rambles: habitat-based exploration supported by trails and selected landscape features, with visitor activity areas distinguished from ecological management areas.

Cross River Adventure: a low ropes and balance-course setting with supporting access and gathering space.

Educational pods: movable structures and equipment supporting outdoor learning at Bloomfield Oaks and potentially other OCP locations.

Design and operating plans will establish appropriate supervision, inclusive participation, inspection and maintenance arrangements. Activity areas will be coordinated with quiet experiences, habitat protection and separation from maintenance operations.

A.4 Educational Animal Habitats and Care Facilities

Bloomfield Oaks–Johnson Nature Center will support educational animal experiences through appropriate habitats, dependable care facilities and accessible opportunities for observation and learning. Improvements should advance animal welfare and help visitors understand native wildlife, habitat needs and environmental stewardship.

The proposed capital scope includes:

- Animal habitats: renovation, replacement or construction of enclosures and associated shelter, containment and protective features.
- Care and support spaces: improvements for food preparation and storage, cleaning, equipment storage and animal handling, including separation spaces where warranted by care needs.
- Supporting infrastructure: water, drainage, electrical service, ventilation and temperature control appropriate to the animals and facilities.
- Visitor access and interpretation: accessible viewing areas, circulation, educational displays and barriers that support safe observation while providing animals with opportunities for retreat.

Projects should be based on a verified animal inventory, species-specific care needs, facility assessments and applicable permit requirements. Habitat design should consider animal welfare, staff access, cleaning, security, weather protection and emergency response.

The scope allows improvements to the educational animal program without committing to additional animals or species. Any proposed expansion should be evaluated for educational purpose, suitable housing, qualified staffing, veterinary support and ongoing operating costs before animals are acquired.

Habitat and care-facility improvements should be evaluated against the conditions of the applicable animal permits, including documented facilities and handling procedures. The POMP will maintain separate records for live educational animals and preserved specimens, identifying applicable authorizations, responsible permit holders, reporting deadlines and any changes needed during the operating transition. [BO-P01]

The POMP will address daily care, staffing, veterinary arrangements, inspections, emergency procedures and permit administration. Capital improvements will be coordinated with those operating requirements, including temporary care arrangements during construction.

A.5 Maple Sugaring Sugarbush and Heritage Learning

Bloomfield Oaks–Johnson Nature Center will sustain maple sugaring as a signature outdoor learning experience connecting forest health, seasonal change, food production and local history. Capital improvements should support safe operations, accessible participation and the long-term renewal of the sugarbush.

The proposed capital scope includes:

- Sugar shack: renovation, expansion or replacement of the existing facility to support processing, demonstrations, equipment storage and visitor learning.
- Production infrastructure: improvement or replacement of sap collection, transfer, storage and evaporating systems, with supporting utilities, ventilation, fire protection and sanitation appropriate to the intended use.
- Sugarbush renewal: planting, protection of young trees, invasive-species treatment and selective vegetation management supported by an updated forestry assessment.
- Visitor access and learning spaces: accessible connections, viewing and gathering areas, seating, interpretation and separation of visitors from hot equipment and operational activity.
- Supporting amenities: evaluation of restroom options, including a potential accessible composting toilet, where justified by program needs and feasible to maintain.

- Heritage resources: rehabilitation of the cabin and associated interpretive features, with improvements supporting safe access, educational use and preservation of the site's documented history.

Johnson's Landing: development of heritage-learning settings associated with woodworking, maple production, food preparation and historic movement of materials. Potential improvements include a woodshop, sawmill, wood-fired bakery, smokehouse, boathouse and a visitor-operated chain-barge with associated docks. Interpretation will distinguish documented site history from demonstrations of broader historical practices.

The chain-barge and operating demonstration facilities will receive specific design and operating review addressing staffing, participant access, equipment, emergency response and continuing maintenance. These details will be resolved before the affected facilities open.

Facility investment should be coordinated with the productive capacity and health of the sugarbush. Tree inventory, regeneration and tapping practices should inform the scale of production infrastructure. Improvements should allow visitors to observe and participate without compromising tree health or safe operations.

Sugarbush renewal will build on prior restoration planning and verified planting and treatment work. Future investment may include additional native sugar maples, protection from browsing, targeted invasive-species control and improvements supporting long-term regeneration. Project scopes and budgets will distinguish completed work, establishment care, replacement needs and additional restoration. [BO-E03–BO-E06]

The POMP will address seasonal preparation, equipment inspections, tree and tapping records, staff and volunteer training, processing practices, cleaning and storage. Capital projects will address substantial facility, equipment and landscape improvements.

Interpretation should accurately distinguish the age of the cabin structure from the historical period it represents. Proposed changes to heritage features should receive appropriate historical and technical review.

A.6 Buildings Utilities and Visitor Services

Bloomfield Oaks–Johnson Nature Center will maintain and improve buildings and supporting infrastructure to provide dependable public access, effective learning spaces and efficient operations. Capital investment should address building condition, accessibility, program needs and long-term operating costs.

The proposed capital scope includes:

- Visitor center: renovation, reconfiguration or expansion of public reception, exhibits, the Children's Corner, learning and gathering spaces, restrooms, staff work areas and storage.
- Education and support facilities: renovation or construction of indoor learning and operational spaces where existing facilities cannot adequately accommodate demonstrated needs.
- Building systems: repair or replacement of roofs, windows, doors, exterior finishes, heating and cooling, ventilation, plumbing, electrical service, lighting and fire and life-safety systems.
- Site utilities and technology: improvements to water, wastewater, drainage, communications, internet connectivity, security and building controls.
- Arrival and service areas: parking rehabilitation or reconfiguration, accessible parking and connections, group drop-off, service access, waste handling and equipment storage.
- Caretaker house and Nature School: renovation, reuse or replacement of the 2,100-square-foot residential ranch to support a use consistent with the park's purpose. The Conceptual Site Layout depicts replacement with a Nature School; renovation and reuse remain alternatives pending evaluation of condition, program needs and total costs. No alternative is yet selected, funded or scheduled.
- Visitor-service amenities: modest retail, refreshments and supporting facilities where they complement the educational experience and have a feasible operating model.

Nature School: renovation or construction of indoor space supporting TreeSchool, camps and other outdoor-learning programs near the existing visitor facilities and proposed lower parking area.

Maintenance facilities: development of a maintenance yard, building, storage and work areas near the southern Franklin Road frontage. Planning will define the extent of site-maintenance and educational-pod fabrication functions, service access and separation from visitors.

Parking and arrival: rehabilitation, reconfiguration or expansion of the upper and lower parking areas, accessible connections, group drop-off and supporting stormwater facilities. Capacity and layout will respond to program demand, circulation and site conditions.

Supporting infrastructure: utilities and facilities serving the proposed learning areas, including the supplementary wellhead, recirculating stream infrastructure and associated water systems shown on the concept, where supported by technical evaluation.

Projects should be informed by building assessments and verified infrastructure conditions. Renovation and reuse should be evaluated alongside new construction, considering functional suitability, accessibility, energy and water use, maintenance and total operating costs.

Changes affecting TreeSchool spaces should be coordinated with the applicable staff and evaluated for licensing implications. Construction planning should maintain necessary animal care, building protection and essential services, with temporary arrangements and public communication established before work begins.

Routine maintenance, inspections, custodial services and system operation will be addressed in the POMP. Capital rehabilitation, replacement and expansion will be addressed in the CIP.

A.7 Natural Resources Habitat Restoration and Water Management

Bloomfield Oaks–Johnson Nature Center will protect and restore the natural systems that support wildlife, outdoor learning and quiet recreation. Capital improvements should strengthen habitat quality, address erosion and drainage problems, and sustain the landscape’s resilience.

The proposed capital scope includes:

- Habitat restoration: substantial restoration of woodland, prairie, meadow and wetland areas through invasive-species control, native planting and follow-up establishment work.
- Woodland regeneration: tree and understory planting, protection from browsing and selective vegetation management supported by ecological assessment.
- Pond, stream and wetland improvements: shoreline and bank stabilization, native buffers, erosion control and restoration of habitat and water function where supported by assessment.
- Stormwater and drainage: rehabilitation or installation of drainage features, vegetated treatment areas and other improvements that manage runoff from buildings, parking and trails.
- Resource protection: selective trail relocation, barriers and restoration of disturbed areas where needed to reduce damage to sensitive habitats.

Botanical and habitat-learning areas: development of the Forest Garden and Mossy Hill as native-plant and woodland interpretation settings, including planting, browsing protection, accessible viewing and supporting landscape features. Exploratory wetland and other water-learning features may be developed where compatible with existing ecological conditions.

Management of The Rambles may include woodland openings, brush piles, native shrub plantings, retained fallen trees and other habitat features. Proposed excavation, borrow pits, prescribed fire and vegetation changes will be evaluated as specific management treatments. Visitor digging and manipulation of materials will be confined to designated areas.

Potential collaboration with MSU, Extension educators, Master Gardeners and other partners will be developed through agreed roles and available capacity.

Project design should respond to documented conditions and measurable restoration objectives. Vegetation removal should be coordinated with replacement planting, erosion protection and follow-up management. Work should consider wildlife cover, screening, seasonal habitat needs and the character of the visitor experience.

Projects affecting water, wetlands or drainage should receive appropriate technical review and applicable approvals before implementation. Inclusion in the CIP does not establish a need for dredging, water-level alteration or other major intervention.

Restoration budgets should account for establishment and follow-up care. Monitoring, recurring invasive-species treatment, prescribed fire where appropriate, and routine vegetation management will be addressed in the POMP. Substantial restoration projects and associated infrastructure will be addressed in the CIP.

A.8 Capital Priorities Funding and Implementation

The capital scope provides flexibility to improve Bloomfield Oaks–Johnson Nature Center over the five-year planning period. Project selection and timing will reflect verified needs, public benefit, available funding and the capacity to operate and maintain completed improvements.

Projects will be evaluated against the following considerations:

- Safety and continuity: addressing documented hazards, critical infrastructure needs and conditions affecting essential operations.
- Accessibility and public benefit: removing barriers and improving access to meaningful park experiences.
- Learning and stewardship: strengthening educational opportunities, animal welfare, habitat quality and resource protection.
- Asset condition and operating costs: extending useful life, reducing recurring failures and evaluating the full cost of ownership.
- Readiness and coordination: confirming scope, design needs, approvals, funding and opportunities to coordinate related work.

These considerations guide judgment rather than establish a rigid sequence. Urgent repairs, restoration and new learning opportunities may proceed concurrently when resources and site conditions allow.

The annual capital work program will identify each selected project's scope, intended outcome, estimated cost, funding source, operating implications, responsible lead and anticipated schedule. Estimates will be updated as projects advance. Unfunded opportunities will remain distinguishable from authorized expenditures and scheduled work.

Potential gifts, grants and partnership contributions may support implementation. Contributions will enter project budgets only after their availability, restrictions and required authorizations are confirmed. Coordination with Friends of the Johnson Nature Center should connect fundraising opportunities with shared priorities while respecting the organization's independent decisions and control of its funds.

Project sequencing should account for school programs, TreeSchool, seasonal public use, animal care and ecological conditions. Related work should be coordinated to limit repeated disruption and avoid installing improvements that would need to be removed or reconstructed for a later project.

The capital project table will identify location, intended use, scope, estimated cost, funding status, operating implications and anticipated timing as each project is developed. BHS scope approval will be recorded separately

from expenditure authorization. Historical estimates will remain in the supporting records until updated for the proposed work.

Five Year Capital Project Reconciliation

The following project groups are included in the capital scope submitted for BHS project-type preapproval. Current costs, funding and implementation years will be established as projects advance. Completed components will be recorded separately; final boundaries and locations will be confirmed during project development.

Project group and intended location	Current treatment and next definition
Accessible routes and structures throughout the site	Connected loops, trail connections, bridges, boardwalks, water access and viewing structures. Verify survey, accessibility and site conditions.
Outdoor Classroom and conceptual learning areas	TreeSchool, Explorer Woods, Tinker's Ridge, The Rambles and Cross River Adventure: nature play, low ropes and gathering spaces. Define supervision, ecological limits and separation from service operations.
Animal habitats and care areas	Define scope through animal inventory, condition, care needs and permits.
Sugar shack and production infrastructure	Evaluate renovation, expansion or replacement against production needs and sugarbush capacity.
Sugarbush and management zones	Verify planting and treatment; separate establishment care, replacement and substantial restoration.
Visitor center and education spaces	Visitor-center renewal and expansion; Nature School near lower parking and caretaker-house site. Assess program capacity, licensing and continuity.
Caretaker house	Renovation, reuse or replacement remains within scope; concept depicts Nature School replacement. No alternative selected, funded or scheduled.
Utilities parking and maintenance areas	Upper/lower parking, drop-off, stormwater and utilities; southern maintenance yard/building and potential educational-pod fabrication. Define capacity and operating roles.
Johnson's Landing and heritage features	Cabin, woodshop, sawmill, bakery, smokehouse, boathouse, chain-barge and docks. Establish interpretation and facility-specific design and operating requirements.
Botanical collections and visitor amenities	Forest Garden, Mossy Hill, exploratory wetland, recirculating stream and interpretation. Verify ecological suitability and continuing care.

Attachment B Park Operations and Management Plan

B.1 Operating Responsibilities and Coordination

The Park Operations and Management Plan establishes how Bloomfield Oaks–Johnson Nature Center will be cared for and operated to support dependable public access, outdoor learning and environmental stewardship.

OCP will manage park operations and maintenance in accordance with the partnership agreement, the approved Integrated Park Plan and applicable policies. BHS retains ownership of the premises and the responsibilities reserved to it under the agreement. Temporary transition arrangements will be identified separately from continuing responsibilities.

The operating framework will assign responsibility for:

- Public services and outdoor learning: visitor information, program delivery, reservations, school coordination and public communication.
- Facilities and grounds: buildings, utilities, custodial services, parking, trails, bridges, boardwalks and other site infrastructure.
- Natural resources: habitat management, tree care, invasive-species control, restoration follow-up and ecological monitoring.
- Educational animals and collections: daily care, veterinary coordination, enclosure maintenance, specimen records and permit administration.
- TreeSchool: program operations, licensed-space coordination and the respective responsibilities of the license holder and operating staff.
- Emergency readiness: incident response, closures, emergency access, essential-service continuity and coordination with responding agencies.

The Outdoor Learning site supervisor is the coordinating lead for site operations, supported by the Lead Naturalist for daily program delivery, visitor services and outdoor learning coordination. Responsible functions retain authority over their staff, budgets and professional decisions. Cross-unit conflicts will be elevated to the Deputy Director and, as needed, the Director within their respective authority.

The site supervisor will coordinate maintenance, programs, school use and capital work through a shared calendar and a documented process for reporting and resolving service needs. The Lead Naturalist will support daily coordination. Urgent conditions will be addressed promptly; recurring issues will inform maintenance, staffing and capital priorities.

TreeSchool licensing responsibilities will remain explicitly documented during the transition. Changes in park management or staff employment will not be treated as completing the licensing transition. The detailed TreeSchool section will establish the interim arrangements and the conditions for moving to OCP's license.

Operating assignments will be reviewed as transition services end or organizational responsibilities change. Internal assignments do not alter agreement obligations. The companion review tracker will identify the responsible role, required evidence or decision and timing gate for unresolved matters: before adoption, before the affected use or project, or routine implementation. Essential approval and operating conditions remain in this IPP.

Operating Responsibility Schedule

The schedule identifies the responsible functions. Each function will designate backup coverage and maintain current contacts, service frequencies and escalation arrangements in the staff operating schedule. The site supervisor coordinates across functions without replacing the authority of a license holder, permit holder, property owner or responsible unit.

Function	Coordinating lead	Supporting roles
Site calendar visitor services and outdoor learning	Outdoor Learning site supervisor	Lead Naturalist, Operations, BHS, applicable partners
Buildings utilities custodial services and grounds	Operations	Outdoor Learning, technical providers
Trails bridges boardwalks and accessible routes	Operations	Natural Resources, Planning, Outdoor Learning
Habitat restoration and ecological monitoring	Natural Resources within Operations	Outdoor Learning, qualified contractors, volunteers
TreeSchool operations and licensing transition	Applicable Outdoor Learning staff	BHS license holder and designated staff during interim period
Educational animals and preserved collections	Outdoor Learning	Authorized permit holders, qualified care staff, veterinary providers, Operations
Maple sugaring production	Natural Resources within Operations	Operations, trained staff and volunteers
Maple education and heritage programs	Outdoor Learning	Natural Resources, Operations, historical reviewers
Capital planning and delivery	Planning	Operations, Outdoor Learning, Finance, BHS as required
Friends and volunteer coordination	Outdoor Learning	Friends leadership, supervising staff
Inspection findings and facility corrective actions	Operations	Applicable staff, BHS, inspecting authorities
Financial reconciliation and restricted funds	Finance	Outdoor Learning, Operations, BHS, fund holders

Emergency procedures will identify the staff member responsible for coordinating the initial site response during each operating period, together with backup coverage and escalation contacts.

B.2 Public Access Visitor Services and Scheduling

Bloomfield Oaks–Johnson Nature Center will provide welcoming, dependable access to outdoor learning, trails and natural spaces. Operating schedules should support school programs, TreeSchool and public use while accounting for staffing, seasonal conditions, animal care and resource protection.

Grounds access, visitor-center hours and scheduled programs will be communicated separately so visitors can understand what is available before arriving. Changes, closures and access limitations will be posted through appropriate on-site and digital channels.

Visitor services will address:

- Arrival and orientation: clear entrances, parking information, trail maps, destination signs and guidance on available facilities.
- Accessible participation: information about route conditions, accessible amenities, available assistance and how to request accommodations.
- Scheduling: coordination of school visits, preschool operations, camps, public programs, reservations and maintenance.
- Visitor support: a clear point of contact for questions, concerns, lost property and incident reporting.
- Temporary restrictions: procedures for closing and reopening buildings, trails or activity areas when conditions require.

BHS educational activities and events will be accommodated consistent with the partnership agreement, including reservation coordination and avoidance of scheduling conflicts. The operating calendar will distinguish reserved spaces from areas available for general public use.

TreeSchool's licensed spaces and supervision needs will be reflected in scheduling and visitor circulation. Public access to shared areas will be coordinated with the applicable staff.

Routine park entry and parking will remain free for BHS and Oakland County residents as provided by the agreement. Charges for programs, rentals and other services will be communicated separately and administered under applicable fee policies. [BO-A01 §§5.1–5.2]

Visitor feedback, participation records and verified visitation information will inform adjustments to services and schedules. Hours and staffing commitments will be established through operating review and published once confirmed.

B.3 TreeSchool Operations and Licensing Continuity

TreeSchool is the nature-based licensed preschool program at Johnson Nature Center. Its operating model combines child-led exploration, play and intentional teaching through repeated experiences outdoors. Program continuity depends on qualified staff, dependable learning spaces, family communication and clearly assigned licensing responsibilities.

The documented transition plan provides for BHS to maintain the existing license until an original OCP license is approved and the formal operating transition is complete, unless the licensing authority directs otherwise. OCP's application is for a new license; the existing BHS license will not simply transfer. The intended transition is the 2027–28 school year, subject to approval and operational readiness. [BO-T01]

During the interim period, the operating arrangements will identify the licensee designee, program leadership and responsibility for compliance, staffing, records, inspections and communication with families. Employment or management changes will not, by themselves, change the licensing arrangements.

TreeSchool operations will address:

- Staffing and supervision: required qualifications, background checks, training, staffing levels, substitute coverage and supervision throughout the program day.
- Licensed spaces: verification of approved indoor and outdoor areas, capacity and permitted uses, including the Outdoor Classroom. Activities elsewhere on the property will follow applicable authorization and supervision procedures.

- Daily operations: arrival and dismissal, authorized pickup, attendance, restroom and handwashing access, food practices and coordination with other site activities.
- Health and emergency readiness: child health information, medication procedures, incident reporting, severe-weather shelter, evacuation and family notification.
- Educational practice: developmentally appropriate exploration, consistent relationships, observation of children's progress and intentional support for social, emotional and learning needs.
- Family partnership: current handbooks, enrollment information, orientation, regular communication and opportunities to discuss children's experiences and development.
- Records and administration: secure maintenance of required child and staff records, inspection findings, corrective actions and licensing correspondence.

The 2026–27 handbook serves children ages 3–5 and describes enrollment, family communication and daily procedures. Annual schedules and tuition remain in current program materials. Conflicting staffing ratios and class-day descriptions require reconciliation; licensed capacity, staffing and approved spaces remain subject to license verification. [BO-T02, pp. 6, 8–12, 20]

Before the transition to OCP's license, the applicable staff will confirm licensing approval, staffing readiness, approved facilities, records arrangements and family communication. The effective transition date and responsibilities will be documented so there is no gap in accountability or authorized operation.

B.4 Facilities Grounds and Preventive Maintenance

Bloomfield Oaks–Johnson Nature Center will maintain buildings, grounds and infrastructure to support safe, accessible and dependable operations. Maintenance will combine scheduled preventive work, routine inspections and timely responses to reported conditions.

The maintenance program will address:

- Buildings and systems: roofs, exterior surfaces, doors, windows, heating, cooling, ventilation, plumbing, electrical systems and building controls.
- Public and learning spaces: custodial services, restrooms, furnishings, exhibits, the Children's Corner and indoor and outdoor learning areas.
- Trails and structures: trail surfaces, drainage, bridges, boardwalks, steps, railings, viewing areas and signs.
- Arrival and service areas: parking, accessible routes, drop-off areas, waste collection, service access and seasonal snow and ice management.
- Specialized facilities: the Outdoor Classroom, animal enclosures, sugar shack, cabin and caretaker house, coordinated with their respective operating needs.

An asset inventory will identify equipment and facilities, their condition, maintenance requirements and available manuals, warranties and inspection records. Preventive maintenance schedules will reflect manufacturer guidance, applicable inspection requirements, seasonal use and documented conditions. The Equipment Transfer Inventory provides the initial equipment reference. Its reported conditions require field verification; confirmed assets should be added to the maintenance system with identifying numbers and service needs.

Work requests will identify the location, issue, urgency and effect on operations. Conditions presenting an immediate hazard will receive prompt protective action, including restricting access when necessary. Other work will be prioritized according to service impact, risk of further deterioration and available resources. Completion records will document the work performed and any remaining corrective action.

Maintenance affecting TreeSchool, educational animals or other occupied learning spaces will be coordinated with the applicable staff. Work planning will address access restrictions, noise, dust, tools, materials and continuity of essential services.

Grounds practices will support the nature center's ecological purpose. Mowing, vegetation clearance, snow storage and material use should protect native plantings, sensitive habitats, drainage and water quality while maintaining necessary access and visibility.

Routine repair and preventive maintenance will be distinguished from capital rehabilitation or replacement. Recurring failures and significant condition findings will inform the CIP. Buildings awaiting a future-use decision, including the caretaker house, will remain subject to appropriate inspection, security and protective maintenance.

An accessibility corrective-action schedule will distinguish completed corrections, routine maintenance, minor modifications and capital projects. Each unresolved item will identify its location, responsible role, planned response and verification status. Routine checks will include clear routes and maneuvering spaces, functioning access equipment, vegetation clearance and transitions between surfaces. [BO-C02]

Inspection findings will be maintained in a corrective-action register identifying the required response, responsible role, due date and evidence of completion. Where an inspecting authority requires reinspection or acceptance, that documentation will be retained before the item is closed. [BO-C01]

B.5 Natural Resource Stewardship

Bloomfield Oaks–Johnson Nature Center will manage its natural areas to sustain habitat, protect water and soil, and support outdoor learning. Stewardship will build on the site's documented management history, with practices adjusted to current conditions and observed results.

A management-zone map and annual work program will guide activities across woodland, prairie, meadow, wetland, pond, stream and sugarbush areas. Priorities will reflect ecological need, visitor safety, available resources and the capacity to provide follow-up care.

Routine stewardship will address:

- Invasive species: monitoring and targeted treatment, coordinated with native replacement planting and follow-up management.
- Native vegetation and regeneration: establishment and care of native plants, protection of young trees and evaluation of deer browsing or other barriers to regeneration.
- Trees and woodland: condition assessment near occupied areas and routes, succession planning and retention of standing or fallen habitat features where compatible with safety.
- Prairie and meadow: mowing, prescribed fire or other appropriate treatments based on management objectives, qualified review and required authorizations.
- Water and soil: observation of pond, stream and wetland conditions; protection of vegetated buffers; and response to erosion, sediment movement and drainage problems.
- Visitor impacts: monitoring of informal trails, trampling and disturbance, with adjustments to access or interpretation where needed.

Vegetation removal will be phased where necessary to preserve habitat cover, screening and soil stability. Treatment plans will identify the desired condition, follow-up work and how results will be assessed. Work affecting learning areas or public routes will be coordinated with the applicable staff.

Staff, contractors and volunteers will receive assignments appropriate to their qualifications, training and supervision. Specialized work will be undertaken by qualified personnel using applicable procedures and authorizations.

Management records will document treatment locations, methods, dates and results. Monitoring may include repeat photographs, native plant establishment, invasive-species recurrence, tree regeneration and erosion observations. Findings will inform the next work cycle and any substantial restoration proposed through the CIP.

The annual stewardship work program will identify previously planted trees and restored areas requiring follow-up care. Records will track planting locations, survival, condition, protective measures and maintenance needs. Any continuing partner or grant obligations will be verified and incorporated into assigned work. [BO-E04–BO-E06]

B.6 Educational Animal Care and Collections

Bloomfield Oaks–Johnson Nature Center will provide consistent, humane care for its educational animals and responsible stewardship of preserved specimens. Educational use will reflect animal welfare, applicable authorizations and staff capacity.

Separate inventories will be maintained for live animals and preserved specimens. Records will identify species, acquisition history, ownership or custody, applicable permits and supporting documentation. Historical records and exhibit labels will be reconciled with the animals and specimens currently held.

The animal-care program will address:

- Daily care: species-specific feeding, fresh water, cleaning, enrichment and observation, with documented coverage on weekends, holidays and closure days.
- Health and veterinary support: access to appropriate veterinary care, preventive practices, treatment records and procedures for responding to illness, injury or changes in behavior.
- Habitats and equipment: routine checks of enclosure security, shelter, environmental conditions, feeding equipment and staff access.
- Handling and educational use: trained and authorized personnel, appropriate handling practices, limits on public interaction and opportunities for animals to retreat from activity.
- Emergency arrangements: response to animal escape, severe weather, utility failure, enclosure damage and loss of normal access to the site.
- Staff readiness: training, demonstrated competency, substitute coverage and clear escalation procedures.

A permit register will identify each authorization, permit holder, covered species and activities, authorized personnel, expiration date, reporting obligations and relevant facility conditions. Supporting applications, amendments and correspondence will be retained with the permit.

Changes in personnel, animal custody, facilities or educational use will be checked against the applicable authorizations before implementation. Transfer of animal ownership under the partnership agreement will not be treated as transferring permit authority. [BO-A01 §4.11; BO-P01]

Preserved specimens will be managed through documented acquisition and possession records, appropriate storage and display conditions, pest monitoring and handling procedures. Proposed transfers, loans or disposal will receive review against applicable restrictions.

Animal acquisitions will require an identified educational purpose, suitable facilities, qualified care coverage, necessary authorizations and a sustainable operating budget. Capital proposals will account for temporary housing and uninterrupted care during construction.

B.7 Maple Sugaring and Heritage Operations

Bloomfield Oaks–Johnson Nature Center will operate maple sugaring as a seasonal learning experience supported by responsible forest management, dependable equipment and trained staff and volunteers. Heritage

activities will connect visitors with documented history through interpretation and appropriately managed use of the cabin and related resources.

Natural Resources within Operations will lead maple sugaring production, including seasonal preparation, tapping, sap collection, processing, equipment care and production records. Outdoor Learning will lead maple sugaring education and heritage programming, including school visits, public demonstrations and interpretation. The functions will coordinate the seasonal schedule and visitor access during production. [BO-U04]

The maple operation will address:

- Seasonal readiness: inspection, cleaning and preparation of collection systems, tanks, transfer equipment, evaporating equipment and the sugar shack before use.
- Sugarbush management: tree identification, condition observations and tapping records, with tapping practices informed by tree health and qualified guidance.
- Production: documented procedures for sap collection, transfer, storage, processing and finished-product handling, including applicable food-safety requirements.
- Safe operation: trained operators, controlled access to hot equipment and work areas, appropriate ventilation and fire precautions, and clear shutdown procedures.
- Visitor participation: designated gathering and viewing areas, supervised activities and coordination of school visits, public programs and production work.
- Season closeout: equipment cleaning, maintenance, secure storage and review of production and program results.

Operating records will connect tree and sap observations with processing activity, equipment issues and maintenance needs. Existing journals and equipment guidance will inform procedures after review for current applicability.

Staff and volunteer assignments will distinguish production duties from visitor facilitation. Public programming will be adjusted when weather, sap availability, equipment condition or staffing prevents dependable operation.

The cabin and other heritage resources will have procedures appropriate to their condition and authorized uses. Before activities involving heating, cooking, food service or public occupancy, the applicable staff will verify facility suitability and required safeguards. Interpretation will distinguish documented site history from demonstrations of a historical period.

Historical materials, furnishings and learning objects will be inventoried as appropriate, with ownership, handling and care requirements documented. Changes to heritage interpretation will draw on verified sources and appropriate historical review.

B.8 Volunteers Friends and Operating Partnerships

Bloomfield Oaks–Johnson Nature Center will engage volunteers and community partners to strengthen outdoor learning, stewardship and public participation. Assignments will support identified park priorities and reflect the training, supervision and resources needed for successful delivery.

Friends of the Johnson Nature Center is an independent community partner whose mission supports ecological conservation, community outreach, volunteerism and fundraising. OCP and Friends should coordinate priorities and opportunities while maintaining clear responsibility for park operations and the organization’s independent governance and funds. [BO-F01; BO-F02]

The partnership framework will address:

- Shared priorities: periodic coordination of potential projects, educational activities, stewardship efforts and fundraising opportunities.

- Defined responsibilities: written arrangements proportionate to the activity, identifying scope, responsible contacts, resources, scheduling and any financial commitments.
- Volunteer participation: clear assignments, orientation, appropriate screening, training, supervision and records of service.
- Fundraising and contributions: confirmation of donor restrictions, acceptance requirements, purchasing arrangements and responsibility for installation and ongoing care before commitments are made.
- Events and public activities: coordination of site use, staffing, accessibility, visitor communication, setup, cleanup and required authorizations.
- Recognition and evaluation: acknowledgment of contributions and review of participation, results and the staff effort needed to support the work.

Volunteer roles may support habitat restoration, gardens, maple sugaring, interpretation, visitor services and other approved activities. Specialized assignments involving animals, equipment, regulated work or licensed programming will require appropriate qualifications and authorization. Essential services will have dependable coverage and contingency arrangements regardless of volunteer availability.

Friends' funds will remain under the organization's control unless a contribution or other arrangement is expressly authorized. Potential fundraising proceeds will not be treated as available park revenue or committed project funding before the relevant decisions and restrictions are documented.

Other partnerships will be evaluated for alignment with the park's purpose, public benefit, operational feasibility and clear accountability. Recurring arrangements will be reviewed periodically and adjusted when needs or capacity change.

B.9 Emergency Readiness Incidents and Service Continuity

Bloomfield Oaks–Johnson Nature Center will maintain site-specific procedures for responding to emergencies, protecting visitors and staff, and sustaining essential care during disruptions. Procedures will address the needs of school groups, TreeSchool, public visitors, educational animals and personnel working throughout the property.

Emergency planning will address:

- Response and communication: emergency contacts, staff responsibilities, responder access, incident reporting and coordination with applicable agencies.
- Evacuation and shelter: designated routes, assembly locations, suitable shelter and assistance for people who may need support.
- Outdoor incidents: severe weather, missing persons, injuries on trails or near water, and communication from areas away from buildings.
- Building and utility failures: fire, power loss, water or wastewater problems, heating failures and conditions requiring restricted access.
- Specialized operations: animal escape or care emergencies, maple-processing incidents and disruptions affecting licensed preschool operations.
- Closures and reopening: authority to restrict access, methods for notifying affected users, and verification that conditions support reopening.

Staff will receive training appropriate to their assignments and participate in applicable drills or exercises. Emergency supplies, communication equipment and access provisions will be checked on an established schedule. Procedures will account for seasonal staffing and periods when buildings are closed but grounds remain accessible.

TreeSchool will maintain the emergency procedures and records applicable to its licensed operation. Site procedures will be coordinated with those requirements, including child accountability, family notification and reunification.

Continuity arrangements will identify essential functions, backup coverage and alternatives when normal facilities or services are unavailable. Animal care, building protection and other time-sensitive responsibilities will remain assigned during closures.

Incidents and significant near misses will be documented and reviewed. Corrective actions will identify a responsible role and completion status. Emergency contacts, access details and other sensitive operational information will be maintained in controlled staff resources.

B.10 Operating Resources Records and Performance Review

Bloomfield Oaks–Johnson Nature Center will maintain an annual operating work program connecting service expectations with staffing, funding, maintenance and stewardship needs. The work program will distinguish recurring responsibilities, temporary transition arrangements and new initiatives.

Operating budgets will account for program delivery and the continuing costs of caring for the site, including utilities, custodial services, maintenance, natural resources, animal care and administrative support. TreeSchool's operating requirements and licensing responsibilities will be identifiable within the budget and staffing plan.

New or expanded services will be evaluated for purpose, public benefit, staff capacity, full operating cost and funding. Where available resources cannot support the proposed service level, staff will identify practical adjustments and elevate unresolved needs for decision.

Operating records will include:

- Facilities and maintenance: asset inventories, inspections, work orders, service records and unresolved deficiencies.
- Programs and participation: attendance, school use, participant feedback, accessibility requests and available visitation information.
- Licensed and permitted activities: current authorizations, responsible roles, reporting deadlines, inspections and corrective actions.
- Stewardship and animal care: treatment records, monitoring results, daily care documentation and veterinary records.
- Financial and partnership commitments: budgets, actual expenditures and revenue, contributions, restrictions and documented partner responsibilities.
- Readiness and accountability: training records, incidents, corrective actions and continuity arrangements.

Records will be maintained in designated systems with appropriate access, retention and privacy controls. Each recurring reporting obligation will have an assigned role and deadline.

An annual operating review will assess service delivery, financial performance, asset condition, stewardship results and outstanding risks. Findings will inform the next work program, budget and CIP priorities. Measures should be practical to maintain and useful for decisions.

Anonymized, aggregated mobile location data will inform visitor-origin patterns, demographic context and relative changes in visitation. Staff will review reporting periods, site boundaries, coverage and methodology before comparing results. Changes in providers or methods will be documented, and comparability assessed before combining series or interpreting year-to-year change. Modeled estimates, recorded program participation and any direct counts will remain separately identified. The approximately 30,000 visits estimated

for 2025 are provisional and will not be treated as a verified attendance baseline. Public-facing reporting will describe the data generically; source and methodological details will be retained in supporting staff records.

Permit, License and Inspection Register

OCP will track required licenses, permits, inspections and reporting deadlines.

Area	Responsibility
TreeSchool	Coordinate the licensing transition with BHS. See the TreeSchool section for details.
Live Educational Animals	Confirm required permits, authorized staff and reporting duties; coordinate permit changes with the issuing agencies.
Preserved Specimens	Verify possession records and requirements for transfer, loan or disposal.
Fire and Building Systems	Maintain inspection and service records and document completed corrective work.
Restoration and Treatments	Maintain required qualifications, authorizations and treatment records.
Maple Production and Food Activities	Coordinate with MDARD and meet requirements applicable to processing, distribution and demonstrations.

Equipment Transfer Inventory

Source: Farm NC Equipment Inventory updated May 2026 – th, “Current Inventory NC” tab, rows 4–33. This schedule retains all 30 source entries; listed conditions are those reported in the workbook.

Transfer to OCP: Yes for all 30 entries, confirmed by Alan on October 30, 2026. Original workbook transfer cells were blank; this plan records the subsequent transfer direction. Verify identifying numbers and current condition and retain the tractor and separately listed bucket as separate entries. Final schedule approval will be documented with the PAP.

Row Y/N	Equipment and Model	Uses and Notes	Condition
4 Yes	Tractor with Bucket John Deere 855 Type: Tractor	Uses: This is the main tractor that we use for NC operations.	Good
5 Yes	Small Manure Spreader- UTV Fimco Industries- 1/2 yard Type: Grounds Equipment	Uses: Moving small manure loads and spreading in fields Notes: New in 2017; moved from Farm to NC in 2021	Good
6 Yes	Bucket for Tractor John Deere 70A Type: Grounds Equipment	Uses: Loader	Good
7 Yes	Brush Hog John Deere 513 Type: Grounds Equipment	—	Good
8 Yes	Utility Trailer Snow Bear 8' long / single axle Type: Trailer	Uses: Utility hauling on site; not for road Notes: Not for road	Good
9 Yes	Gator John Deere 4 X 2 with dump box Type: Utility Vehicle	Uses: General hauling and towing of trailer Notes: Electric dump	Good
10 Yes	Electric Golf Car Club Car DS Golf Car 2002 Type: Utility Vehicle	Uses: General hauling and towing of trailer Notes: Manual Dump,	Good
11 Yes	Lawn Mower Toro SR4 Push Mower 20" Type: Mower	Uses: Cut Grass	Fair
12 Yes	Chain Saw Stihl MS180 Type: Power Tool	—	Good
13 Yes	Chain Saw Stihl MS251C Type: Power Tool	—	Good

Blank uses or notes are shown as an em dash. Source row numbers preserve the connection to the workbook.

Equipment Transfer Inventory Continued

Source: May 2026 equipment workbook, “Current Inventory NC” tab. Transfer to OCP: Yes for every entry, confirmed October 30, 2026. Conditions are source-reported.

Row Y/N	Equipment and Model	Uses and Notes	Condition
14 Yes	Snow Blower Toro Power Clear 21" Type: Grounds Equipment	Notes: Electric Start	Good
15 Yes	Long Handle Hedge Trimmer Stihl Type: Power Tool	—	Fair
16 Yes	Hedge Trimmer Stihl H576 Type: Power Tool	—	Fair
17 Yes	Hedge Trimmer Toro Electric Type: Power Tool	—	Fair
18 Yes	Weed Wacker Stihl Type: Power Tool	—	Poor
19 Yes	Weed Wacker Shindaiwa T230X Type: Power Tool	—	Fair
20 Yes	Leaf Blower Echo PB 250LN Type: Power Tool	—	Good
21 Yes	Leaf Blower Dewalt 20V DCBL772 Type: Power Tool	Notes: Battery	Good
22 Yes	Hedge Trimmer Dewalt 20V DCHT 820 Type: Power Tool	Notes: Battery	Good
23 Yes	Circular Saw Makita 7 1/4" Type: Power Tool	—	Good

Blank uses or notes are shown as an em dash. Source row numbers preserve the connection to the workbook.

Equipment Transfer Inventory Continued

Source: May 2026 equipment workbook, “Current Inventory NC” tab. Transfer to OCP: Yes for every entry, confirmed October 30, 2026. Conditions are source-reported.

Row Y/N	Equipment and Model	Uses and Notes	Condition
24 Yes	Sawz All Dewalt Type: Power Tool	—	Good
25 Yes	Screw Gun Dewalt 20V DCD791 Type: Power Tool	—	Good
26 Yes	Screw Gun Dewalt 20V DCF 887 Type: Power Tool	—	Good
27 Yes	Screw Gun Dewalt 20V DCD778 Type: Power Tool	—	Good
28 Yes	Screw Gun Milwaukee 18V Fuel Type: Power Tool	—	Good
29 Yes	Table Saw Craftsman 10" 2.5 HP Type: Power Tool	—	Fair
30 Yes	Scroll Saw Craftsman 16" Type: Power Tool	—	Fair
31 Yes	Chop Saw Delta Shop Master 10" Type: Power Tool	—	Fair
32 Yes	Air Compresser Porta Cable 1.6 HP / 20 Gal Type: Power Tool	—	Good
33 Yes	Pressure Washer Simpson 3000PSI MS61043 Type: Power Tool	—	Fair

Blank uses or notes are shown as an em dash. Source row numbers preserve the connection to the workbook.

Animal Transfer Inventory

Source: Current animal list and quantities confirmed by Alan Jaros on October 30, 2026. All five animals are included in the transfer to OCP under the Final PAP. This schedule records the confirmed inventory and transfer direction; it does not represent that PAP approval or ownership transfer has already occurred.

Animal	Quantity	Transfer to OCP
Peregrine falcon	1	Yes
White-tailed deer	1	Yes
Great horned owl	1	Yes
Red-eared slider turtle	1	Yes
Red-bellied cooter turtle	1	Yes

Total: 5 animals. Ownership transfer does not itself transfer permit authority. Applicable permits and individual care records will remain with the operating records. The approved PAP record will identify the final version of this schedule.

Integrated Park Plan Supporting Appendix

Oakland County Parks
Bloomfield Hills Schools

Final review reference edition

October 30th, 2026

33 indexed records and schedules

Using This Appendix

Purpose

This separate reference volume accompanies the Bloomfield Oaks Integrated Park Plan. It brings supporting records together while retaining their dates, original findings and limitations.

Navigation

The contents list gives each record’s opening appendix page. PDF bookmarks link to sections and individual records. A source cover identifies the record and its review context. Each reproduced page carries its source ID, source-page number and continuous appendix-page number.

Reading the Sources

Historical plans, estimates, invoices, proposed activities and past permits retain their original status. Inclusion does not approve a project, establish an available balance, confirm work completion or transfer permit authority. Source-page numbering remains visible; the appendix footer provides the continuous sequence.

Current Interpretation

Source covers explain limitations and current status. All 30 equipment entries are included in the transfer direction; original workbook transfer cells were blank. The Conceptual Site Layout supplement begins on page 968. The governing IPP remains the statement of proposed direction.

Reproduction Method

PDF sources are reproduced in full. Word and PowerPoint sources are converted to PDF. The program tab is transcribed field by field; the equipment schedule is reproduced from the current master. Original page proportions are preserved. Scans and two layered environmental maps are image reproductions; the maps retain the source’s visible layers. Text search is available on other text-bearing pages. Signed-page images are preserved, but this compiled PDF is a reference reproduction, not the digitally signed original.

INTERLOCAL AGREEMENT BETWEEN
THE COUNTY OF OAKLAND
AND
BLOOMFIELD HILLS SCHOOLS
FOR JOHNSON NATURE CENTER

This Agreement (the "Agreement") is made between the County of Oakland, a Constitutional and Municipal Corporation, located at 1200 North Telegraph, Pontiac, Michigan 48341 ("County"), by, through, and administered by its statutory agent the Oakland County Parks and Recreation Commission ("OCPRC") and Bloomfield Hills Schools, a Michigan general powers school district, located at 7273 Wing Lake Road, Bloomfield Hills, Michigan 48301 ("BHS"). County/OCPRC and BHS may each be referred to herein individually as a "Party" and jointly as the "Parties".

INTRODUCTION AND PURPOSE OF AGREEMENT.

A. BHS is the owner of approximately 43.4+/- acres of real property, commonly known as E.L. Johnson Nature Center, with Parcel Identification Numbers of 19-09-301-051, 19-09-301-050, and as more particularly described in the attached Exhibit A and to be confirmed by survey and title in accordance with Section 3.3.3.

B. The Parties desire to have OCPRC operate, manage, plan for, and maintain the Premises as a County Park, for conservation purposes and for public recreation purposes, including, but not limited to, public recreation activities, pathways, trails, and a parking lot for such purposes.

C. To effectuate this desire, the County and BHS enter into this Agreement, pursuant to Michigan law, to delineate the duties and responsibilities of the Parties with respect to operation, management, planning, and maintenance of the Premises as a County Park.

The Parties agree to the following terms and conditions:

1. **DEFINITIONS**. The following words and expressions used throughout this Agreement, whether used in the singular or plural, shall be defined, read, and interpreted as follows:

   1.1. **Agreement** means the terms and conditions of this Agreement, and Exhibits attached hereto, and any other mutually agreed to written and executed modification, amendment, addendum, or exhibit approved in accordance with Section 2.

   1.2. **Bloomfield Hills Schools ("BHS")** means BHS, a Michigan general powers school district, its Board of Education, Board members, administrators, employees, agents, contractors, subcontractors, volunteers, and/or any such persons' successors.

   1.3. **Bloomfield Hills Schools Employee** means any BHS administrator, employee, agent, contractor, subcontractor, and/or any such person's successors or predecessors (whether such persons act or acted in their personal, representative, or official capacities). "BHS Employee" shall also include any person who was a BHS Employee at any time during the Initial Term, or Renewal Term, of this Agreement but, for any reason, is no longer employed, appointed, or elected in that capacity.

   1.4. **Capital Improvement Project** means a project that: (1) costs thirty thousand dollars ($30,000.00) or more; and (2) extends the life cycle of an existing facility or asset on the Premises; replaces, renovates, or remodels an existing facility or asset on the Premises; or adds a new facility or asset on the Premises.

1.5. **Claims** means any alleged losses, claims, complaints, demands for relief or damages, lawsuits, causes of action, proceedings, judgments, deficiencies, liabilities, injuries, penalties, litigation, costs, and expenses, including, but not limited to, reimbursement for attorney fees, witness fees, court costs, investigation expenses, litigation expenses, amounts paid in settlement, and/or other amounts or liabilities of any kind which are incurred by or asserted against a Party, or for which a Party may become legally and/or contractually obligated to pay or defend against, whether based upon any alleged violation of the federal or the state constitution, any federal or state statute, rule, regulation, or any alleged violation of federal or state common law.

1.6. **County** means Oakland County, a Municipal and Constitutional Corporation, including, but not limited to, all of its departments, divisions, the County Board of Commissioners, elected and appointed officials, directors, board members, council members, commissioners, authorities, committees, employees, agents, volunteers, and/or any such persons' successors. The County and OCPRC may be used interchangeably throughout this Agreement to mean either or both.

1.7. **County Employee** means any County employee, officer, manager, volunteer, attorney, contractor, subcontractor, and/or any such person's successors or predecessors (whether such persons act or acted in their personal, representative, or official capacities). "County Employee" shall also include any person who was a County Employee at any time during the Initial Term, or Renewal Term, of this Agreement but, for any reason, is no longer employed, appointed, or elected in that capacity.

1.8. **Day** means any calendar day beginning at 12:00 a.m. and ending at 11:59 p.m.

1.9. **Effective Date.** the date the last Party signs this Agreement.

1.10. **Exhibits** means the following documents, which this Agreement includes and incorporates herein by reference:

1.10.1. **Exhibit A:** describes and depicts the Premises.

1.10.2. **Exhibit B:** Preliminary Park Use and Improvement Framework.

1.11. **OCPRC** means the Oakland County Parks and Recreation Commission, as established by resolution of the Oakland County Board of Commissioners pursuant to Public Act 261 of 1965, MCL 46.351, et seq., which is a statutory agent of the County.

1.12. **Park** means the park, with the name set forth in Section 2.6, located on the Premises, which is owned by BHS and operated, maintained and managed by the County as a County Park pursuant to the terms and conditions of this Agreement, as described in Section 4.18 below.

1.13. **Park Fees and Charges** means the following fees and charges: (1) equipment/facility rental fees; (2) event program fees; (3) sponsorship of events/programs by third parties; and (4) and all other fees and charges charged and collected by OCPRC associated with the use of the Park or the Premises.

1.14. **Park Revenue** means the monies generated from the Park Fees and Charges received by OCPRC and grants, gifts, and donations received by OCPRC or by BHS for the Park or Premises.

1.15. **Premises** means the real property including any buildings and improvements that are described and depicted in **Exhibit A**.

1.16. **Transition Period** means a period of time commencing on the Effective Date and ending on June 30, 2026. Prior to June 30, 2026, the BHS Representative and OCPRC Representative (as defined in Section 4.1) may mutually agree to change the end date of the Transition Period, but in no event shall the Transition Period extend beyond September 30, 2026.

2. AGREEMENT TERM/ REAL PROPERTY DESCRIPTION & TERMINATION.

2.1. **Agreement Term.** This Agreement shall commence on the Effective Date and terminate thirty (30) years from the Effective Date of this Agreement ("Initial Term"). Prior to the expiration of the Initial Term, the Parties may mutually agree to renew this Agreement for up to thirty (30) years, upon mutual written agreement of the Parties ("Renewal Term"). The terms and conditions contained in this Agreement shall not change during the Renewal Term, unless mutually agreed to in writing by the Parties. The approval and terms of this Agreement and any amendments shall be entered in the official minutes of the governing bodies of each Party. An executed copy of this Agreement and any amendments shall be filed by the County Clerk with the Secretary of State.

2.2. **Agreement Amendments.** All amendments or modifications to this Agreement shall be in writing and approved by both Parties and filed as set forth in Section 2.1.

2.3. **Real Property Subject to Agreement.** BHS grants to the County use of the Premises for the purposes and according to the terms and conditions set forth herein.

2.4. **Use of Premises.** On the date the Transition Period ends, OCPRC shall have care, control, and use of the Premises to operate, manage, plan, maintain, and improve the Premises for public recreation activities as a County Park, or as further described and delineated herein, and to provide other recreation activities mutually agreed upon in writing by the Parties. OCPRC shall obtain BHS' prior written consent to use the Premises for any purpose not described herein, and such approved use does not require a written amendment to this Agreement.

2.5. **Fee for Use of Premises.** The County shall not pay a monetary fee to BHS for the use of the Premises pursuant to this Agreement. The Parties acknowledge that the services provided by the County during this Initial Term and Renewal Term of this Agreement are adequate consideration for this Agreement.

2.6. **Designation of Park & Name of Park.** During this Agreement, the Park shall be designated as a County Park and named: "Bloomfield Oaks" with the nature center located thereon named the "Johnson Nature Center."

2.7. **Termination/Expiration.**

2.7.1. **Termination by BHS.** BHS may terminate this Agreement, at any time, if OCPRC is notified in writing at least one hundred eighty (180) days prior to the effective date of termination and any one of the following occur: (1) the Premises is no longer being used for the purposes identified in this Agreement; (2) OCPRC provided BHS with information at any time during the Initial Term or Renewal Term of this Agreement that was false or fraudulent; or (3) OCPRC fails to perform any of its obligations under this Agreement and such failure is not cured within thirty (30) calendar days after written notice of default to OCPRC or, if such default is of a nature that it cannot be cured within the thirty (30) day period, and OCPRC does not proceed to diligently cure the default in a time period

mutually agreed to by the Parties.

2.7.1.1. **Termination by BHS in Absence of Default/Breach.** If BHS terminates this Agreement, in absence of default or breach by OCPRC, then BHS shall reimburse OCPRC the amount of the non-depreciated value of Capital Improvement Projects to the Park, paid for by OCPRC, on the date of the termination notice, or such other period as agreed to by the Parties in writing.

2.7.1.2. **Termination by BHS for Default/Breach.** If BHS terminates this Agreement for default or breach by OCPRC, then BHS does not have to reimburse OCPRC the non-depreciated value of Capital Improvement Projects to the Park paid for by OCPRC.

2.7.2. **Termination by OCPRC.** OCPRC may terminate this Agreement, at any time, if BHS is notified in writing at least one hundred eighty (180) days prior to the effective date of termination and any one of the following occur: (1) the Premises is no longer being used for the purposes identified in this Agreement; (2) BHS provided OCPRC with information at any time during the Initial Term or Renewal Term of this Agreement that was false or fraudulent; or (3) BHS fails to perform any of its obligations under this Agreement and such failure is not cured within thirty (30) calendar days after written notice of default to BHS or, if such default is of a nature that it cannot be cured within the thirty (30) day period, and BHS does not proceed to diligently cure the default in a time period mutually agreed to by the Parties.

2.7.2.1. **Termination by OCPRC in Absence of Default/Breach.** If OCPRC terminates this Agreement in absence of default or breach by BHS, then BHS does not have to reimburse OCPRC the non-depreciated value of Capital Improvement Projects to the Park paid for by OCPRC.

2.7.2.2. **Termination by OCPRC for Default/Breach.** If OCPRC terminates this Agreement for default or breach of BHS, then BHS shall reimburse OCPRC the amount of the non-depreciated value of Capital Improvement Projects to the Park, paid for by OCPRC, before the date of the termination notice, or such other period as agreed to by the Parties in writing.

2.7.3. **Disposition of Personal Property Upon Expiration/Termination of Agreement.** Upon expiration or termination of this Agreement, for any reason, each Party shall retain ownership of personal property purchased by them, unless the Parties otherwise agree in writing. "Personal property" does not include buildings or fixtures attached to the Premises.

2.7.4. **Condition of Park Upon Expiration/Termination of Agreement.** Upon the expiration or termination of this Agreement, OCPRC shall cease all Park use, planning, management, maintenance, and operation, and surrender the Premises to BHS and cooperatively work with BHS to transfer management and operation of the Premises to BHS.

2.7.5. **Payment for Non-Depreciated Capital Improvement Projects Upon Agreement Expiration**. If this Agreement is not renewed at the end of the Initial Term for the Renewal Term, then BHS shall reimburse OCPRC the amount of the

non-depreciated value of Capital Improvement Projects to the Park, paid for by OCPRC, before the date this Agreement expires, or such other period as agreed to by the Parties in writing. Upon the expiration of the Renewal Term, BHS shall not reimburse OCPRC the amount of the non-depreciated value of Capital Improvement Projects to the Park, paid for by OCPRC.

3. **TRANSITION PERIOD.**

3.1. **Transition Period.** This Agreement includes a Transition Period. During the Transition Period, the Parties shall work cooperatively to facilitate the transfer of Park planning, management, maintenance, and operations to OCPRC. Notwithstanding any other provision, either Party may terminate this Agreement, without liability, prior to the end of the Transition Period, if they are not satisfied with the plans for the transfer, planning, management, maintenance, and operations of the Park. No Capital Improvement Projects may commence during this Transition Period.

3.2. **Park Information.**

3.2.1. **Grants & Endowments.** Within thirty (30) days of the Effective Date, BHS shall provide OCPRC copies of any grant agreements, endowment agreements, or other agreements, if any, that impose restrictions and conditions upon the Premises and its use.

3.2.2 **Agreements between BHS and Third Parties.** Within thirty (30) days of the Effective Date, BHS shall provide OCPRC with copies of all third-party agreements relating to the use, management, maintenance, or operation of the Premises, if any. OCPRC is not under any obligation to assume any third-party agreements relating to the management or operation of the Premises.

3.3. **Rights and Obligations During the Transition Period.**

3.3.1. **Park Operation and Maintenance During Transition Period.** During the Transition Period, BHS shall be responsible to operate, repair, and maintain the Premises and pay all costs associated therewith, including utilities (water, sewer/sanitary, electric, and gas).

3.3.2. **County Right to Access and Perform Work on the Premises.** During the Transition Period, the County may access the Premises to plan for maintenance, restoration, repairs, security and improvements to the Premises and only provide programming, mutually agreed to by the BHS Representative and OCPRC Representative in writing.

3.3.3. **Premises Inspections.** During the Transition Period, the County shall inspect the infrastructure and conditions of the Park/Premises and the title for the Premises, including but not limited to, the condition of utilities and their connections, parking lots, trees, buildings, restrooms, pavilions, playground equipment, trails and pathways, and any other structures or buildings located on the Premises. The inspection shall be codified in a written document to illustrate the condition of the Premises at the end of the Transition Period and provided to BHS. Any damage to the Premises due to such inspections, shall be repaired by the County and the Premises shall be fully restored to a condition that existed prior to such inspections. Additionally, any changes to this Agreement that are required based upon the County's inspection of the Park/Premises, including any restrictions or encumbrances relating to title, shall be reflected in an amendment to this Agreement

which shall be mutually agreed upon and entered into by the BHS Representative and the OCPRC Representative to reflect the same prior to the expiration of the Transition Period.

3.3.4. **Preliminary Park Use and Improvement Framework.** The Preliminary Park Use and Improvement Framework, **Exhibit B**, sets forth the use and improvement plan for the Transition Period and shall form the basis of the Park Action Plan described in Section 4.7.

3.3.5. **Park Planning.** During the Transition Period, the County shall: (1) assume primary responsibility for Park planning consistent with the Preliminary Park Use and Improvement Framework; (2) regularly consult with the BHS Representative about such planning; and (3) organize public/community engagement concerning the park development, and planning. The Parties acknowledge that OCPRC has conducted previous public/community engagement regarding this Park and the additional engagement required by this Section will build upon the previous public/community engagement.

3.3.6. **Park Programming.** During the Transition Period, OCPRC may organize and host recreation programs, events, volunteer activities, and other activities on the Premises upon mutual written agreement of the Parties.

3.4. **Mutual Assistance Agreements.** During the Transition Period and thereafter and until the Final Park Action Plan is mutually agreed to by the Parties, the BHS Representative and OCPRC Representative may enter into agreements, as needed, to provide additional services for the operation, repair, maintenance, and programming for the Park and to address the costs associated therewith.

3.5. **Environmental Condition.**

3.5.1. **Environmental Assessments.** During the Transition Period, OCPRC shall examine the Premises and perform a Phase I Environmental Site Assessment (ESA), at its sole cost, and may perform additional environmental assessments that OCPRC deems necessary, in its sole discretion and at its sole cost.

3.5.2. **Copies of Environmental Assessments.** OCPRC will provide BHS with a copy of the Phase I ESA and any other environmental assessments. OCPRC shall take possession of the Premises subject to such Phase I ESA and other environmental assessments performed pursuant to this Section.

3.5.3. **Termination Related to Environmental Assessments.** Notwithstanding any other provision, OCPRC or BHS may terminate this Agreement prior to the end of the Transition Period, if either Party is not satisfied with the condition of the Premises as evidenced by the Phase I ESA or other environmental assessments performed pursuant to this Section.

4. **PARK GOVERNANCE & OPERATIONS.**

4.1. **Agreement Administration.** BHS' Superintendent or his successor or his written designee is BHS' Agreement Administrator (hereinafter "the BHS Representative"). The OCPRC Director or their successor or their written designee is OCPRC's Agreement

Administrator (hereinafter "OCPRC Representative"). Each Party must notify the other Party of any changes to their written designees.

4.2. **Disputes.** All disputes arising under or relating to the interpretation, performance, or nonperformance of this Agreement involving or affecting the Parties shall first be submitted to the BHS Representative and the OCPRC Representative for possible resolution. If the BHS Representative and the OCPRC Representative cannot resolve the dispute, then the dispute shall be submitted to non-binding mediation, and both Parties shall share equally in the costs associated with mediation. If the Parties are unable to resolve the dispute through mediation, then either Party may seek any remedy available as permitted by law, in accordance with the governing law provisions under Section 7.10 of this Agreement.

4.3. **Park Management and Operations.** Except as otherwise provided by this Agreement, OCPRC shall manage and operate the Park in a manner consistent with other OCPRC Parks, OCPRC policies, the OCPRC 5-Year Parks and Recreation Master Plan ("OCPRC Master Plan") the Park Action Plan described in Section 4.7, and any other plans and programs set forth and described herein. OCPRC shall manage, maintain, and operate the Park with OCPRC employees, volunteers, and contractors and subcontractors pursuant to the plans and programs set forth and described herein.

4.4. **Park Improvement Projects.** OCPRC shall be responsible to provide, perform and construct (either directly or through third parties) improvements for the Park. This responsibility and the costs associated therewith shall be addressed in the Park Action Plan set forth in Section 4.7, with the general understanding that OCPRC shall be responsible for the costs associated with such improvements, unless otherwise agreed to by BHS. Where applicable, all improvements and Capital Improvement Projects that are to be completed pursuant to this Agreement or as part of the Park Action Plan pursuant to Section 4.7 shall be done in a professional and workmanlike manner and in compliance with all applicable local, state, and federal laws, including, to the extent applicable, those laws pertaining to school building construction, being the Revised School Code, MCL 380.1 *et seq.*, the School Building Construction Act, MCL 388.851 *et seq.*, the Still-Derossett-Hale Single State Construction Code Act, MCL 125.1501 *et seq.*, and the Michigan Building Code (collectively the "Construction Acts"). All Capital Improvement Projects constructed pursuant to the Park Action Plan shall become an integral part of the Premises, remain on the Premises at the expiration or termination of this Agreement, and shall be owned by the BHS. As such, BHS shall account for depreciation of any Capital Improvement Projects (if constructed) on BHS' financial statements. No Capital Improvement Projects shall occur without the prior written approval of the BHS Representative, unless such Capital Improvement Project is included in the Park Action Plan created pursuant to Section 4.7.

4.5. **Park Maintenance/Repairs.** The responsibility for, provision of, and costs for Park maintenance and repairs shall be set forth in the Park Action Plan described in Section 4.7. Notwithstanding the foregoing, it is the Parties intent that OCPRC shall be responsible for the all costs associated with such maintenance and repairs, unless otherwise agreed to by BHS and the Park, at a minimum, shall be maintained in a similar manner to how OCPRC maintains its other Oakland County Parks.

4.6. **Park Utilities and Services.** OCPRC shall be responsible to provide the utilities and services, it deems necessary for the operation of the Park. The provision of and costs for

all utilities, including water, sewer/sanitary, electric, and gas, for the Park and Premises shall be the responsibility of BHS until the end of the Transition Period and shall be responsibility of OCPRC thereafter during the Initial Term or Renewal Term of this Agreement. The Parties may further delineate the responsibilities and costs applicable to the Park and Premises utilities in the Park Action Plan described in Section 4.7. Notwithstanding the foregoing, it is the Parties intent that OCPRC shall be responsible for all the costs associated with such utilities and services, unless otherwise agreed to by BHS in writing. However, OCPRC shall not authorize or approve any easements or other encumbrances to, on, or across the Park or the Premises.

4.7. **Park Action Plan.**

4.7.1. By May 1, 2026, OCPRC shall create a Preliminary Park Action Plan for the Park and by September 30, 2026, OCPRC shall create a Final Park Action Plan for the Park. The Preliminary Park Action Plan and the Final Park Action Plan shall be collectively referred to in this Agreement as "Park Action Plan." The terms of this Agreement shall apply equally to the Preliminary Park Action Plan and the Final Park Action Plan. The OCPRC Representative and the BHS Representative may agree in writing to extend the deadline for the delivery of the Final Park Action Plan.

4.7.2. The Park Action Plan shall be based on **Exhibit B**, the Preliminary Park Use and Improvement Framework and created pursuant to OCPRC's current policies and procedures. The Park Action Plan shall establish a structure to guide the stewardship, operation, and investment of the Park with the following intentions:

4.7.2.1. Guide operational and capital decisions during the first five years of implementation;

4.7.2.2. Align Park priorities with OCPRC system goals;

4.7.2.3. Provide continuity and transparency as planning, engagement, and investment activities happen; and

4.7.2.4. Ensure the Park is managed in a manner that is equitable, fiscally responsible, resilient, and sustainable over the long term.

4.7.3. The Park Action Plan will have two Attachments: (1) Attachment A, the Capital Improvement Plan ("CIP") and (2) Attachment B the Park Operations and Management Plan ("POMP").

4.7.4. The CIP shall establish a five (5) year framework to identify, evaluate, and prioritize potential capital investments at the Park. The CIP serves as a planning and evaluation tool, not a guarantee of implementation. Inclusion of an item in the CIP does not constitute project approval, funding authorization, or a commitment to proceed. The CIP will set forth a process for approvals, authorizations, and commitments to proceed. Inclusion of an item in the CIP constitutes BHS pre-approval for the project type to proceed when funding is available, without requiring additional BHS approval. The CIP may be amended as set forth in the Park Action Plan, but at least every four (4) years OCPRC shall create an updated CIP, which the BHS Representative shall have at least sixty (60) days to review and approve. If the BHS Representative does not approve the CIP, the improvement may not be made, unless otherwise agreed to by the Parties. The updated CIP, approved by the BHS Representative, shall replace the existing CIP and be incorporated into the Park Action Plan as Attachment A.

4.7.5. The POMP shall establish a framework for day-to-day Park operations, Park maintenance, Park staffing, Park programming, and Park coordination. The POMP may be amended as set forth in the Park Action Plan, but at least every five (5) years OCPRC shall create an updated POMP, which the BHS Representative shall have at least sixty (60) days to review and approve. If the BHS Representative does not approve the POMP, the change may not be made, unless otherwise agreed to by the Parties. The updated POMP, approved by the BHS Representative, shall replace the existing POMP and be incorporated into the Park Action Plan as Attachment B.

4.7.6. Once completed, OCPRC shall submit the Park Action Plan to the BHS Representative for comments and recommendations. The BHS Representative shall submit comments and recommendations to the OCPRC Representative within thirty (30) Days of receipt of the Park Action Plan. The OCPRC Representative shall review and consider the BHS Representative's comments and recommendations and shall endeavor to address all comments and recommendations. The Park Action Plan shall not be approved or implemented by OCPRC without prior written approval by the BHS Representative. If the BHS Representative does not respond within the thirty (30) day period, then the BHS Representative is deemed to have approved the Park Action Plan. Every five (5) years OCPRC shall create an updated Park Action Plan, which the BHS Representative shall have at least sixty (60) days to review and comment on.

4.8. Notwithstanding any other provision in this Agreement, if the BHS Representative and OCPRC Representative cannot agree to a Preliminary Park Action Plan by the end of the Transition Period, then OCPRC or BHS may proceed under the Dispute Resolution Section of this Agreement, Section 4.2 or terminate this Agreement. No Capital Improvement Projects may commence during this Transition Period.

4.9. **Volunteers and Employees.**

4.9.1. OCPRC shall manage and operate the Park with OCPRC employees, volunteers, and contractors and subcontractors.

4.9.2. OCPRC may use volunteers at the Park in various capacities, including existing volunteers and volunteer groups. All volunteers providing volunteer service at the Park shall become part of OCPRC's volunteer program.

4.9.3. OCPRC has no obligation to hire BHS employees to work at the Park, but OCPRC shall provide information to BHS employees, who currently work at the Premises, on how BHS employees may apply for OCPRC employment.

4.10. **Personal Property and Equipment.** At no cost to OCPRC, BHS shall transfer ownership of all personal property and equipment listed in the Final Park Action Plan. The Parties acknowledge that this Agreement and the Final Park Action Plan will operate as a bill of sale and that no further documents are required to effectuate the transfer of the personal property and equipment. The BHS Representative and the OCPRC Representative are authorized to sign any other documents needed to effectuate the transfer of the personal property and equipment.

4.11. **Animals.** At no cost to OCPRC, BHS shall transfer ownership of all animals listed in the Final Park Action Plan. The Parties acknowledge that this Agreement and the Final Park Action Plan will operate as a bill of sale and that no further documents are required to

effectuate the transfer of the animals. The BHS Representative and the OCPRC Representative are authorized to sign any other documents needed to effectuate the transfer of the animals.

4.12. **Park Access/Parking.** OCPRC shall be responsible to determine how Park patrons will access the Park (ingress to and egress from the Park) and where patrons will park while using the Park. This responsibility and the costs associated therewith shall be addressed in the Park Action Plan with the general agreement that OCPRC shall be responsible for the costs associated with such parking, unless otherwise agreed to in writing by the BHS. In no event shall any resident of BHS or the County incur any fee or charge for entering the Park or Premises or for parking a vehicle in or on the Park or Premises.

4.13. **Park Rules.** During the Initial Term or Renewal Term of this Agreement, the Park and Premises shall be subject to OCPRC Rules and Regulations and OCPRC policies and procedures, except as otherwise provided by this Agreement.

4.14. **Park Security.** Security for the Park shall be provided by OCPRC at its sole expense.

4.15. **Signs.** OCPRC shall be responsible for and is permitted to erect signs to identify the Park and features/structures located therein and to erect other signs that are typical and/or necessary at a public park of this nature. OCPRC shall be required to comply with local ordinance requirements regarding the design and placement of any new signs. OCPRC shall be responsible for the cost of signs it erects.

4.16. **Sponsorship of Events/Programs at Park by Third Parties.** Without approval from the BHS, OCPRC may solicit or accept sponsorship of events/programs at the Park by third-parties, pursuant to OCPRC policies and procedures; provided that third-party sponsorships may not be associated with alcoholic beverages or drugs (legal or illegal) while school is in session on the Premises. Any sponsorship of events/programs shall be limited to those that would not be prohibited in BHS' facilities or on BHS property (use or promotion of alcohol, drugs or other illegal activities, etc.).

4.17. **Use of Park by Third Parties.** Notwithstanding any other provision in this Agreement, OCPRC may license use of the Park to third parties for events or programs, without approval from and notification to BHS. OCPRC shall allow such use via written agreement with the third party, pursuant to OCPRC policies and procedures. To avoid scheduling conflicts at the Park, all third parties desiring to use the Park for events or programs shall schedule such use through OCPRC. The written agreement for use of the Park by third parties shall also include BHS as an indemnified party and an additional insured as well, if insurance is required.

4.18. **Use of Park by BHS.**

4.18.1. **BHS Events or Programs.** BHS may use the Park for education use or other BHS-sponsored events or programs at no cost, charge, or fee, if such use does not conflict with other scheduled events or programs. To avoid scheduling conflicts at the Park, BHS shall reserve use of the Park for its events or programs, through OCPRC. BHS shall be responsible for all costs associated with the setup, operation, and cleanup of such events or programs. Each Party shall promote activities planned by the other Party to take place in the Park in the same manner as they promote their own activities.

5. **PARK FINANCES.**

5.1. **Establishment of Park Fees & Charges.** OCPRC shall establish all Park Fees and Charges at the Park. The Park Fees and Charges shall be created, adopted, and implemented pursuant to OCPRC's current policies and procedures as may be amended by OCPRC. Notwithstanding any other provision in this Agreement, at no time shall any BHS or Oakland County resident be charged a fee for entry into the Park or the Premises or for parking at the Park or on the Premises.

5.2. **Park Revenue.** Subject to applicable law, all Park Revenue shall be paid to OCPRC and shall be deemed OCPRC's revenue, unless otherwise agreed by the Parties during the Transition Period and codified in the Park Action Plan. OCPRC shall record the monies of all Park Revenue according to generally accepted accounting principles and in a manner similar to how OCPRC records other revenue it collects and receives.

5.3. **Annual Accounting and Audits.** If requested by BHS, OCPRC shall provide BHS with an annual accounting of Park Revenue consistent with generally accepted accounting policies and procedures. BHS has the right to annually review and audit OCPRC's records related to Park Revenue, upon written request to OCPRC.

5.4. **Park Grants.** The Parties shall use their best efforts to work together to secure grant funding for Park expansion, development, improvements, operation, and maintenance. OCPRC and BHS shall work together to apply for and manage grants related to the Park. Any improvements to the Park funded via grants secured by or through BHS shall not be subject to reimbursement under Section 2.7.1.1 upon expiration or termination of this Agreement.

6. ASSURANCES/LIABILITY/INSURANCE.

6.1. **Title to Premises.** BHS warrants that it will confirm that it has fee simple title to the Premises in accordance with Section 3.3.3 and both Parties acknowledge that each Party has the authority to enter into this Agreement. Each Party shall hold the other Party harmless (including payment of attorney fees) against any third-party Claim challenging that Party's right to execute this Agreement or use of the Premises as set forth herein.

6.2. **Liability for Claims.** Except as otherwise provided herein, each Party shall be responsible for any Claims made against that Party by a third-party and for the acts or omissions of its respective BHS Employee or County Employee arising under or related to this Agreement.

6.3. **Liability for Claims Prior to the Effective Date.** To the extent permitted by law, BHS shall be solely responsible for and shall defend and hold harmless OCPRC (including payment of reasonable attorney fees) from any Claim that occurred prior to the Effective Date of this Agreement or that was incurred but not reported prior to the Effective Date of this Agreement.

6.4. **Liability for Environmental Matters.** Notwithstanding any other provision, OCPRC shall not be responsible to perform or pay for remediation or clean-up of any environmental contamination on or around the Premises, which existed on the Premises prior to the Effective Date and/or discovered by the Phase I ESA or any other environmental assessments performed pursuant to this Section 3, unless exacerbated by OCPRC during its inspections. OCPRC shall be responsible to perform or to pay for remediation or clean-up of any environmental contamination on or around the Premises, which is caused by OCPRC and, to the extent provided by law, is caused by any of its agents, employees, volunteers, officers, or officials, contractors, subcontractors or

consultants, or invitees on the Premises.

6.5. **Legal Representation.** Except as provided herein, each Party shall seek its own legal representation and bear the costs associated with such representation, including judgments and attorney fees, for any Claim that may arise from the performance of this Agreement.

6.6. **Responsibility for Costs/Fines/Fees.** Each Party shall be solely responsible for all costs, fines and fees associated with any acts or omissions by its respective BHS Employee or County Employee arising under or related to this Agreement.

6.7. **No Indemnification/Reimbursement.** Except as otherwise provided for in this Agreement, neither Party shall have any right under this Agreement or under any other legal principle to be indemnified or reimbursed by the other Party or any of its agents in connection with any Claim.

6.8. **Governmental Function/Reservation of Rights.** Performance of this Agreement is a governmental function and government service. This Agreement does not, and is not intended to, impair, divest, delegate, or contravene any constitutional, statutory, and/or other legal right, privilege, power, obligation, duty, or immunity of the Parties. Nothing in this Agreement shall be construed as a waiver of governmental immunity.

6.9. **Limitation of Liability.** In no event shall either Party be liable to the other Party or any other person, for any consequential, incidental, direct, indirect, special, and punitive or other damages arising out of this Agreement.

6.10. **Insurance.**

6.10.1. Except for the insurance set forth in Section 6.10.2 and Section 6.10.3, this Agreement does not require either Party to obtain insurance to cover loss exposures associated with this Agreement and the Park. Each Party is solely responsible to determine whether it will obtain insurance, and in what amounts, to cover loss exposures associated with this Agreement and the Park.

6.10.2. If a Party purchases a special event insurance policy for use the Premises, for whatever reason, then the Party shall name the other Party and its boards, commissions, elected and appointed officers/officials, employees, and volunteers as "additional insureds" on such policy.

6.10.3. BHS, at its sole cost, shall obtain real property insurance or self-insurance for existing buildings and structures located on the Premises and for any future buildings and structures located on the Premises whether built by BHS or OCPRC. If a building or structure that is covered by BHS' real property insurance is damaged or destroyed, OCPRC shall repair or replace the building or structure in a timely manner and the BHS shall reimburse OCPRC for all costs associated with the repair or replacement of such building or structure to the extent such repairs or replacement are covered by BHS insurance coverages. OCPRC shall invoice BHS for the costs of the repair or replacement and BHS shall pay such invoice within thirty (30) calendar days. However, OCPRC shall reimburse BHS for insurance premiums related to buildings and structures constructed on the Premises by OCPRC.

6.11. **Waste.** Neither Party shall commit or allow to be committed any waste or nuisance on the Premises and will not use, or allow the Premises to be used, for any unlawful purpose.

6.12. **Compliance with Laws.**

6.12.1. The Parties shall comply with all applicable federal, state, or local laws, regulations,

rules, and ordinances related to the operation, management, planning, maintenance, and improvement of the Premises and Park. OCPRC shall obtain any necessary permits regarding its use of the Premises.

6.12.2. OCPRC shall comply with all applicable grants and other agreements between BHS and another entity such as the State of Michigan, governing the operation of and restrictions upon the Premises, if OCPRC receives notice of such grants and other agreements from BHS.

6.12.3. The Parties acknowledges that any violations of the federal, state, or local regulations or convictions of any resource violations may be considered a default of this Agreement and the other Party may terminate this Agreement, as provided herein.

6.13. **Authorization.** The Parties have taken all actions and secured all approvals necessary to authorize and complete this Agreement. The persons signing this Agreement on behalf of each Party have legal authority to sign this Agreement and bind the Parties to the terms and conditions contained herein.

7. **GENERAL TERMS AND CONDITIONS**.

7.1. **No Interest in Premises.** Through this Agreement, OCPRC shall have no title interest in and/or to the Premises or any portion thereof and has not, does not, and will not claim any such title or any easement over the Premises.

7.2. **Delegation or Assignment**. Neither Party shall delegate or assign any obligations or rights under this Agreement without the prior written consent of the other Party. For purposes of this Section, consent for the County shall be given by the OCPRC Director or his/her successor and consent for BHS shall be given by the BHS Representative.

7.3. **No Employee-Employer Relationship**. Nothing in this Agreement shall be construed as creating an employer-employee relationship between County and BHS.

7.4. **No Third Party Beneficiaries**. Except as provided for the benefit of the Parties, this Agreement does not and is not intended to create any obligation, duty, promise, contractual right or benefit, right to indemnification, right to subrogation, and/or any other right in favor of any other person or entity.

7.5. **No Implied Waiver**. Absent a written waiver, no act, failure, or delay by a Party to pursue or enforce any rights or remedies under this Agreement shall constitute a waiver of those rights with regard to any existing or subsequent breach of this Agreement. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances shall be deemed or construed as a continuing waiver of any term, condition, or provision of this Agreement. No waiver by either Party shall subsequently affect its right to require strict performance of this Agreement.

7.6. **Severability**. If a court of competent jurisdiction finds a term or condition of this Agreement to be illegal or invalid, then the term or condition shall be deemed severed from this Agreement. All other terms, conditions, and provisions of this Agreement shall remain in full force.

7.7. **Captions**. The section and subsection numbers, captions, and any index to such sections and subsections contained in this Agreement are intended for the convenience of the reader and are not intended to have any substantive meaning. The numbers, captions, and indexes shall not be interpreted or be considered as part of this Agreement. Any use of the singular or plural, any reference to gender, and any use of the nominative, objective or possessive case

in this Agreement shall be deemed the appropriate plurality, gender or possession as the context requires.

7.8. **Force Majeure**. Notwithstanding any other term or provision of this Agreement, neither Party shall be liable to the other for any failure of performance hereunder if such failure is due to any cause beyond the reasonable control of that Party and that Party cannot reasonably accommodate or mitigate the effects of any such cause. Such cause shall include, without limitation, acts of God, floods, fire, explosion, vandalism, national emergencies, insurrections, riots, wars, strikes, lockouts, work stoppages, other labor difficulties, or any law, order, regulation, direction, action, or request of the United States government or of any other government. Reasonable notice shall be given to the affected Party of any such event.

7.9. **Notices**. Notices given under this Agreement shall be in writing and shall be personally delivered, sent by express delivery service, certified mail, or first class U.S. mail postage prepaid, and addressed to the person listed below. Notice will be deemed given on the date when one of the following first occur: (i) the date of actual receipt; (ii) the next business day when notice is sent express delivery service or personal delivery; or (iii) three days after mailing certified U.S. mail.

7.9.1. If Notice is sent to County, it shall be addressed and sent to: OCPRC Director, 2800 Watkins Lake Road, Waterford, Michigan 48328 and the Chairperson of the Oakland County Board of Commissioners, 1200 North Telegraph Road, Pontiac, Michigan 48341.

7.9.2. If Notice is sent to BHS, it shall be addressed and sent to BHS Superintendent, 7273 Wing Lake Road, Bloomfield Hills, Michigan 48301.

7.9.3. Either Party may change the individual to whom Notice is sent and/or the mailing address by notifying the other Party in writing of the change.

7.10. **Governing Law/Consent To Jurisdiction And Venue**. This Agreement shall be governed, interpreted, and enforced by the laws of the State of Michigan. Except as otherwise required by law or court rule, any action brought to enforce, interpret, or decide any Claim arising under or related to this Agreement shall be brought in the 6th Judicial Circuit Court of the State of Michigan, the 48th District Court of the State of Michigan, or the United States District Court for the Eastern District of Michigan, Southern Division, as dictated by the applicable jurisdiction of the court. Except as otherwise required by law or court rule, venue is proper in the courts set forth above.

7.11. **Counterparts.** This Agreement may be executed in any number of counterparts, each of which shall be deemed an original agreement, but all of which together shall constitute one Agreement. Copies (photo, fax, or electronic) of signatures to this Agreement will be deemed originals and may be relied on to the same extent as originals.

7.12. **Entire Agreement**. This Agreement and the referenced Affidavit represents the entire agreement and understanding between the Parties regarding the maintenance, operation, and management of the Park and the Premises. This Agreement and the referenced Affidavit supersede all other oral or written agreements between the Parties regarding that subject matter. The language of this Agreement shall be construed as a whole according to its fair meaning and not construed strictly for or against any Party.

IN WITNESS WHEREOF, the Bloomfield Hills Schools Superintendent has been authorized by a resolution of Bloomfield Hills Schools' Board of Education, to execute this Agreement.

TRAIL EASEMENT AGREEMENT

THIS TRAIL EASEMENT AGREEMENT (this "Agreement") is made and entered into this 2ND day of May, 2019, by and between **BLOOMFIELD HILLS SCHOOLS**, a Michigan general powers school district ("BHS"), having an address of 7273 Wing Lake Road, Bloomfield Hills, Michigan 48301, and **HICKORY RIDGE VILLAGE ASSOCIATION**, a Michigan nonprofit corporation (the "Association"), having an address of 3025 East Ridge Court, Bloomfield Hills, Michigan 48302. BHS and the Association are referred to from time to time in this Agreement each individually as a "Party" and together as the "Parties".

Background Information

A. BHS is the fee simple owner of certain parcels of real property situated in Bloomfield Township (hereafter, the "Township"), Oakland County, Michigan, known as the E. L. Johnson Nature Center (the "Nature Center"), and located at 3325 Franklin Road, Bloomfield Township, Oakland County, Michigan (parcel identification numbers 19-09-301-022 ("Parcel 022") and 19-09-301-050 ("Parcel 050", and together with Parcel 022, collectively, the "Nature Center Property")), which Nature Center Property is more particularly described on **Exhibit A** attached hereto.

B. The Nature Center Property consists of an approximately 45-acre site and includes various amenities, including a visitor center with classrooms and multiple nature trails, for the purposes of providing recreational and learning opportunities for BHS students and the public, and to otherwise maintain the aesthetic beauty of the local environs.

C. Adjacent to the Nature Center Property is Hickory Ridge Village, a residential condominium project (the "Condominium") situated in Bloomfield Township, Oakland County Michigan, more particularly described on **Exhibit B** attached hereto (the "Condominium Property").

D. The general location of the Condominium Property in relation to the Nature Center Property is depicted on **Exhibit C** attached hereto.

E. The Condominium was established pursuant to the Master Deed thereof, recorded on August 9, 1990 in Liber 11502, Pages 555 through 620, both inclusive, Oakland County Records, as amended by a First Amendment to Master Deed recorded on October 28, 1991 in Liber 12144, Pages 290 through 296, both inclusive, Oakland County Records, as amended by a

Second Amendment to Master Deed recorded on December 11, 1995 in Liber 15874, Pages 712 through 718, both inclusive, Oakland County Records, as amended by a Third Amendment to Master Deed recorded on January 26, 1996 in Liber 15978, Pages 269 through 277, both inclusive, Oakland County Records, as amended by a Fourth Amendment to Master Deed recorded on June 10, 1997 in Liber 17279, Pages 573 through 578, both inclusive, Oakland County Records, and as further amended by a Fifth Amendment to Master Deed recorded on August 10, 2010 in Liber 42277, Pages 795 through 830, both inclusive, Oakland County Records (collectively, the "Master Deed").

F. The Association is the association of co-owners of the Condominium responsible for the management, maintenance, operation and administration of the Condominium as provided for in the Master Deed, the bylaws of the Association and the Michigan Condominium Act.

G. There is a stream tributary of the Rouge River located on the Nature Center Property which runs along the northerly boundary of Parcel 022 with the Condominium Property and which also branches off into Parcel 050 (the "Stream").

H. Among the common elements of the Condominium Property are a detention basin (the "Detention Basin") and a wetlands area to the south of the Detention Basin (the "Wetlands") which are located immediately to the north of the Stream. The Detention Basin has an outflow into the Wetlands to enable storm water to discharge into the Wetlands.

I. There is a recognized floodplain associated with the Stream known as the Long Lake-Forest Lake Drain.

J. The Oakland County Water Resources Commissioner's Office (the "WRC") owns, operates and maintains a drain known as the Case Drain which runs north and south along the easterly property line of the Condominium Property.

K. The Nature Center Property is also currently subject to a sanitary sewer easement in favor of the Township (the "Township Sewer Easement") which runs along the Case Drain, crosses the Stream and generally runs along the southern shore of the Stream to the east and west within Parcel 022.

L. In accordance with, and to further advance, the Nature Center's mission, BHS desires to develop a ten (10) foot wide walking and hiking nature trail running alongside the north shore of the Stream (the "Trail") which will connect Parcel 050 with the northeasterly portion of Parcel 022, by way of crossing the Wetlands located within the common elements of the Condominium Property.

M. The Trail is to remain generally in a natural state and will consist mainly of a woodchip path and/or boardwalk, but it is anticipated to also include two (2) bridges over certain portions of the Wetlands where necessary. The bridges will be located only on the Nature Center Property.

N. The Association is willing to grant BHS a perpetual easement for the purposes of constructing, inspecting, operating, maintaining, repairing and replacing that portion of the Trail

which will be located on the Condominium Property in accordance with the terms and provisions of this Agreement.

Statement of Agreement

NOW THEREFORE, for $1.00 and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree to the foregoing Background Information and as follows:

1. Definitions. The following terms shall have the meaning ascribed to each of them below:

(a) "Parcel" and "Parcels" shall mean, individually and together respectfully, the Nature Center Property and the Condominium Property.

(b) "Person" shall mean an individual or any partnership, corporation, limited liability company, association or other entity.

(c) "Responsible Person" shall mean the then-current fee simple owner or owners of a Parcel, provided that so long as the Association exists for the purposes of managing and operating the common elements and affairs of the Condominium, the Association shall be deemed the "Responsible Person" for the Condominium Property.

2. Grant of Perpetual Trail Easement.

(a) The Association hereby grants and declares to and for the benefit of BHS and the current and future Responsible Person of all or any portion of the Nature Center Property, and their respective successors, assigns, lessees/tenants, mortgagees, agents, contractors, employees and invitees (and the customers, employees, agents and invitees of the lessees/tenants), a perpetual, non-exclusive easement in, on, over, upon, across and through that portion of the Condominium Property depicted and described on **Exhibit D** attached hereto and made a part hereof (the "Trail Easement") for the purposes set forth herein. The Association makes no representations or warranties of any kind and expressly disclaims any warranties regarding the Trail Easement; it being acknowledged and agreed by the Parties that the grant of the Trail Easement is AS-IS, WHERE-IS, WITH ALL FAULTS.

(b) The Parties acknowledge and agree that the Trail Easement shall be for the purposes of enabling BHS and the current and future Responsible Person of all or any portion of the Nature Center Property to access the Condominium Property to construct, operate, maintain, repair, re-construct and replace the Trail and the Trail Facilities (as hereinafter defined) upon the Trail Easement in perpetuity in accordance with the terms of this Agreement.

(c) Within the Trail Easement, BHS and the current and future Responsible Person of all or any portion of the Nature Center Property, subject to applicable permits, laws, ordinances, rules and regulations, shall be permitted to construct and maintain the following (collectively, the "Trail Facilities"):

(i) The Trail, which shall generally not exceed approximately ten (10) feet in clear tread width, which shall consist of a hard-packed woodchip path and/or boardwalk and the bridges (each a "Bridge", and collectively, the "Bridges") in the general locations depicted on **Exhibit D**.

(ii) Foundations, waterbars, erosion control structures, steps, culverts and other patch surface structures as may be necessary or required to construct and maintain the structural integrity of the Trail and the Bridges.

(iii) Such signs as reasonably determined by the Responsible Person for the Nature Center Property as necessary to mark the Trail, to provide information related to the Trail and for educational purposes.

(iv) Fencing, gates, barriers and signs as reasonably determined by the Responsible Person for the Nature Center Property as may be necessary to control access to the Trail, to prevent trespassing off of the Trail Easement and to prevent unauthorized motorized vehicles from accessing the Trail.

(v) Benches and trash receptacles at such locations as the Responsible Person for the Nature Center Property determines are appropriate as an accommodation to those using the Trail.

(d) Neither the Association nor any of the co-owners of the Condominium shall erect any structures, landscaping or other improvements within the Trail Easement which would interfere with BHS's use of the Trail Easement for the purposes described herein or take any action which is inconsistent with the terms of this Agreement.

3. Construction, Maintenance, Operation and Permitted Uses of the Trail.

(a) The construction, operation, maintenance, repair and replacement of the Trail, the Trail Facilities and the Trail Easement shall be the sole responsibility of BHS and the current and future Responsible Person of all or any portion of the Nature Center Property at its sole cost and expense. The Association shall have no obligation or responsibility whatsoever to construct or maintain the Trail or Trail Facilities. BHS shall be responsible for obtaining the prior approval of the Township, the WRC, and any other governmental authority having jurisdiction, in connection with construction of the Trail over and/or within the Case Drain and the Township Sewer Easement. BHS shall further be responsible, at its sole cost and expense, for obtaining any and all permits required by the Township, the Michigan Department of Environmental Quality ("MDEQ"), and any other governmental authority having jurisdiction, in connection with the construction of the Trail within the Long Lake-Forest Lake Drain floodplain and the Wetlands. The Association agrees to reasonably cooperate and assist BHS, at no cost to the Association, in obtaining any municipal, county and/or state permits necessary for the construction and on-going maintenance of the Trail and Trail Facilities. BHS shall keep the Trail in a good condition and state of repair at all times and in a safe and hazard-free condition.

(b) In connection with the initial construction and the on-going maintenance, repair and replacement of the Trail Facilities within the Trail Easement, the Association hereby grants and declares to and for the benefit of BHS and the current and future Responsible Person

of all or any portion of the Nature Center Property, and their respective successors, assigns, lessees/tenants, mortgagees, agents, contractors, employees and invitees (and the customers, employees, agents and invitees of the lessees/tenants), a temporary, non-exclusive construction easement (the "Construction Easement") in, on, over, upon, across and through that portion of the Condominium Property extending [fifteen (15)] feet to each side of the Trail Easement and an area within a radius of [fifteen (15)] feet of the Bridge abutments located on the Condominium Property (collectively, the "Construction Easement Area"). The Construction Easement shall be for the purposes of (i) access, passage and staging, as applicable, of construction equipment and materials as appropriate to complete the clearing, trailblazing, filling, compacting and grading of the Trail within the Trail Easement Area, as necessary in connection with the construction of the Trail Facilities, (ii) the construction, installation, erection, inspection, maintenance, repair and replacement of the Trail Facilities, and (iii) any other construction and maintenance associated with the Trail Facilities for which access upon the Construction Easement Area is reasonably necessary. The Construction Easement shall only be available during the periods in which such rights are being exercised by the Responsible Person of all or any portion of the Nature Center Property, and their respective successors, assigns, lessees/tenants, mortgagees, agents, contractors, employees and invitees. BHS and the current or future Responsible Person of all or any portion of the Nature Center Property shall take all reasonable steps to minimize any interference or disturbance to the Construction Easement Area and shall restore any portion of the Construction Easement Area damaged or disturbed in connection with the performance of such work to substantially the same condition as existed immediately prior to such damage or disturbance, at its sole cost.

(c) Subject to all applicable laws, ordinances, codes, rules and regulations, and in connection with the construction, installation, erection, inspection, maintenance, repair and replacement of the Trail Facilities and Trail Easement, BHS and the current or future Responsible Person of all or any portion of the Nature Center Property, and their respective successors, assigns, lessees/tenants, mortgagees, agents, contractors, employees and invitees (and the customers, employees, agents and invitees of the lessees/tenants), shall be permitted to (i) cut, clear and remove trees, bushes, shrubbery and other vegetation directly within the Trail Easement, (ii) trail blaze, fill, compact, grade and apply soil and woodchips to the Trail Easement, and (iii) construct, install and erect the Trail Facilities, including but not limited to the Bridges, within the Trail Easement. BHS shall use commercially reasonable efforts to save native plant and tree species and to avoid the removal of trees. Notwithstanding anything to the contrary contained herein, BHS and the current or future Responsible Person of all or any portion of the Nature Center Property shall be permitted to use motorized vehicles and machinery within the Trail Easement and Construction Easement Area as reasonably necessary in connection with its construction and on-going maintenance of the Trail Facilities and Trail Easement.

(d) The Trail shall only be used for pedestrian walking, hiking, jogging, bird watching and nature study and other non-motorized access for the purposes of providing educational and recreational opportunities in the natural environment. Bicycling, snowmobiling and horseback riding are expressly prohibited upon the Trail. Power-drive mobility devices for use by those who have mobility impairments shall be permitted.

(e) Use of the Trail shall be open to the members of the public in a manner consistent with the mission of the Nature Center and the other natural trails located on the Nature

Center Property. The Nature Center shall be permitted to adopt reasonable rules and regulations from time to time governing the use and operation of the Trail, including but not limited to, the hours for which the Nature Center and the Trail are open to the public. The Nature Center shall use commercially reasonable efforts to enforce such rules and regulations and to minimize any disturbance to the Condominium Property. The Responsible Person for the Nature Center Property shall also be permitted to temporarily close the Trail from time to time for the purposes of inspecting, maintaining and repairing the Trail Facilities in accordance with the terms of this Agreement. The members of the Association, being the co-owners of the Condominium and their permitted guests and invitees, shall be permitted to access the Trail from the Condominium Property during the hours the Trail is open to the public, but members of the general public shall not be permitted to access the Trail from the Condominium Property.

(f) Use of any portion of the Trail by members of the general public is at their own risk. The Association, by entering into this Agreement, assumes no duty to or for the benefit of the general public for defects in the location, design, installation, construction, maintenance, repair or replacement of the Trail Facilities; for unsafe conditions within the Trail Easement; or for the failure to inspect for or warn against possibly unsafe conditions; or to close the Trail to public assess when unsafe conditions may be present.

(g) Notwithstanding anything the contrary contained herein, the Trail Easement shall automatically terminate and be of no further force and effect in the event that the Nature Center Property is no longer used as a nature center providing recreational and educational opportunities to members of the public.

4. Self-Help. In addition to all other remedies available at law or in equity, upon the failure of a Responsible Person (the "Defaulting Person") to perform any of its obligations under this Agreement, which failure is not cured within thirty (30) days after written notice thereof is given to such Defaulting Person by the other Responsible Person (the "Non-Defaulting Person") (unless, with respect to any such failure, the nature of which cannot reasonably be cured within such thirty (30) day period, the Defaulting Person commences such cure within such thirty (30) day period and thereafter diligently prosecutes such cure to completion), the Non-Defaulting Person shall have the right to cure such failure and to invoice the Defaulting Person for the Defaulting Person's share of such costs reasonably incurred for such cure. Notwithstanding the foregoing, in the event of an emergency or the blockage or material impairment of any easement rights granted hereunder, the Non-Defaulting Person may immediately cure the same with such notice as soon as reasonably possible under the circumstances.

5. Construction Liens; Restoration.

(a) If any construction liens are filed against a Parcel, or any portion thereof, in connection with any work performed by or on behalf of the other Responsible Person pursuant to an easement created herein, the Responsible Person that performed the work in question shall either cause said liens to be promptly discharged of record or shall take such actions as may be required to reasonably and legally object to such liens. Such actions may include, at the option of the Responsible Person that performed the work, bonding over the liens.

(b) A Responsible Person performing any work on a Parcel of the other Responsible Person pursuant to an easement created herein shall (i) take all reasonable steps to minimize any inconvenience to the use or operation of such Parcel and (ii) promptly restore any portion of such Parcel damaged or disturbed in connection with the performance of such work to substantially the same condition as existed immediately prior to such damage or disturbance, at its sole cost.

6. Insurance; Liability for Losses and Litigation Expenses.

(a) BHS shall maintain or cause to be maintained in full force and effect commercial general liability insurance with a combined single limit of liability of not less than One Million Dollars ($1,000,000.00), per occurrence and Two Million Dollars ($2,000,000.00) in the aggregate for bodily injury, personal injury, and property damage. The Association, and its successors and assigns to its Parcel, shall be named an additional primary, non-contributory insured under such policy.

(b) Any contractor and/or vendor engaged by a Responsible Person to fulfill such Responsible Person's obligations under this Agreement upon the Parcel of the other Responsible Person (including exercising the self-help remedy provided for in Section 4 herein) shall obtain commercial general liability insurance in compliance with the requirements of Section 6(a) above and shall furnish certificate(s) evidencing such insurance coverage to the Responsible Person for the Parcel for which such contractor or vendor will be entering upon prior to such entry.

(c) If a claim for any Loss (as hereinafter defined) for personal injury or property damage occurring within the Trail Easement or Construction Easement Area (a "Public Access Claim") is asserted against either the Responsible Person for the Nature Center Property or the Responsible Person for the Condominium Property, or both, it is anticipated that they will assert such defenses (including immunity under Section 73301 of the Natural Resources and Environmental Protection Act, being Act 451 of the Michigan Public Acts of 1994, as amended (MCL 324.73301)) as are available to them under applicable law. The phrase "Public Access Claim" excludes all claims (collectively, "Owner Responsibility Claims") for Losses and Litigation Expenses (as hereinafter defined) arising from, relating to or associated with: (i) personal injury or property damage occurring prior to the date of this Agreement; (ii) activities or uses engaged in by the Association, and their guests, invitees, contractors, agents, and tenants or anyone else entering the Condominium Property by, through, or under the express or implied invitation of any of the foregoing; or (iii) structures, facilities and improvements within the Trail Easement or Construction Easement Area (other than the Trail Facilities). The term "Loss" as used herein means any liability, loss, claim, settlement payment, cost and expense, interest, aware, judgement, damages (including punitive damages), diminution of value, fines, fees and penalties or other charge other than a Litigation Expense. The term "Litigation Expense" means any court filing fee, court cost, arbitration fee or cost, witness fee, and each other fee and cost of investigating and defending or asserting any claim of violation or for indemnification under this Agreement, including, in each case, attorneys' fees, other professionals' fees and disbursements.

(d) To the extent permitted by law and if immunity from a Public Access Claim is for any reason unavailable to the Responsible Person for the Condominium Property,

BHS shall defend, indemnify and hold harmless the Responsible Person for the Condominium Property and its directors, managers, members, officers, agents and employees against any and all Losses and Litigation Expenses arising out of any Public Access Claim.

7. Covenants Running with the Land. The easements herein granted and the agreements herein contained are perpetual and shall be easements and covenants running with the Parcels and shall inure to the benefit of, and be binding upon, the Parties and their respective successors and assigns, including successors in title to all or any portion of the Parcels.

8. No Rights to Public. Nothing contained in this Agreement shall be deemed to be a gift or a dedication of any property to the general public or for any public use or purpose whatsoever.

9. Amendments. No amendment of this Agreement shall be effective until a proper instrument in writing has been executed by each Responsible Person and recorded with the Oakland County Register of Deeds.

10. No Joint Venture. Nothing contained in this Agreement shall be construed to make the Parties hereto, or their successors and assigns, partners or joining ventures or to render any of said parties liable for the debts or obligations of the other, except as in this Agreement expressly provided.

11. Waiver. No delay or omission by either of the Parties, or their successors and assigns, to exercise any right or power accruing upon any non-compliance or failure of performance by the other Party under the provisions of this Agreement shall impair any such right or power or be construed to be a waiver thereof. A waiver by either of the Parties, or its successors or assigns, of any of the covenants, conditions or agreements hereof to be performed by the other shall not be construed to be a waiver of any succeeding breach thereof or of any other covenant, condition or agreement contained herein.

12. Headings. The section and any subsection headings herein are for convenience and reference only and in no way define or limit the scope and content of this Agreement or in any way affect its provisions.

13. Notices. Any notice, request, demand, approval or consent given or required to be given under this Agreement, shall be in writing and shall be deemed as having been given when mailed by United States registered or certified mail, postage prepaid or by reputable overnight courier to the other party at the addresses stated below or at the last changed address given by the Party to be notified as hereinafter specified:

As to the Association: Hickory Ridge Village Association
Attn: Anthony Carmen
3025 East Ridge Court

14. Governing Laws. This Agreement shall be construed in accordance with the laws of the State of Michigan.

15. Exhibits. All exhibits referred to herein and attached hereto shall be deemed part of this Agreement.

16. Severability. If any term, provision or condition contained in this Agreement shall, to any extent, be invalid or unenforceable, the remainder of this Agreement (or the application of such term, provision or condition to persons or circumstances, other than those in respect of which it is invalid or unenforceable) shall not be affected thereby and each term, provision or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

17. Counterparts. This Agreement may be executed in one or more counterparts, but all of which together shall constitute one and the same instrument.

18. Recitals. The recitals set forth above in the "Background Information" are incorporated herein as if a full part of this Agreement.

19. Exempt. This Agreement is exempt from real estate transfer tax pursuant to MCL 207.505(a) and 207.526(a).

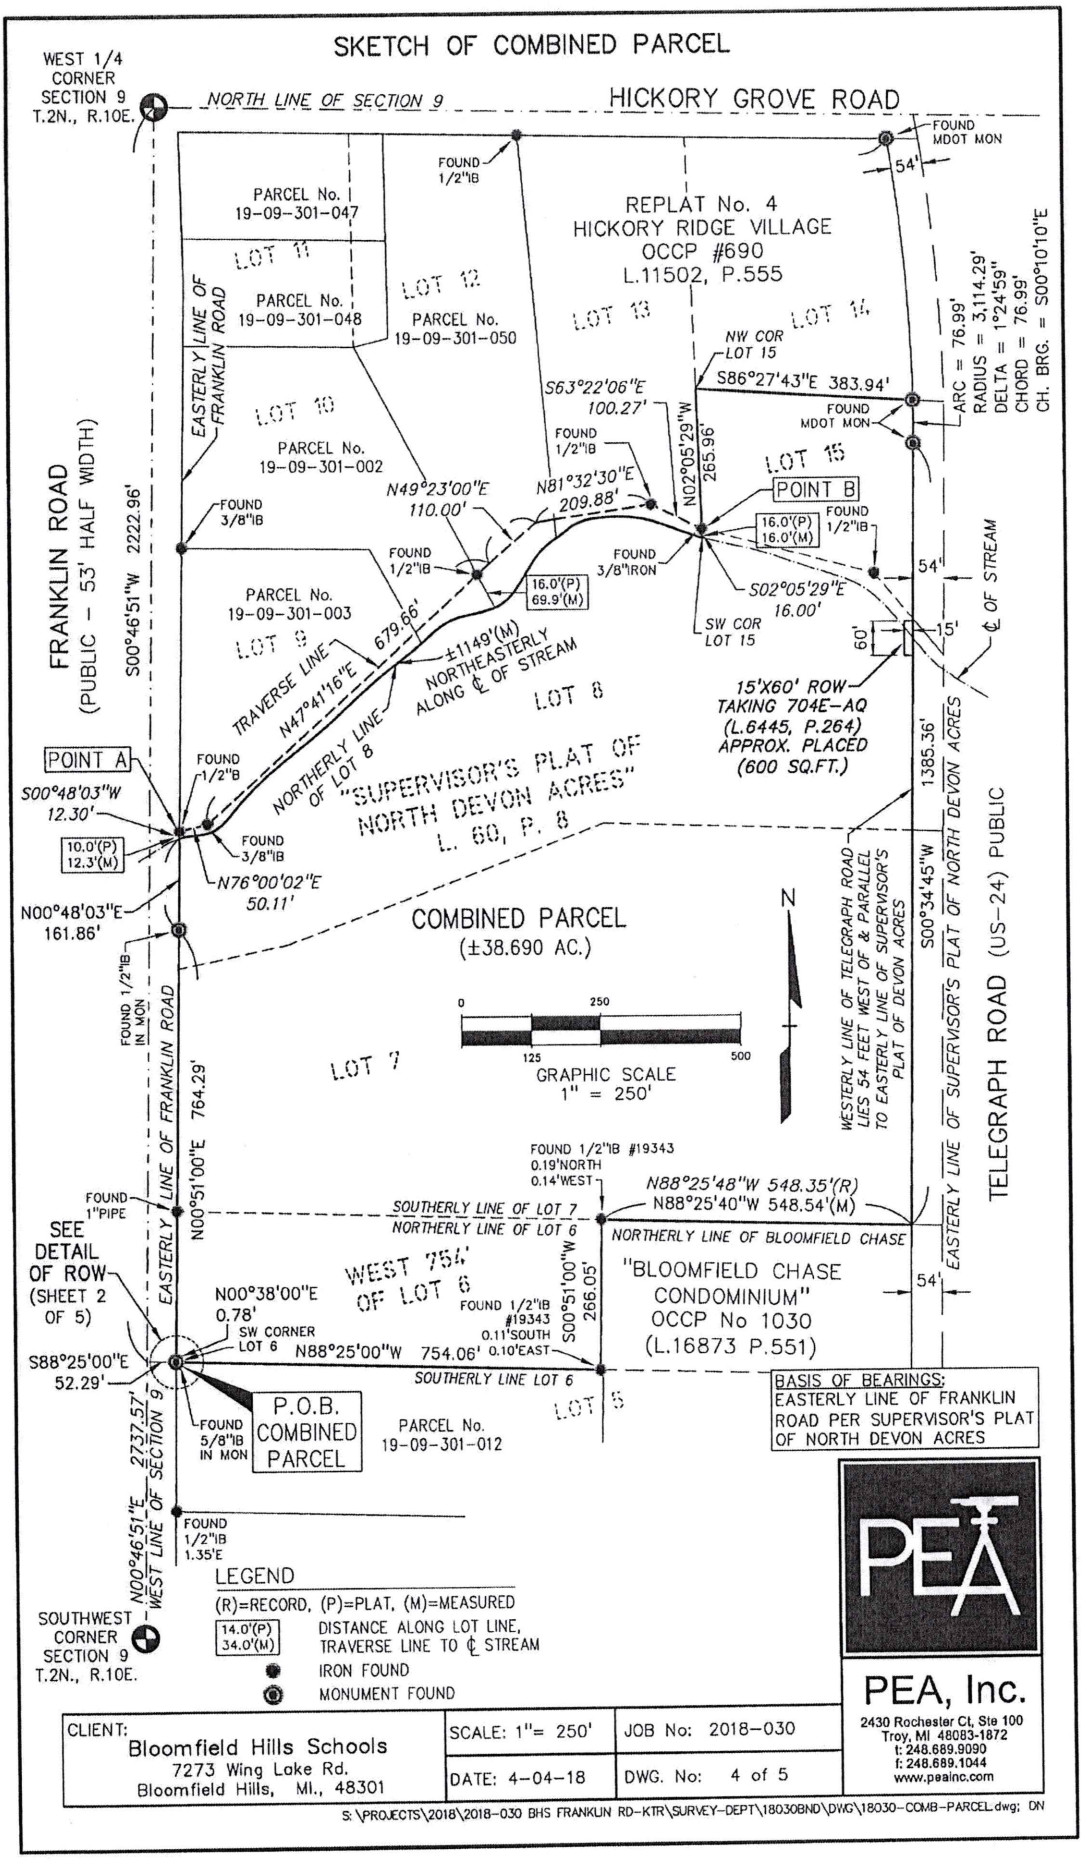
LEGAL DESCRIPTION – PARCEL B

PARCEL B:
(As Surveyed By PEA)

Lots 7, 8, and 15 of "Supervisors Plat of North Devon Acres" as recorded in Liber 60, Page 8, Oakland County Records; EXCEPT the easterly 54 feet thereof taken for highway purposes, being more particularly described as:

COMMENCING at the West 1/4 Corner of Section 9, Town 2 North, Range 10 East, Bloomfield Township, Michigan; thence S00°46'51"W, 1957.06 feet along the west line of said Section 9; thence S88°25'40"E, 52.61 feet to a found 1" diameter iron pipe on the easterly line of Franklin Road (53' half width) and the POINT OF BEGINNING, said point also being the southwest corner of the aforementioned Lot 7; thence N00°51'00"E 499.17 feet *(platted as 499.25 feet)* along the easterly line of Franklin Road, as monumented, to a found 1/2" iron bar in a concrete monument; thence continuing along said easterly line N00°48'03"E, 161.86 feet *(platted as N00°44'E, 164.27 feet)* to a point at the intersection of the easterly line of Franklin Road and the centerline of a stream, said stream centerline being the northerly line of the aforementioned Lot 8, said intersection lying S00°48'03"W, 12.30 feet *(platted as 10.0 feet)* from a 1/2" iron bar found at the intersection of the easterly line of Franklin Road and the westerly end of a TRAVERSE LINE lying northerly of said stream, said 1/2" iron bar also being reference POINT A; thence 1149 feet, more or less, *(platted as ±1145 feet)* northeasterly along the centerline of said stream, also being the northerly line of said Lot 8, to the southwest corner of the aforementioned Lot 15; said point lying S02°05'29"E, 16.00' (platted as S02°09'E, 16.0 feet) from a found 3/8" iron bar at the intersection of the easterly end of the aforementioned TRAVERSE LINE and the westerly line of Lot 15, said 3/8" iron bar also being POINT B;

said TRAVERSE LINE being described from POINT A as; N76°00'02"E, 50.11 feet (platted as N76°09'E 50.0 feet) to a found 3/8" iron bar; thence N47°41'16"E, 679.66 feet (platted as N47°37'E 680.0 feet) passing through a 1/2" iron bar at 649.66 feet; thence N49°23'00"E, 110.00 feet; thence N81°32'30"E 209.88 feet (platted as N81°37'E 210.0 feet) to a found 1/2" iron bar; thence S63°22'06"E 100.27 feet (platted as S63°36'30"E 100.0 feet) to the aforementioned POINT B;



thence continuing from the aforementioned southwest corner of Lot 15, N02°05'29"W, 265.96 feet (recorded as N02°09'00"W, 266.00 feet) along the westerly line of Lot 15, also being the easterly line of Replat No. 4 of Hickory Ridge Village, Oakland County Condominium Plan Number 690, as recorded in Liber 11502, Page 555 of Oakland County Records to the northwest corner of Lot 15; thence S86°27'43"E, 383.94 feet (platted as S86°28'E, 384.02 feet) along the northerly line of Lot 15, also being the southerly line of said Hickory Ridge Village condominium to a found concrete highway monument lying at the intersection of the northerly line of Lot 15 and the westerly line of Telegraph Road, as monumented, said westerly line lying parallel to and 54.00 feet westerly of the easterly line of the aforementioned "Supervisor's Plat of North Devon Acres"; thence along said westerly line of Telegraph Road 76.99 feet on the arc of a non–tangent curve to the right, having a radius of 3,114.29 feet, a central angle of 01°24'59", and a chord which bears S00°10'10"E 76.99 feet to a found concrete highway monument; thence continuing along said westerly line of Telegraph Road S00°34'45"W, 1385.36 feet to the northerly line of Lot 6, also being the southerly line of Lot 7, also being the northerly line of "Bloomfield Chase Condominium", Oakland County Condominium Plan Number 1030, as recorded in Liber 16873, Page 551 of Oakland County Records; thence along said line, N88°25'40"W, 1302.60 feet *(recorded as N88°25'48"W)* to the POINT OF BEGINNING.

ALSO EXCEPT a strip of land 15 feet westerly of and parallel to the westerly line of Telegraph Road, and extending 60 feet in a north–south direction, approximately centered on the stream intersecting said westerly line of Telegraph Road, as recorded in Right–of–Way taking 704E–AQ, on May 5, 1975, in Liber 6465, Page 264, as shown on MDOT Right–of–Way Map File No. 63–R–1, project number 63–21, Control Section 63031, Sheet No. 94, last revised February 2006.

Containing 34.086 acres of land more or less.

LEGAL DESCRIPTION

COMBINED PARCEL:

(As Surveyed By PEA)

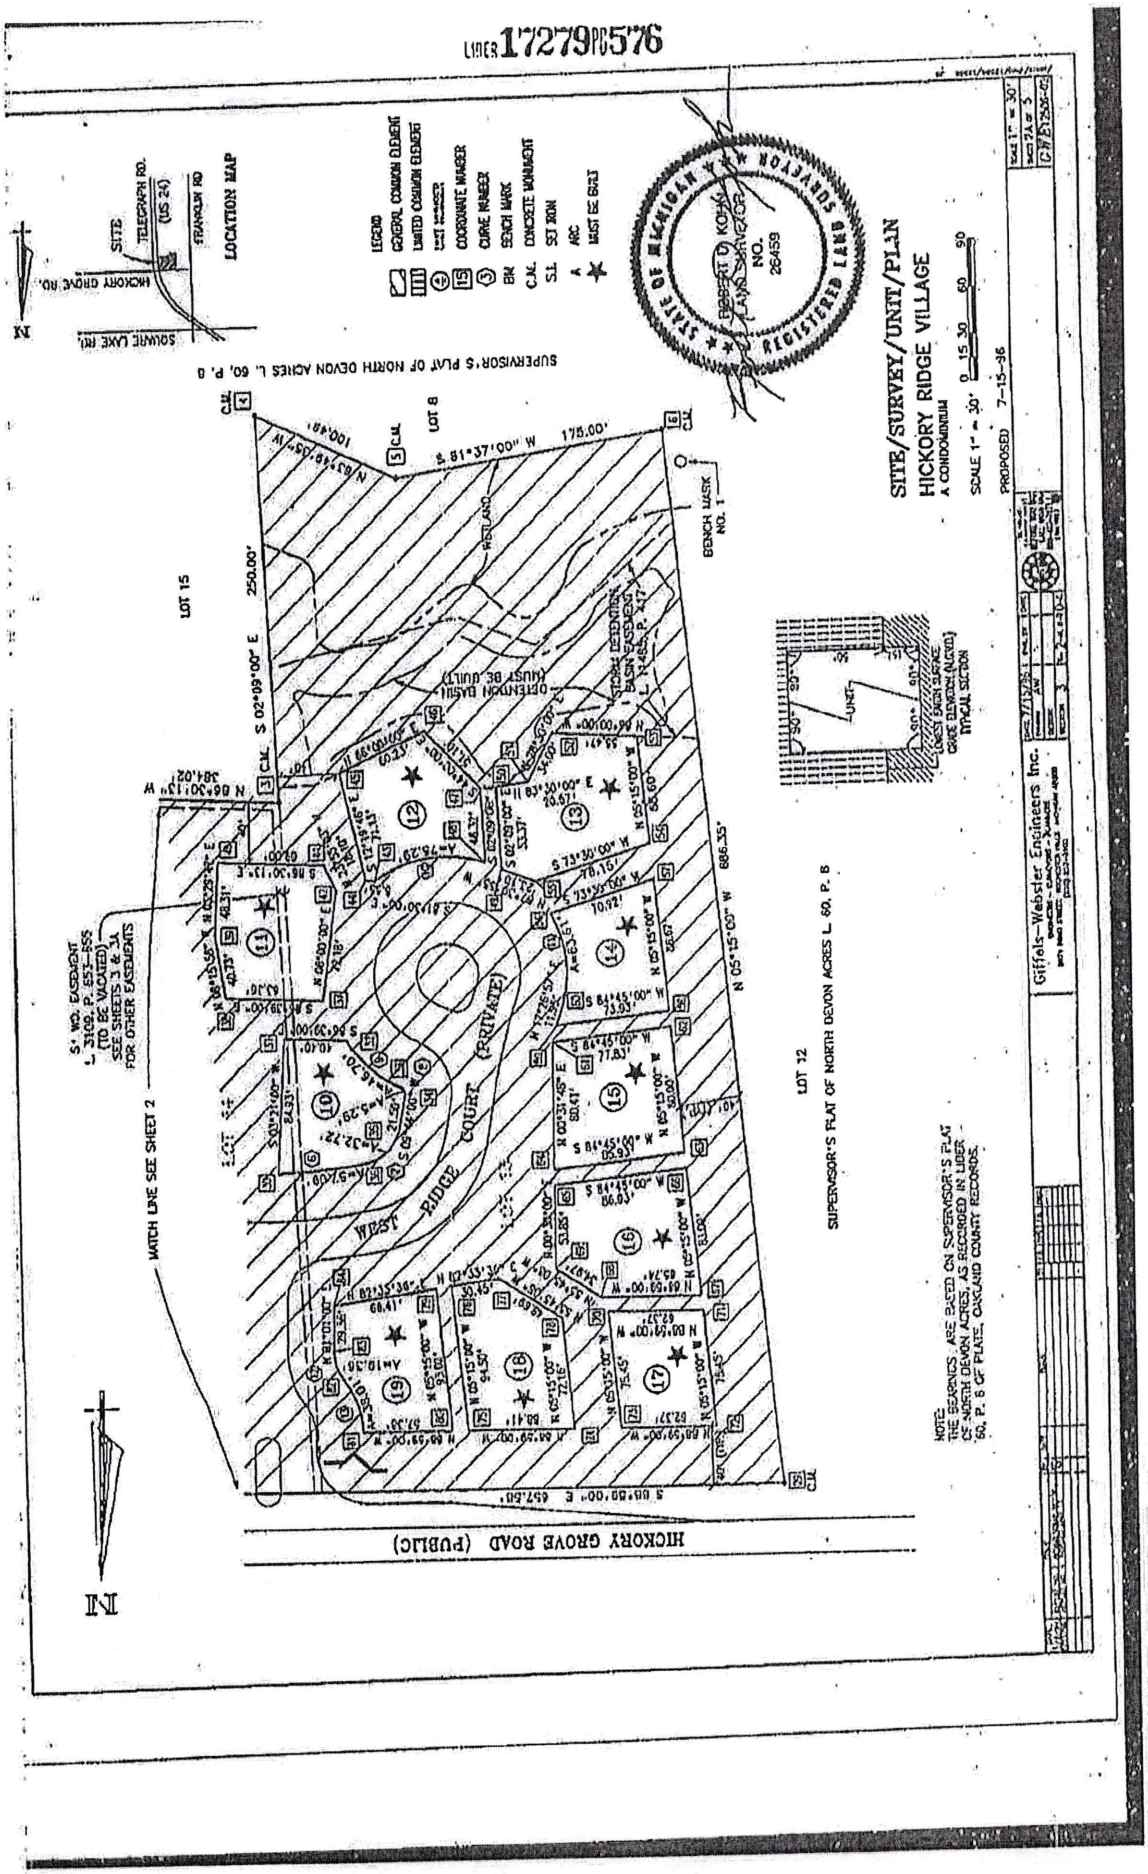
The west 754 feet of Lot 6, also all of Lot 7, Lot 8, and Lot 15 of "Supervisors Plat of North Devon Acres" as recorded in Liber 60, Page 8, Oakland County Records; EXCEPT the easterly 54 feet thereof taken for highway purposes, being more particularly described as:

COMMENCING at the West 1/4 Corner of Section 9, Town 2 North, Range 10 East, Bloomfield Township, Michigan; thence S00°46'51"W, 2,222.96 feet along the west line of said Section 9; thence S88°25'00"E, 52.29 feet to a found 5/8" iron bar in a concrete monument on the easterly line of Franklin Road, said monument also being the southwest corner of Lot 6; thence along said easterly line, as monumented, the following three (3) courses: N00°38'00"E, 0.78 feet and N00°51'00"E 764.29 feet, (platted as N00°51'00"E, 764.47 feet) to a found 1/2" iron bar in a concrete monument and N00°48'03"E, 161.86 feet (platted as N00°44'E, 164.27 feet) to a point at the intersection of the easterly line of Franklin Road and the centerline of a stream, said stream centerline being the northerly line of the aforementioned Lot 8, said intersection lying S00°48'03"W, 12.30 feet (platted as 10.0 feet) from a 1/2" iron bar found at the intersection of the easterly line of Franklin Road and the westerly end of a TRAVERSE LINE lying northerly of said stream, said 1/2" iron bar also being reference POINT A; thence 1149 feet, more or less, (platted as ±1145 feet) northeasterly along the centerline of said stream, also being the northerly line of said Lot 8, to the southwest corner of the aforementioned Lot 15; said point lying 02°05'29"E, 16.00' (platted as S02°09'E, 16.0 feet) from a found 3/8" iron bar at the intersection of the easterly end of the aforementioned TRAVERSE LINE and the westerly line of Lot 15, said 3/8" iron bar also being POINT B;

said TRAVERSE LINE being described from POINT A as; N76°00'02"E, 50.11 feet (platted as N76°09'E 50.0 feet) to a found 3/8" iron bar; thence N47°41'16"E, 679.66 feet (platted as N47°37'E 680.0 feet) passing through a 1/2" iron bar at 649.66 feet; thence N49°23'00"E, 110.00 feet; thence N81°32'30"E 209.88 feet (platted as N81°37'E 210.0 feet) to a found 1/2" iron bar; thence S63°22'06"E 100.27 feet (platted as S63°36'30"E 100.0 feet) to the aforementioned POINT B;

thence continuing from the aforementioned southwest corner of Lot 15, N02°05'29"W, 265.96 feet (recorded as N02°09'00"W, 266.00 feet) along the westerly line of Lot 15, also being the easterly line of Replat No. 4 of Hickory Ridge Village, Oakland County Condominium Plan Number 690, as recorded in Liber 11502, Page 555 of Oakland County Records to the northwest corner of Lot 15; thence S86°27'43"E, 383.94 feet (platted as S86°28'E, 384.02 feet) along the northerly line of Lot 15, also being the southerly line of said Hickory Ridge Village condominium to a found concrete highway monument lying at the intersection of the northerly line of Lot 15 and the westerly line of Telegraph Road, as monumented, said westerly line lying parallel to and 54.00 feet westerly of the easterly line of the aforementioned "Supervisor's Plat of North Devon Acres"; thence along said westerly line of Telegraph Road 76.99 feet on the arc of a non-tangent curve to the right, having a radius of 3,114.29 feet, a central angle of 01°24'59", and a chord which bears S00°10'10"E 76.99 feet to a found concrete highway monument; thence continuing along said westerly line of Telegraph Road S00°34'45"W, 1385.36 feet to the northerly line of Lot 6, also being the southerly line of Lot 7, also being the northerly line of "Bloomfield Chase Condominium", Oakland County Condominium Plan Number 1030, as recorded in Liber 16873, Page 551 of Oakland County Records; thence along said line, N88°25'40"W, 548.54 feet (recorded as N88°25'48"W, 548.35 feet); thence S00°51'00"W, 266.05 feet (recorded as S00°51'00"W, 265.98 feet) along the westerly line of said "Bloomfield Chase Condominium", also being the easterly line of the west 754 feet of said Lot 6, to the southerly line of Lot 6; thence along said southerly line, N88°25'00"W, 754.06 feet to the east line of Franklin Road and the POINT OF BEGINNING.

ALSO EXCEPT a strip of land 15 feet westerly of and parallel to the westerly line of Telegraph Road, and extending 60 feet in a north-south direction, approximately centered on the stream intersecting said westerly line of Telegraph Road, as recorded in Right-of-Way taking 704E-AQ, on May 5, 1975, in Liber 6465, Page 264, as shown on MDOT Right-of-Way Map File No. 63-R-1, project number 63-21, Control Section 63031, Sheet No. 94, last revised February 2006.



Containing 38.690 acres of land more or less.

DECLARATION AND NOTICE

This Declaration made this 25 day of March, 2021, by **BLOOMFIELD HILLS SCHOOLS**, a Michigan general powers school district, formerly known as Bloomfield Hills School District No. 2, a Michigan municipal corporation, having an address of 7273 Wing Lake Road, Bloomfield Hills, Michigan 48301 (hereafter called ("**BHS**"), being the owner of the property commonly known as E. L. Johnson Nature Center ("**Property**") which is owned by BHS and commonly known as 3325 Franklin Road, Bloomfield Township, Oakland County, Michigan (parcel identification numbers 19-09-301-051 (formerly parcel identification numbers 19-09-301-022 and 19-09-301-011) and 19-09-301-050), hereby makes the following Declaration regarding uses to which the Property may be put.

WITNESSETH:

The Declaration contained herein is based on the following factual recitals:

A. BHS developed the Property, in part, through the grant of money from the Michigan Natural Resources Trust Fund.

B. As a condition of the grant by the DNR, BHS has agreed to impose certain restrictions on the Property.

The legal description and boundary map of the Property are attached as Appendix A and Appendix B, respectively.

NOW, THEREFORE, BHS hereby declares that the Property is and shall be held, transferred, sold, conveyed, leased, occupied and used subject to the obligation hereinafter set forth, all of which shall run with the land.

The lands in this Declaration were developed, in part, by BHS with funding assistance from the Michigan Natural Resources Trust Fund pursuant to Project Agreement TF03-092 between the Michigan Department of Natural Resources and BHS executed on May 31, 2005, as amended by Amendment No. 1 effective November 15, 2005, and Amendment No. 2, effective as of February 17, 2021. The Project Agreement, in part, describes certain requirements to ensure the use of the Property for public outdoor recreation. BHS is placing this notice on record as confirmation of its obligations as set forth in the Project Agreement, including the requirement that the consent of the Michigan Department of Natural Resources and the Michigan Natural Resources Trust Fund Board of Trustees is required prior to the conveyance of any rights or interest in the Property to another entity, or for the use of the Property for purposes other than public outdoor recreation.

APPENDIX A Revised Legal Description

Legal Description – Part of Lot 6 and all of Lots 7, 8 and 15 - From PEA Survey dated April 4, 2018 – Job No. 2018-030

The west 754 feet of Lot 6, also all of Lot 7, Lot 8, and Lot 15 of "Supervisors Plat of North Devon Acres" as recorded in Liber 60, Page 8, Oakland County Records; EXCEPT the easterly 54 feet thereof taken for highway purposes, being more particularly described as:

COMMENCING at the West 1/4 Corner of Section 9, Town 2 North, Range 10 East, Bloomfield Township, Michigan; thence S00°46'51" W, 2,222.96 feet along the west line of said Section 9; thence S88°25'00" E, 52.29 feet to a found 5/8" iron bar in a concrete monument on the easterly line of Franklin Road, said monument also being the southwest corner of Lot 6; thence along said easterly line, as monumented, the following three (3) courses: N00°38'00"E, 0.78 feet and N00°51'00"E 764.29 feet (platted as N00°51'00"E, 764.47 feet) to a found 1/2" iron bar in a concrete monument and N00°48'03"E, 161.86 feet (platted as N00°44'E, 164.27 feet) to a point at the intersection of the easterly line of Franklin Road and the centerline of a stream, said stream centerline being the northerly line of the aforementioned Lot 8, said intersection lying S00°48'03"W, 12.30 feet (platted as 10.0 feet) from a 1/2" iron bar found at the intersection of the easterly line of Franklin Road and the westerly end of a TRAVERSE LINE lying northerly of said stream, said 1/2" iron bar also being reference POINT A; thence 1149 feet, more or less, (platted as ±1145 feet) northeasterly along the centerline of said stream, also being the northerly line of said Lot 8, to the southwest corner of the aforementioned Lot 15; said point lying 02°05'29"E, 16.00' (platted as S02°09'E, 16.0 feet) from a found 3/8" iron bar at the intersection of the easterly end of the aforementioned TRAVERSE LINE and the westerly line of Lot 15, said 3/8" iron bar also being POINT B;

said TRAVERSE LINE being described from POINT A as: N76°00'02"E, 50.11 feet (platted as N76°09'E 50.0 feet) to a found 3/8" iron bar; thence N47°41'16"E, 679.66 feet (platted as N47°37'E 680.0 feet) passing through a 1/2" iron bar at 649.66 feet; thence N49°23'00"E, 110.00 feet; thence N81°32'30"E 209.88 feet (platted as N81°37'E 210.0 feet) to a found 1/2" iron bar; thence S63°22'06"E 100.27 feet (platted as S63°36'30"E 100.0 feet) to the aforementioned POINT B;

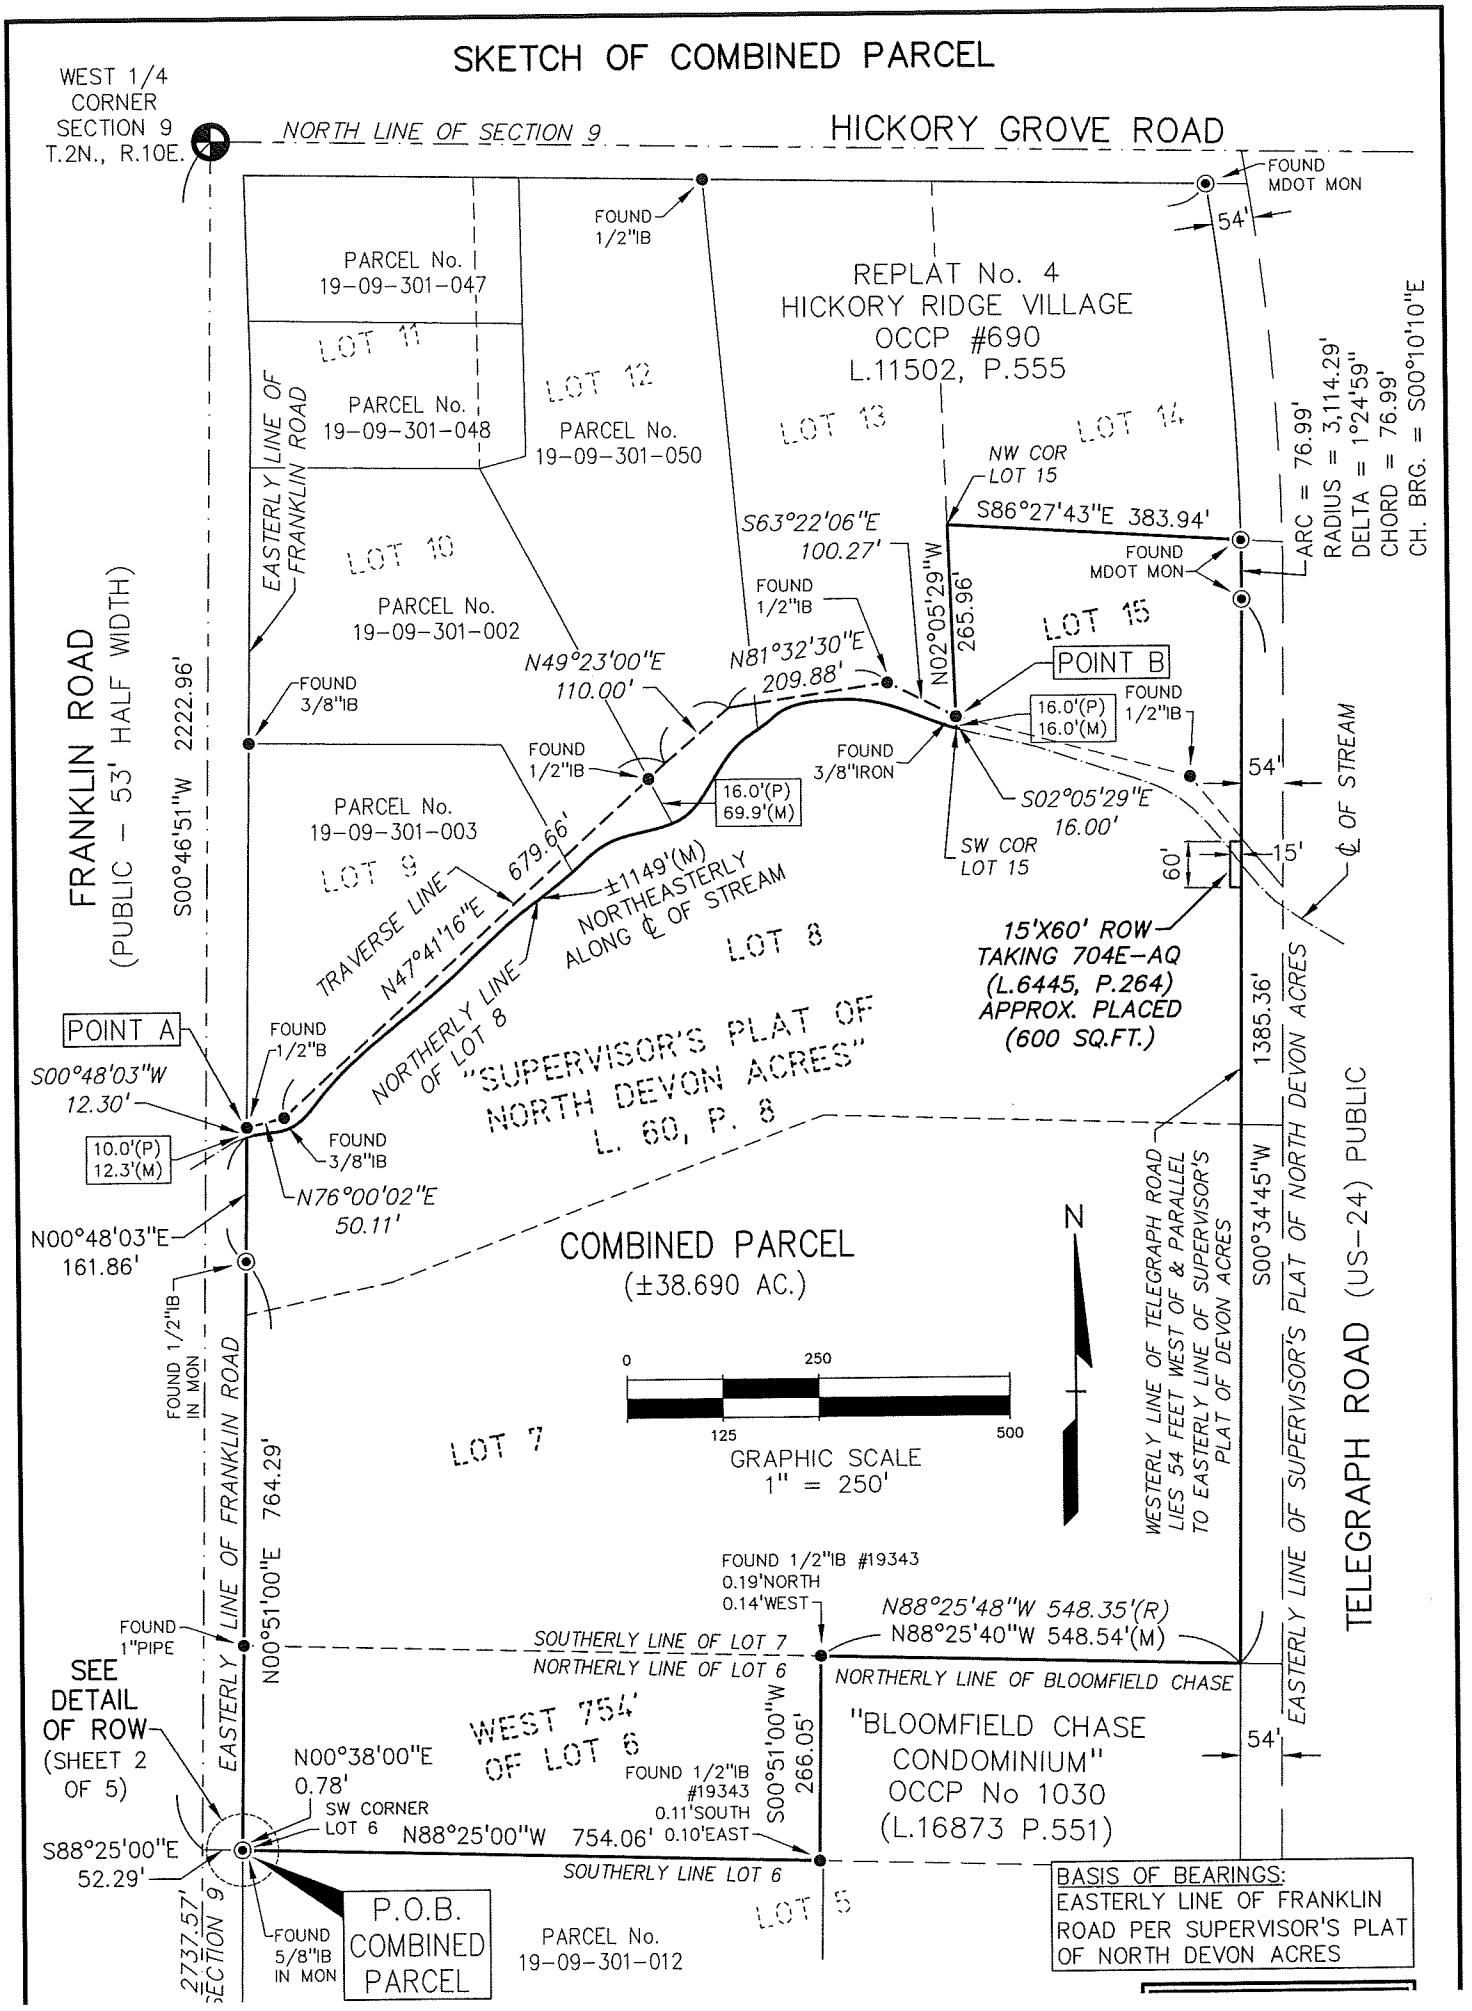
thence continuing from the aforementioned southwest corner of Lot 15, N02°05'29"W, 265.96 feet (recorded as N02°09'00"W, 266.00 feet) along the westerly line of Lot 15, also being the easterly line of Replat No. 4 of Hickory Ridge Village, Oakland County Condominium Plan Number 690, as recorded in Liber 11502, Page 555 of Oakland County Records to the northwest corner of Lot 15; thence S86°27'43"E, 383.94 feet (platted as S86°28'E, 384.02 feet) along the northerly line of Lot 15, also being the southerly line of said Hickory Ridge Village condominium to a found concrete highway monument lying at the intersection of the northerly line of Lot 15 and the westerly line of Telegraph Road, as monumented, said westerly line lying parallel to and 54.00 feet westerly of the easterly line of the aforementioned "Supervisor's Plat of North Devon Acres"; thence along said westerly line of Telegraph Road 76.99 feet on the arc of a non-tangent curve to the right, having a radius of 3,114.29 feet, a central angle of 01°24'59", and a chord which bears S00°10'10"E 76.99 feet to a found concrete highway monument; thence continuing along said westerly line of Telegraph Road S00°34'45"W, 1385.36 feet to the northerly line of Lot 6, also being the southerly line of Lot 7, also being the northerly line of "Bloomfield Chase Condominium", Oakland County Condominium Plan Number 1030, as recorded in Liber 16873, Page 551 of Oakland County Records; thence along said line, N88°25'40"W, 548.54 feet (recorded as N88°25'48"W, 548.35 feet); thence S00°51'00"W, 266.05 feet (recorded as S00°51'00"W, 265.98 feet) along the westerly line of said "Bloomfield Chase Condominium", also being the easterly line of the west 754 feet of said Lot 6, to the southerly line of Lot 6; thence along said southerly line, N88°25'00"W, 754.06 feet to the east line of Franklin Road and the POINT OF BEGINNING.

ALSO EXCEPT a strip of land 15 feet westerly of and parallel to the westerly line of Telegraph Road, and extending 60 feet in a north-south direction, approximately centered on the stream intersecting said westerly

line of Telegraph Road, as recorded in Right-of-Way taking 704E-AQ, on May 5, 1975, in Liber 6465, Page 264, as shown on MDOT Right-of-Way Map File No. 63-R-1, project number 63-21, Control Section 63031, Sheet No. 94, last revised February 2006.

Containing 38.690 acres of land more or less.

Parcel I.D. Numbers: 19-09-301-011 (West 754 feet of Lot 6) and 19-09-301-022 (as to Lots 7, 8 and 15)



Legal Description - Lot 12 – From Warranty Deed dated July 30, 1966 and recorded August 4, 1966 in Liber 4921, Page 180

Lot 12 excepting the Westerly 60 feet as measured at right angles to W'ly and S.W'ly lot lines, "Supervisor's Plat of North Devon Acres," a Subdivision of part of the W. ½ of the S.W. ¼ of Section 9 and part of the N.W. ¼ of the N.W. ¼ of Section 16, Town 2 North, Range 10 East, Bloomfield Township, Oakland County, Michigan, according to the plat thereof as recorded in Liber 60 of Plats, Page 8, Oakland County Records.

JOINT AGREEMENT TO EXTEND
FINAL PARK ACTION PLAN DEADLINE

Date: September 9, 2026

Re: Discovery Oaks – Bowers Farm and Bloomfield Oaks – Johnson Nature Center

Pursuant to Section 4.7.1 of the respective Interlocal Agreements between Oakland County and Bloomfield Hills Schools for Bowers Farm and Johnson Nature Center, the undersigned BHS Representative and OCPRC Representative mutually agree in writing to extend the deadline for delivery of the Final Park Action Plans from September 30, 2026, to December 15, 2026.

The additional time will allow the parties to complete review of recently available planning, engineering, environmental, operational, and community-engagement information and incorporate that information into the final five-year plans for each park.

This extension applies only to the deadline for delivery of the Final Park Action Plans. All other terms and conditions of the respective Interlocal Agreements remain unchanged.

We remain committed to the successful long-term partnership between Bloomfield Hills Schools and Oakland County Parks and to the continued stewardship of Bowers Farm at Discovery Oaks and the E.L. Johnson Nature Center at Bloomfield Oaks as valued educational, recreational, and community resources.

Agreed and acknowledged:

Rick West _____

Please help us protect this beautiful sanctuary by following these simple guidelines:

- *No pets allowed*
- *Do not feed wildlife*
- *No bikes allowed on trails*
- *Collecting natural materials and picking wildflowers are prohibited*
- *For the protection of the wildlife, balloons and confetti are NOT permitted on the property*
- *Commercial photography requires prior approval*
- *Help us keep the area clean by packing out any refuse*
- *Fishing and canoeing are only allowed on advertised dates*
- *All groups (schools, camps, homeschools, religious organizations, etc.) must schedule a program to visit – call 248.341.6485 for more information*
- *Supervise children at all times*

Consider joining Friends of Johnson Nature Center to work alongside Bloomfield Hills Schools to care for and maintain the natural environment, supporting the continued mission to connect people with nature.

Contacts and Information

OCP staff contacts:

Name	Role/Action	Dates of Actions
Simon Rivers	Property evaluation	3/24/25

Property contacts:

Contact	History of communication

Other information:

Provide references to publications that reference this property, website links and links to internal documents

Project Opportunities

Notes based on internal OCP discussion and communication with potential project partners.

Opportunity Statement

What is the opportunity? What is the problem that this property could solve?

Long Term Vision

How could this property fit into our long-term vision for the park system. Or state why it does not.

Project Scope

What are we proposing to do with this property? Would it be an acquisition or an interlocal partnership project? Give reference to current plans. Would this be a grant funded project?

Update: October 29, 2026

Alternatives

Have we considered other approaches to this property?

- Is another agency a better fit to acquire or partner?
- How can OCP assist local community without acquiring or partnering?

Opportunities for Additional Investment

Would we do the project differently if we had additional resources? What are the grant opportunities? Can we design the project with different outcomes based on funding?

Other Considerations

Anything not included in previous sections that should be discussed? Are there parties who should be informed or invited to participate?

Existing Site Characteristics

This AGO and web database section and Appendices A & B should take one hour or less by Planning staff.

Charles L. Bowers School Farm and E. L. Johnson Nature Center Joint Strategic Plan

March 2018

Charles L. Bowers School Farm and E. L. Johnson Nature Center are both owned and administered by the Bloomfield Hills School District. While each fulfills a unique role in supporting the curriculum of Bloomfield Hills Schools and the community needs in Bloomfield Township, our two sites share a common purpose to inspire authentic learning through hands-on experience. We also operate from a set of shared values and beliefs. For these reasons, we have chosen to create a shared strategic plan. The plan identifies what we consider to be the most significant questions facing us in the foreseeable future, and determines the strategies we will use to address those questions.

BIG QUESTION: How can we be more intentional to increase impact in our instructional programs for learners? And how will we know we've been successful?

STRATEGIES:

1. Farm and nature center educators and classroom teachers will engage in deliberate collaboration to develop learning outcomes starting with the end in mind.
    - Offer and participate in professional learning
    - Consult with curriculum leaders to vertically align program objectives, looking at all standards (Michigan standards, Next Generation Science Standards, etc.)
    - Use inquiry-based pedagogy as a foundation for programs
    - Doable, feasible → outside-the-box to actual reality
    - Logistics and resources—time, money, and stuff
2. Create a program schedule that better fits classroom curriculum timing.
3. Take the time necessary to provide impactful programs.
4. Perform and share formative and summative assessment of student learning between site and school.

BIG QUESTION: How do we create and sustain a preschool at both sites?

STRATEGIES:

1. Create new Bloomin' sites at both the nature center and farm, using current resources and knowledge of farm, nature center, and Bloomin' staff and the IB framework already used in Bloomin'.
2. Convene District committee to move this forward, including:
    - Finance
    - Facilities
    - Learning Services
    - Communications
    - Farm/nature center staff
    - Bloomin' team
    - Michigan State University

BIG QUESTION: How do we ensure that we meet community expectations well enough to retain their financial and political support?

STRATEGIES:

1. Create a conduit for community involvement and conversation.
    - Council, forum, membership
    - Result in awareness, communication, advocacy
    - Nature center and farm
    - Specialized membership "perk"-type incentives
    - Maintain some gateway to non-member program
    - A "funnel"
2. Create an active school/community partnership council to foster communication, linking home, school, and community through collaboration.
3. Create a network between agencies, civic organizations, and citizens for the purpose of identifying opportunities and concerns that will support and promote specific programs, groups, and projects.
4. Offer more community-based programs.
5. Utilize the Communications Department. Point person at each site to send info to Shira/Lauren.
    - Local publications (Eagle, Beacon)
    - Social media
    - Libraries
    - Senior centers
    - Etc.
6. Offer more consistent volunteer opportunities for interested community members.

BIG QUESTION: What should be the role of Community Services (Recreation Department) in programming at the farm and nature center?

STRATEGIES:

1. The role of Recreation/Community Services should be to support the programs by:
    - Publicity
    - Registration
    - Equipment usage
2. Create more open lines of communication between the two sites and Recreation Department.
3. Create our own farm/nature center break-even community programs with full-time staff.

BIG QUESTION: How can the farm and the nature center better coordinate programs so they are complementary?

STRATEGIES:

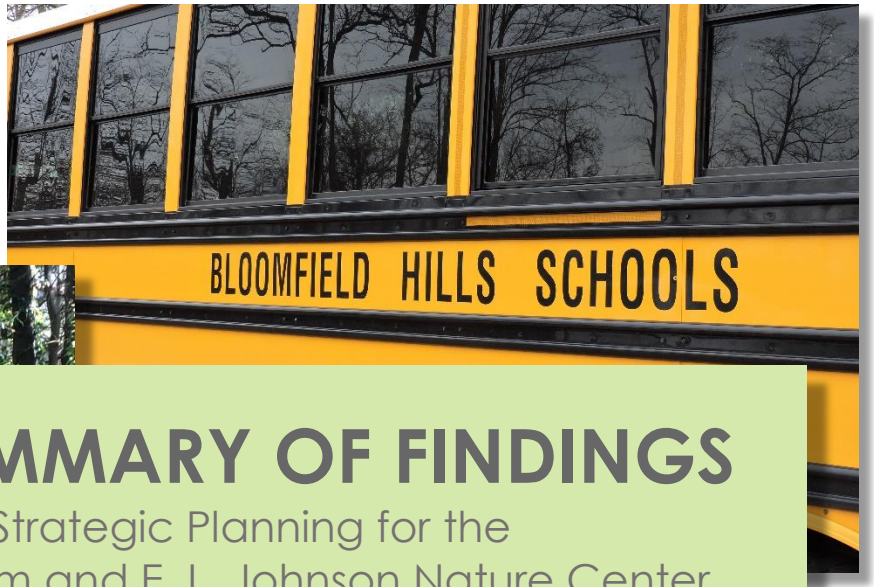
1. Build staffing structure that values collaboration between both sites. Think about Subject Matter Experts and roles/shared leadership.
2. Coordinate efforts to assure consistency with curriculum, pricing, and schedule.
3. Hire specialized staff for shared administrative leadership.
4. Create a shared curriculum map for both facilities and a collaborative web-based resource folder and calendar.

BIG QUESTION: How do we improve customer service? Service standards? Public relations?

STRATEGIES:

1. Implement service standards of the district.
    - Generate revenue to reduce costs for Bloomfield staff, students, and community members.
    - Increase advertising to bring new users to the farm/nature center.

BIG QUESTION: How do we build a more engaged staff?



STRATEGIES:

1. Offer a fair, equitable, and livable wage and benefits.
2. Invest in professional learning opportunities. (Offer educational tuition assistance.)
3. Evaluate staff and set performance standards.

BIG QUESTION: How do we address the need for periodic capital expenditures at both sites?

STRATEGIES:

1. Request to be added to the District's facilities timeline.
2. Conduct a capital needs assessment (of existing structures) of both facilities.
3. Determine the need for capital improvements through bringing on an expert.

APPENDIX A: SUMMARY OF FINDINGS

Background Information for Strategic Planning for the Charles L. Bowers School Farm and E. L. Johnson Nature Center

Executive Summary

This document collects in one place information that will serve to guide joint strategic planning for two Bloomfield Hills School District educational sites, Bowers School Farm and the E. L. Johnson Nature Center. The information falls into three categories: the mission and goals of the school district with which the plan should be consistent, the wide range of resources that will serve as inputs to the plan, and the needs of the customers whom the plan will serve. Because customer needs are usually the most poorly understood of the three, special attention has been focused on assessing these.

A middle section provides brief case studies of several organizations that, like Bloomfield Hills Schools, operate both a nature center and farm, in order to gain some understanding of how they have meshed the two functions.

The final section suggests some of the implications of the facts collected in the earlier sections. These represent the consultant's professional assessment of the key challenges for planning:

1. The nature center and farm are integral to the mission of the Bloomfield Hills Schools . . . for now.
2. The most important role of both the nature center and the farm is to support academic success for Bloomfield Hills Schools students. Providing for the recreational needs of the community, while important, comes second.
3. Requiring school classes to use the farm and nature center has both positive and negative implications.
4. The community at large may not understand the prioritization in #2, and this may lead to difficulties in the future.
5. Community-oriented programs and activities should be as financially self-sustaining as possible.
6. Both the nature center and farm are underutilized. This is true for both the school markets and the community markets.
7. School programming, in order to reach its full potential, will require better integration with classroom-based work, and greater interaction between site educators and their counterparts in the schools.
8. Better coordination between the farm and the nature center will lead to better utilization of the unique resources of each, and to a more well-rounded experience for users.
9. It will be difficult to achieve the full potential of both sites utilizing primarily part-time employees. This contributes to poor morale and staff churn.
10. Big staffing changes likely on the near horizon for the nature center will make for both opportunity and risk.
11. Invasive plant species at the nature center, if left unmanaged, will significantly impact the plant, animal and habitat type diversity on the site.

Implications for Planning 46

Addenda 49

Introduction

Planners, if they are to be successful, have to begin their work with a thorough understanding of three things. They must come to consensus on the ***mission and goals*** of the organization. They must have a realistic grasp of the ***resources available*** to invest in the finished plan. And they must understand the ***needs and desires of the audience*** that the plan is intended to serve—the organization's customers.

The task of the planners is then to create a plan that fits all three: it should achieve the organization's mission and goals, effectively draw on the available resources within the organization and its community of support, and provide things that customers actually want.

This is not as easy as it sounds. Too often, organizations become so focused on what they *believe* their customers should have that they create products and services that go unused. Or they are so responsive to customer demands that they lose track of the organization's mission. Or they attempt to build projects they don't have the resources to pay for.

Effective plans aim for the area of overlap highlighted in Figure 1.

Fig. 1. A simple planning model.

This document is an attempt to summarize, in one place, information about the Bloomfield Hills Schools' mission and goals, available resources, and customer needs that will inform strategic planning for two of the organization's key assets: the E. L. Johnson Nature Center and Charles L. Bowers School Farm.

Methodology

The purpose of this document is to summarize and interpret information available about the **mission and goals** of the Bloomfield Hills Schools as they relate to the Johnson Nature Center and Bowers Farm, the **resources** available to the organization in planning for the nature center and farm, and the **needs** of the people who use (or might use) those facilities.

I used a number of approaches to compile this information.

Information about the **mission and goals** of the school district comes from two main sources: written plans developed by the district and the opinions and views of the school board trustees and district administrators who have been tasked with interpreting those documents and following through on their intent. The written documents are available online. To learn about how they are put into practice, I interviewed three board members and a number of administrators, in person or occasionally by phone if a face-to-face meeting was not possible. (The names of all interviewees are included in Appendix A.)

Information about the **resources** available to planners, either currently or potentially, came from online sources, written reports and documents provided by nature center and farm staff, and through interviews with staff, volunteers, and representatives of partner organizations.

Because information about the **needs** of customers is often in the shortest supply in organizations, I spent a disproportionate amount of my time exploring them. In addition to reviewing online sources (including user reviews of the nature center and farm), studying relevant documents, and conducting interviews with staff, volunteers, and representative customers, I also investigated competing organizations (to learn about how they are satisfying the needs of the same or similar customers) and conducted short online surveys. The two versions of the survey—one for the nature center and one for the farm—were essentially the same, but distributed to different subsets of people. (Note that the surveys were completed by self-selected respondents, so they do not have the same statistical validity as Gallup polls or similar studies. They do, however, provide interesting insights into key customers. The survey results are found in Appendices B-G.)

To get some idea of how similar organizations have gone about planning for their nature centers and farms, I also interviewed key representatives by phone. The results of those conversations are detailed in a separate section in this report.

Throughout the report, I have included direct quotes taken from the interviews and surveys conducted as the core of my research. To protect the anonymity of the commenters and allow them the chance to speak more freely than they might otherwise, I indicated during the interviews that their quotes would not be attributed to individuals. In a few instances, I have indicated the category to which the speaker belongs, if doing so helps clarify the significance of their comment.

Findings

This section attempts to summarize the information that I believe will be most useful to planners. In some instances, I have relegated more detailed content to the Appendices. Readers who especially like detail, or who have special interest in certain sections, are referred there.

Organization Mission and Goals

The Bloomfield Hills School District has explicitly included the Johnson Nature Center and Bowers School Farm in its strategic planning for many years. The District's "originating Strategic Plan Document 2008"[1] mentioned both in the following objective:

Objective # 4: Build and Maintain Lighthouse Facilities

- *Measured by a periodic survey, our facilities will be the pride of our community.*
- *Measured by a new resident survey, our facilities will draw new families into our community.*
- *The integration of our unique assets (e.g. the Farm, the Nature Center, the Stone Schoolhouse) for educational use will contribute to a national reputation for educational innovation.*

The most recent iteration of the District's planning documents includes a more specific objective:[2]

Objective 3: BHS will enhance educational experiences & opportunities at the nature center, farm, and recreation

- *Leverage resources available via the strategic partnership with MSU Extension and plan next steps of the partnership*
- *Create a strategic plan and structure for outdoor education spaces, Farm & Nature Center*

The "Key Performance Indicators" are:

- *Future goal: Create and implement survey to gather feedback on farm, nature center, and recreation*
- *Future goal: Impact numbers - # of students, visitors, etc.*

[1] https://www.bloomfield.org/uploaded/Board_of_Education/Originating_Strategic_Plan_Document_2008.pdf
[2] https://docs.google.com/document/d/e/2PACX-1vT4mdIoWYTKEGArDMINAUouL85k58PVOvTf-s0Bij2HIwS6zHlRRszdcc909ZkZnY0ZEauDZnEf2qNE/pub

These guiding documents underscore the district's support of the nature center and farm in a general way. However, they leave a number of details open to interpretation.

How do the nature center and farm fit into the Bloomfield Hills Schools mission?

Over the years that the district has owned the nature center and farm, people—both inside and outside of the organization—have asked if it is appropriate for a school district to invest in such facilities. The skepticism was especially prominent (and public) when bond issues were on the ballot in the late 1990s.

> *"Sell [the nature center] to a different owner and get it off the BHS books." (Survey comment)*

In my interviews with board members and administrators, I asked various versions of the question, "How do you justify owning the farm and nature center?" Some acknowledged the farm and nature center might justifiably be seen as lower in priority than more traditional avenues of instruction.

> *"If I was pushed to have only the core that the state requires, protecting the farm and the nature center becomes harder to do."*

In general, however, all were supportive of the farm and nature center as integral to the school district's mission.

> *"We are very special in that we have our farm and nature center."*
> *"Children need to learn about those things."*
> *"I'm a very big proponent of experiential learning and immersive experiences."*
> *"Can I justify the care of a lot of farm animals as part of our K-12 operating budget? I have and will continue to do so as long as I am able. . . . I think it's vitally important that children have the experiences offered by those places."*
> *"We have a unique opportunity to leverage the farm and nature center as part of our core identity."*

A common sentiment was that the best way to justify the value of the farm and nature center to skeptics will be to improve them and enhance their integration with school curriculum.

> *"It's by strengthening the educational components of the program."*
> *"Not just improving what we're doing, but re-imagining these two gems that we have in the district."*
> *"[Each is] a gem waiting to be appreciated and re-positioned."*
> *"As long as we're going to keep the properties, [make] sure they're the best they can be."*

How does the district balance serving education versus community recreation needs?

Bloomfield Hills School District is highly unusual in that it functions in many respects as the *de facto* parks and recreation department for Bloomfield Township, which has no parks department of its own.

> *"The Township has historically been of the 'country club' mentality, not into public works projects."*

The district provides open space—the nature center and farm are prime examples—as well as programming, including sports, dance, arts and crafts, theater, aquatics, and other special interest pursuits. Only a small fraction of the district's programming is offered at the nature center and farm, but these sites are disproportionately important for special events and passive recreation like walking, bird-watching, and nature photography. As a result, they are more "dual-purpose" than most other district facilities.

> *"[The farm and the nature center] are different from the rest of the system. . . . They're square pegs in round holes."*

I asked a number of interviewees about how much priority should be given to community recreation versus education at the nature center and farm. All were clear that education is the most important work they do.

> *"Both facilities are there to enhance the educational experience of our students."*
> *"They are definitely extended classrooms and laboratories to me."*
> *"The priority would be the education."*
> *"We are more of an educational facility directly connected to the schools."*
> *"Being connected to the school district, we have a responsibility [to connect to the curriculum.]"*
> *"The district is a school district."*

Some pointed out that the question is not "either/or"—that much of the work done by the district's Recreation & Community Service Department addresses the whole child and whole community, and therefore has an educational function in the broad sense.

> *"It takes a village to raise a child. . . . I see all of our facilities as primarily educational facilities. . . . It's important to me that we are optimizing our resources for our students first. . . . I see [educating the community] as part of a whole."*

A challenge for BHS is that the district no longer has a millage earmarked for recreation, so any funds it spends solely for recreation-related activities need to be offset by income, or they draw money from the education side of the ledger. This poses an

important question for the farm and nature center: To what degree do the community-oriented activities need to be underwritten by earned income like admissions, program fees, rentals, and sales?

Interviewees generally indicated that community-oriented activities should generate revenue to offset their costs, but there was less agreement on how much.

> *"They should pay for themselves."*
> *"We've got to look at every single penny [when charging fees for service]."*
> *"There will always be a net cost, in my mind. We're just trying to offset it."*

In general, recreation and community-service programs are expected to be self-supporting on a district-wide basis, even if not every individual activity is. The farm and nature center are not currently required to demonstrate a balance between income and expense for community-focused programs.

How do the farm and nature center fit in the BHS organizational structure?

The nature center and farm each have an on-site person in charge of the facility. Beyond that, though, they are administered differently in the district's current structure. The "Farm Educational Leader/MSU Extension Educator" (Alan Jaros) reports to the Assistant Superintendent of Business Services (and also to Michigan State University Extension). The nature center "Manager" (Dan Badgley) reports to the Assistant Superintendent of Instruction. This inconsistency has developed over time, and is the result of a variety of non-strategic factors (like the capacity of potential supervisors). It has led to (or at least permitted) other inconsistencies:

- The farm charges for parents who accompany school groups; the nature center does not.
- Both sites have historic (or "faux historic") buildings and use them to do history-related programming that may or may not duplicate one another.
- The financial arrangements for staff who live on site are different.

These differences won't be addressed directly by strategic planning, but they do prompt one strategy-level question: "Does the current organizational arrangement make sense as we go forward?" Part of the answer to that question is determined by the goals, objectives, and philosophies of the BHS administration. In general, I found that field staff are happy having site-specific leadership. Most everyone I interviewed was open to some different structure at the administrative level.

> *"I would hope they [the farm and the nature center] didn't join. I'd hate to have one manager for both places."*
> *"It's all open for discussion. I think there should be consistency [in how the sites are supervised.]"*
> *"The biggest thing would be to have one person running both [the farm and the nature center]. . . . One umbrella."*

"I see them fulfilling two different roles, but under the same umbrella."
"There still needs to be more communication between recreation and farm staff. From a community service standpoint, it would be best served to work more together."

The untapped potential of the farm and nature center

This was not a topic I raised during interviews, but the subject came up enough times that it seems to represent a common thought, especially at the board and administrative level.

"There is the potential for lots of things to happen at the nature center."
"I feel like this place [the farm] has infinite potential."
"[The farm] is untapped, in many ways. . . . Underutilized."
"We're not fully optimizing either of these venues."
"They're probably at 10% of their potential."

In general, the perception was that the physical resources of the two sites—the land, buildings, and other facilities—are underutilized. Interviewees were also reflecting on the amount of demand they feel exists for more activities at the nature center and farm.

Serving Bloomfield Hills School District residents versus outsiders

As an outside observer, I was struck by the fact that residents of the Bloomfield Hills School District and non-residents are treated pretty much the same with respect to community programs and services, despite the fact that the former pay taxes to the district while the latter do not. Non-residents are assessed an extra $5 fee for programs (which is very nominal compared to most local government-operated recreation services in southeast Michigan, where non-resident premiums as high as 50% are charged). However, the nature center is open to everyone at no charge, community garden plots at the farm are available to all, and the Birmingham schools—which sent nearly 2,000 students to the Johnson Nature Center alone last year—pay program fees that are significantly subsidized. Interviewees, though, were for the most part not troubled by this trend. "I think our district residents have to have priority," said one, but the general feeling was that non-residents should be welcomed.

What other things at the farm and nature center might contribute to the mission?

Interviewees mentioned several things that could be added to operations at the farm and/or the nature center that they thought could help achieve the BHS mission. Several suggested that a nature-based preschool might be developed in either place. Another proposed a jogging path around the circumference of the farm. Others were not specific about ideas, but thought there was room for new things that would be mission-oriented.

"Why is there not a preschool at the nature center?"

"Farm, nature center, Lahser—these are opportunities to be entrepreneurial . . . that could pump the revenue up and be self-sustaining."

Available Resources

Plans require resources. When we talk about "return on investment," what we're investing is resources. For the purposes of this report, I define "resources" in the broadest sense: They include anything that advances (money, staff, etc.) or hinders (regulations, threats) the work you do to achieve your objectives.

Money

Money is one of the most significant resources, because it can be used to acquire most all the other inputs necessary for successful operations.

Current costs of the facilities

It cost BHS approximately $502,000 in the most recent fiscal year to operate the farm, based on figures from June 30, 2017, and not including the indirect costs of the school district like human resources and legal support, etc. (See Appendix H for details.) The nature center expenditures in the same fiscal year were approximately $184,000. (See Appendix I for details.)

Both sites have income as well. In FY2017, the farm had earned revenues of approximately $275,000 and the nature center recorded a bit over $73,000.[3] These figures represent 54.8% and 39.7% of their operating budgets, respectively—figures that are within the norms for nonprofit nature centers and similar institutions (although it should be noted that these numbers do not account for indirect costs for services like legal and human resources support that are not charged to individual site budgets).

In general, the current levels of funding for the nature center and farm are probably sustainable, and did not seem to worry anyone with whom I spoke, especially since most of the activities (and related expenditures) support curriculum in the schools.

"My perception is what's costing us [is] Bowers Academy [and] the fixed costs of operating the farm."
"It doesn't really cost us anything for our residents to come and enjoy [the facilities]. . . . It increases our reputation as a school district."
"Both the properties are luxuries that fortunately we can afford."

Several interviewees characterized the expenditures on the farm and nature center as relatively small in the context of the overall budget for the school district.

[3] These income numbers represent all earned revenues generated at the respective sites—both instructional fees (Fund 101) and recreation activities (Fund 230).

"If the costs were significant—I don't know what that dividing line would be—and we're robbing Peter to pay Paul to do what we need in the classrooms, that would be different. . . . [Currently, it's] not a make-or-break factor."

Earned revenues at the nature center and farm

While no interviewees focused on funding as an issue of concern, many did draw a distinction between money that covers curriculum-related expenditures and money that pays for community services--the "auxiliary entities" in the budget, as one put it.

"We want to minimize how much they take from our general fund."

Every administrator to whom I put a direct question about how to pay for community recreation had a version of the same response—that the goal is to make those activities pay for themselves.

"I do think we need to ask them to find ways to do as much self-support as possible."
"If that is costing money and not self-sustainable then it's at risk."

No one put this goal into concrete terms for the nature center and farm, however.

"There is no specific target."

Part of the reluctance to specify income targets is related to the difficulty of establishing exactly what the income and expenses of community programs have been. Going forward, administrators would like a clearer picture of those figures.

"Once we have some year-over-year numbers, [the farm and nature center might have projections]. . . . Without that type of data, it would be unfair to ask them to hit targets."

More than one administrator, though, acknowledged there is still room for entrepreneurial ideas to be tried.

"Sometimes you have to invest some money up front."
"If you've got to run some programs at a loss for a while, no problem."

In the long term, at least some are thinking about ways to shift the responsibility for funding parks and recreation for the community to some other entity. It is recognized that Bloomfield Township can't (by law) raise any more revenue through millage. But there is some interest and shifting sense that the Township should get into parks in some way.

Raising charitable dollars

In addition to charging fees for service, it is also possible to raise charitable dollars to offset the capital and operating costs of the farm and nature center. To some extent, this is done already on a small scale: Both sites receive contributions on an occasional basis, amounting to an average of $4,000-$6,000 a year at the nature center and a somewhat smaller amount at the farm. In addition, the Friends of the Nature Center has over $22,000 currently on hand to support the center's activities, and the farm also has a Friends group that raises funds (see "Partnerships," below). As far as I could discover, though, no large-scale fundraising campaign has been successfully undertaken by any group that works with the school district.

Overarching responsibility for raising contributed funds for BHS as a whole belongs to the Bloomfield Hills Schools Foundation. Several interviewees stressed that any fundraising done for the farm or nature center should be coordinated by the Foundation.

> *"It should be going through the Foundation. They should be working with [Executive Director] Cathie Badalamenti."*

Staff

People are a critical resource for any organization that delivers services. Their numbers, skill sets, level of experience, and other more intangible elements go into the contributions that staff members make to the organization's success.

Farm and nature center staff

The leadership positions at both the farm and nature center are in the hands of staff who are well regarded. At the farm, Farm Educational Leader/MSU Extension Educator Alan Jaros is relatively new, having been brought over about a year and a half ago from nearby Tollgate Farm in a partnership arrangement with Michigan State University Extension that allots 80% of his time to Bowers Farm. One concern: June 30, 2018, is Jaros's contract expiration date (although Extension expressed willingness to discuss continuing the relationship).

> *"[Alan is] really forward-looking and -thinking."*
> *"He is a vibrant thinker."*
> *"It's become much more user-friendly at the farm with Alan being there."*
> *"Alan is phenomenal to work with and a great guy."*
> *"We have a really great working relationship."*

At the nature center, Dan Badgley has served as Manager for 29 years. He is respected especially for his institutional knowledge, his long perspective, and the passion he brings to his work. As with Jaros, though, there is some uncertainty regarding the remaining

length of his tenure at the center, because he is eligible for retirement (though he has made no decision regarding how long he will continue in his position).

"Dan's phenomenal to work with."
"Dan is super. . . ."
"Mr. Badgley is amazing." (Survey comment)

In addition to the leadership, there are nine staff who work at the farm (not including those at Bowers Academy) and six at the nature center. Most of the farm staff and all of the nature center staff are educators and are part-time (see the next section for more about part-time status). Within the BHS organization, all were given high marks, and they impressed me favorably as well. They demonstrated a great deal of engagement in their work.

"We love each other, and we really love this place a lot. I think we have a lot of pride, too."

Customers, though, made comments both in interviews and on surveys that offered front-line staff mixed reviews.

Most came from comments written on surveys. In answer to the question, "What is your favorite thing about Bowers School Farm?" asked on the farm version of the survey, 14.2% of respondents cited staff and volunteers, sometimes by name. The same question tailored to nature center respondents prompted 4.2% to mention staff and volunteers.

"The [farm] staff, Amy Cardin especially, is very nice and inviting." (Survey comment)
"The [nature center] trails are amazing, staff very friendly and knowledgeable." (Survey comment)

(Note that a much smaller percentage of nature center visitors interact with staff, since the nature center—unlike the farm—is open to the public when staff are not present.)

More telling, though, were responses to versions of the question, "If you could change one thing about Bowers School Farm, what would you change?" Only one respondent to the farm survey (out of 125 comments) mentions a staff concern. On the nature center version of the questionnaire, however, five (out of 72 comments) express displeasure with staff.

"Make the [farm] staff less creepy (went to a thing and a guy working with kids had his fly down)" (Survey comment)
"The group leaders for school trips [to the nature center] are not very patient with little kids. Very unfriendly." (Survey comment)

"The nasty attitude the woman who 'teach' the children have! Those woman are awful! 'Don't touch this,' 'Put your hand down.' I mean the kids can't even have fun or ask questions, [the nature center] is more like a prison not a learning experience!" (Survey comment)

"When attending school field trips the majority of the [nature center] guides seem irritated that the kids are there...and the kids can see this very clearly." (Survey comment)

Similar (though more tempered) concerns emerged in the interviews, where some nature center educators were described as having "old ways" and "old expectations."

Issues with part-time staff

One question I asked frequently in interviews was some version of, "If you could make one change at the nature center and/or the farm, what would it be?" Common responses from part-time and full-time staff alike had to do with the limits of using part-time, hourly employees in positions at both sites.

"For me, 100%, it would be investing in staff."

"Have more staff available, so we don't feel like we're having to be here all the time. Probably another teacher."

"We're very understaffed [at the farm]."

"Part-time doesn't make you invested. It makes you overworked and under-appreciated, sometimes."

"I don't make enough money to be independent. . . . It's sad and it's frustrating."

Part-time staff reported putting in time for which they were not paid—things like working at home, going to the store, and doing set-up and tear-down early or late in the day. They expressed the concern that being paid primarily to present programs left few opportunities for planning or just keeping up with the day-to-day changes at their sites that allow them to prepare for "teachable moments." Administrators worried about the recruitment and training costs of "staff churn," an issue even at the nature center (where educators have been on staff for many years) because many employees are currently eligible to retire.

Volunteers

In addition to staff, both sites count heavily on the contributions of volunteers. Many hours are contributed by partner organizations, especially Master Gardeners at the farm (1,203 hours contributed in FY2017). A cadre of over 130 volunteers contributed 585 hours at the nature center during the same period. Scouts and corporate groups also get involved on a regular basis at both locations.

"It's been a huge help for us. . . . Wherever I look around the farm, I can see stuff done by a Scout or group of Scouts."

Partners

Both the farm and nature center rely on partnerships to help them achieve their objectives, and those partners bring their own sets of resources to the table.

MSU Extension

In July of 2016, BHS formed a strategic partnership with Michigan State University (MSU) Extension in order to combine the strengths of both organizations—the school district's suburban farm site, and Extension's expertise and links to university resources. The goal was to develop a comprehensive outdoor science learning center. The partnership was contractually binding and includes leadership and management support. Most significantly, MSU agreed to fund 80% of Alan Jaros's time as the leader of the program at the farm.

"I think we're just scratching the surface of the partnership possibilities."

Friends groups

Both the nature center and farm have volunteer-based Friends groups. The Friends of the Nature Center has existed since 2006. Its main role in recent years has been to put on public interpretive events at the center. According to one interviewee, there are approximately 50 or 60 dues-paying members. The Friends leadership reports having trouble recruiting new members, although they believe there are lots of people who care about the nature center. As noted in the section on "Money," the group has raised over $20,000 that they held in case the funds were needed to help acquire the lots on the nature centers southern boundary. (The school board recently decided to swap other BHS property for these lots.)

"Money is involved, but also time. We all cook for [special events]."

The Friends of the Farm organized in 2010. Its stated mission is "to support, preserve and enhance the Bowers Farm property, programs and activities through financial support, community outreach and volunteerism." The group has a mailing list of about 120 people. They helped do a renovation of the barn in 2010. The group has a special interest in the horse leasing program. They are active in volunteering and fundraising through product sales and special events.

Preservation Bloomfield

Preservation Bloomfield's website describes the group as "a non-profit, all-volunteer community organization formed to preserve and protect two historically relevant homes in Bloomfield, Michigan." Those two homes—the Barton Farm House and Craig Log Cabin—have been moved to Bowers Farm, where they are available for use with

educational programming. Preservation Bloomfield continue to improve the structures, and retains control of their use.

> *"It is our hope that the preservation of the farmhouse and cabin, along with the educational programs provided by the Bloomfield Hills schools, will help future generations remember and appreciate the lives of the Metro Detroit's early colonial settlers." (Preservation Bloomfield website)*

Others

Master Gardeners have worked at the farm for 14 years. There are 700 Master Gardeners in Oakland County, the largest group in Michigan, and Bowers Farm is their largest project. About 45 of them work at the farm. The farm staff "makes us want to be here." In 2017, they contributed over 1,200 hours of volunteer labor at an estimated value of nearly $28,000.

The Oakland County Conservation Stewards provide similar assistance at the nature center.

Also an important farm partner, Macomb County Community College runs a large-animal veterinary technology class there, pays for it and provides veterinary care to the farm's livestock.

Buildings and Related Structures

Both the farm and nature center rely to a great extent on buildings and related structures to enhance or even make possible the work they do. Here is a summary of the structures at each site:

Bowers School Farm—building and structures inventory

- Animal barn (built around 1908)—Used daily.
- Cottage (built in the early 1950s)—Used today for storage and the occasional program.
- Tool shop, outdoor restrooms, poultry barn and horse barn (all built in the early 1980s)—All used daily.
- Outdoor horse arena (originally created in 1993 with new fencing in 2016)—Used frequently by horse lease participants in the summer.
- Farm Activity Building & adjacent garage (1990)—A Recreation building, very rarely used. Book sale done annually. The farm recently got approval to use the garage as storage.
- Gazebo (1987)—Used for events.
- Learning Center and Bowers Academy (2011)—Incorporates classrooms, a laboratory, greenhouse, and offices. Used daily. The greenhouse is mostly used for starting plants for spring planting.

- Craig Log Cabin (brought to the farm by Preservation Bloomfield in 2008)—The goal is to use this building for educational programs.
- Barton Farm House (brought to the farm by Preservation Bloomfield in July of 2008)—The goal is to use this building for educational programs.

Fig. 2. Bowers School Farm Learning Center and Bowers Academy.

Johnson Nature Center—building and structures inventory

- Caretaker residence (1947)—A 4-bedroom ranch on a cement slab, includes a two-car garage for caretaker and additional garage storage for nature center equipment including a tractor, utility vehicle, log splitter, and other equipment and supplies.
- Visitor Center/Classroom Building (2006)—Includes an exhibit room, restrooms, small kitchen, two classrooms, small library, Manager's office, and storage. A total of 5,000 square feet on two levels. Parking lot accommodates 50 cars.
- Pioneer Log Cabin (1988)—Built to provide a space to offer living history programs for students. Furnished with 1800's era décor, wood stoves. Has one electrical outlet and "electrified lanterns" for lighting. Hand pump located outside.
- Log barn (1994)—Used to support the living history programs. Houses a variety of old farming and logging tools giving students a hands-on experience. Has one outlet and "electrified lanterns" and a wood stove.
- Sugar Shack (1980)—The maple sap "wood-fired" evaporator is housed here where boiling maple sap is practiced in February-March every year. Students come inside the shack to see the process. No electricity.
- Tool sheds—Two sheds that house an electric utility cart, lawn mower and attachments, and a variety of tools used on the property including rakes, shovels, root jacks, hand tools, etc.

- Fishing dock (1996)—Used for fishing programs and many instructional programs. A favorite gathering spot for visitors.
- Pond bridge (1987)—This bridge gives access to the south side of our pond. Used extensively.
- Outdoor classroom (2013)—Accommodates approximately 40 students. Has a fire ring for campfires.
- Several boardwalks, benches, sampling docks, and a look-out tower are found along the trails.

Fig. 3. Johnson Nature Center visitor center/classroom building.

Unused capacity

Interviewees often mentioned what they saw as underutilization of resources at both sites (especially the farm). Usually they singled out buildings, including the Activity Building and the Learning Center at the farm.

> *"We used to have teen dances [in the Activity Building] . . . karate classes . . . sledding hill warming."*
> *"I see wasted capacity in that [farm] building."*
> *"The greenhouse should be a beehive of activity."*
> *"With the right set-up [in the greenhouse], we could grow a lot of lettuce . . . maybe hydroponically."*

Despite the existing buildings, I did hear some complaints about inadequate spaces.

"In the big picture, we have the space," said one interviewee. But projects, labs, etc., for the Career Technical Education (CTE) course at the farm are tough to fit because the space isn't student-friendly.

Historic structures

The farm has two historic structures. BHS owns a third historic building, the Wing Lake School, that at least one interviewee thinks should be considered a resource for strategic planning.

> *"Part of our Michigan curriculum has been to spend a day at the Wing Lake School."*

The historic programming at all facilities needs to have a "collective vision," said another interviewee. Currently, restoration work is still underway on the interior of the Barton Farmhouse, and neither it nor the Craig Log Cabin are used much for farm activities.

Other stuff

Interviewees had several comments about perceived shortcomings in existing buildings and other structures.

> *"You've got a lot of things that need proper care and maintenance. . . . The boardwalk. The paths. . . . There's so much maintenance that needs to be done here [at the nature center]. [Mentions the steps of the log cabin.] It seems scruffy. . . . It needs more input from the district."*
> *"The signage [for the farm] is horrible. That needs to change."*

Equipment

The farm in particular relies upon expensive specialized equipment in its operations. Alan Jaros offered the following commentary on the farm's equipment:[4]

> *Certain implements typical to a working farm are not available for use. Row planters, no-till drills and other similar planting equipment are standard in similar small farm integrated operations. Some of the field and farm equipment is outdated. A capital outlay may be necessary to purchase new equipment and keep the tools in operation. This includes two New Holland tractors, farm implements, and small utility vehicles. The equipment is stored outdoors in the elements without shelter. This decreases the longevity and degrades even the newest implements.*

[4] Alan Jaros, "Analytical Organizational Assessment of Bloomfield Hills School District, Charles L. Bowers School Farm," (Internal report, 2016), p. 10.

The report also notes that there is currently no equipment inventory or replacement plan.[5]

The Land and Other Living Resources

The nature center and the farm exist for site-based education, so as you might expect, the sites themselves are vital to the outcomes Bloomfield Hills Schools seek there. This section provides a quick summary of the land and other living resources of each site.

Bowers School Farm

Key features of the property:

- It occupies an 89.8-acre urban site.
- It is a working farm that incorporates forest land, rolling fields, a large pond, horticultural gardens, vegetable production, and community gardens.
- The community gardens contain 69 tilled plots and 10 no-till plots.
- There are a number of specialized plantings, including butterfly, sensory, and shade gardens.
- Sheep, horses, llama and a donkey graze the pastures. The farm also houses poultry of all types, rabbits, and goats. (See Appendix J for a complete inventory of livestock.)

Fig. 4. Community garden plots at Bowers Farm.

[5] Ibid, p. 13.

Johnson Nature Center

Key features of the property:

- It consists of 40 acres (soon to be 45) of diverse habitats including forest, restored prairie/savanna, wetlands, and riparian areas.
- The woodlands harbor a large variety of trees including stands of pine, hardwoods, and a sugar bush.
- The property has significant issues with invasive plant species, most notably common buckthorn (*Rhamnus cathartica*), which has taken over large swaths of the understory, especially down near the stream. Significant efforts have been made over many years to remove invasives and replace them with native species with notable success, but the work remains ongoing.
- It has frontage on a tributary of the Rouge River.
- The main aquatic feature is a four-acre pond with good water quality and a diverse fish population.
- Live animal displays include one white-tailed deer, a red-tailed hawk, and two great horned owls.
- There are approximately two miles of trails of varying lengths.

Fig. 5. Johnson Nature Center four-acre pond.

Location

Location—especially good location that makes a site accessible to potential users—is an important resource. Both the farm and the nature center are blessed with excellent

locations. Both have prominent frontage on one of southeast Michigan's largest arterials (Interstate 75 for the farm, Telegraph Road/US-24 for the nature center), and both have excellent direct access to well-known surface streets (Square Lake Road in the case of the farm, Franklin Road in the case of the nature center). In addition, the sites are among the largest green spaces in Bloomfield Township, a jurisdiction where publicly-owned green space is at a premium.

Legal Constraints

The nature center has significant limiting constraints on what can and cannot be done there, the most significant of which are a part of the agreement that governs the $475,000 grant made to finance the center building by the Michigan Natural Resources Trust Fund in 2005. That agreement (see Appendix K), administered by the Michigan Department of Natural Resources (MDNR), requires Bloomfield Hills Schools to:

- Use the facilities funded by the grant (essentially, the nature center building and disabled-accessible pathways) "solely for the purposes specified" in its application. The application specifies they will be used "to provide barrier-free access to enhance and expand educational and recreational opportunities for the public, and promote preservation of ecological resources." Public fishing for Boy Scout troops, day camp groups, and persons with disabilities is specifically identified as a use. The application also specifies that, "The facility will be open seven days a week all year," though "facility" is not specifically defined.
- "Operate the project facilities for a minimum of their useful life as determined by the DEPARTMENT, to regulate the use thereof to the satisfaction of the DEPARTMENT, and to appropriate such monies and/or provide such services as shall be necessary to provide such adequate maintenance. . . ."
- "Provide to the DEPARTMENT for approval a complete tariff schedule containing all charges to be assessed against the public utilizing the project area and/or any of the facilities constructed thereon. . . ."
- "Acquire and maintain insurance. . . ."
- "Obtain prior written authorization from the DEPARTMENT before implementing a change that significantly alters the project facilities as constructed and/or the project area, including but not limited to discontinuing use of a project facility or making a significant change in the recreational use of the project area. . . ."
- Agree that "the project area or any portion thereof will not be converted to other than public outdoor recreation use without prior written approval by the DEPARTMENT and the BOARD and implementation of mitigation approved by the DEPARTMENT and the BOARD, including but not limited to replacement with land of similar recreation usefulness and fair market value."

The agreement also stipulates that "membership or annual permit systems are prohibited," and that "differences in admission and other fees may be instituted on the basis of residence," although there are limitations on the amount of the differences.

It also includes some bookkeeping requirements. The school district must:

- "Separately account for any revenues received from the project area which exceed the demonstrated operating costs and to reserve such surplus revenues for the future maintenance and/or expansion of the GRANTEE"S park and recreation program.
- "Furnish the DEPARTMENT, upon request, detailed statements covering the annual operation of the project area and/or project facilities. . . ." (None have been requested.)

There has been only one follow up by MDNR regarding the school district's compliance with the terms of the agreement, a brief written questionnaire a couple of years ago. "We're in good standing with them," says Manager Dan Badgley.

Security Issues

Security issues at the nature center and farm merit comment because both sites are set up to house on-site caretakers (although the residence at the farm is currently unoccupied). Neither site has a significant history of vandalism, crime, or other security-related problems, but both (especially the farm) have valuable assets potentially subject to theft or damage.

> *"People coming in and doing mischievous stuff [at the farm] has been minimal over the years."*
> *"Park security. On a recent [nature center] visit, witnessed families breaking rules and misbehaving." (Survey comment)*

The main buildings at the farm and the nature center have security systems, but one interviewee notes, "You can't really lock the barn up." It and the log cabin and other buildings at the nature center are not alarmed.

Staff at both sites value the on-site presence of caretakers. A significant concern at the nature center is the risk of drowning in the lake, which is up to 10 feet deep in areas. Staff also want to and protect the lake from unauthorized fishing. At the farm, animals need to be fed on weekends, participants in the horse-leasing program are in and out, 4-H members come to care for their animals, and customers stop by for produce or eggs left at the stand for them. Another concern was people dropping off animals, which I was told has occurred a handful of times over the years.

> *"They do treat us as a dumping ground for woodchucks."*

Staff contends that the district could run the farm without a person in residence, but would still need someone nearby.

"For peace of mind, you're going to want someone living here [at the farm] . . . not just for security."

Customer Needs

While it would be possible to divide the customers of the farm and nature center into any number of market segments, because of the district's emphasis on serving students first and the community second, it is perhaps most useful for our purposes to describe their needs in terms of those two categories.

School Classes

Johnson Nature Center provided programs for 6,289 BHS students (and teachers and chaperones) in FY2017. At Bowers Farm, the number was 6,601. Most of the programs at both sites were relatively short—two hours or less, with some designed to run an hour or an hour and a quarter. Most have hands-on components—gathering eggs, dissecting animals, handling and examining geological specimens, etc. All are intended to address state educational standards at the grade levels for which they are offered.

Unlike most nature centers and educational farms, the district-owned sites benefit from a "captive audience." All BHS pre-K through 5th-graders go twice a year to the farm, and twice a year to the nature center, while 6th and 7th grades visit each location once.

The farm educators believe that most Bloomfield Hills teachers (65-70%, they estimate) are more supportive than not of coming to the farm, either because they see curriculum value, or just welcome a field trip to break up normal classroom routine. It is likely that a similar statistic applies to the nature center as well.

"They love coming here [to the nature center]. . . . The parents like to come, too."
"They both [the farm and nature center] have so much to offer. There's so much richness there."
"I love them as they are. . . . Keep the fact that everything they teach matches the curriculum."
"I also love the educational programming [at the nature center]. I loved it as a student, teacher, and now as a parent. Such a great resource for bringing curriculum to life!" (Survey comment)

That is the broad overview. In my interviews with BHS board, administrators, teachers, and field staff, there were a handful of specific topics relevant to strategic planning that came up repeatedly.

Are the programs too short?

A concern voiced by both teachers and field educators was that programs at both the nature center and farm, as they are presently designed, are too short.

"I feel like what they're trying to do is turn-and-burn."
"We have such a short period of time to really be effective."
"I feel that the teachers don't take these field trips as seriously as we'd like them to. Maybe because it's a short program, they say, 'It's only an hour.'"

Now, the experience is treated as more of a "destination field trip" by classroom teachers, a perception that is inconsistent with the belief of field educators.

"It's not a field trip. It's an extension of what they're doing in the classroom."

The all-day programs recently inaugurated for select grade levels "are way better." Somewhat surprisingly, both classroom teachers and field educators expressed a preference for longer visits to the farm and nature center.

"Another wish list is that they're here longer . . . like a half a day."

Is requiring all BHS students to visit the nature center and farm regularly a good thing?
Field staff report that they can detect differences between BHS students, who visit their sites regularly, and out-of-district students who come only once in a great while. To some extent, they said, classes from other school districts see a trip to the nature center as more special, and demonstrate more enthusiasm than their BHS counterparts.

"I hear sometimes [BHS] kids say, 'Oh, we're always here.' I've heard that sometimes from students, and sometimes from parents."

Given the desire many educators expressed for longer programs, and the greater pressure such a change would put on available time slots, perhaps it would be good to "weed out" those teachers who don't really want to take field trips and who fail to prepare their students as a result.

On the other hand, other interviewees noted that Bloomfield Hills kids are comfortable at the nature center and farm, and that the lack of novelty is a good thing. (Research supports the contention that novelty gets in the way of learning.)

"It's a nice thing to see that familiarity."

Coordination between teachers and site educators is inadequate
A number of comments made by both teachers and field educators during my interviews suggest that they don't interact much in the development of field experiences that fit the curriculum. They generally feel the coordination between classroom teachers and site-based staff is not thorough enough, for a variety of reasons.

Teachers wish the field experiences aligned more closely with what they are teaching in the classroom, and that there was a stronger presence of field educators in preparing students for their visit.

> *"Over the years the program at the farm has done a better job aligning to our curriculum."*
> *"I would love to see a richer science curriculum in both places [the nature center and farm]."*
> *"I would love to have the chance for some of the [farm and nature center] staff to come in and do some of the grunt work, prep work. . . .They have another voice. . . . With 5th graders . . . they are viewed as the be-all, know-all expert."*
> *"In a perfect world . . . we [nature center educators and teachers] should be all on the same page."*

Field educators wish school groups arrived better prepared for their experiences at the farm and nature center, and that there was more classroom follow-up after their visits.

> *"We [nature center educators] asked to go in and do orientation in the classroom."*
> *"It totally depends on the teacher [how prepared students are]. . . . We have to do so much intro, which is tough."*
> *"We hope for both the before and after. It's not guaranteed. . . . It depends on the teacher."*
> *"We probably would need some training . . . to get classroom teachers brainstorming about how they could use both of these [sites] better. . . . It should be seamless."*

They also bemoan the fact that some teachers and chaperones seem disengaged from the start.

> *"We have a few teachers [at the farm] that either send a sub or they go upstairs and do their work. So you know they're not into it."*
> *"Parents come with a cell phone in one hand and a Starbucks in the other."*

How programs are scheduled in blocks

School programs at both the nature center and farm are scheduled in blocks, with each topic and grade level offered during a single designated week-and-a-half. Far in advance, teachers receive a schedule of program offerings, and they must request a slot to fit their classes into that schedule. Why book in time blocks, rather than permit teachers to sign up for field trips whenever it suits them?

> *"It has to do with planning and set-up."*

Field staff explained that many of the programs they do require elaborate preparation. At the farm, conservation and plant science take the most set-up. Sometimes it involves acquiring and preparing food ingredients. They feel that customizing the schedule for individual teacher's schedules would be impossible. At the nature center, the geology program is especially time consuming to prepare for. The staff change posters, rearrange furniture, and bring out dozens of specimens.

> *"Then it gets a little tricky. Right now we're setting up for geology. It takes two days. . . . The whole room is a big geology museum."*

Classroom teachers complain about this scheduling system because it forces them to tailor their curriculum to the field sites' timetables, or be resigned to field experiences that don't coincide with the material they are teaching.

> *"Sometimes it matches what we're doing, sometimes it doesn't."*
> *"Every teacher kind of wants you to tailor to them."*
> *"If there is an issue, that would be it."*

Evaluation of success

One of the questions I posed to field staff was whether or not they evaluate students after their site visits.

> *"We don't, we don't!"*
> *"We're not getting critical feedback that we can measure. . . . It just hasn't happened. . . . It makes it very hard."*

I asked the nature center educators, "What is your measure of success?"

> *"If the kids are excited. . . ."*
> *"If they behaved well, then they've learned something. If they're paying attention and smiling, then it's a good day."*

Concern about overlap of farm and nature center programming

Because the farm and nature center have some similar resources—everything from historic structures to captive mammals to beehives can be found in both locations—and because coordination between the educators at each site is minimal, there is concern (real or imagined) that programming is redundant.

> *"The increasing theme of pioneer life at the farm is a problem—that's what we do here [at the nature center]."*
> *"There should be a certain amount of exclusivity. . . . I don't think you should duplicate."*
> *"Not duplicating is important."*

"They have an opportunity to take the house and log cabin [at the farm] and create a different kind of program—do different programs but not exactly duplicate."
"I think there should be coordination."

Bowers Academy

Bowers Academy, founded to address the needs of at-risk older students, shares a campus, a building, and a name with Bowers School Farm. Historically, though, the Academy has not been well integrated into the farm operation—one interviewee described the Academy as "an alternative education program that happens to be on a farm." While there has been improvement recently, the relationship remains problematic in the eyes of many of the people I interviewed.

"Bowers [Academy] has underutilized the farm."
"I'd like to see that relationship improve."
"I find it odd that [the farm and the Academy] don't work closer together. . . ."

Exactly how things might change, though, is a matter of little consensus, at least among those with whom I spoke. Some would like to see the Academy expand both in size and in engagement with the farm, attracting students from outside the district, filling more places in more course offerings, and engaging in work-based learning.

"I see the Academy as being the life of the farm. It's that relationship that elevates the farm's status in the District. . . . We get student agency out of that."
"I think Bowers Academy should have more ownership of the farm."
"I would love to have more kids involved in the agriscience."
"If we can get students coming because they don't want to miss it, that's the ideal."

Others, though, talked about the farm without addressing its relationship with the Academy at all. The disparity suggests an unresolved status for the Academy.

Other issues and ideas

Several other issues and suggestions were mentioned during the interviews.

Several people expressed a desire to see Career Technical Education (CTE) programs expanded at the farm.

"We should have four or five of them [CTE programs] out there."

Another suggested that farm educators work with district schools to assist with their gardens and help their cafeterias use more locally-grown foods.

Several expressed enthusiasm for the role the district robotics team had played in the development of an automated chicken door at the farm, and for future opportunities to remain involved there. They would like to see robotics projects integrated into the programs at the farm, both during the school year and in summer day camps.

"[Robotics is] partly the grassroots resurgence of shop class."
"Through this farm project we're giving 'digital people' an analog experience."
"The kids already have ideas . . . crop yields . . . soil analysis . . . hydroponics."

Community Users

The customers of the nature center and farm are the students of Bloomfield Hills schools . . . and everybody else. But who exactly is "everybody else," and what do we know about their needs?

Other schools are significant customers

As noted earlier in this report, other schools from outside the Bloomfield Hills School District receive programming at both the nature center and farm. In FY2017, the nature center provided programs for 2,318 out-of-district students, and the farm did programs or farm tours for 10,940. (There are more competing nature centers in the area than competing educational farms, which may explain the discrepancy in the totals.) The highest numbers were from Birmingham, but schools from all over southeast Michigan were represented. Clearly, the demand for experiences at the BHS sites goes beyond the district itself, which means that there is a source of external dollars for the farm and nature center, but also competitors for the limited time slots and program staff available.

Most programs at the farm charge $8/student, while those at the nature center charge $6/student. (There are higher fees for longer programs.) While the cost per student is the same for district and out-of-district schools, the revenue implications are different because the farm and nature center transfer part of the money received from district schools to the transportation department to cover the cost of buses.

While the BHS budget does not apportion indirect (or overhead) costs to the various programs, my experience with other clients suggests to me that the program fees paid by out-of-district schools do not cover the full cost of providing them programs. I suspect BHS is subsidizing those programs.

The needs of the community at large

One way to get a sense of the needs of community members is to eavesdrop on their conversations and listen to the things they focus on. In this age of social media, the easiest way to do that is to study the reviews and comments people post online about the services the district already provides.

For this report, I copied-and-pasted the texts of all the online reviews I could find about the Johnson Nature Center and Bowers Farm into a word cloud generator. This produced pictures in which those words have been sized proportionally to the number of times they were used. The results can be seen in Fig. 6 (nature center) and Fig. 7 (farm).

The first thing to notice is that both sets of reviews are overwhelmingly positive. The word clouds differ, though, in that the one for the nature center emphasizes passive, "non-educational" uses of the site ("walk," "trails," "relax," etc.) while the one for the farm focuses on animals and components of programs and special events ("corn maze," "wagon ride," etc.)

Fig. 7. Word cloud of online reviews of Bowers Farm. The size of the words is proportional to the number of times they were used in the reviews.

The positive sentiments evident in the online reviews are echoed in the survey results. One question in the survey used standardized wording to determine if the visitors to each of the sites would be willing to recommend that site to friends and colleagues. This produces a Net Promoter® Score (NPS) ranging from -100 to +100 that can be compared with the scores from other sites. According to SurveyMonkey, the 2017 global benchmark (based on NPS scores from 191,878 organizations) was +16, while the 2017 benchmark score from 4,623 Education organizations was +30. By comparison, the Bowers Farm score was +72 and the Johnson Nature Center score was +75. Both were within the top 25% of scores for Education organizations.

Who are the community users?

Results from the survey suggest that the "typical" farm customer is a woman (86.8%), 40-49 years old (36.8%), with a graduate degree (46.0%), who has visited the farm 1-3 times in the past year (49.7%).

They suggest that the "typical" nature center customer is very similar: a woman (75.7%), a slightly older 40-49 years old or 50-59 years old (both 25.7%), with a graduate degree (49.3%), who has visited the nature center 1-3 times in the past year (36.7%).

While it is common for respondents to the several surveys I have conducted to skew female, older, and highly educated, these data represent the most predominantly female, youngest, and most well-educated I have encountered.

Where do community users come from?

As Figs. 8 and 9 illustrate, most respondents to both surveys are relatively local, but substantial numbers come from outside the boundaries of the Bloomfield Hills School District (though it isn't possible to measure this number exactly, since the district boundaries do not coincide with zip code boundaries).

> *"We are a neighborhood nature center. We get some regional visitation . . . [but] I would not call us a regional center at all."*

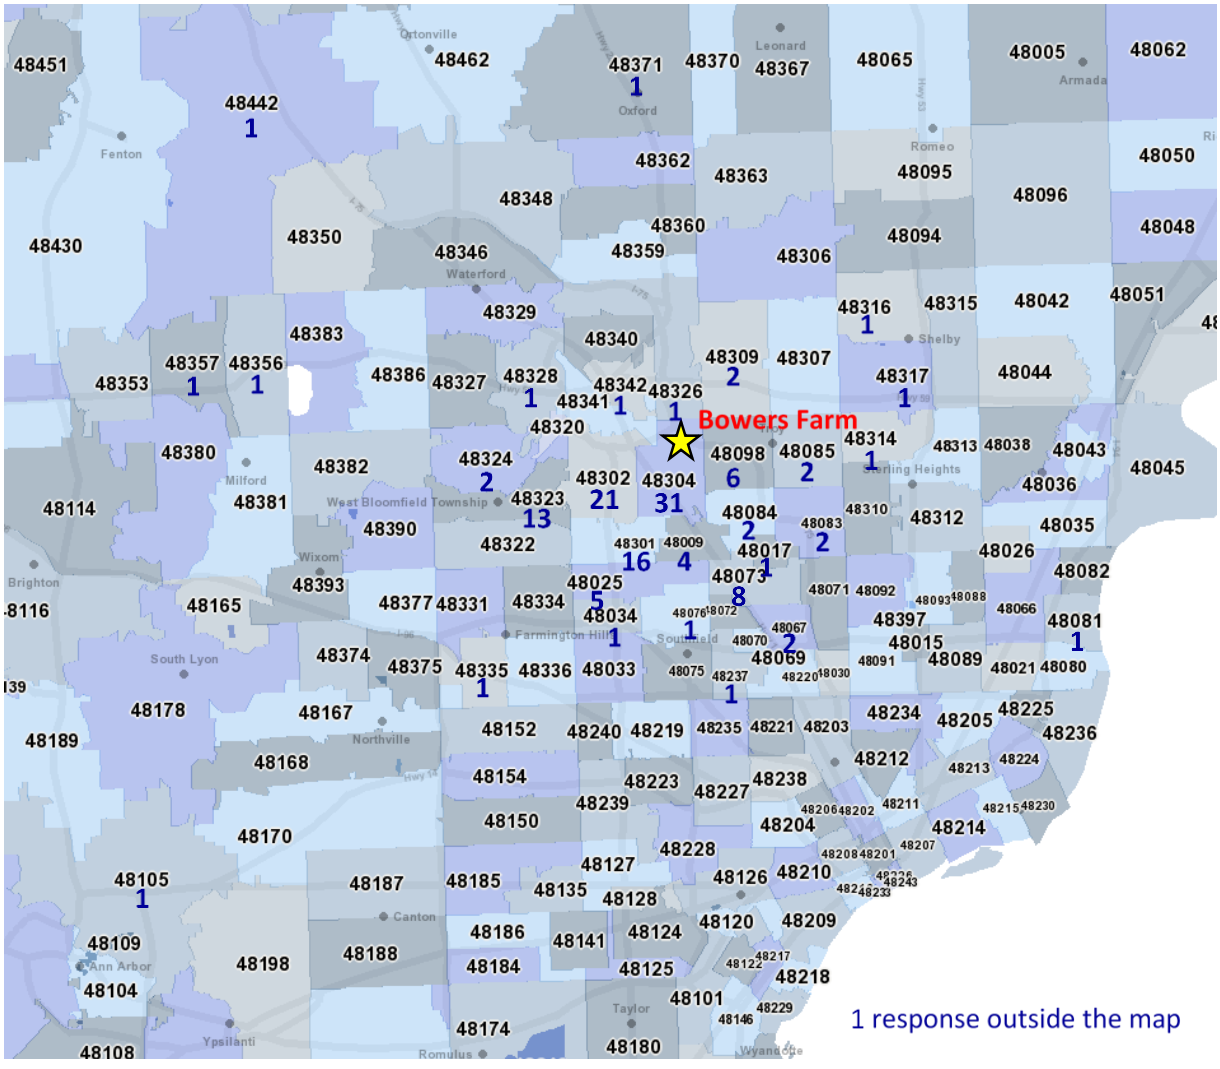

Fig. 8. Home zip codes of Bowers Farm survey respondents.

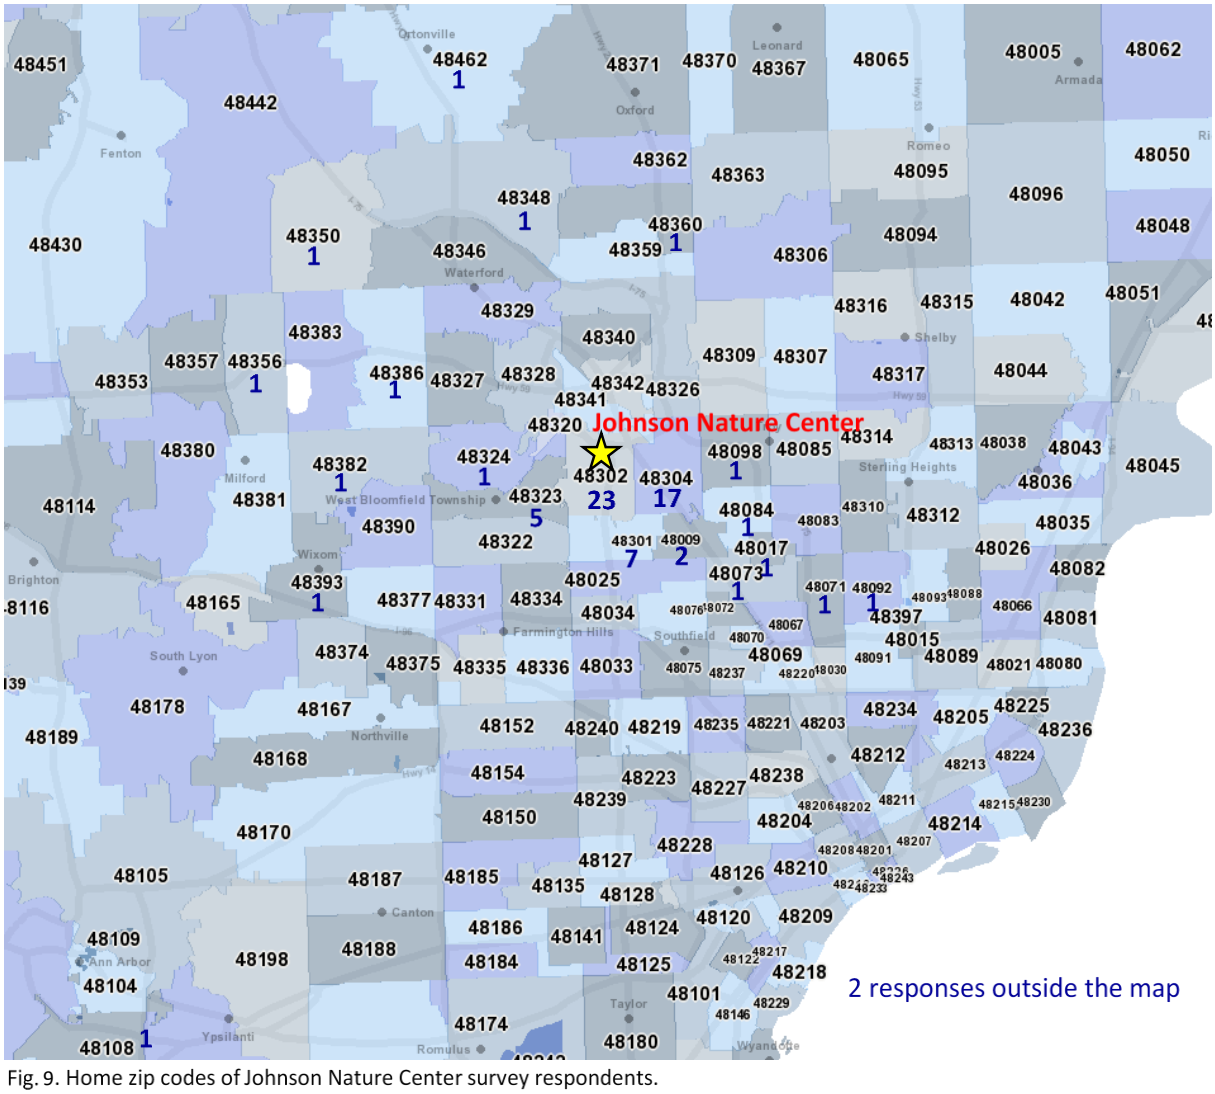

Fig. 9. Home zip codes of Johnson Nature Center survey respondents.

What motivates community users?

Dr. John Falk, a prominent researcher into the interactions between visitors and museums (which includes nature centers and educational farms, at least to a considerable degree), describes five types of motivation for their visits. Individuals may have different primary motivations during different visits, but Falk believes that typically one motivation will predominate during any one visit. He characterizes these motivations as follows:

- The *Explorer* visits because of "curiosity or a general interest in discovering more about the topic/subject matter of the institution."
- The *Facilitator* comes "in order to satisfy the needs and desires of someone they care about other than themselves," typically children, grandchildren, students (in the case of teachers), or out-of-town company.
- The *Professional/Hobbyist* has "a strong knowledge and interest in the content of the institution" and comes "with an eye toward enhancing his or her profession,

avocation, or hobby." Bird-watchers, photographers, and gardeners are three of the more common examples.

- The *Experience Seeker*, often someone from outside the area, is motivated to visit "primarily to 'collect' an experience, so that they [can] say they've 'been there, done that.'" They are often driven by the expectations or recommendations of other people.
- The *Spiritual Pilgrim* visits "in order to reflect, rejuvenate, or generally just bask in the wonder of the place."[6]

For the purposes of this project, I added a sixth category that I would call *Exerciser*, since it is a motivation not typical to the museums that Falk studies but common wherever there are trails (though I think Falk may well consider these users *Spiritual Pilgrims*, since they could exercise anywhere but choose to come to the nature center for reasons other than fitness).

On the survey, I asked respondents to characterize the primary motivation of their most recent visit.

The farm and nature center produced substantially different results. Of respondents to the farm survey, fully 70.7% indicated they were *Facilitators*, suggesting that their motivation in visiting was to provide an experience to people accompanying them (most likely children or grandchildren). At the nature center, on the other hand, while 38.0% fit the *Facilitators* profile, an equal number (38.0%) fit the profile of *Spiritual Seekers*.

Community programming

The surveys and interviews both underscore that most community use of the farm and nature center is driven by school programming. Of the respondents to the farm survey, 54.4% said they learned about Bowers Farm because "my child attended a school program there," and 41.8% of nature center respondents learned about the center in the same way.

> *"Our youth programs are key to our success."*
> *"The most trusted partner to [parents] is their school. . . . I think we have a great opportunity there."*
> *"Darn near half our senior class gets their picture taken at the nature center."*

Visibility in the community

In general, the nature center and farm have comparatively low profiles in the community. When survey respondents were asked how they learned about the sites and invited to mark all the answers that apply, fewer than 10% indicated that they

[6] John H. Falk and Beverly K. Sheppard, *Thriving in the Knowledge Age: New Business Models for Museums and Other Cultural Institutions*, AltaMira Press, 2006

learned about either place through radio, television, magazines, newspapers, websites, or social media.

"So many people don't even recognize we have these jewels right next store."
"I think this resource [the nature center] for the community is invaluable. But not enough people know about it."
"[The farm] needs more exposure in the BHS and other media."(Survey comment)
"People don't know we're a part of Bloomfield Hills Schools. . . ."
"I think [the nature center] is not publicized as well as maybe it should be."
"We have the opportunity to get a lot more people here."
"I have a feeling [the nature center] is underutilized as a public resource."
"I would like more awareness out in the community."

Despite the above comments, there are some people who acknowledge these facilities are not well known . . . and prefer it that way.

"I don't want this place [the nature center] to become a Metropark."
"I wouldn't want to see too much change."

Drop-in visitors

Drop-in visitors are, as the term suggests, people who stop by for a recreational or educational experience unannounced and on their own. Dan Badgley estimates the nature center received about 5,000 drop-ins in FY2017. By the standards of most urban and suburban nature centers, this is a comparatively small number (if accurate). Nonetheless, they make up a significant portion of the center's total users.

"If you need a nature fix, and you only have an hour, you come [to the nature center]."
"There is constant foot traffic [at the nature center]. . . . Whenever I go, the parking lot has four to five cars in it."
"When you walk the [nature center] trails, you're often alone."
"I do think it gets used for geocaching. The people I know don't use the nature center a ton on weekends."

The farm, on the other hand, is not open to drop-in visitors. At one time, the farm did permit cross-country skiing in certain areas, but that practice was discontinued. Many people wish that drop-in visits were permitted. On the survey, some version of "more access to the general public" was written in as a desired change by 22 respondents (17.6%)—the most frequent suggestion made. This may explain one interviewee's observation that when sidewalks were installed along Square Lake Road, people started using them to "access" the farm.

"When I'm here [at the farm] on the weekends, I get so many people who just show up."

"One of the most common questions is, 'When can I come?' It's a little awkward to me that at the farm you need a tour, but [at the nature center] you don't."

"Just having access would be the biggest thing."

"Walking dogs is always a concern."

"Definitely wish is was more accessible to the public!!! Aside from going there on a school/group field trip, there are NO opportunities to visit the farm (aside from one open house a year which is too crowded!)" (Survey comment)

Special programs and uses at the farm

Most of the comments about special community uses of the farm were related to the horse programs and facilities there. It was pointed out that they once had 22 horses instead of nine (like now) because they make money. A multi-purpose building that was a riding arena with a recreation room was mentioned several times during interviews. Some version of "More opportunities with horses" (including comments about adding an indoor facility) was mentioned by 11 survey respondents (8.8%).

"If we had an indoor riding arena, we could do more with horses."

"This county's big for horses. . . . We always have people on a waiting list for horses."

"[An equestrian center] would be awesome. It would be a nice private way to be making money."

Weddings were also mentioned as an activity of interest to the community. The ambience of the barn is a draw. Staff have been married here. The gardens are a draw, too. There are lots of photo ops "all over the place."

Competitive Assessment

Competitors influence strategic planning because they corner resources that your institution hopes to acquire. Those resources can come in many forms. Money from paying customers is the most obvious. However, sometimes the competition is for resources like grant funding, volunteers, or even talented staff. Public sector leaders like school district administrators are sometimes uncomfortable thinking in terms of "competitors"—they prefer to think of themselves and others as "collaborators." However, regardless of how benign their motives and innocent their intents, other organizations that serve the same customers and draw on the same resources as Bowers Farm and the Johnson Nature Center should be seen as competitors. Tables 1 and 2 provide a quick reference to the most obvious ones. However, particularly if BHS strategic planning leads the farm and/or the nature center into new markets (like horse arenas or nature-based preschools), further investigation will likely be warranted to understand better those competitive arenas.

Table 1. Johnson Nature Center competitors.

NAME	LOCATION	OWNER	DISTANCE	WEBSITE	HOURS	FEES	NOTES
The Roeper School	Bloomfield Hills	501(c)(3)	2 m	www.roeper.org/DayCampHome	9:00-3:10, M-F	$680/two wks	A competitor primarily in the summer. Pools, gym, other activities. Woods and creek. Before and after care available.

Tollgate Farm	Novi	Michigan State University Extension	14 m	https://www.canr.msu.edu/tollgate/	Grounds open 9am-8pm M-Sat. Summer camp is 9am-4pm, M-F	$10-12/student, depending on the program. Day camp is $300-$350/wk depending on session	School programs, 4-H, adult programs, on-site preschool, summer day camps (with aftercare available), rentals, CSA. Earned revenues covered 35.4% of the budget in 2015.
Maybury Farm	Northville	501(c)(3) (Northville Community Foundation)	20 m	https://www.northvillecommunityfoundation.org/mayburyfarm-c1f2v	Seasonal (Mar-Oct), with two weekends in December. Hours vary by season. Summer camp is 9am-4pm T,W,Th.	$6.50-$9 per student, depending on the program. Wagon rides an extra $2.50. Corn maze is $7. Day camp is $195/wk.	Offers educational tours for groups from throughout SE Michigan. Also summer day camps, parties, rentals, and special events including a corn maze.
Kensington Farm Center	Milford	Huron-Clinton Metroparks	22 m	www.metroparks.com/facilities-education/kensington-farm-center	9am-4pm	Vary by type and length of program, higher for those outside the five-county area	Sugar bush, farm tours, pumpkin patch, summer day camps, farmers' market, school and scout programs

Comparable Facilities

When undertaking strategic planning, it is frequently enlightening to examine comparable facilities to see how they have approached similar challenges. There are many educational farms and nature centers throughout the U.S., of course. However, nature centers and educational farms operated by school districts are comparatively rare, and I have not yet been able to find any other examples of school districts that operate *both* a nature center *and* a farm (which would be the closest comparable situation to that of Bloomfield Hills Schools). The next closest match is some other organization that operates both a nature center and a farm, since how to mesh the two is one of the special challenges of this planning process. This section profiles several such organizations.

Delaware Nature Society, Hockessin, Delaware

The Delaware Nature Society (DNS), a 501(c)(3) nonprofit whose mission is environmental conservation, operates three nature centers and one educational farm scattered throughout their small state. Their Coverdale Farm site is located two-and-a-half miles from their Ashland Nature Center, in a fairly rural area.

- The farm site has been donated over the last 25 years by one family. The donors started by giving natural areas. It is soon to be 377 acres, with a last tract coming this year. The agricultural part was acquired 14 years ago, and is the biggest chunk.
- The farm has its own endowment.
- DNS adapted a barn to a classroom and began farm education programs 14 years ago. They started as what Executive Director Brian Winslow characterizes as a "Noah's Ark" program: a diverse menagerie of animals with pens close together for easy viewing—more of a petting zoo than a true agricultural operation. That approach lasted 10 years.
- About eight years ago they began a Community Supported Agriculture (CSA) operation. It has 125-140 members (families), with about 100 half shares and 20 full shares. "It's gone down." There is more competition now, so they have to find other markets.
- Their emphasis is regenerative agriculture that protects water and uses natural buffers. They see this as consistent with their mission as a conservation organization.
- "We're not in the business of selling vegetables—we're in the business of showing people how their food's grown," says Executive Director Brian Winslow. "We also want to grow a new generation of farmers."
- Originally, there was no one manager of the farm—educators answered to one person, and the conservation team handled the land. Now, each of DNS's four sites, including the farm, has its own manager. They report to a single Director of

Sites. Winslow's goal was to have this integrate the sites, and he believes it is beginning to work that way. DNS has overarching goals (like "clean water") and all the sites achieve that in their own way. Site directors meet as a group, and are beginning to plan some joint activities. "Unless you get them in the room as a group, that doesn't really happen," says Winslow.

- They try to keep the activities distinct, so there is reason for visitors to go to both the farm and the nearby Ashland Nature Center. For instance, the nature center wanted to add a beehive (which the farm already had), and Winslow said, "No—that's agriculture—let's keep it at the farm."
- The various sites are not budgeted as separate cost centers yet, though Winslow says he is embarrassed to admit it. They are currently working toward that end. "We need those numbers. . . . [Farming education] is expensive." Financially, the farm doesn't do very well, though some elements of its programs are more financially successful than others. Its kitchen has "gone gangbusters." Anything with cooking and food does well. Also, summer camps there are successful.
- They are moving away from the "Noah's Ark" approach. They are going to get rid of their dairy cow, for instance, because they don't have a dairy. "It's a pretty expensive exhibit." They are going to introduce a grass-fed beef operation, and the education program will be more focused on that. They'll have 30 Red Devon beef. "We're even growing mushrooms in the woods," Winslow says. He refers to the raising of shiitake mushrooms as "an artisan operation." They have focused on production agriculture for two to three years. "We're still in the pilot phase."

(Information from Brian Winslow, Executive Director)

Kalamazoo Nature Center, Kalamazoo, Michigan

The Kalamazoo Nature Center (KNC), also a conservation-focused nonprofit, operates an educational program at its DeLano Farms site, located less than a mile west of the nature center itself.

- The farm features the 1800's DeLano Homestead, farm animals (in the summer), beehives, learning gardens, a log cabin, and miles of hiking trails. According to their website, DeLano Farms' focus is on "land ethics and historical resource education."
- In addition to school programs, DeLano Farms also offers summer day camps, special events (including Fall Fest, Holidays at the Homestead, and the Maple Sugar Festival) as well as regular open houses and wagon rides throughout the summer.
- The farm program constitutes one of the center's "top one or two" programming draws, partly because of the history focus it incorporates.
- They had a CSA operation for five years, but quit in 2016. "We haven't figured it out yet."

- The farm has never fit well into the organization. "It's always been a struggle . . . the farm is not a total fit culturally and in terms of the mission," says President Bill Rose. "They're the 'black sheep,'" adds Chief Operating Officer Jenn Wright.
- The nature center is still refining its ability to track income and expenses for the farm separately, especially in accounting for indirect costs. "I know it loses money. I'm sure of that," says Wright.
- Just one operations crew covers the farm, nature center, and other sites owned by KNC. (They also operate a nature-based preschool, a field station, an urban nature park, and a remote preserve.) The current farm director does not have operations skills, and it stretches their crew to cover an agricultural operation. "It's still not perfect," acknowledges Wright.
- Delano Farms and the nature-based preschool both have their own directors, although some staff go back and forth from the nature center to those sites. Says Wright: "I think it works."

(Information from Bill Rose, President & CEO, and Jenn Wright, Chief Operating Officer)

Cincinnati Nature Center, Cincinnati, Ohio

The nonprofit Cincinnati Nature Center owns a property called Long Branch Farm, which is located about nine miles from the nature center. For many years the organization operated an agricultural educational program at the farm. The nature center still owns the farm, but has discontinued the educational program there because it was not financially viable.

- The farm is 775 acres, long and narrow. Less than a third is agricultural. It is located outside of Cincinnati's urban area.
- The agricultural portion is now leased to a local farmer on a per-acre basis (as opposed to crop shares). It generates some revenue—"probably less than $10,000."
- The property was donated to the nature center many years ago, and opened in the early 1970s. Farm-based education was done there until the early 2000s. The emphasis was "agricultural ecology," and it focused on livestock. Programming included a 4-H program that served "half-a-dozen kids." They also did special events like a "farm babies weekend" and "Firefly Fiddlefest." "It was really a neat program . . . a really effective program." It was also very volunteer-intensive.
- In the early 2000s, the finances "came apart." School visits decreased. Four full-time staff were reassigned to other locations. The livestock program was shut down.
- Now, the site is available for hiking to Cincinnati Nature Center members only. It is also used for a summer camp and select other programs. It is being developed as a native plant nursery, propagating native plants from seed for the nature center's use and—eventually—for sale to the public. There is also a "foraging forest" planted with paw-paws and gooseberries. "We really don't have a farm program any longer."

- It was not controversial to end their farm education program. Some questioned why they were in the farm business. Indeed, it had been suggested internally at one point that the property be sold.

(Information from Bill Hopple, Executive Director)

Implications for Planning

The previous sections of this report are mostly factually-based observations or quotes of the opinions of others. This section is my opportunity to apply my professional judgment, and to attempt to predict the planning implications of the rest of the material in these pages.

There are, of course, many implications contained in the previous sections. I address here only those that strike me as most important to strategic planning for Bowers School Farm and the Johnson Nature Center.

1. **The nature center and farm are integral to the mission of the Bloomfield Hills Schools . . . for now.**
   Nobody, especially at the site level, currently feels much pressure to justify the existence of a farm and a nature center on the balance sheets of a school district. Indeed, nothing I have seen or heard suggests that there is any urgency to do so. Both Bowers School Farm and the Johnson Nature Center enjoy broad and passionate support from the BHS board and administration. However, circumstances –and their associated politics—are always changing. The day may come when your sites' seemingly unassailable position as key components of the school system may be challenged, and that day may come with little advance warning. A stock market crash, a change in school board trustees, a natural disaster—any of these could make a school district-run farm or nature center suddenly seem like a fierce extravagance. I think a sound strategic plan should drive you to do two things to prepare for that day: (1) Become as integral to the curriculum and business model of BHS as possible, and (2) Ensure that your community service programs are financially self-sustaining or demonstrably and defensibly mission-driven. The wealthy community of Birmingham once had a school district-owned nature center, too. It doesn't any more.

2. **The most important role of both the nature center and the farm is to support academic success for Bloomfield Hills Schools students. Providing for the recreational needs of the community, while important, comes second.**
   This message came pretty clear from the BHS board and administration.

3. **Requiring school classes to use the farm and nature center has both positive and negative implications.**
   I don't feel strongly about this issue one way or the other. I just think that it has always been a given that BHS students will be required to participate in field experiences at both the nature center and the farm. There are good reasons for this—site-based field experiences are inherently valuable, it's good to be known by and (presumably) have the support of all the teachers in your district's elementary

and middle schools, and there is a certain predictability and economy of scale that comes with a large, guaranteed audience. I just think you should be open-minded on this point. If the choice is between a full roster of slam-bam, production-line, hour-long programs with lots of teachers who would rather not be there, and a more selective slate of full-day sessions attended strictly by enthusiasts, the second option may make more sense.

4. **The community at large may not understand the prioritization in #2, and this may lead to difficulties in the future.**
   As #2 notes, the BHS board and administration is quite clear that the district's education mission takes precedence over its community service and recreation one. Everyone I talked to agreed . . . except for some Friends group members, who all said the two missions were "50-50." The same dichotomy was apparent, I understand, when the BHS proposed land sales and the recent land swap: BHS saw itself as a school district accessioning excess property, while neighbors and other community members saw it as a parks department reneging on its duty to protect open space. If the farm and nature center want to avoid conflicts that are spawned by this misunderstanding, a good and consistent communication plan will be vital.

   "As a taxpayer of the Township, I feel I should have more access to this [farm] facility." (Survey comment)

5. **Community-oriented programs and activities should be as financially self-sustaining as possible.**
   I discussed this contention in #1. Most everyone agrees with this premise. The real issue is that right now you don't know the degree to which your public programs *are* self-sustaining. It sounds like BHS as an organization is working to make the finances clearer. You should embrace that effort.

6. **Both the nature center and farm are underutilized. This is true for both the school markets and the community markets.**
   A number of people in a position to know said this; I'm just agreeing with them. The challenge will be that, in order to maximize the potential of your physical resources (which is where the underutilization dwells), you'll have to invest money . . . because I certainly don't see any excess capacity in your personnel. That's all the more reason to get a better handle on your costs and benefits.

7. **School programming, in order to reach its full potential, will require better integration with classroom-based work, and greater interaction between site educators and their counterparts in the schools.**
   Awkward schedule blocks, poorly-prepared students and teachers, rushed programming due to short field trip time slots, duplication and repetition of program content within and between sites, an absence of realistic success metrics—all are issues with your current school programming, and all of them can be improved

through better communication. Farm and nature center staff need to be working more closely together, and then should be more fully engaged with teachers, curriculum coordinators, and school administrators in order to make things better for everyone. You've got a head start—there are lots of talented people on the BHS team. It's just a matter of making it a priority.

8. **Better coordination between the farm and the nature center will lead to better utilization of the unique resources of each, and to a more well-rounded experience for users.**
   And, if the past is any indication, you'll all have more fun!

9. **It will be difficult to achieve the full potential of both sites utilizing primarily part-time employees. This contributes to poor morale and staff churn.**
   This is a significant issue for both of your sites, even though the pain is currently felt more acutely at the farm. It is, of course, a situation driven mostly by the numbers—permanent employees cost a lot more than temporary ones even when the aggregate number of hours they put in is the same. If it is any consolation, this same flawed (in my view) business model is rampant in the nature center/educational farm business. But BHS needs to figure it out.

10. **Big staffing changes likely on the near horizon for the nature center will make for both opportunity and risk.**
    As near as I can tell without checking birthdays and asking everyone about their personal plans, it appears that most of the nature center staff will be leaving over the next few years. They will take with them the combination of bad habits and deep wisdom that we all have, leaving a pretty clean slate. Good strategic planning now followed by thoughtful and fortunate hiring later will pay off in many ways, including some currently unforeseen. But bad planning—or an absence of planning—and careless hiring could create a real mess. Begin now to manage this process.

11. **Invasive plant species at the nature center, if left unmanaged, will significantly impact the plant, animal and habitat type diversity on the site.**
    Buckthorn in particular is prone to form impenetrable thickets that squeeze out native plants and make passage very difficult. This in turn may have a detrimental effect on some aspects of current educational programming, especially those that focus on natural diversity. While staff and volunteers have worked with success to push invasives out and replace them with native species, such progress will be ephemeral without continued management.

Addenda

[Addenda accompany the electronic version of this report as separate files.]

APPENDIX B:

Charles L. Bowers School Farm and E. L. Johnson Nature Center
Strategic Planning Retreat Sessions
Final Report
March 16, 2018

Introduction

The Bloomfield Hills School District operates two outdoor sites whose primary purpose is to complement school curricula with site-based, hands-on learning. Those sites are the E. L. Johnson Nature Center and Charles L. Bowers School Farm. Despite their similarities of purpose and approach, in recent years the two sites have been operated mostly independently from one another. In 2017, the determination was made to conduct a joint strategic planning effort, in order to achieve better coordination between the two. That process began with a thorough analysis of both sites and the customers they serve (detailed in the "Summary of Findings" report), and culminated in two all-day planning retreats held on February 2 and March 1, 2018.

The strategic planning process for Johnson Nature Center and Bowers Farm brought together staff from both facilities, as well as other school district personnel and stakeholders from important partner organizations. This document summarizes the process and results of those planning retreats.

PLANNING RETREAT: DAY ONE
FEBRUARY 2, 2018

PARTICIPANTS:
Cathie Badalamenti, BHS Foundation
Dan Badgley, BHS
Todd Bidlack, BHS Administration
Amy Cardin, BHS
Sandy Cohen, BHS
Noelle Collis, BHS
Jackie Doran, BHS
Jackie El-Sayed, BHS
Michelle Golembieski, BHS
Shira Good, BHS
Josh Gunn, Michigan State University Extension
Mary Hillberry, BHS
Alan Jaros, BHS
Amy Kiesel, BHS/Friends of the Nature Center
Jessica Koczynski, BHS
Ken Macon, Friends of the Nature Center
Mike Mathis, Michigan State University Extension
Rachel Rotger, Friends of Bowers Farm
Margaret Schultz, BHS
Kristen Vigier, BHS
Cynthia Von Oyen, BHS
Mark White, BHS
Blanche Wicke, BHS

Methodology

The group was convened by facilitator David Catlin, and proceeded to work throughout the day in both full-group and small-group settings. The Purpose, Consensus definition, and Agenda were determined in advance and presented to the participants, as were most of the Ground Rules. (Several of the latter were added by the group.)

Purpose: To make strategic decisions that impact the farm and the nature center in a way that advances the mission of the school district.

Consensus means "I can live with that and support it." (It does not mean. "I think this is the best solution.")

Ground Rules:

1. Everybody participates.
2. No idea is dumb.
3. Use "headlines."
4. Silence cell phones.
5. Start on time—end on time.
6. Use "Parking Lots."
7. Limit side conversations.

Agenda on Friday:

- Welcome back/Introductions
- Strategy criteria tool
- Brainstorm the Big Questions
- Prioritize the Big Questions
- Define Strategies
- Develop Strategies for the Big Questions
- Define Measures of Success
- Develop Measures of Success for the Strategies
- Identify Next Steps
- Close

Strategy Criteria

What are the organizational values and criteria that will guide all of the strategies we use? This tool, still in draft form, can be used to evaluate both the strategies currently proposed and those that might be generated at a later time to address future

challenges and opportunities. Several of the criteria were suggested by the facilitator, while others were suggested by participants.

STRATEGY CRITERIA: We will undertake strategies that . . .

	STRATEGY A	STRATEGY B	STRATEGY C	STRATEGY D
1. Are consistent with the BHS mission.				
2. Can be achieved with available resources.				
3. Meet the needs of the intended customers.				
4. Are in partnership or collaboration rather than competition with similar organizations				
5. Financial resources are part of the decision—what is the financial risk?				
6. Attract, engage, and excite educators and community members regularly at both locations.				
7. (Design—foster—engineer) greater integration not just between the centers but throughout the system.				
8. Conserve and protect green spaces and promote environmental stewardship.				

Big Questions and Strategies to Address Them

The next step in the strategic planning retreat was to generate key questions affecting the farm and nature center and identify (through a voting process) those that the group considered the highest priority. Several of the Questions were generated by Alan Jaros and Dan Badgley prior to the retreat, while others were suggested by retreat participants. Some Big Questions are accompanied by related questions, independently generated by retreat participants and determined by them to be similar. Subsequent steps developed strategies to address the highest-ranking questions and measures that could be used to gauge success in their application. Along the way, we also captured ideas related to the Big Questions and strategies, and those are also recorded below.

Some questions determined to be of lower priority did not receive attention in the later small group work.

BIG QUESTION #1: How can we be more intentional to increase impact in our instructional programs for learners? And how will we know we've been successful? (34 VOTES)

Related questions

- How do we create programs that enhance help/teach the curriculum? That goes beyond what we can do in the classroom?
- How to nurture excitement for visits to these two sites on a consistent basis?
- How can we improve the position of the farm and nature center to enhance learning for our students?
- How will BHSD ensure the farm and nature center are integrated into our curriculum so they will always be valued and relevant by our educators and community?
- Can we identify and prioritize programs that balance needs of services to students/schools and needs of services to community?
- What opportunities exist for developing innovative teaching practices and evaluation that combine formal and non-formal settings?
- How can we teach students to have a passion to explore and learn experientially throughout their lives?
- How can we increase engagement and authentic learning?
- How can we utilize the farm and nature center to increase authentic learning for all students?
- How do we use both facilities to increase critical thinking, civic-mindedness and environmental stewardship in society?
- How can my students and the community get more out of these two properties?
- How can we best align our instructional programs with classroom instruction?
- How do we increase student engagement and learning opportunities for all ages of students?
- How do we enhance/develop/create instructional spaces that align with our curriculum and allow students the most opportunity to be living what they are learning?
- How do we best support student learning?

Strategies

We will . . . deliberate collaboration of all parties (educators) to develop learning outcomes starting with the end in mind.

- Professional learning
- Vertical alignment looking at all standards
- Inquiry-based pedagogy
- Doable, feasible → outside-the-box to actual reality
- Logistics and resources—time, money, and stuff

Other ideas

- University research partners for evaluation
- Collaboration with University researchers
- Partners in higher education
- Paired teaching between content experts (farm and nature center) and teachers
- Sustained exposure over time
- Professional development
- Delivery process and content (content is process, process is content)
- Look for connections from all standards
- Physical sites: school, farm/nature center, other schools in district
- Making sure we have inquiry
- Think about different "visit" platforms
- Carry over to own campus
- Inception of ideas to practical practice

Measures of success

- Growth (collaboration) meetings and units (outcomes) developed
- Timely pre/post knowledge/experience data
- Share information with farm/nature center
- Effectiveness of logistics

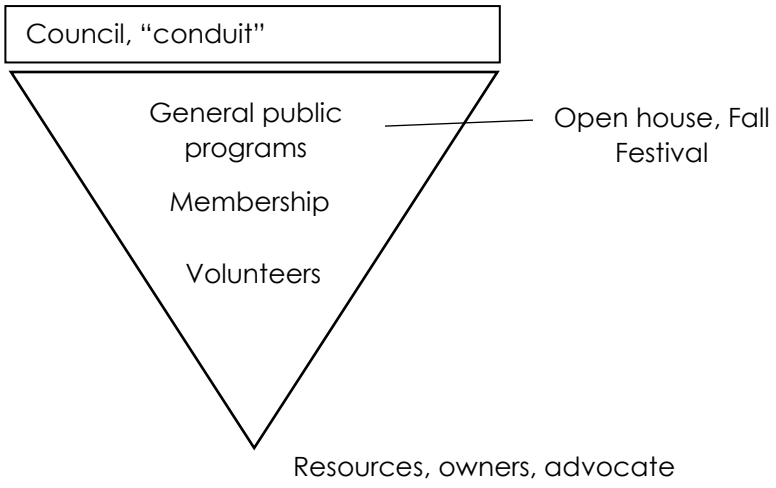
BIG QUESTION #2: How can the farm and the nature center better coordinate programs so they are complementary? (5 VOTES)

Related questions

- How will staff between both facilities collaborate?

Strategy

- Build staffing structure that values collaboration between both sites. Think about SMEs and roles/shared leadership.



BIG QUESTION #3: How do we ensure that we meet community expectations well enough to retain their financial and political support? What should be the role of Community Services in programming at the farm and nature center? (14 VOTES)

Related questions

- Re: community involvement—How to convert interest and expectations from the community into resources for the farm and the nature center?
- How do we proactively and strategically communicate our efforts and vision?
- This is about migrating the community from a place of ambient curiosity or indifference to a place of informed ownership and advocacy.

Strategies

- Create a conduit for community involvement and conversation.
  - Council, forum, membership
  - Result in awareness, communication, advocacy
  - Nature center and farm
  - Specialized membership "perk"-type incentives
  - Maintain some gateway to non-member program
  - A "funnel"
- Create an active school/community partnership council to foster communication, linking home, school, and community through collaboration.
- Create a network between agencies, civic organizations, and citizens for the purpose of identifying opportunities and concerns that will support and promote specific programs, groups, and projects.

Other ideas

- The demand for community programs is there . . . we need to capitalize on it!
  - Cooking
  - Art
  - Photography, etc.
- Develop framework for Community Forum.
- Identify participating Bloomfield Hills organizations: BHS, farm, nature center, senior center, library.
- Set up kick-off meeting.
- Further define framework for forum: determine organizations involved; when, where, how often to meet; create mechanisms for community outreach.
- Welcoming signage—a system for integrating and orienting people for a public visit.
- Involve the TV of Bloomfield in making a downtown feed for community outreach.
- Utilize Barton farmhouse and Craig log cabin.

Measures of success

- Establishment of community council—who, what, why formally organized
- Develop mission
- First meeting invitation (next three months)
- Determine chairperson (very small chair committee)
- Growth of council

BIG QUESTION #4: How do we create and sustain a preschool at both sites? (8 VOTES)

Strategy

Create new Bloomin' sites at both the nature center and farm, using current resources and knowledge of farm, nature center, and Bloomin' staff and the IB framework already used in Bloomin'.

Convene district committee to move this forward

- Finance
- Facilities
- LST
- Comm.
- Farm/nature center staff
- Bloomin' team
- MSU (prior experience in this!)

Other ideas:

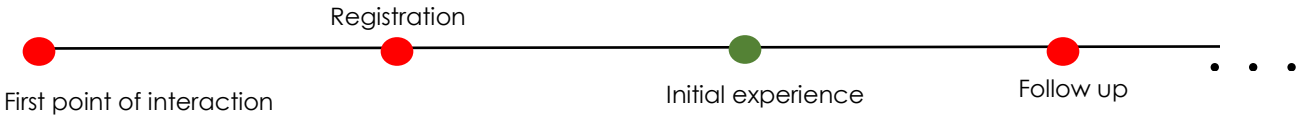
- Get kids outside away from screens, to see and feel what they're learning
- Team to develop curriculum
- Comprehensive facilities review between farm/nature center, Facilities, Barton Malow, etc.
- Marketing strategy
- Explore best practices and attract talent to design and build nature-based preschool model
- Great Start Readiness Program (GSRP) financial assistance
- Who is the director for the preschool at the farm and nature center?

Measures of success

- Have results from comprehensive site surveys
- Financial plan (with identified funding sources) and contingency plan
- Human resources plan—hiring/staff allocation (with help from MSU)
- Public relations—interest survey and results, focus groups
- LST—plan for instruction model and delivery with understanding of how it would work within greater K-12 operation (with help from MSU)
- Comprehensive marketing plan
- PD for co-teaching (with help from MSU)

BIG QUESTION #5: How [do we] increase public access to both sites safely—safely for the plants and animals, safely for the humans? If not accessible, how can we make people care about the two sites? How can we offer more casual recreation use at the farm/nature center (ex. walking paths, etc.)? (3 VOTES)

Strategy
Deepen partnership with MSU Extension to fully operationalize strategic plan.



BIG QUESTION #6: How do we improve customer service? Service standards? Public relations? (12 VOTES)

Related questions

- How do we best promote and utilize these facilities as truly unique and special experiences for both Bloomfield community/staff/students AND external users?
- How do we get away from outdated registration/scheduling system, become more customer-friendly, and remove inconsistencies between Farm/nature center (i.e. pricing)?

Strategy
[Implement] service standards of the district.

- Generate revenue to reduce costs for Bloomfield staff, students, and community members.
- Increase advertising to bring new users to the farm/nature center.

Measures of success

- Convened and completed Service Standards sessions
- Actions taken and ongoing (Examples: registration process enhancement, signage enhancement)
- Metrics possibilities
  - Registration # increase
  - Repeat customer increase
  - Less pop-ins (farm-specific)
  - More pop-ins (nature center specific)
  - More audience engagement

BIG QUESTION #7: How do we rely on our big partners to further our mission? (2 VOTES)

No further work was done on strategies for this question due to the low priority assigned to it by participants.

BIG QUESTION #8: How do we address staff turnover? (2 VOTES)

No further work was done on strategies for this question due to the low priority assigned to it by participants.

Next Steps

In order to "get the ball rolling" on the strategies identified, the small groups identified at least one identifiable step that could be undertaken for each, along with a responsible party and deadline.

BIG QUESTION #	TASK	RESPONSIBLE PARTY	BY WHEN?	NOTES
1	1. Share plan with LST → 2. Determine seasonal cycle → 3. Plan collaboration meetings →	1. Todd! 2. Alan and Dan 3. Kristen and Noelle	June 15, 2018	Implement some units by next school year
3	1. Create Community Education Council 2. Create mission 3. Schedule meeting	1. Approval of School Board/ Administration 2. Cathie/Rachel/+? 3. ???	1. Following the first April Board mtg. 2. April 15 3. May 31	
4	Convene team	Cabinet	May 31	Frontload community survey with questions to determine interest
6	Schedule Service Standards process	Shira Good	June 30, 2018	Include farm and nature center staff who are day-to-day employees

"Parking Lots"

Ideas and questions generated by discussions that didn't directly relate to the question of developing strategies for both the nature center and farm were recorded for possible later use.

Farm-related Questions and Ideas

- Farmers market
- Wine, beer, etc., tasting
- Cooking classes for students and adults
- Music on the farm events
- Brunch/dinner with Santa or other holiday events
- Garden walks
- How-to-raise-chickens class

- Birthdays
- Nerf wars (like paintball)
- Barn dance
- Partner with Oakland University (classes)
- Vet camp
- Combined camps for both locations
- Add signage explaining in friendly manner why farm isn't open to public so people who stop by understand.
- Didn't want this to be overlooked . . . the need for full-time staff positions at the farm and more hours for part-time.
- How to increase public access to the farm safely—permanent staff presence?
- Sunsets at farm gazebo one time/month. Bring your own beverage and share an appetizer.

Nature Center-related Questions and Ideas

- Geology camp
- Combined camps for both locations
- Longer K-12 programs
- Outreach to schools
- Project-Based Learning projects—pre-built social studies and science (and ELA and math) PBL units/field trips
- PBL science camp
- Differentiated field trips
- Replace departing key staff members—are there internal candidates?
- How do we transition/change staff at the nature center, which will ensure the continuation of land management practices and quality programs?
- How do we maintain land management practices that are environmentally sound?
- How to improve the natural habitat by controlling invasive species and planting native species. Staff needed.
- Open moonrise on the deck—viewing, or by the pond campfire? Bring your own beverage and share an appetizer.
- Interpreter evaluation sheets filled out by teacher or leader.

PLANNING RETREAT: DAY TWO
MARCH 1, 2018

PARTICIPANTS:
Dan Badgley, BHS
Amy Cardin, BHS
Sandy Cohen, BHS
Jackie Doran, BHS
Karen Fenwick, BHS
Michelle Golembieski, BHS
Alan Jaros, BHS
Jessica Koczynski, BHS
Ellen Koehler, Michigan State University Extension
Corinne Mathis, BHS
Mike Mathis, Michigan State University Extension
Isabella Tillman, BHS
Blanche Wicke, BHS

Methodology

Staff determined that the first strategic planning retreat session—the only session originally scheduled—did not adequately address several of the issues important to a joint farm/nature center plan. For that reason, a second session was added a month later. Most of the participants in the follow-up session had participated in the first session; several additional participants were added to represent field staff at the farm and nature center, since most of the issues to be covered in the follow-up session were especially relevant to site-specific personnel. David Catlin again facilitated.

Edits made to the Purpose, Ground Rules, Strategy Criteria, Big Questions, and Strategies that were originally drafted as part of the initial retreat are shown below in red.

Purpose: To finish making strategic decisions that impact the farm and the nature center in a way that advances the mission of the school district.

Consensus means "I can live with that and support it."

Ground rules:

1. Everybody participates.
2. No idea is dumb.
3. Use "headlines."
4. Mind your e-manners.
5. Start on time—end on time.
6. Use "Parking Lots."
7. Check in later about weather concerns. [NOTE: Snow was in the day's forecast.]
8. Be patient with others' ideas.

Shared Values of the Nature Center and Farm

At the suggestion of Alan Jaros and Dan Badgley, the group spent some time identifying and discussing the values and beliefs shared by the farm and nature center. A list of values was created through a brainstorming process, and participants voted for those they felt should be given the highest priority.

"At Johnson Nature Center and Bowers Farm, we believe that . . . "	VOTES
1. Children are innately curious.	0
2. We share a land ethic.	0

3. We provide a unique setting for hands-on learning by experience.	5
4. Having a positive experience in the out-of-doors is our highest priority.	5
5. Each child should leave with a smile on their face.	1
6. Both facilities bring to life classroom subject matter.	2
7. The customer is key to our success.	3
8. We need more time.	1
9. We are an extension of the school classroom.	4
10. Our experience cannot be done in the classroom.	1
11. Authentic learning through experience is most effective.	8
12. Heritage is important.	1
13. Experience can be the best method of teaching.	2
14. If we can teach children to care about and respect the natural world, they are our best hope.	6
15. Informal education is an important component of a well-rounded education.	2
16. Children are the ambassadors of the outside.	1
17. Showing relevance (real world connections) while having fun is critical.	4
18. Our purpose is unknown to many.	3
19. We have tremendous untapped potential.	1
20. Partnerships increase potential impact.	4
21. We are the experts in inquiry learning.	6
22. People should be prepared with 21st century skills.	7
23. Without plants and animals we cannot be successful.	1
24. We create memorable, meaningful experiences in the outdoors.	4
25. We are co-learners with our visitors.	0
26. Our passion drives value for our customers.	4
27. We're seen as the experts in inquiry-based learning.	0
28. We're always striving to be better.	0

Strategy Criteria

The Strategy Criteria drafted before and during the first retreat was refined by Alan Jaros and Dan Badgley prior to the follow-up session, and presented to the group as a guideline for evaluating strategies.

STRATEGY CRITERIA: We will undertake strategies that . . .

1. Are consistent with the BHS mission and our shared values.	HIGH MED LOW
2. Can be achieved with available resources (money, staff skills, available time, structures, natural resources, etc.).	HIGH MED LOW
3. Meet the needs of the intended customers (students, educators, community members, etc.).	HIGH MED LOW
4. Design, foster, and engineer greater integration between the centers and throughout the District.	HIGH MED LOW
5. Are in partnership or collaboration rather than competition with similar organizations outside the District.	HIGH MED LOW
6. Conserve and protect green spaces and promote environmental stewardship.	HIGH MED LOW

7. Have a SMART way to measure success.	HIGH MED LOW
8. Have a high probability of success.	HIGH MED LOW
9. Have a champion.	HIGH MED LOW

Big Questions and Strategies to Address Them

BIG QUESTION #1: How can we be more intentional to increase impact in our instructional programs for learners? And how will we know we've been successful?

This Question, which received small-group attention during the first planning session, was revisited and refined during the second session. Additional potential strategies were brainstormed, and participants voted to indicate those they felt should have the highest priority.

Strategies

STRATEGY	VOTES
1. Farm and nature center educators and classroom teachers ~~We~~ will ~~..~~ .engage in deliberate collaboration ~~of all parties (educators)~~ to develop learning outcomes starting with the end in mind. • Offer and participate in ~~P~~professional learning • Consult with curriculum leaders to ~~V~~vertically align~~ment~~ program objectives, looking at all standards (Michigan standards, Next Generation Science Standards, etc.) • Use ~~i~~inquiry-based pedagogy as a foundation for programs • Doable, feasible → outside-the-box to actual reality	24

• Logistics and resources—time, money, and stuff	
2. Invite farm and nature center staff to attend building grade level meetings—tell us how we help your programs.	15
3. Engage District curriculum leaders.	19
4. Create a program schedule that better fits classroom curriculum timing.	31
5. Hire full-time staff.	11
6. Perform and share formative and summative assessment of student learning between site and school.	16
7. Increase formative assessment throughout programs.	0
8. Create experience-based programs with real-world relevance.	1
9. Instill cognitive, psychomotor, and affective educational objectives.	0
10. Take the time necessary to provide impactful programs.	24
11. Increase communication between instructors and teachers.	0
12. Promote impactful work and learning and communicate our value.	0
13. Host a Field Day or Teacher Training at our sites (in August).	14
14. Develop summit.	0
15. Provide staff with knowledge and skills to become expert in their field.	0
16. Provide follow-up materials for students and teachers.	0
17. Make staff guides part of the new hire interview process.	0

BIG QUESTION #2: How can the farm and the nature center better coordinate programs so they are complementary?

This Question did not receive small-group attention during the initial planning retreat, but was deemed important enough by the nature center and farm managers to merit discussion at the follow-up session. Participants brainstormed possible strategies, and selected those they felt were most important.

STRATEGY	VOTES
1. Build staffing structure that values collaboration between both sites. Think about Subject Matter Experts and roles/shared leadership.	26
2. Coordinate efforts to assure consistency with curriculum, pricing, and schedule.	11
3. Physically observe each facility's programs.	6

4. Coordinate between both facilities on a continuum programming by grade level.	7
5. Offer all-day programs for all grades—no pre-K. Include 8th grade.	18
6. Combine staff meetings for each program. Build a curriculum leadership team to collaborate on programs.	0
7. Better communication regarding high school science class at the nature center and farm to increase enthusiasm.	1
8. Participate in prior introductions (in classroom) before programs.	2
9. Hire specialized staff for shared administrative leadership.	21
10. Build a joint operations team for outdoor sites.	0
11. Articulate shared values.	0
12. Create a shared curriculum map for both facilities and a collaborative web-based resource folder and calendar.	12
13. Twice a year, meet together to give an overview of all programs so staff knows what each site does.	0
14. Create a master guide of classroom curriculum to be shared between teachers and nature center/farm staff—each year.	0
15. Begin a program at one site, move to other site.	0

BIG QUESTION #3A: How do we ensure that we meet community expectations well enough to retain their financial and political support?

In the February 2 planning session, two questions related to providing services for the community were linked together as Big Question #3. During the March 1 session, participants elected to separate the two and discuss them further. They are inserted here as Big Questions 3A and 3B.

STRATEGY	VOTES
1. Create a conduit for community involvement and conversation. • Council, forum, membership • Result in awareness, communication, advocacy • Nature center and farm • Specialized membership "perk"-type incentives • Maintain some gateway to non-member program • A "funnel"	0

2. Create an active school/community partnership council to foster communication, linking home, school, and community through collaboration.	0
3. Create a network between agencies, civic organizations, and citizens for the purpose of identifying opportunities and concerns that will support and promote specific programs, groups, and projects.	0
4. Offer public program(s) each month . . . alternating sites. Open to public, all age groups. Facility OPEN (e.g. 2nd Saturday of the month, 10am-1pm, FREE). Planned/special activities offered.	3
5. Utilize the Communications Department. Point person at each site to send info to Shira/Lauren. • Local publications (Eagle, Beacon) • Social media • Libraries • Senior centers • Etc.	26
6. Offer more consistent volunteer opportunities for interested community members.	23
7. Seek community input and feedback on what they want to see at the farm/nature center.	1
8. Give back to community.	3
9. Develop signage.	6
10. Relate our purpose to our community.	0
11. Offer more community-based programs.	28
12. Encourage staff to be more visible and approachable before, during, and after EVERY program.	1
13. Offer weddings.	0
14. Reduce risk by offering strong, quality community programs.	0
15. Encourage staff to put electronics away during entire program.	0
16. Add registration and nominal fee (so we know counts and can just charge "family fee").	2
17. Create scholarship fund for those who can't afford bus/entrance fee.	11

BIG QUESTION #3B: What should be the role of Community Services (Recreation Department) in programming at the farm and nature center?

Participants generated several possible strategies for this question, but time did not allow for discussion or voting on them.

STRATEGY	VOTES
1. The role of Recreation/Community Services should be to support the programs by: • Publicity • Registration • Equipment usage	--
2. Create more open lines of communication between the two sites and Recreation Department.	--
3. Create our own farm/nature center break-even community programs with full-time staff.	--

BIG QUESTION #8: How do we build a more engaged ~~address~~ staff ~~turnover~~?

This Question was included in the February 2 list in its original form, but did not receive enough priority votes to merit its own small-group discussion. The wording was revised by the site managers prior to the March 1 session, and addressed at that time.

STRATEGY	VOTES
1. Offer a fair, equitable, and livable wage and benefits.	37
2. Create job titles reflective of the work conducted. (Compare titles to other similar organizations.)	1
3. Invest in professional learning opportunities. (Offer educational tuition assistance.)	27
4. Involve staff in important decision-making.	9
5. Recognize staff for accomplishments.	3
6. Focus on a culture of excellence.	3
7. Make staff relevant to the system and District staff.	0
8. Ensure there is an ongoing evaluation of staff salaries.	0
9. Evaluate staff and set performance standards.	14
10. Have fun!	6
11. Communicate with staff.	3
12. Work as a team with program development between managers and staff.	0
13. Provide benefits.	0
14. Conduct 360° evaluation.	0
15. Evaluate part-time/full-time need based on individual's personal need and desire.	0

16. Make sure that staff feels valued and all input is heard and considered.	0
17. Allow more opportunities for staff's special interest and programs and projects to be offered.	0
18. Staff rewarding other staff regularly.	0
19. Conduct regular combined meetings with both nature center and farm staff (re: programming).	0
20. Create Qualtrics survey for teacher feedback regarding staff performance, per program.	0
21. Recruit staff with specific experience and intention.	1

BIG QUESTION #9: How do we address the need for periodic capital expenditures at both sites?

This Question was not a part of the discussions during the February 2 planning session, but was added by site managers prior to the March 1 session and discussed at that time.

STRATEGY	VOTES
1. Create our own timeline and bring it to the Board.	0
2. Fundraise with the community.	4
3. Request to be added to the District's facilities timeline.	26
4. Increase the value of the farm and nature center to be equal to core facilities.	0
5. Ask to have a nature center/farm representative on the decision-making body.	7
6. Determine the need for capital improvements through bringing on an expert.	12
7. Put it in the strategic plan.	0
8. Evaluate what they spend on other schools.	0
9. Increase our understanding of the District's capital expenditure process and increase communication with those who determine it.	4
10. Meet with Superintendent, Business office, and head of building and grounds.	7
11. Conduct a capital needs assessment of both facilities.	19
12. Highlight safety issues; make our voice loud and clear.	9
13. Get grants for capital expenditures.	0
14. Develop a long-term capital improvement calendar.	0

STRATEGIC & MASTER PLANNING

3 PHASE PROCESS

Phase 1
Facility & Market Analysis
(Aug – Nov 2022)

Phase 2
Strategic Planning
(Nov 2022 – Jan 2023)

Phase 3
Master Planning
(Jan 2023 – May 2023)

Define our starting point

- Assess current site, facilities and operations
- Assess current market performance
- Identify SWOT

Define our Destination

- Identify goals and vision for next 5 yrs.
- Define the strategies and action plan to reach these goals

Create a Roadmap for Implementation

- Design the program and site plan for Nature Center improvements
- Identify key stories and overarching messages for guest experience
- Phased diagrams and illustrations to build stakeholder excitement and assist with fundraising efforts

PHASE 1 EXECUTIVE SUMMARY

The Johnson Nature Center is a unique asset for the Bloomfield Hills communities - rich in history and showcasing landscapes and ecosystems found in southeast Michigan. Since acquiring the land in 1968, Bloomfield Hills Schools has transformed this property into a large outdoor classroom, allowing students and community members hands-on learning opportunities to experience and connect with nature. Welcoming all ages primarily from within a fifteen-minute drive, the nature center seeks to inspire lifelong curiosity and positive change through engaging and meaningful experiences with nature, food, and sustainable natural resources.

SITE & FACILITY ANALYSIS

Sited on almost 43 acres, developments supporting the nature center's operations are primarily focused in one defined area centrally located at the west edge along Franklin Rd. These developments include a Visitor's Center, PREP House and animal enclosures. There are other small structures (Cabin, Barn and Sugar Shack) located on the north side of the lake, but otherwise 90% of the parcel is intentionally left undeveloped with walking trails throughout the forests. Keeping most of the area natural and minimizing man-made improvements is a directive from all stakeholders moving forward.

Many of the facility's buildings and infrastructure systems are aging or no longer serve the needs of the Nature Center. Of particular importance is the entry sequence, which is confusing, inefficient, and does not allow tracking of visitation easily. Additionally, through a team evaluation of the facilities based on age/condition, functionality/efficiency, and guest experience, the PREP House, garage, bridge, docks, and the East Loop trail were all identified as the most critical elements to be addressed in future plans.

An Accessibility Evaluation was completed by an Inclusive Recreation and Accessibility Consultant (Cynthia Burkhour) who evaluated the site and all facility spaces for accessibility compliance. The site is currently very limiting for people of varying abilities, especially those with limited mobility. Some key recommendations include:

- Redesigning select pathways for appropriate slopes and surface materials to facilitate accessibility for all abilities.
- Providing information about accessibility on the Nature Center's website, at the Visitor Information Center and on signs located across the site.
- Providing all-terrain wheelchairs to help with navigating less accessible routes.

CURRENT PROGRAMS

While most of the education and community programs currently target K-5 students, Johnson Nature Center does offer programs and events focused on engaging the community and adults throughout the year. While visitors and non-visitors alike request more of these programs and at a lower price point, program capacity is currently limited due to lack of staffing. However, the most popular activities attracting visitors to the site focus on opportunities to connect with nature - trail hiking, looking at the pond, and viewing/interacting with animals.

PERFORMANCE ANALYSIS

The Felis Consulting team analyzed attendance data and revenue data to understand how the site/facilities and business overall is performing. Our attendance analysis confirmed that the toilet and parking capacities meet the Nature Center's needs for daily operations (not including events), but a restroom should be added within the property to shorten the travel distance for small children and visitors who have mobility impairments. The business analysis highlights the complications in the current public-private hybrid management and funding structure and conveys the need for additional revenue streams to support education and community programs.

COMPETITION & BENCHMARKING

Competitors for Johnson Nature Center don't just include other nature centers in the area but also parks, botanical gardens and institutions that provide visitors the opportunity to connect with nature. When looking at the competitive landscape, we identified the following top competitors:

- Leslie Nature Center has strong student education programs and is a frequent destination for school field trips.
- Stage Nature Center is a notable competitor due to its proximity to Johnson Nature Center and its volunteering opportunities.
- Belle Isle Nature Center is a popular attraction since visitation is often grouped with the area's other nearby attractions.

Additionally, Kalamazoo Nature Center was identified as a strong benchmark within the state of Michigan and will be referenced in future discussions regarding growing our nature center.

Competition assessment included site visits and online research and was focused on helping the Nature Center understand what makes them unique. Qualities that differentiate the Johnson Nature Center experience from others include the following.

- Unique assets
- Engaging experiences
- Successful educational programs

BRAND & PUBLIC PERCEPTION

The Felis Consulting team conducted a stakeholder workshop and a public engagement survey to gather data supporting the perception of the Nature Center, as well as brainstorm ideas for improvement. The community recognizes and values the roles the Nature Center plays in supporting education efforts (BHS and nature-related) as well as providing opportunities for community members to unwind and experience nature. Non-visitor perceptions were more focused on the educational aspect while visitor perceptions understand a balance between education and nature-based experiences. Further, visitors do not want future developments to compromise these characteristics. One of the most noted barriers for visitation is a lack of awareness (far greater than Bowers School Farm), especially related to events, programs, and generally what there is to do at the Nature Center.

SWOT

Using feedback from our public engagement efforts and internal workshops with key stakeholders, we outlined the Nature Center's internal strengths and weaknesses as well as external opportunities (trends/events that the Nature Center can use to support its growth) and threats (trends/events that can derail growth efforts.) These will be key in Phase 2 as we identify the Strategic Plan goals and strategies for 2027.

STRENGTHS

Nature Center Features, Programs & Attractions

Publicly accessible trails

Site, historic structures and unique programs communicate stories of the past, present and future

Flexible Visitor Center space

Wing Lake Building has potential for greater use

Strong partnerships with BHS K-5 curriculum

Education Support & Career Pathways program

Successful community events

Trust grant in place to preserve the land

Team & Internal Culture

Strong, talented, motivated and effective team

Friendly & welcoming staff focused on educating and engaging visitors

Strong creative problem-solving skills among all team members

Passionate and engaged volunteer groups

Active Friends of JNC group

Partnerships with local libraries, businesses and organizations

Brand & Public Perception

Peaceful and safe retreat for people to connect with nature in the city/suburbs

Authentic and experiential environment that welcomes all

Birmingham resource

Strong community support

WEAKNESSES

Team & Internal Culture

Additional staff needed for any future growth

Current hiring constraints and limited HR capacity makes hiring new employees a difficult process

Nature Center would benefit from stronger representation and positioning in BHS

BHS has limited resources to assist with conservation efforts

Nature Center Features, Programs & Attractions

Site is landlocked with limited expansion options

Parking is a limiting factor for events

Facility is not designed for competing uses to occur simultaneously (e.g. education, public use, events, etc.)

Few hands-on exhibits in the Visitor's Center

Limited revenue streams to supplement BHS funding

Lack of data on general attendance visitors limits JNC's ability to quantify annual visitation and understand current audiences

Nature Center doesn't know the maximum visitor capacity for balancing visitor experiences and guest impacts on the site

Limited information available for current trail system

Physical accessibility of the site

Community based programs are limited due to cost, staffing and marketing

School educators leading tours & school experiences lack the fundamental knowledge about JNC site and facilities

Brand & Public Perception

Stronger marketing strategy needed to inform the community about current attraction offerings, programs and events

Public doesn't understand the Center's funding structure

OPPORTUNITIES

New Markets

Commercial Photography

Public demand for the following could provide new visitors and sources of revenue

- Public fishing
- Overnight camping
- Food experiences
- Private rentals for events

Customer and volunteer pools are growing among the following groups

- Retiring Boomers who are looking for something to do
- People looking to recover from burnout and stress

Funding and Growth

Economic downtowns result in increased BHS student enrollment

Large pool of potential donors in the Bloomfield Hills area

Grants available through the Dept. of Natural Resource to assist with improving accessibility issues and other site improvements

Corporate partnerships are looking to give donations and volunteer hours

Growing Friends of the JNC group with an ongoing focus to strengthen community support

Several upcoming opportunities for land acquisition (including parcels adjacent to the current Nature Center property)

THREATS

BHS Board & Community

Private school attendance continues to limit the following.

- Financial support
- Students reached through field trips and BHS programs

Competition with municipal funded facilities and programs

Connection with BHS can hinder some grant and donor funding eligibility

Operations

The following issues impact staffing

- Retaining current staff and attracting new staff as many are looking elsewhere for jobs that pay more for less work
- Hiring process and training takes time

Wooded environment and open accessibility to public present opportunities for criminal activity

Conservation Efforts

The following could negatively impact the site's ecological footprint.

- Activity upstream on the Rouge River
- Residential fertilization and run-off
- Climate change
- Invasive species
- Increases in wild animal populations
- Noise pollution from adjacent roads

SECTION 1:
WHAT IS THE NATURE CENTER TODAY?

VISION & MISSION STATEMENT

Vision

We are growing a better future by:

- Cultivating community
- Inspiring learners to find purpose & create change
- Engaging visitors through meaningful & memorable experiences

Mission Statement

To promote conservation and stewardship through meaningful experiences in nature

Both the Farm and the Nature Centers share a common purpose - to inspire authentic learning through hands-on experiences.

CORE VALUES

We are committed to building a community focused on health, healing and the sustainability of all life on earth.

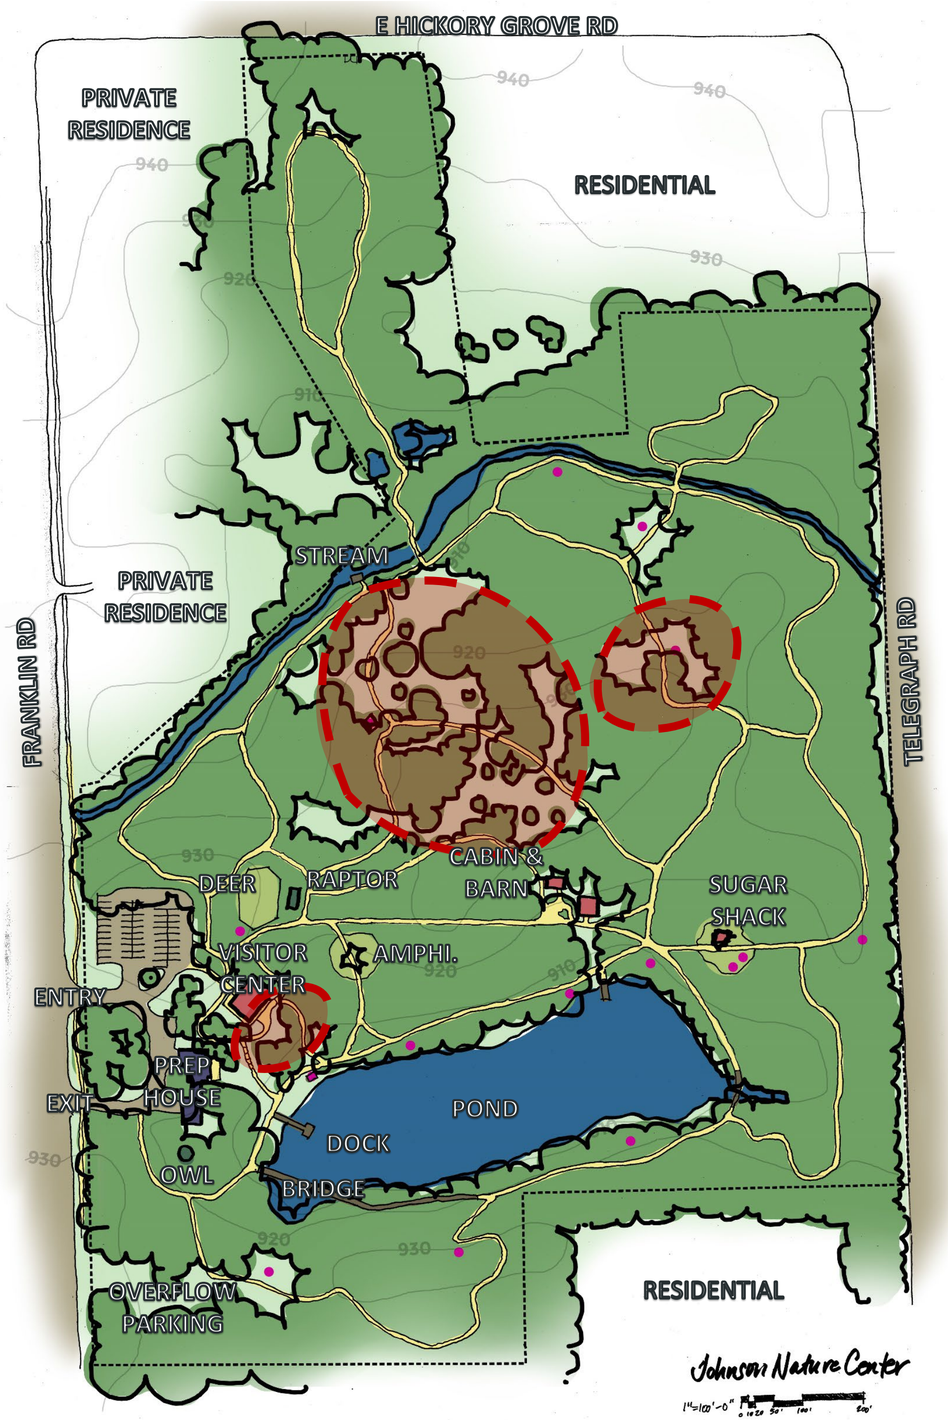
- Place: We will cultivate attention to the beauty and wonder of nature, the harvest and the interconnectedness of all living things.

- Inquiry: We will partner with all members of our community to draw in a wide range of strengths and knowledge in order to design and provide educational experiences that promote equity and compassion for all. We will do so through a process that is rooted in inquiry and reciprocity.

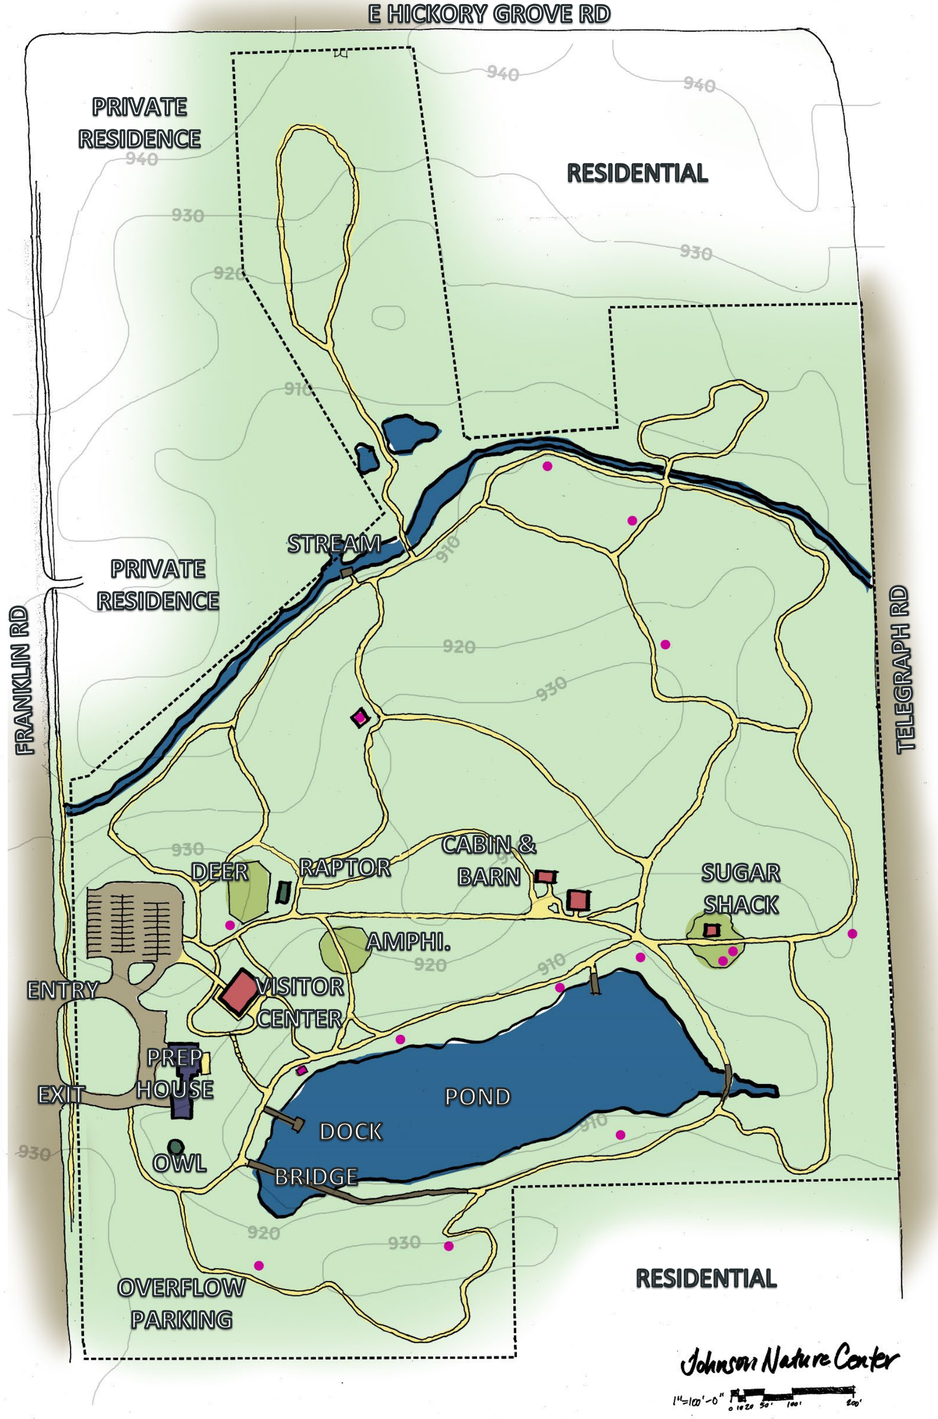
- Civic engagement & action: We will develop awareness and inspire positive change by welcoming, engaging and supporting our local community members and visitors.

SITE ANALYSIS

What is the current state of the physical facility?

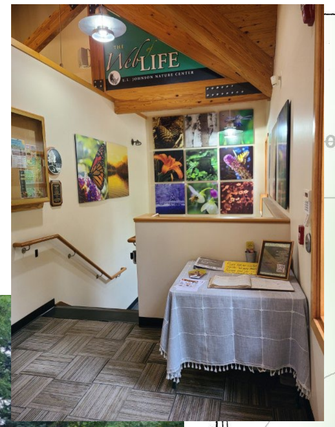


What are potential opportunities and challenges to development?

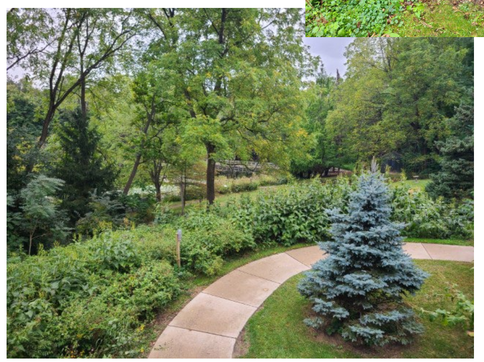


EXISTING SITE PLAN

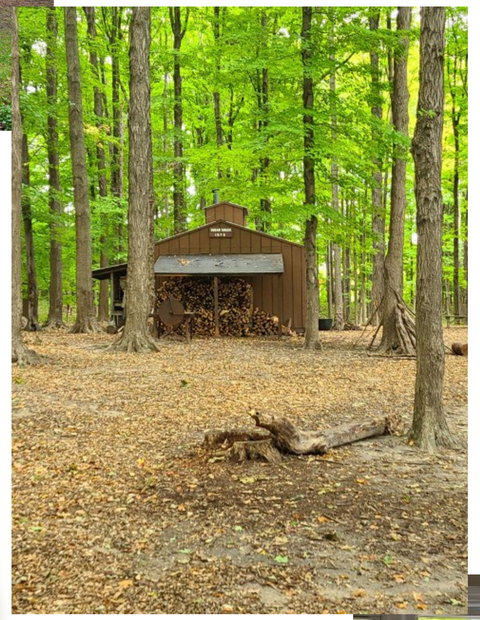
~43 total acres



75% tree coverage



- BENCH
- GUEST PATH
- ROADS & PARKING
- GUEST ACCESS BUILDINGS
- BACK OF HOUSE BUILDINGS
- ANIMAL SHELTERS
- POINTS OF INTEREST
- TREES & VEGETATION
- WATER
- PRESCRIBED BURN



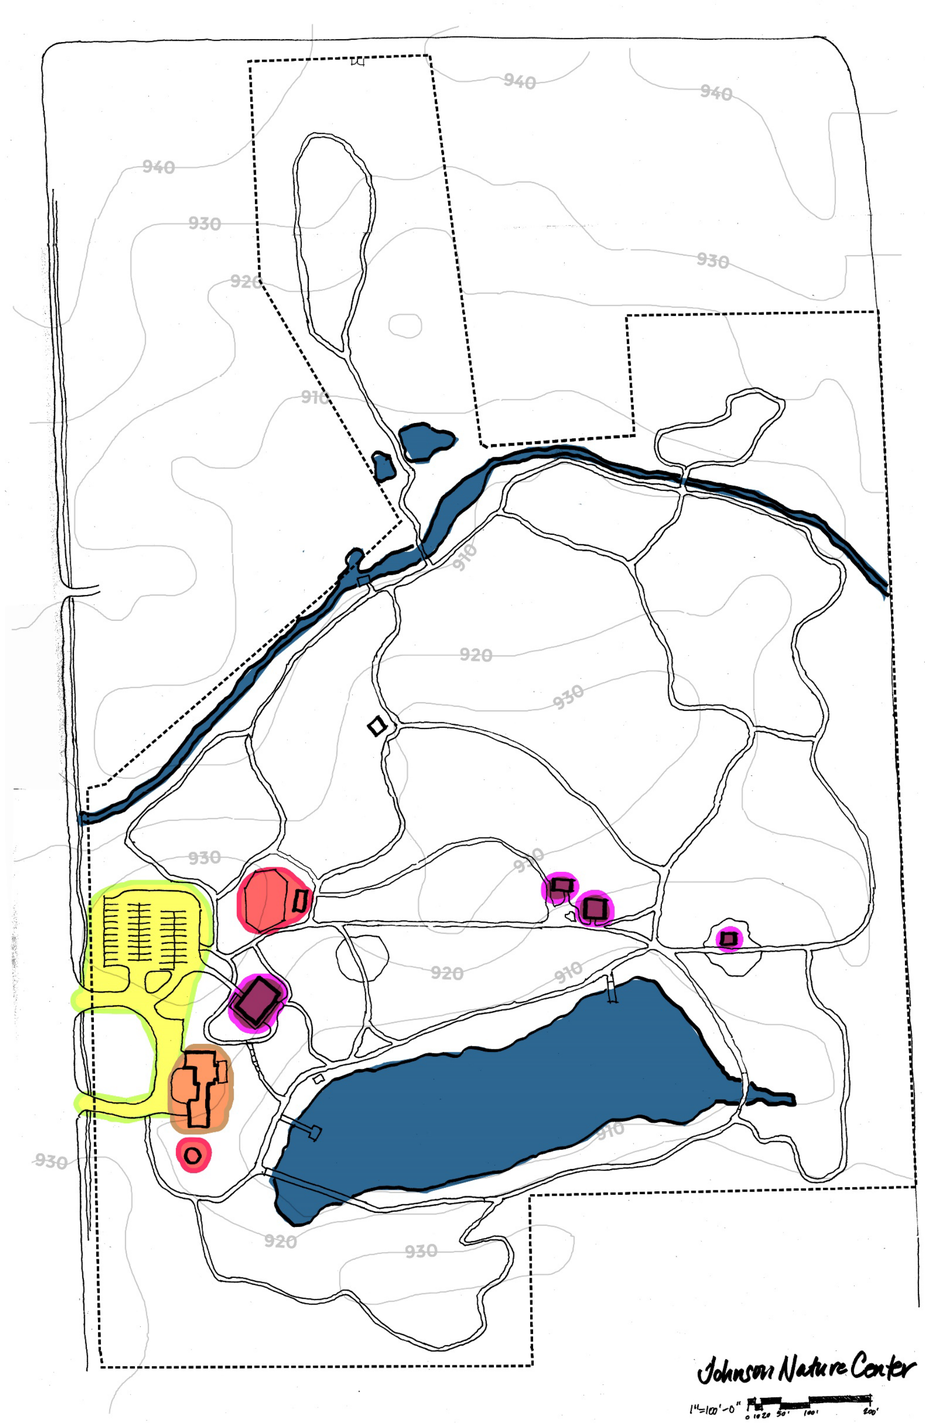
EXPERIENTIAL ANALYSIS

NOISE

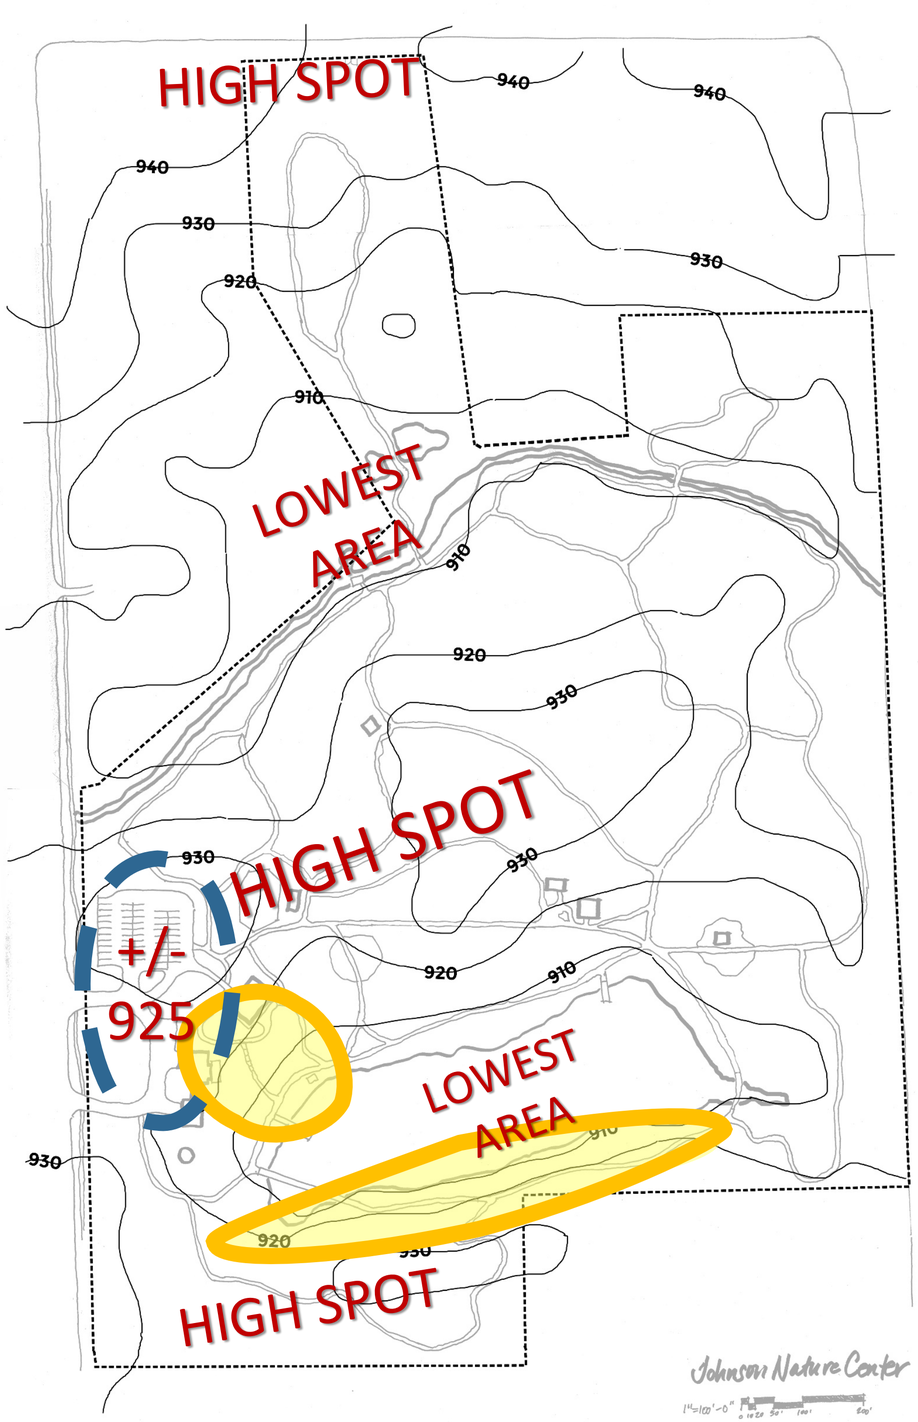
GOOD VIEW

NEGATIVE VIEW

CONFUSION



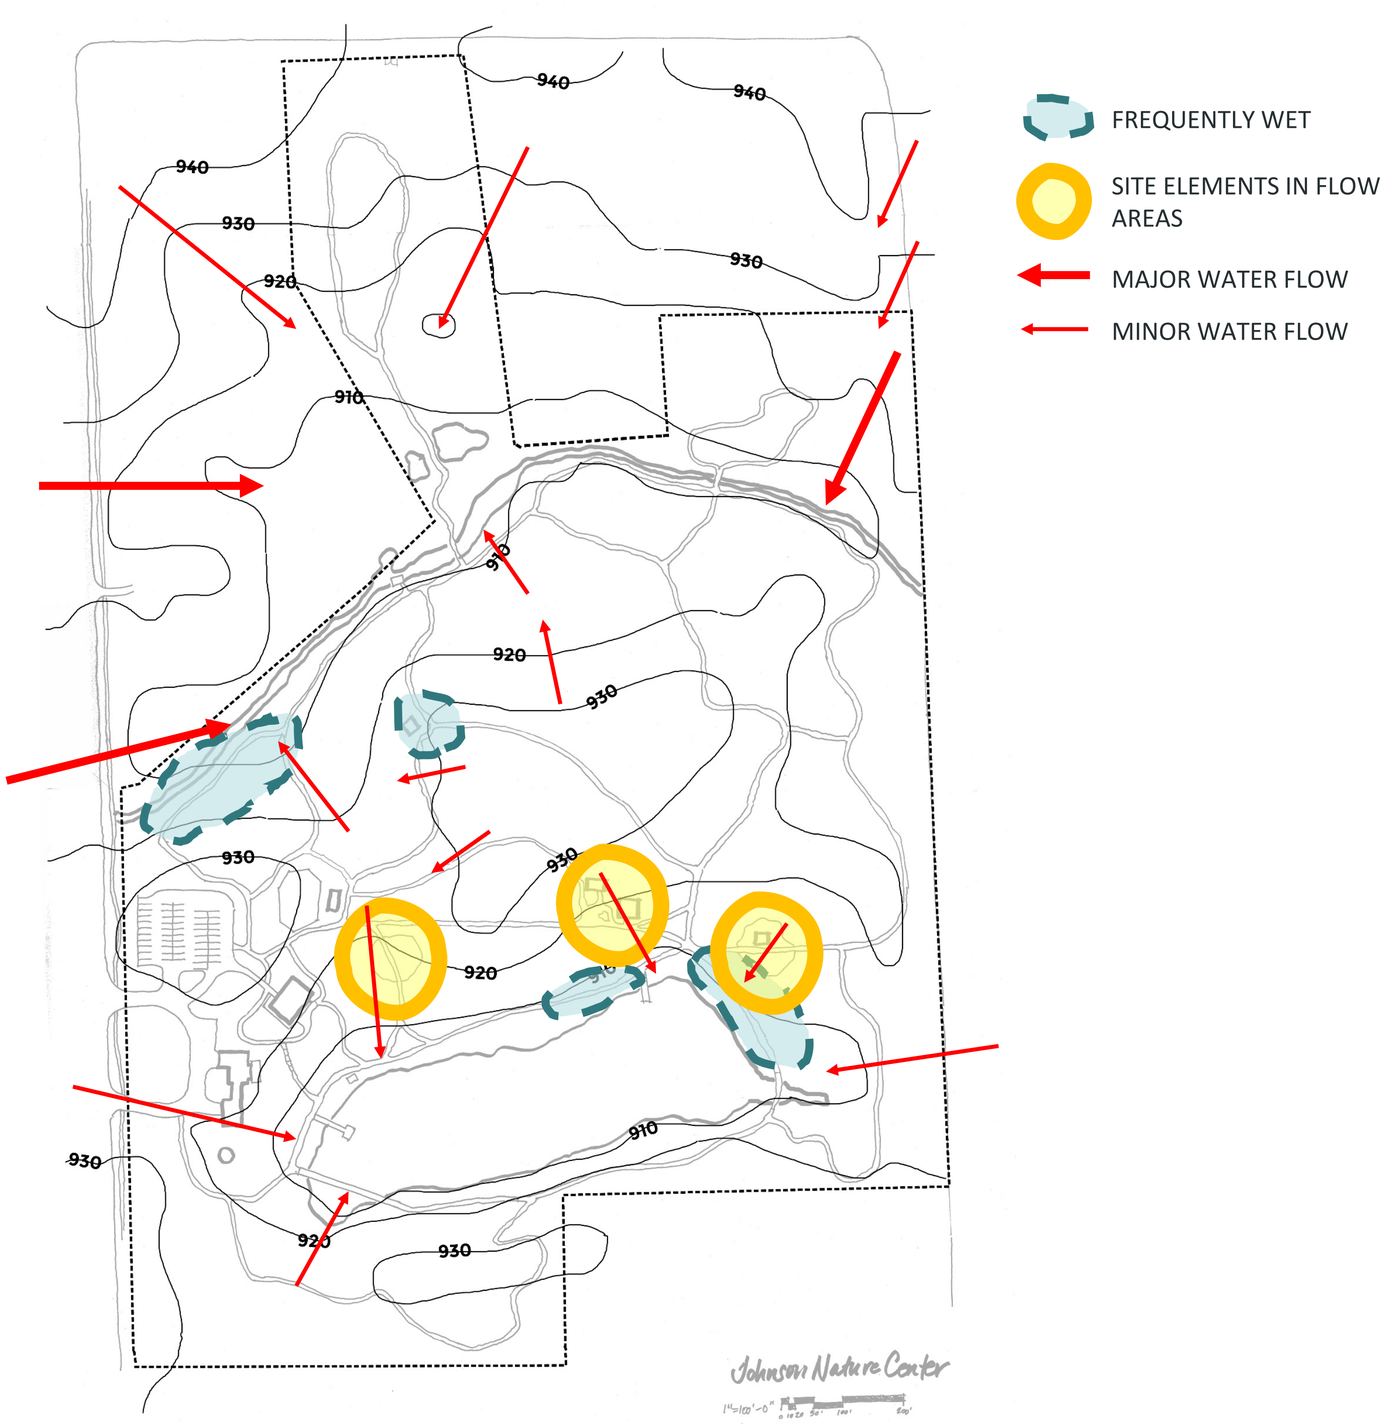
BENCH



SITE USAGE

~90% of site is natural areas

PERCENT OF TOTAL	
9.4%	WATER
1.4%	ROADS & PARKING
0.5%	ANIMAL
0.3%	GUEST INDOOR
0.3%	BOH



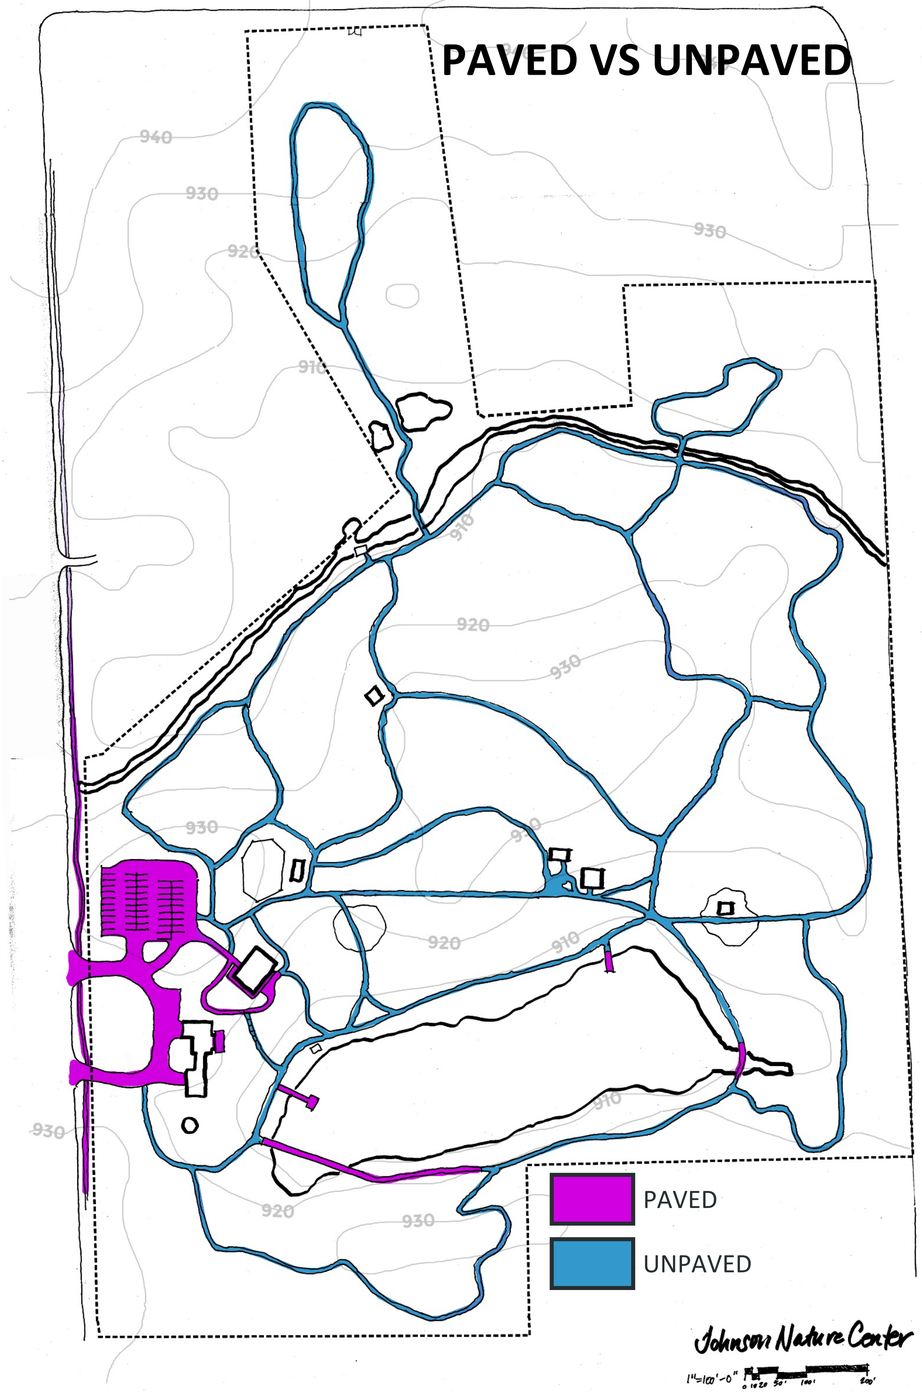
TOPOGRAPHY

10’ INTERVALS FROM USGS

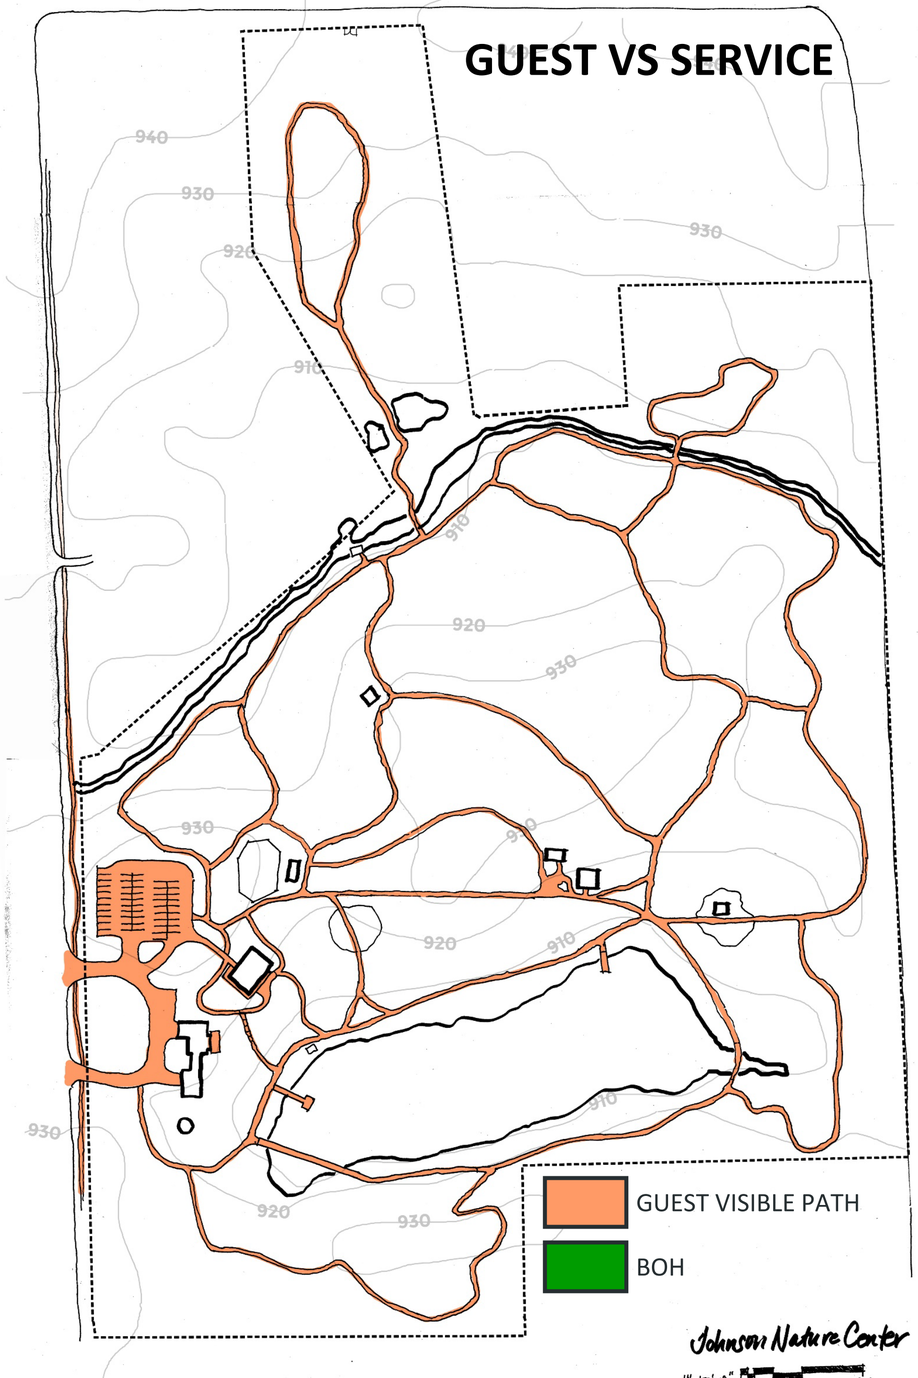
- Total change across site is +/- 20’
- Low areas are where water gathers into pond / stream
- Parking, BOH, and Visitor Center are all located on high spots
- Two most challenging areas are: 1) Moving between the upper Visitor Center and down to the pond edge—natural slope is 9% 2) Walking along the southern edge of pond where slopes are 13%+ *(8% is ramp; 5% is max ADA)*

HYDROLOGY

FREQUENTLY WET



SITE ELEMENTS IN FLOW AREAS



MAJOR WATER FLOW

MINOR WATER FLOW

- Lots of flow on-site from adjacent roads and possibly golf course
- Some key site elements are prone to flooding:
  1) Amphitheater
  2) Cabin & Barn
  3) Sugar Shack
- Several pathways tend to flood in heavy rains

PATHS

- Most paths on site are natural surface, except near Visitor Center and BOH
- No dedicated BOH paths
- No trail is ADA accessible today

FACILITY EVALUATION

JNC	Ave / Priority	Age / Condition	Functionality / Efficiency for Current Use	Guest Experience	Known Improvements Needed
Prep House	1.0	1	1	N/A	
Garage	1.0	1	1	N/A	Roof & Electrical; Bigger--30x40 w/ 10' lean-to; Taller
Bridge & Docks	1.0	1	1	1	T-floating dock aged but okay; bridge / boardwalk--doesn't account for seasonal changes of pond water; slippery; need canoe / kayak launch
East Loop	1.0	1	1	1	Too narrow; old wildlife trail; spooky
Sugar Shack	1.3	2	1	1	Too small; hard to see; no bottling area; Could be much better experience
Picnic Area	1.3	1	1	2	Near Prep House / "Grey thing"; Not accessible; Pretty
Connector Trail from Tower to Stream	1.3	1	1	2	Unusable during wet times
Woodland Trail (by pond)	1.3	2	1	1	Steep
Owl Habitat	1.7	1	2	2	Hard to find
Trail along Telegraph	1.7	2	2	1	Noisy
Coyote Den (first room at stair)	1.7	3	1	1	Traffic flows through this classroom from upstairs and outside; bathroom inside
Bat Cave	1.7	3	1	1	Meeting space…not a classroom really; workspace shared inside the meeting room; overflow program staging / storage
Restroom	1.7	2	2	1	
Deer Habitat	2.0	2	2	2	Location is not best for animal well-being
Raptor Habitat	2.0	2	2	2	
Outdoor Classroom	2.0	1	2	3	
Tower	2.0	2	2	2	Aged, but safe; capacity is 12 elementary aged kids or 6-8 adults; weird bench in the middle
Guest Toilets	2.0	2	2	2	Short for kids; capacity is small for large groups for programs; only one sink
Visitor's Center (Upper Level)	2.3	3	2	2	Exhibits need updating; Not enough staff space; Deck expansion; Retail and snacks
Sugar Bush	2.3	1	3	3	Very old and needs succession planting; 20 years…won't have maple sugaring (need 40+ old trees)
Trails	2.3	2	2	3	Accessibility; material
Log Cabin	2.7	3	2	3	Not accessible; Limited hours make it difficult to experience; Visitor flow is awkward
Cabin Barn	3.0	3	3	3	
Kitchen / Library (downstairs)	3.0	3	3	N/A	Doesn't support events--shallow sink; 'tea room'

SITE ACCESSIBILITY

The JNC site and facilities were evaluated for accessibility compliance and recommendations were made to remove barriers for people of all abilities to better use the environment. Recommendations focus on achieving full inclusion – ALL share the same experience at the same time. Refer to *BHS Johnson Nature Center ADA Access Barrier-Removal Recomm Rpt Oct '22* for comprehensive report. Summaries of the Top Findings and Top Recommendations are summarized below.

Top Findings

- No connected accessible routes to outdoor classrooms and individual experiences (Cabin, Sugar Shack, wildlife enclosures, floating docks, etc.)

- No accessibility information about the Nature Center trails, facilities, programs and experiences are posted on the website.

- Woodchip trail surface is neither firm nor stable.
  - Remove and/or do not replace in the future
  - Replace with ¼" crushed aggregate

- Some steep routes should be redesigned to improve accessibility and runoff drainage management.

SITE ACCESSIBILITY

Top Recommendations

- Invest in all-terrain wheelchairs to make pathways and routes more accessible; wheelchairs should be available to students and guests.

- Communicate trail condition information.
  - Virtual and printed maps should be available noting accessible routes to key experience locations.
  - Signs should be placed at trailheads and intersections noting trail information (route slopes, trail lengths, resting locations, surface condition, etc.) for users to make informed decisions.

- Consider automated systems to present sign information in audio format for guests who cannot read or have vision impairment.

- Develop a maintenance program to keep route conditions repaired and clear of obstacles (overgrown vegetation, large debris, etc.)

CURRENT PROGRAMS & AUDIENCES

What programs & events does the Nature Center currently offer?

Who is visiting the Nature Center today (and which groups are missing?)

EDUCATION PROGRAMS

Date: Year-Round (Differs by Program Type)

Programs / Activities

- Nature walks / exploration / play
- Animal feeding & encounters
- Maple sugaring
- Candle making
- Life in the 1800’s
- Birding
- Early childhood & adult training
- Summer camps
- PREP & Wing Lake programs

Target Audience

- Kindergarten – 5th grade students
- Young adults 18-26 yrs. old with developmental, emotional and physical disabilities (PREP Program)

Program Goals

- Support formalized education with nature exploration and hands-on experiences
- Connect students with Michigan’s natural resource systems
- Support ongoing research and conservation efforts

COMMUNITY ACTIVITIES

Date: Year-Round (Differs by Program Type)

Programs / Activities

- Nature walks / exploration
- Animal encounters
- Cabin exploration
- Birding
- Visitor's Center
- *Fishing Clubs
- *Photography
- *Canoeing
- *Book Hikes
- *Snow shoeing

*Denotes paid activity

Target Audience

- Local community residents

Program Goals

- Connect community members with Michigan's natural resource systems
- Provide a safe and peaceful retreat from urban / suburban environments
- Increase community engagement

SPECIAL EVENTS

Date: Year-Round (Differs by Program Type)

Programs / Activities

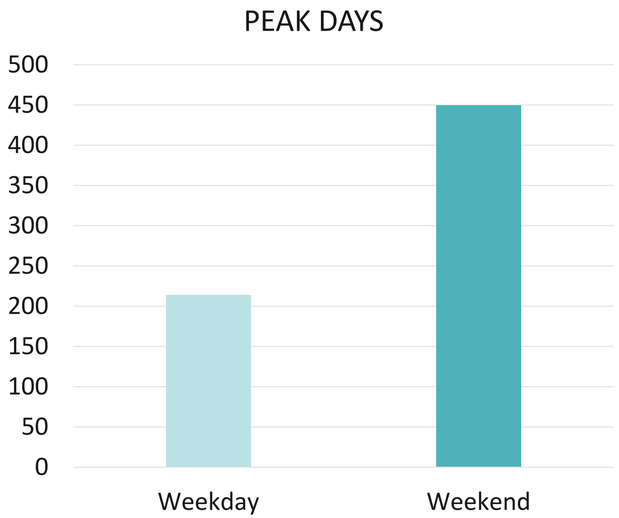
- Maple Sugaring
- Earth Day
- Forest to Table

Target Audience

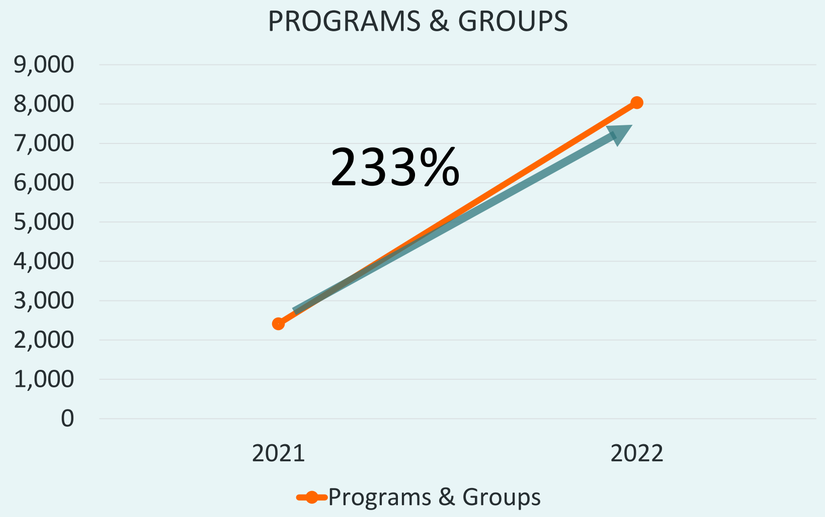
- Local families
- Adults
- Foodies

Program Goals

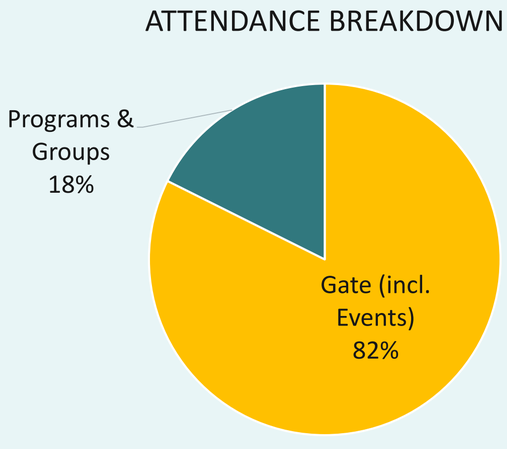
- Increase community engagement
- Generate revenue
- Provide opportunities for visitors to engage with their environment differently



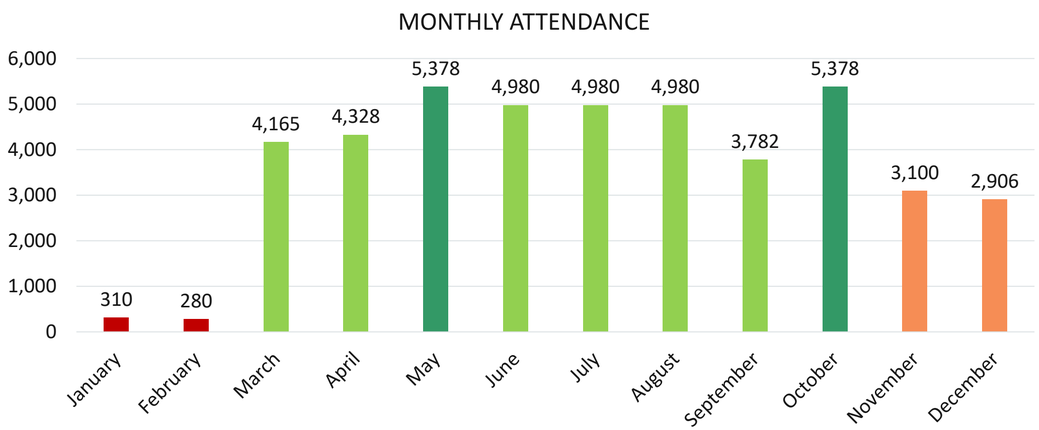
PERFORMANCE ANALYSIS



What trends are we seeing with attendance and finances?



What are the successes and potential areas of growth in the market?



ATTENDANCE TRENDS

Total Annual Attendance: 44,567

Calculating Attendance:

- 214 guests 3x weekdays Sept. - Dec. & March – May (programs & casual)
- Summer Weekends: 60% of days hit 450 guests (all casual)
- Summer Weekdays: 200 guests
- March Weekends: 3 days of 261 for Maple Sugar
- April Weekends: 50% of days with 300 guests
- Sept., Nov., Dec. Busy Weekends: 50% of days with 200 guests
- Oct. Weekends: same as Summer weekends
- Non-Peak Not Busy Weekend & Weekday Days: 10 guests (Nov, Dec, Jan, Feb); 40 guests for all others
- Sept. Weekends: Slow down due to school restarting

DAILY ATTENDANCE PATTERNS

Understanding Design Day—Summer Weekend

	Arrival		Departure		In Park	
Before 8:00 AM	1%	4	0%	0	1%	4
8:00 AM	10%	38	3%	11	8%	30
9:00 AM	17%	64	5%	19	20%	76
10:00 AM	8%	30	7%	27	21%	80

Maximums	17%	**64**	12%	**45**	21%	**80**
				Length of Stay		**1.20**

Design Day tells us the total attendance for an average busy day, which will become the basis for evaluating capacity of existing site. This data has application during master planning to appropriately size new facilities.

Overall, JNC's Design Day should be considered a busy Summer Weekend day (as compared to a busy Program Weekday).

Annual Attendance:	44,567	FY 2022 (programs & gate)
Ave Peak Day:	450	Average of top 25 days
Maximum Day:	550	Beautiful summer weekend day
Design Day:	375	0.8% of total (typ 0.5-1% for theme parks)
Design Day, Peak in Park:	80	
Length of Stay:	1.22	

Peak Arrival = 9am & 3pm
Peak Departure = 4pm
Peak in Park = 10am

DAILY ATTENDANCE PATTERNS

Understanding Design Day—Program Weekday

	Arrival		Departure		In Park	
Before 8:00 AM	2%	4	1%	2	1%	2
8:00 AM	5%	11	4%	9	2%	4
9:00 AM	50%	107	6%	13	46%	98
10:00 AM	5%	11	5%	11	46%	98
11:00 AM	5%	11	4%	9	47%	101
12:00 PM	6%	13	3%	6	50%	107
1:00 PM	5%	11	6%	13	49%	105
2:00 PM	5%	11	50%	107	4%	9
3:00 PM	6%	13	7%	15	3%	6
4:00 PM	5%	11	7%	15	1%	2
5:00 PM	4%	9	3%	6	2%	4
6:00 PM	2%	4	3%	6	1%	2
7:00 PM	0%	0	1%	2	0%	0
8:00 PM	0%	0	0%	0	0%	0
	100%		100%			
Maximums	50%	**107**	50%	**107**	50%	**107**
					Length of Stay	**2.52**

Annual Attendance:	44,567	FY 2022 (programs & gate)
Ave Peak Day:	214	Average of top 25 days
Maximum Day:	214	Peak is same as DD
Design Day:	214	Total of programs + guests
Design Day, Peak in Park:	107	
Length of Stay:	2.5	Despite students staying ~4.5 hrs.

Peak Arrival = 9am with students
Peak Departure = 2pm with students
Peak in Park = 12pm

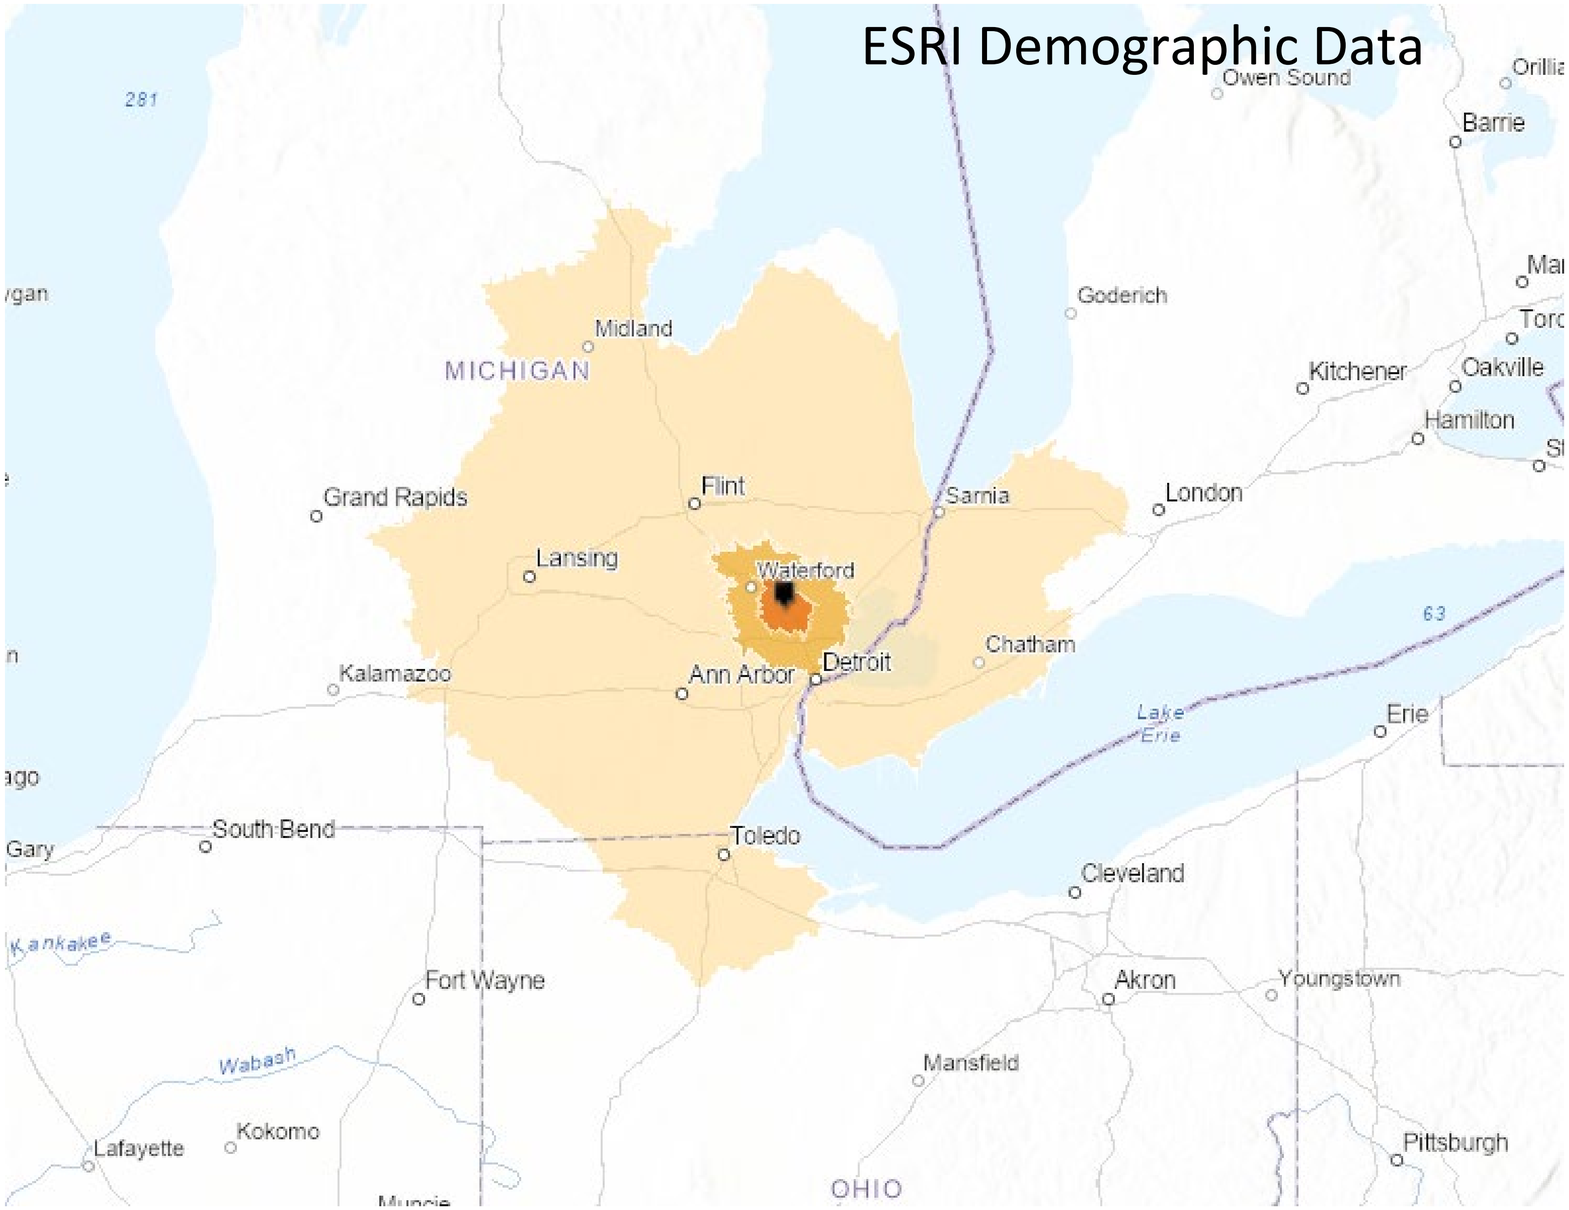
CAPACITY ANALYSIS

Parking & Toilets

PARKING

Design Day Weekend (3.2 ppc) = 25 spots
Max Arrival: Forest to Table (2 ppc) = 100 spots

Design Day Weekday is insignificant due to student bussing.



TOILETS

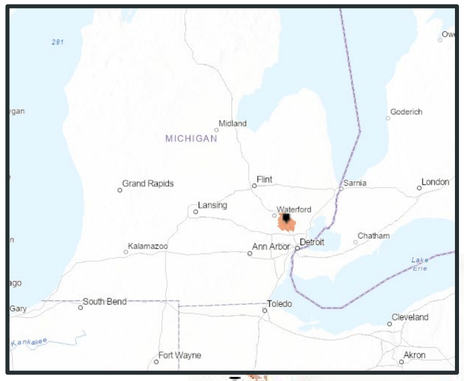
Based on highest PIP (weekday), need 2 total restrooms in park, and should be located at entry to service Arrival and Departure.

For comfort and convenience, should add at least one family restroom inside the park.

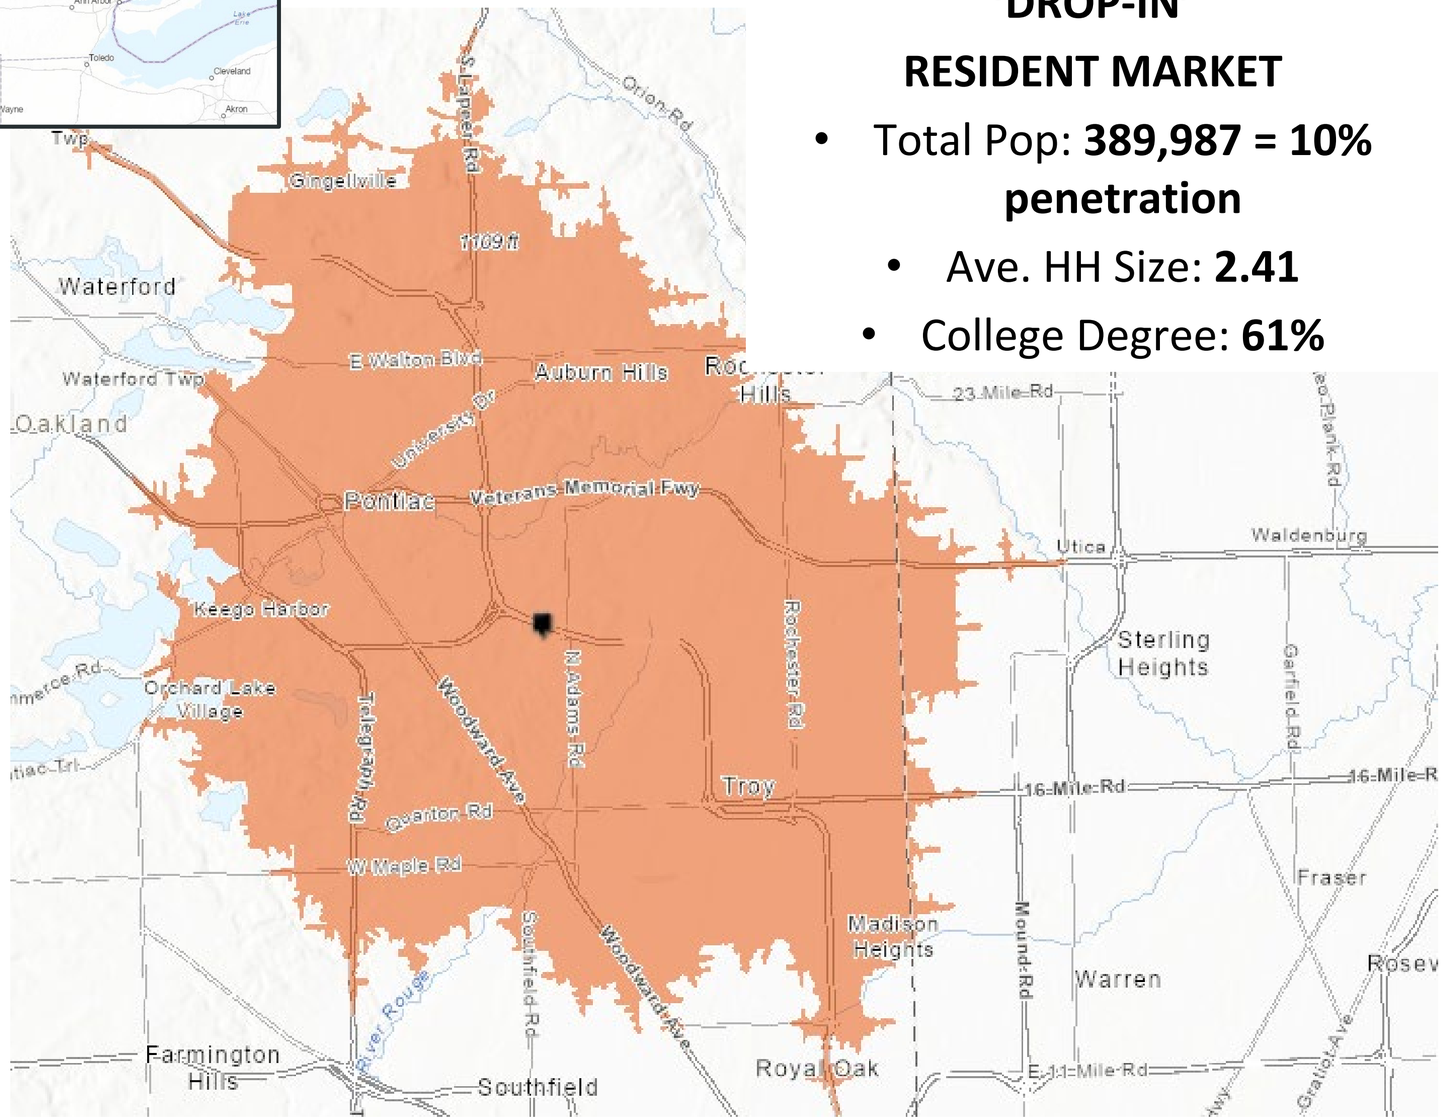
POTENTIAL MARKET

ESRI Demographic Data

15 MIN DRIVE TIME FROM NATURE CENTER



30 MIN DRIVE TIME FROM NATURE CENTER



2 HOUR DRIVE TIME FROM NATURE CENTER

LOOKING FOR GROWTH

- Financial activity is accounted for in two separate funds: General and Community Services.
- *General Fund:* The funding for the educational programs and overall operating costs of the Johnson Nature Center is made possible through the General Fund of the district. The General Fund is the district's primary operating fund and spending must comply with Michigan laws. Educational services to students and direct expenses to fulfill the District's mission are covered by the General Fund. Since 2019, in-district schools were no longer charged for Nature Center programming, which was offset by an expense to the in-district school resulting in a zero net effect for the General Fund. The School Education component is and will always be an expense to BHS; however, a portion of future net profits from programs and services to the community will offset the net cost to BHS.
- *Community Services Fund:* 'Community' relates to all out-of-district programs, community programs, camps, site rentals, and events. Expenses across the board have increased significantly since 2019, primarily focused on an investment into future community offerings that necessitated a restructuring of the nature center's staffing roles, responsibilities as well as certain capital related costs.

- Forest to Table (FTT) event in FY23 brought $42k in profit via the Friends group

- Projection FY23: 20% incr in Expenses; Actual Revenues (FTT22 + FY22 Revenue)

- The Nature Center, like the Farm are both considered an integral part of our educational programming similar to cocurricular opportunities and choices provided to BHS students, including arts, music, athletics, clubs and more providing a full experience for our students.

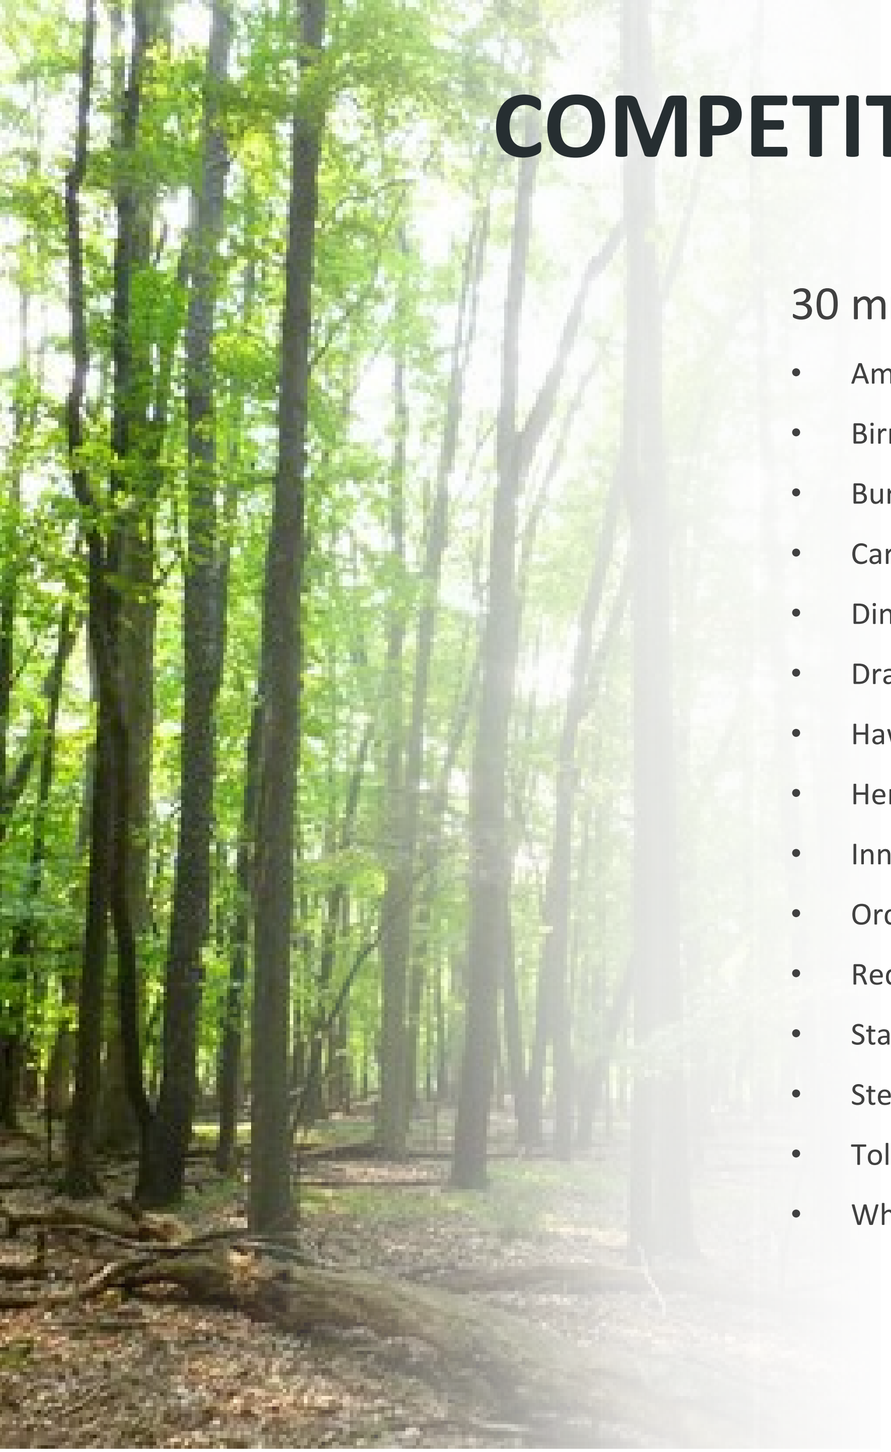
COMPETITION & BENCHMARKING

Who/what are we competing against for visitation and funding?

How are we performing compared to similar attractions?

Who is your competition?

What can we learn from them?



How is the Johnson Nature Center unique?

Competition Criteria

- Appeals to the same local target audiences
- Outdoor activities
- Animal and/or nature component
- Strong educational message

COMPETITION – LOCAL NATURE CENTERS

30 min Drive Time

- American Commerce Centre Nature Preserve
- Birmingham Nature Center
- Burgess-Shadbush Nature Center
- Carpenter Lake Nature Preserve
- Dinosaur Hill Nature Preserve
- Drayton Plains Nature Center
- Hawk Woods Nature Center
- Heritage Park & Nature Center
- Innovation Hills
- Orchard Lake Preserve
- Red Oaks Nature Center
- Stage Nature Center
- Sterling Heights Nature Center
- Tollgate Farm and Education Center (MSU)
- Whispering Woods Kiwanis Park

60 min Drive Time

- Belle Isle Nature Center
- Detroit River International Wildlife Refuge
- Howell Nature Center
- Indian Springs Environmental Discovery Center
- Kensington Nature Center
- Lake St. Clair Nature Center
- Leslie Nature Center
- Nicholson Nature Center
- Ojibway Nature Center
- Rouge River Greenway Trail
- Seven Ponds Nature Center
- Stony Creek Nature Center
- Tamarack Adventure & Retreat Center

COMPETITION VISITS

The Felis Consulting team and Johnson Nature Center steering committee visited key competitor nature centers in the area.

3 Local Nature Centers Visited

- Heritage Park & Nature Center
- Howell Nature Center
- Stage Nature Center

HERITAGE PARK & NATURE CENTER

Key Takeaways

- Immersive and relevant exhibits in the Visitor's Center
- Interactive kids' play area; splash pad available for summer months
- Curated views of bird exhibit
- Healthy live animal collection
- Robust marketing for current and upcoming programs
- No cost for entry with resident/non-resident program pricing
- Incentivizing attendance with prizes
- Informational signs available for trails

Municipally funded

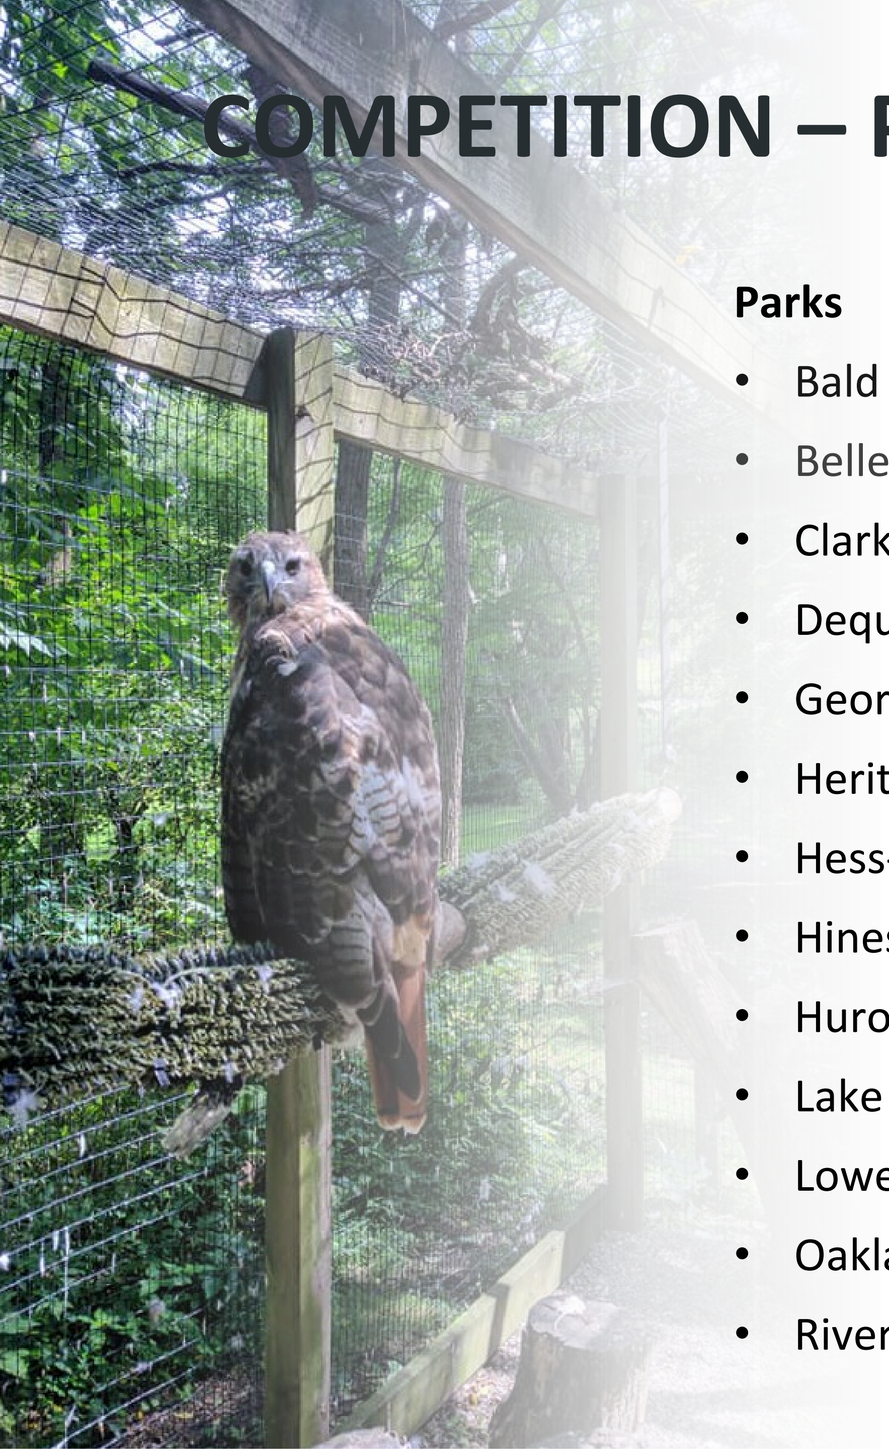
HOWELL NATURE CENTER

Key Takeaways

- More “Native Zoo” than Nature Center
- “Education Light” experiences
- Animal collection showcasing Michigan native animals
- Strong animal advocacy piece in the interpretive signs
- Unique pop-up experience into a groundhog exhibit
- Fun kids’ play area with a fairy garden
- Global Village showcases cultures and native house construction techniques from around the world
- Homegrown feel with little visual cohesion
- Engaging program for Teens (Naturalist Clubs)
- Great community gathering space

501(c)(3) funded

STAGE NATURE CENTER



Key Takeaways

- Strategic planning for new programs and funding opportunities
- Strong partnerships and sponsorships
- Impressive Visitor's Center building with dedicated information desk
- All visitors are directed through Visitor's Center when building is open
- Relaxing and dedicated reading area
- Trails are natural with curbing and benches
- Trail environment is overly managed, resulting in an openness that reduces intimacy and discovery

Hybrid funding model from 3 sources

- **501(c)(3)**
- **Troy Municipality**
- **DNR Grants**

COMPETITION – PARKS, BOTANICAL GARDENS & OTHER

Parks

- Bald Mountain State Parks
- Belle Isle Park
- Clark Park
- Dequindre Cut Greenway
- George George Memorial Park
- Heritage Park
- Hess-Hathaway Park
- Hines Park
- Huron-Clinton Metroparks
- Lake Erie Metropark
- Lower Huron Metropark
- Oakland County Parks
- River Bends Park

Parks Cont.

- Rouge Park
- William G Milliken State Park and Harbor
- West Bloomfield Parks & Recreation

Botanical Gardens

- Anna Scripps Whitcomb Conservatory
- Edsel & Eleanor Ford House
- Cranbrook House & Gardens

Other

- Outdoor Adventure Center

COMPETITION

Who do you consider to be your biggest competitors and why?

- Leslie Nature Center has strong student education programs and is a frequent destination for school field trips.
- Stage Nature Center is a notable competitor due to its proximity to Johnson Nature Center and its volunteering opportunities.
- Belle Isle Nature Center is a popular attraction since visitation is often grouped with the area's other nearby attractions.
- Other notable nature centers across the state include
  - Blandford Nature Center
  - Chippewa Nature Center
  - Kalamazoo Nature Center

BENCHMARKING: KALAMAZOO NATURE CENTER

Kalamazoo Nature Center offers many programs, attractions and events that are similar to those found at the Johnson Nature Center, but there are a few notable differences between both centers.

Location: Kalamazoo, MI

2021 Attendance: 40,089

Ticket Prices

Adults 18+: $6-$7

Ages 4-17: $4

Program fees are in addition to admission prices

BENCHMARKING: KALAMAZOO NATURE CENTER

Trails are noted with length, difficulty level and a description of the environment. This sets visitor expectations and creates opportunities for highlighting unique experiences.

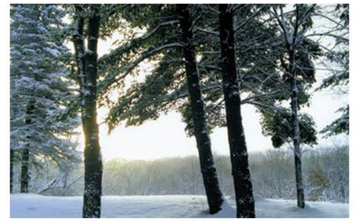
Prairie Pathway Loops

0.7 mile/0.5 mile | Easy

Easy walk through fields to a reconstructed prairie awash with color in summer and fall. Look for bluebirds and swallows at the nest boxes.

Arboretum Loop

0.5 mile loop | Easy



Enjoy accessible pathways with favorites including the Hummingbird-Butterfly Garden, Sculpture Tour, and Nature's Playground.

Fern Valley

0.8 mile | Moderate

Steep descent to a vernal pool. Look for signs of deer and wild turkeys. Huge maples can be found in the sugar grove.

Ridge Run

0.7 mile | Moderate

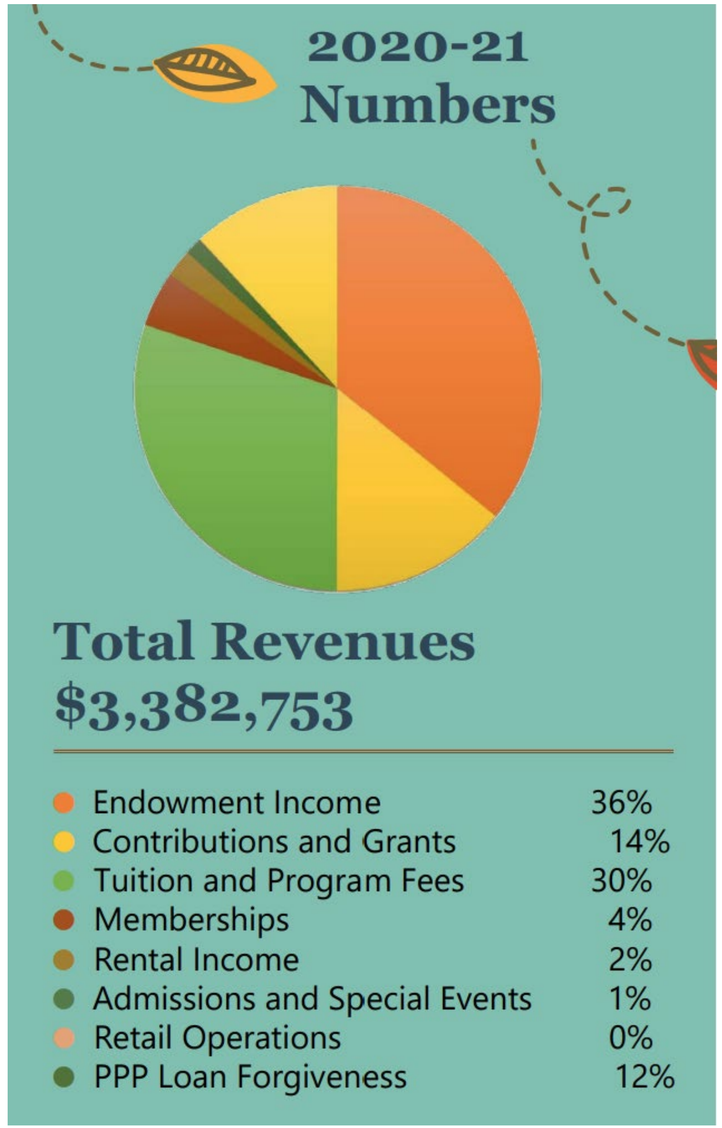
Hike through woodlands, pine plantations, and old meadows. Includes a short, steep climb.

BENCHMARKING: KALAMAZOO NATURE CENTER

Several different membership levels with benefits including discounts to partnering nature centers nationwide.

Each membership includes one year of the following benefits:

- Free admission, including to special events like Maple Sugar Festival
- Bi-monthly newsletter (Nature Center News)
- and KNC's regular eNewsletter
- 10% discount at the Trailhead Gifts & Books gift shop
- One KNC static window decal for each new membership
- Reduced program fees
- Voting privileges at the annual members meeting
- Free admission and/or discounts at over 120 nature centers nationwide.
- Invitations to members-only events including Member's Night and Jingle Mingle
- Free admission in the month of October to participating area organizations through the Southwest Michigan Cultural Membership Exchange.



BENCHMARKING: KALAMAZOO NATURE CENTER

2020-2021 REVENUE

51% of earned revenue came from the following sources.

- Contributions and Grants: $473,600
- Tuition and Program Fees: $1,015,000
- Memberships: $135,300
- Rental Income: $67,660
- Admissions and Special Events: $33,830

Total: $1.725M (51%)

WHAT MAKES US UNIQUE?

Unique Assets with Engaging Experiences

- Only place to experience nature in Bloomfield Hills
- Site has diverse tree species & ecological systems with strong historical roots/stories
- Effective Land Management program curates different experiences along the trails
- Historic log cabin & associated programs
- Healthy Maple Sugaring program & event
- Innovative fundraising events hosted onsite

Successful Educational Programs

- Friendly & welcoming staff focused on educating and engaging visitors
- Strong ties with surrounding K-5 schools
- Successful and integrated science, social studies & teacher professional development programs
- Bird research & banding program

SECTION 2:
WHAT DO PEOPLE THINK OF THE NATURE CENTER?

OUR BRAND

Describe characteristics of the Nature Center

What are attributes we don't want associated with JNC?

JOHNSON NATURE CENTER

IS

- Welcoming
- Safe place
- Authentic
- Unique
- Operated by BHS
- Learning lab
- Conservation
- Experiential
- Living Museum
- Recreation
- Accessible
- Showcase for MI landscapes
- Discovery
- Curiosity
- Photography haven
- Transparent
- Supporting research
- Wildlife corridor
- Rouge River Water Shed
- Part of food system

IS NOT

- Dog park
- Park
- Manicured
- Wild animal rehabilitation facility
- Bike park
- ATV park
- Camp site (today)
- Hunting grounds

PUBLIC ENGAGEMENT

What do other stakeholder groups like/dislike about the Nature Center?

What ideas do community members have for improving JNC?

PUBLIC ENGAGEMENT STRATEGY

Specific groups were targeted for an in-person workshops for deeper levels of engagement

Workshop 1: Key Community Organizations

- Friends of Johnson Nature Center
- BHS PTO Council
- Donors
- JNC Tuesday Group
- Rotary Club
- Community Garden Members
- Optimist Club
- Equestrian Group
- Wild Ones of North Oakland
- MSU Extension
- Oakland Audubon
- Birmingham Bloomfield Chamber
- West Bloomfield Chamber
- Farm Bureau
- Township & Senior Services
- BYA
- Local Libraries

Workshop 2: BHS Student Group

All stakeholder groups were invited to participate in a short survey (administered digitally)

WORKSHOP RESULTS

I LIKE:

- NICE MAINTAINED TRAILS TO WALK
- A "BIODIVERSE" ECOSYSTEM WITH MANY NATIVE SPECIES
- UPDATES ON PLANTS AND ANIMALS OBSERVED
- QUALITY PROGRAMS THAT TEACH AN ENVIRONMENTAL ETHIC

SUGGESTIONS:

- REPLACE ALL OLD BOARDWALKS AND BRIDGES
- CONTINUE A THEME OF STEWARDSHIP, ECOLOGICAL RESTORATION
- HIRE STAFF THAT HAVE A BACKGROUND IN ECOLOGY, RESTORATION, BOTANY
- ADD ACREAGE IF OPPORTUNITIES ARISE
- ADD NATIVE SPECIES WHENEVER POSSIBLE

NEW IDEAS:

Purchase Gill property (3.5 acres)
Private Weir for creek (existing) — gain control

Tree House

Habitat improvement in areas where buckthorn is removed
Limit human development.

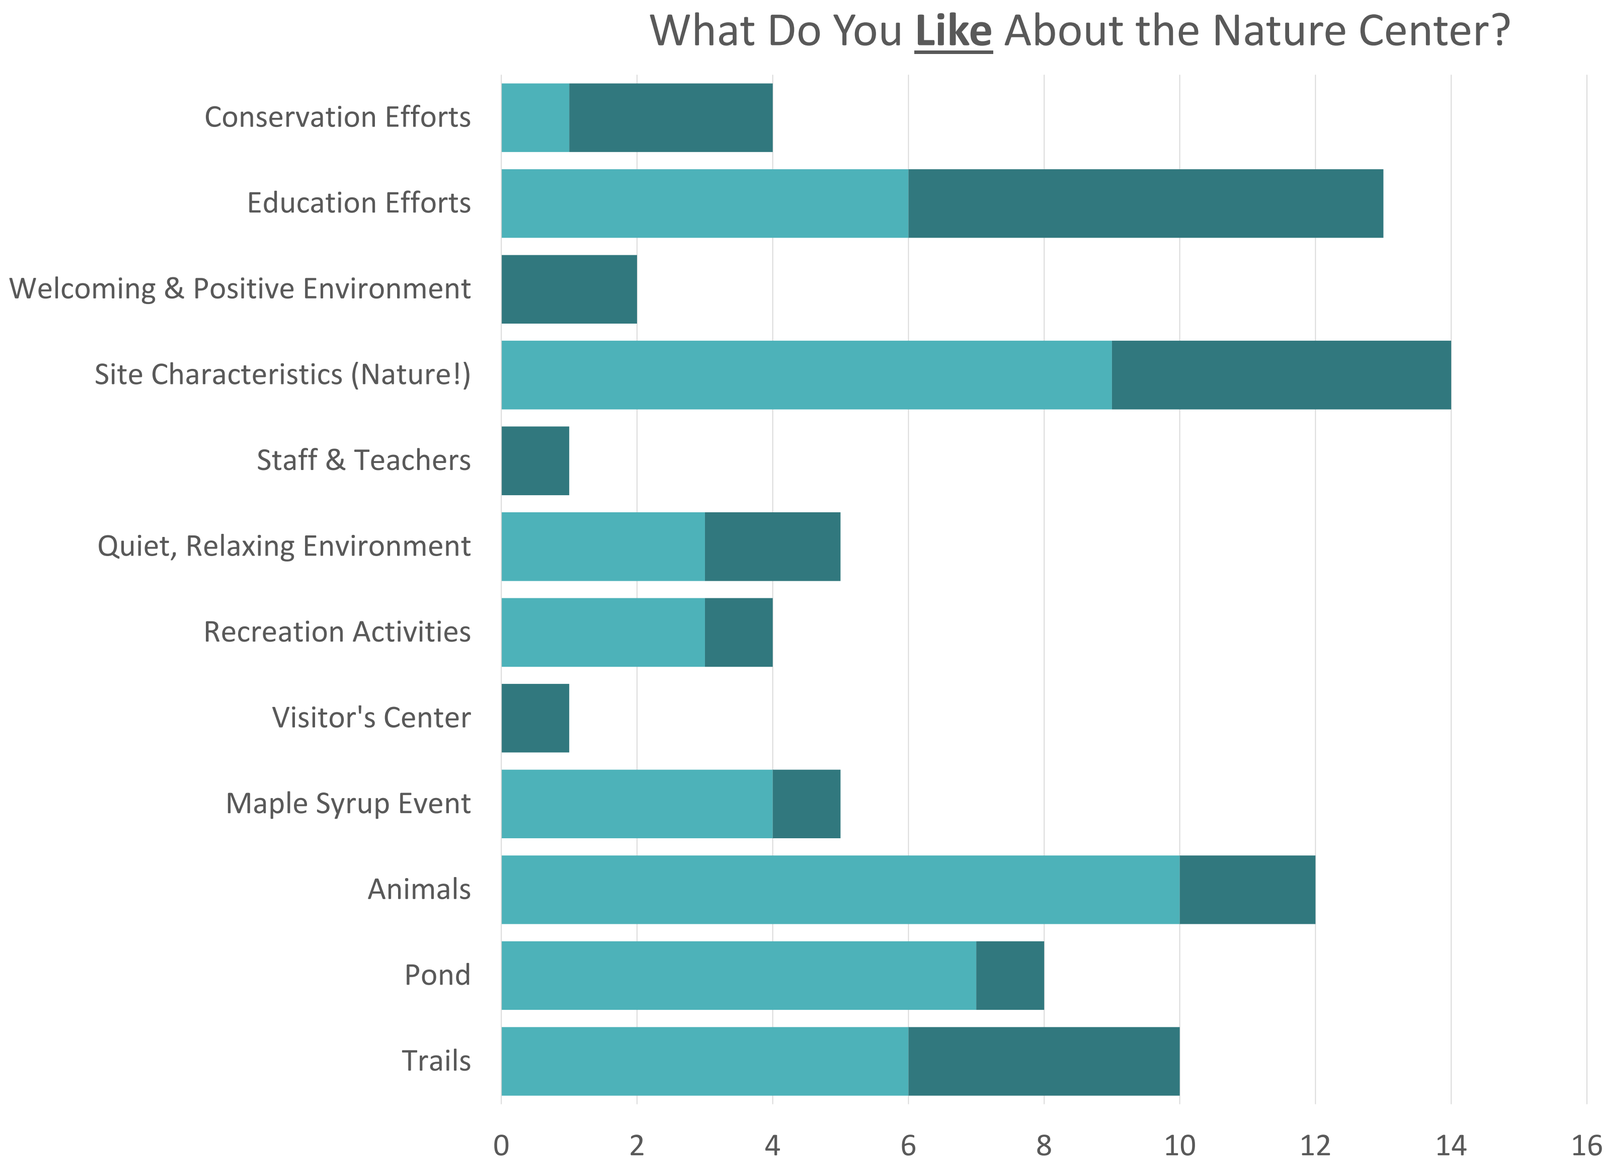
Fire program — next Rx burn — a before and after walk, along w an equipment demo by a burn tech and native American story of how coyote brought fire to people.

Likes

Maple Syrup tapping
Pre-school programs
k-4 field trips
Trails
educational opportunities

Dislikes

Easy to get lost/miss trails
Not widely known
Dogs not allowed
Deer

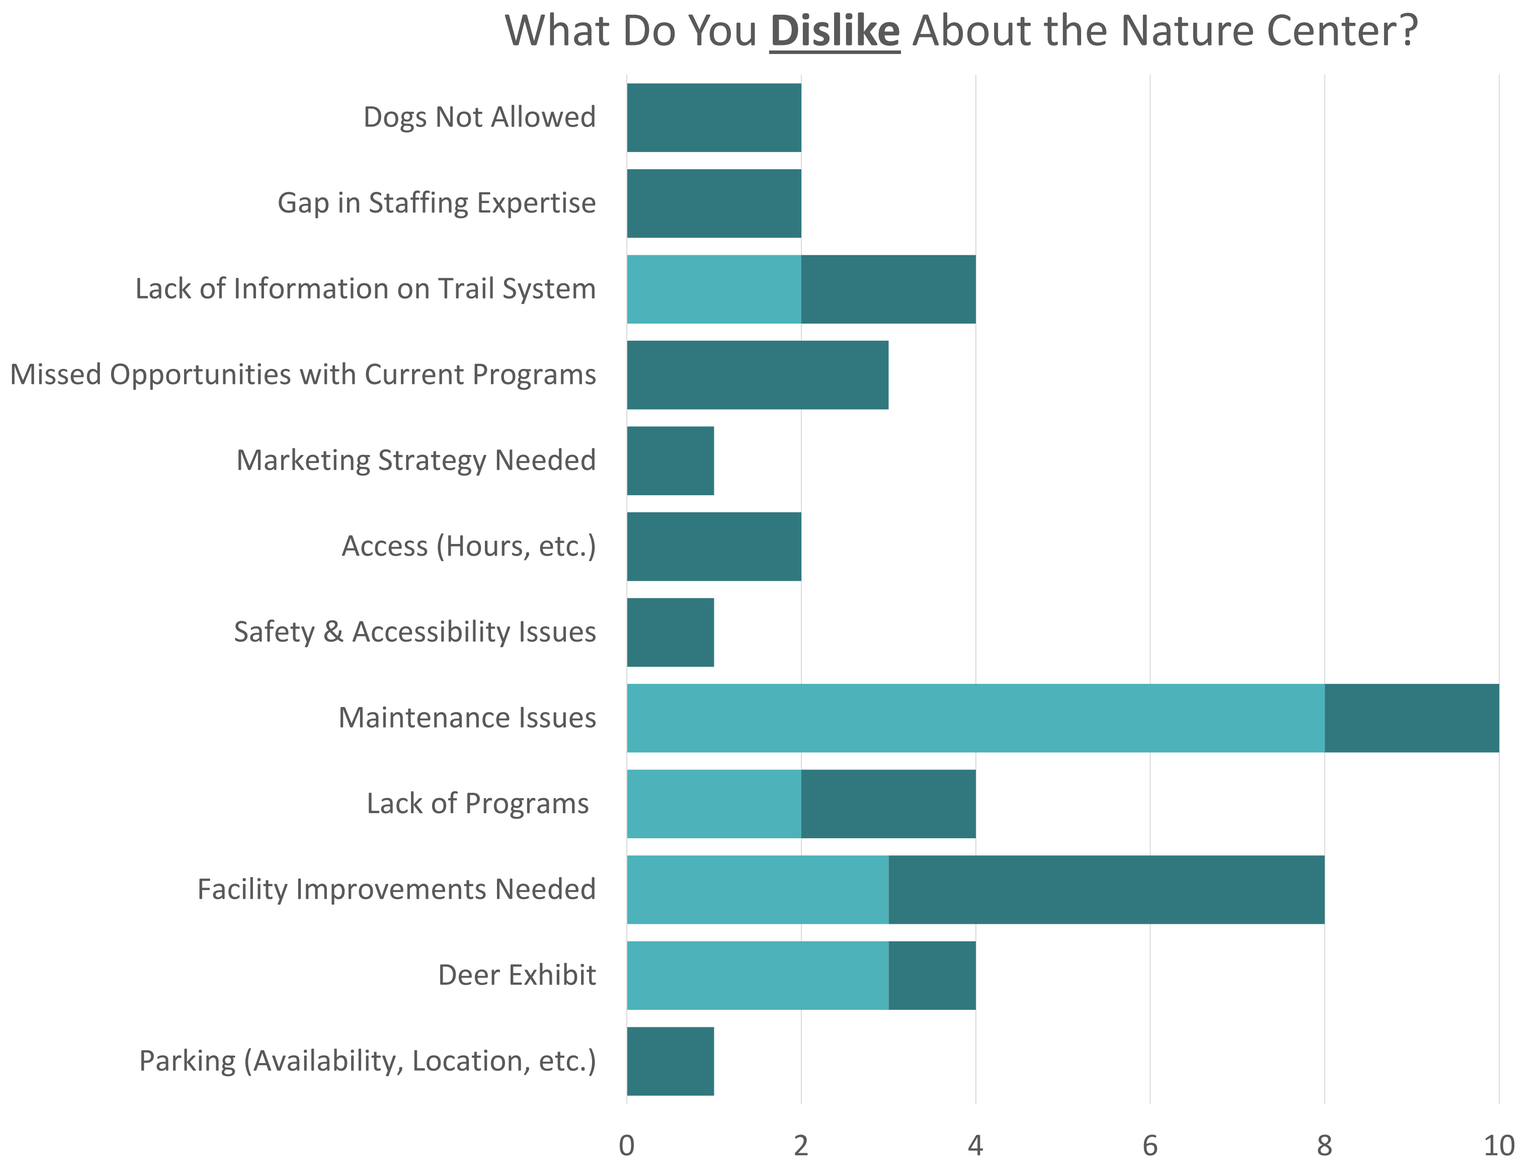


What is Good →

- Nature center displays + meetings space
- All of the invasive removal
- Native plant restoration
- Beautiful landscape in all seasons.
- Bird watching

What to improve —

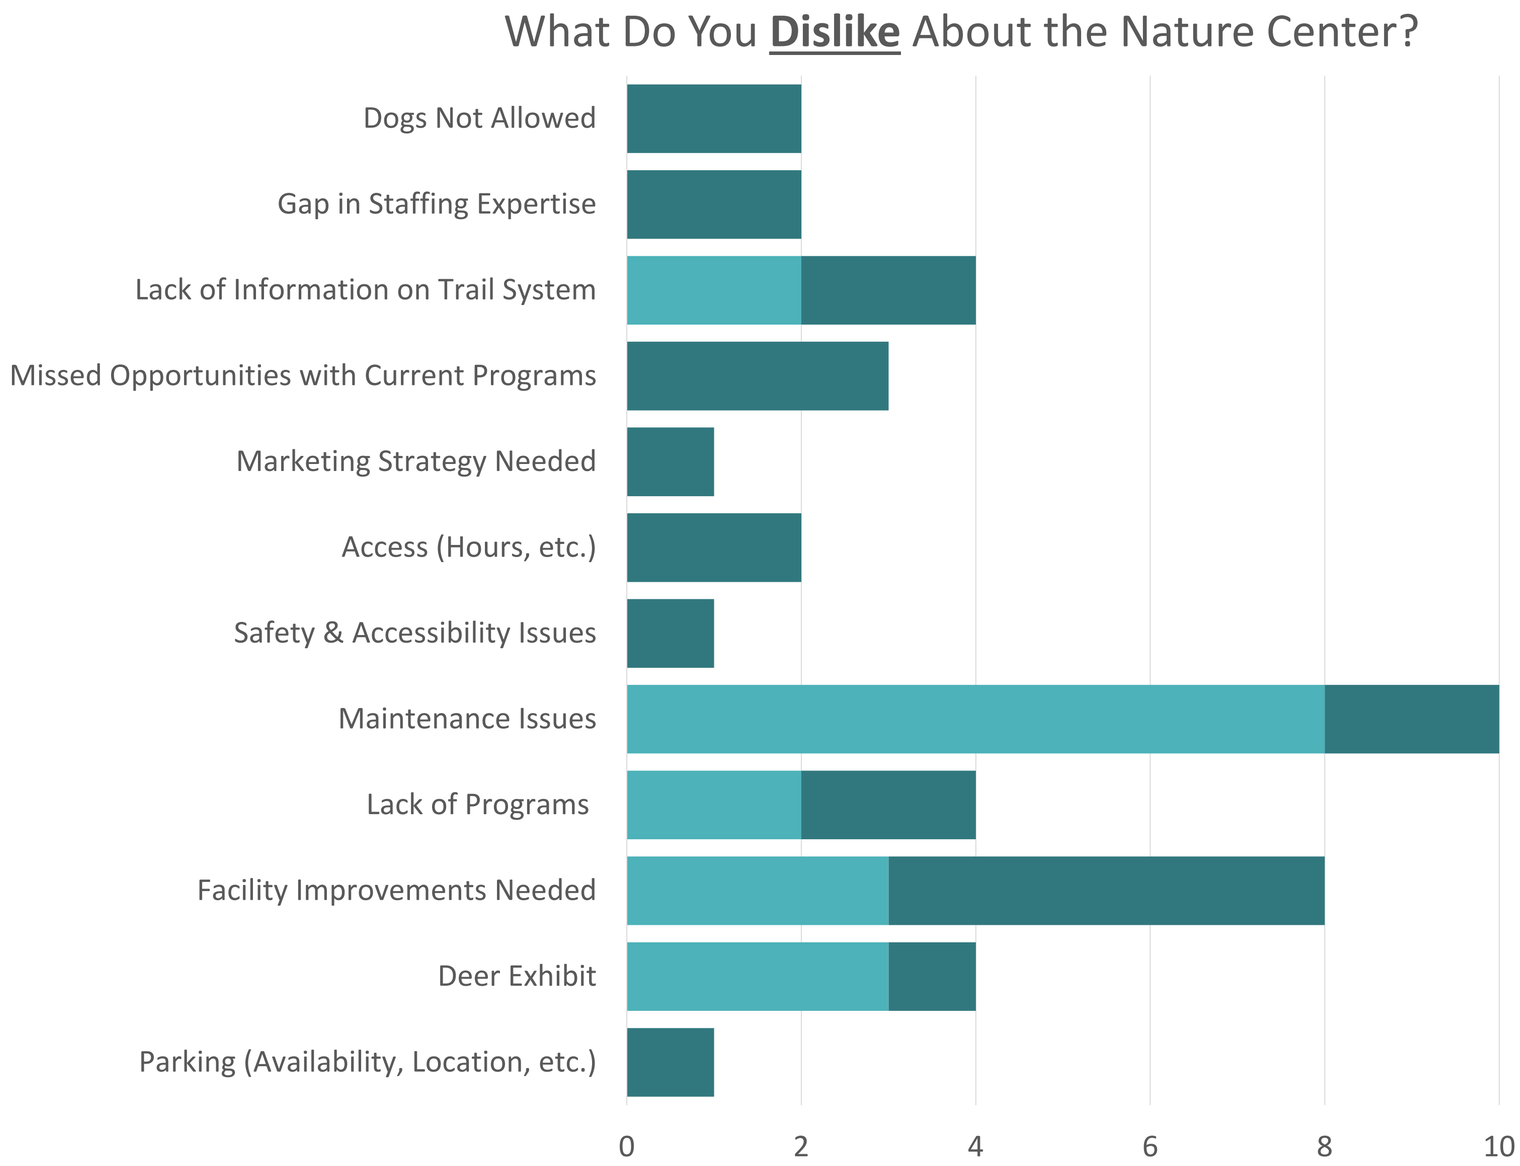
- more invasive removal + native plant restoration.
- landscape around the nature center should be native species.
- enhance the community meeting space - more tech.



WORKSHOP RESULTS

Top Ranking Likes

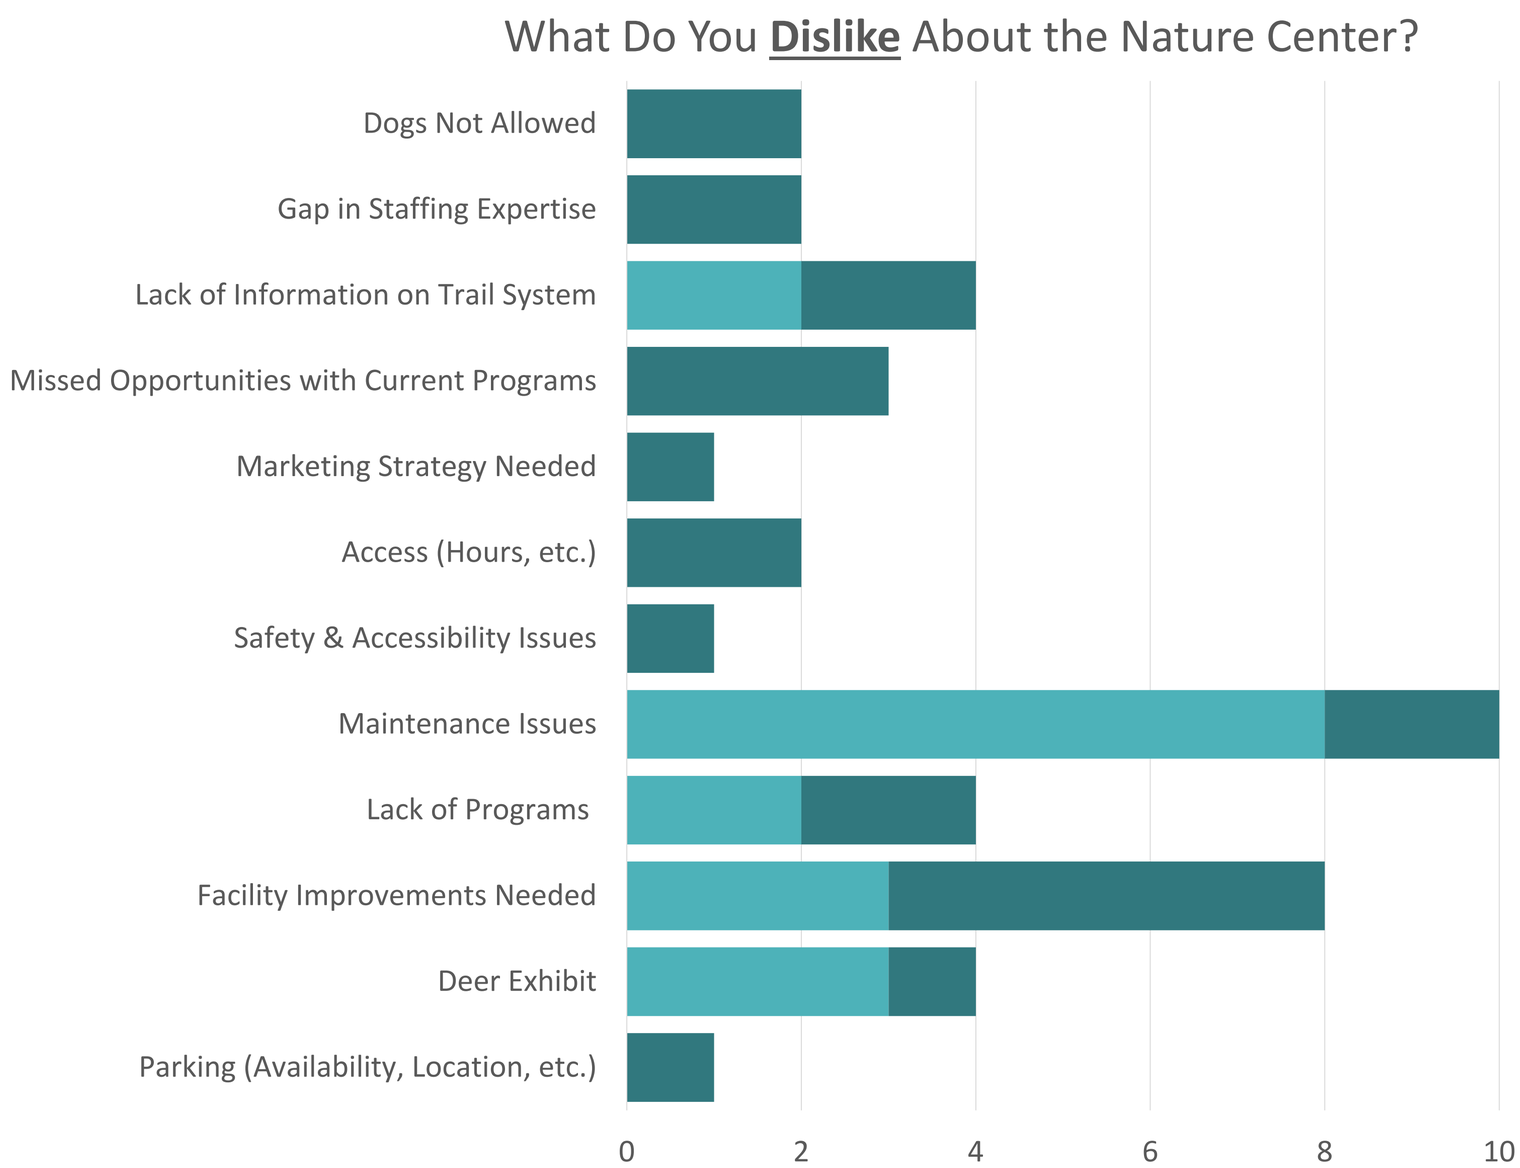
- Site Characteristics (18%)
- Education Efforts (16%)
- Animals (15%)
- Trails (13%)
- Pond (10%)
- Quiet, Relaxing Environment for Discovery (6%)
- Maple Syrup Event (6%)



WORKSHOP RESULTS

Top Ranking Dislikes

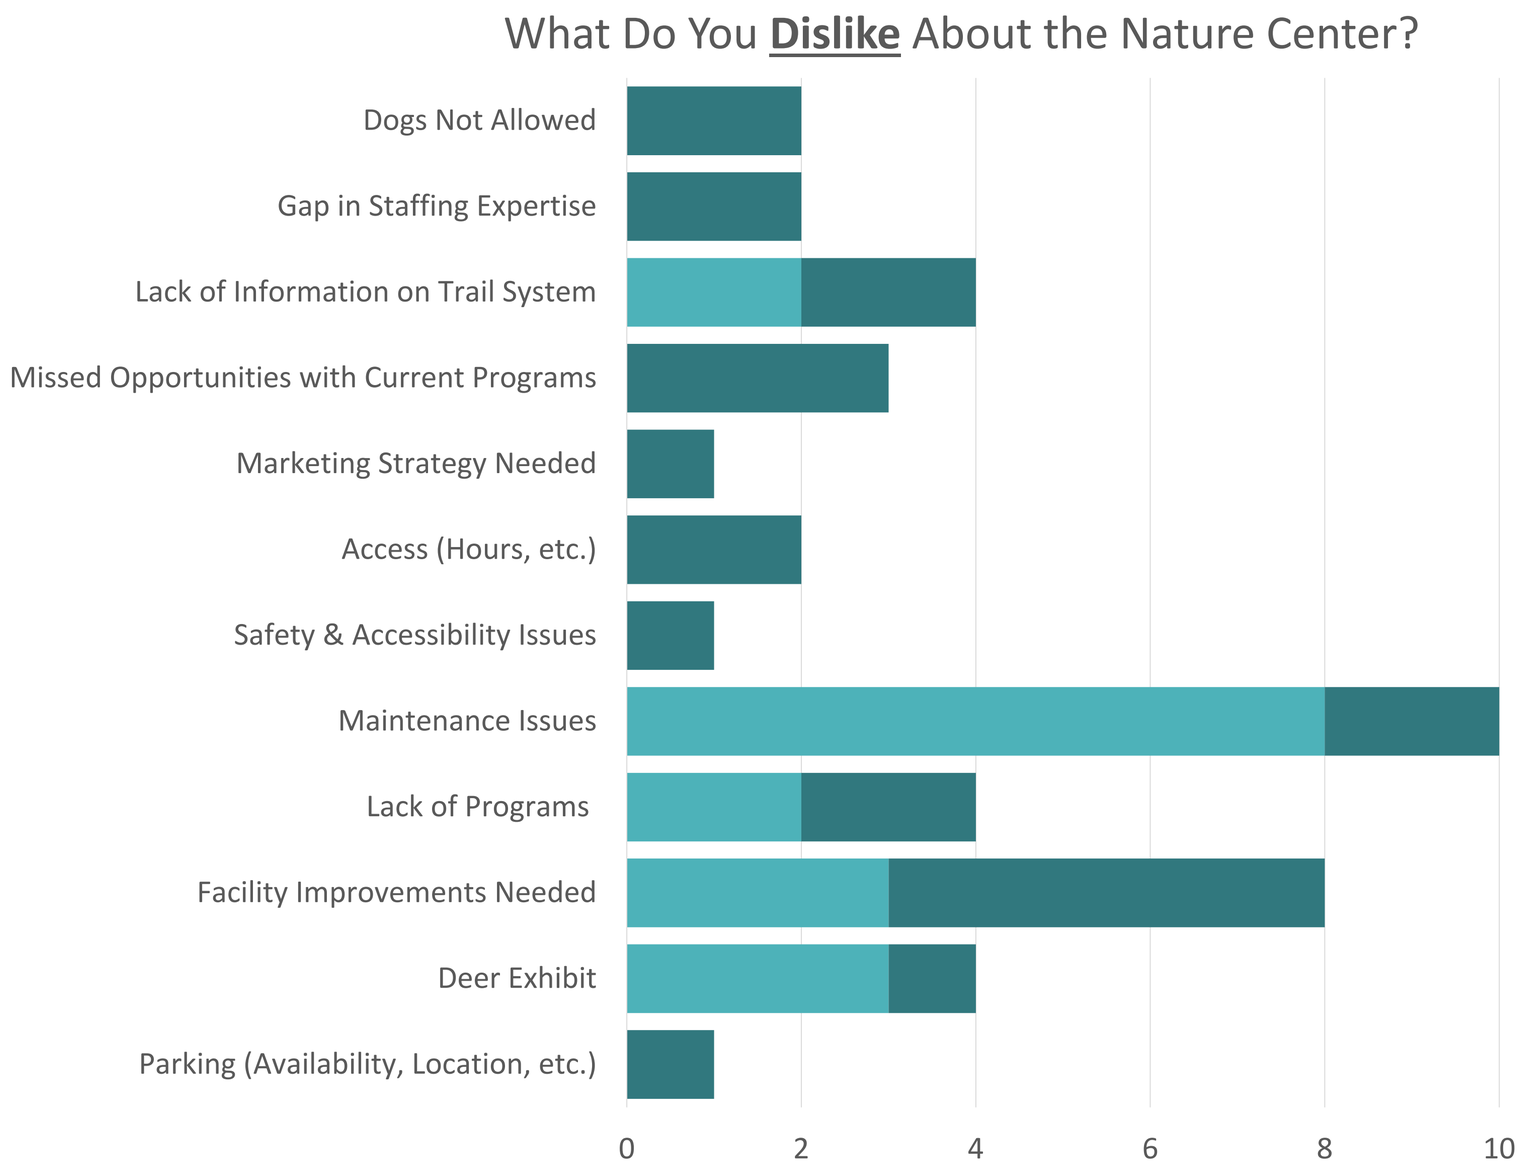
- Maintenance Issues (24%)
- Facility Improvements Needed (19%)
- Deer Exhibit (10%)
- Lack of Programs (Education & Community Outreach) (10%)
- Lack of Information on Trail System (10%)
- Missed Opportunities with Current Programs (7%)



WORKSHOP RESULTS

General Notes

- Maintenance issues noted
  - Deck repairs
  - Pond clean-up
- Facility Improvements noted
  - Added acreage
  - New weir for creek water flow
  - Updated Visitors Center
  - Technology for the community meeting space
  - PREP house
  - Classrooms are disconnected



WORKSHOP RESULTS

General Notes

- Missed opportunities with current programs specifically highlighted the following
  - Invasive removals (habitat improvement needed instead of leaving areas bare)
  - Bird banding
  - Controlled burns (educational opportunity)

WORKSHOP RESULTS

General Notes

- Noted gaps in staffing expertise included the following
  - Wildlife Management
  - Ecology
  - Restoration
  - Botany

WORKSHOP RESULTS

Key Takeaways

- Community members recognize and value the role that the Nature Center plays in educating students and connecting students and residents with nature
  - Many noted that this is the only place in the Bloomfield Hills area where residents can experience and enjoy nature
  - Several mentioned (in written and verbal comments) that despite what community leaders think, private country clubs are not a replacement for local nature centers

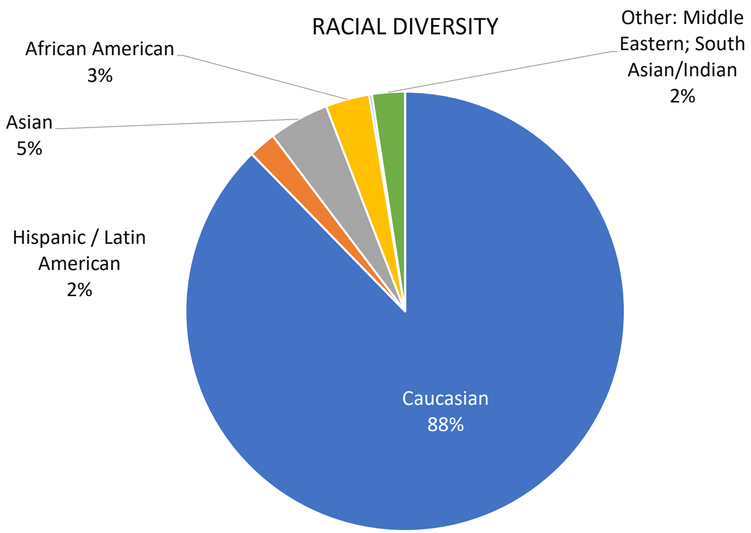
- Some are concerned about the site losing it's intimate and natural qualities as attendance numbers increase and facilities are expanded to accommodate more visitors

WORKSHOP RESULTS

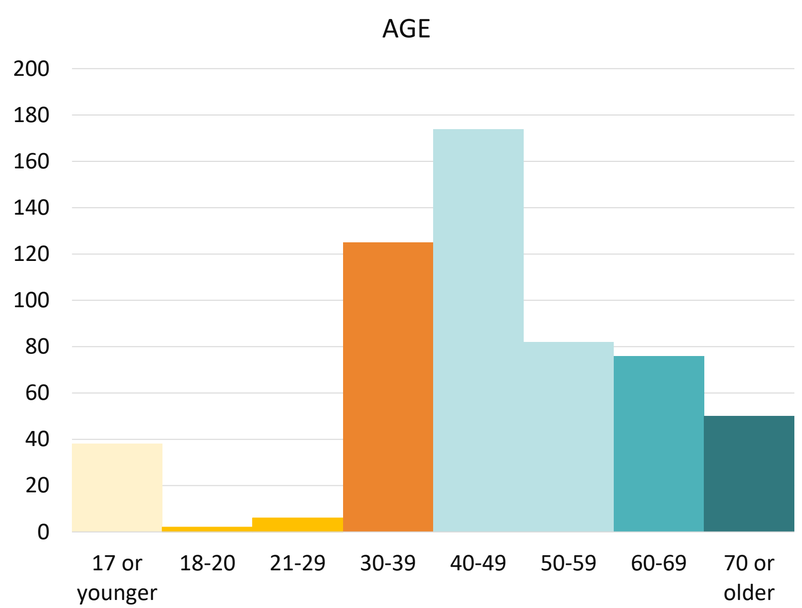
BIG Ideas for Improving JNC

- Add acreage if opportunities arise (Gill property targeted - 3.5 acres adjacent)
- Tree house educational play structures
- Gain control over the creek water flow
- Become a hub for local green clubs
- More community outreach programs
- More connections with other conservational groups
- Add native species wherever possible
- Habitat improvement in areas where invasives are removed
- Hire staff that have a background in ecology, restoration and/or botany
- Hire an expert Wild Land Manager
- Limit human development
- Controlled Burn program improvements
  - Have a Burn Technician demonstrate the equipment used and explain the purpose of the burn
  - Walk with Native American interpreter to tell the story of coyotes, fire & people

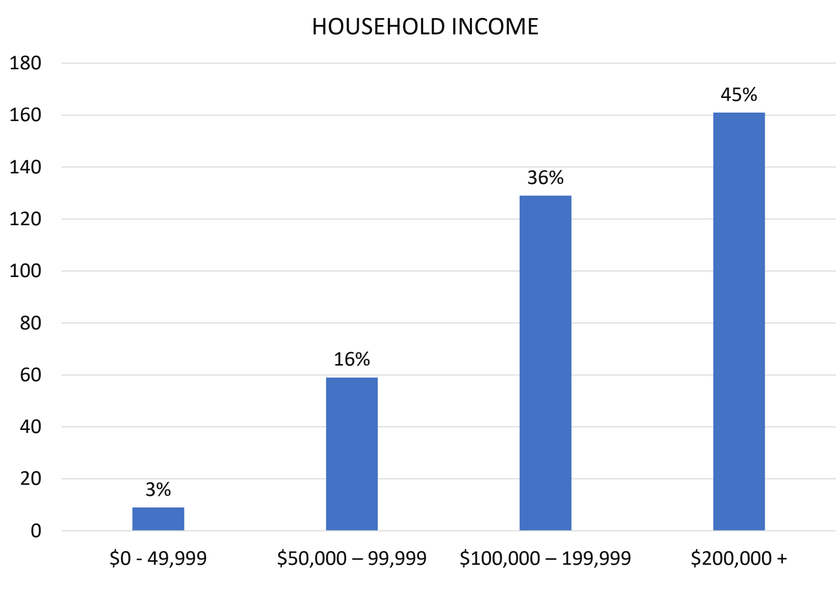
DIGITAL SURVEY RESULTS



Key Takeaways



- The target audience for the Nature Center is within 15 minutes drive. Even so, the Nature Center is not as widely known as the Farm.
- Non-visitors have a perception that the Nature Center is primarily for BHS students and do not know what there is to do if they were to visit. Their perception of the Nature Center is that it is no different than any other nature center in the area in terms of experience.
- Visitors are strongly engaged with the Nature Center as being a place of quiet and connection with nature and have an understanding that the Nature Center serves both as a place of education and as a place for recreation.
- Although many visitors primarily use the Nature Center for walking, and state that increased visitation to the Center is part of their plan to increase exercise and improve mental health, most do not associate the Center with Health and Wellness.
- The Nature Center is currently underserving the non-Caucasian market, and that segment's lower overall awareness and perceptions of the Nature Center reflect this.
- Unlike Bowers School Farm, many respondents asked to "not change anything" about the Nature Center. A few responses explained further that the nature center is for enjoyment of nature and stated a desire to keep the attendance small so as not to overrun the limited site. These respondents recognize and appreciate the natural space and park access that isn't readily available in the immediate area.
- 20% of Bowers School Farm visitors have not visited Johnson Nature Center, and 10% are not even aware that it exists.



AUDIENCE SEGMENTS

- UNAWARE NON-VISITORS

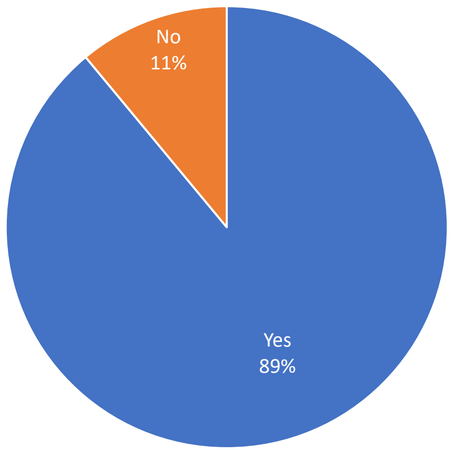
- UNDER 21

DIGITAL SURVEY RESULTS

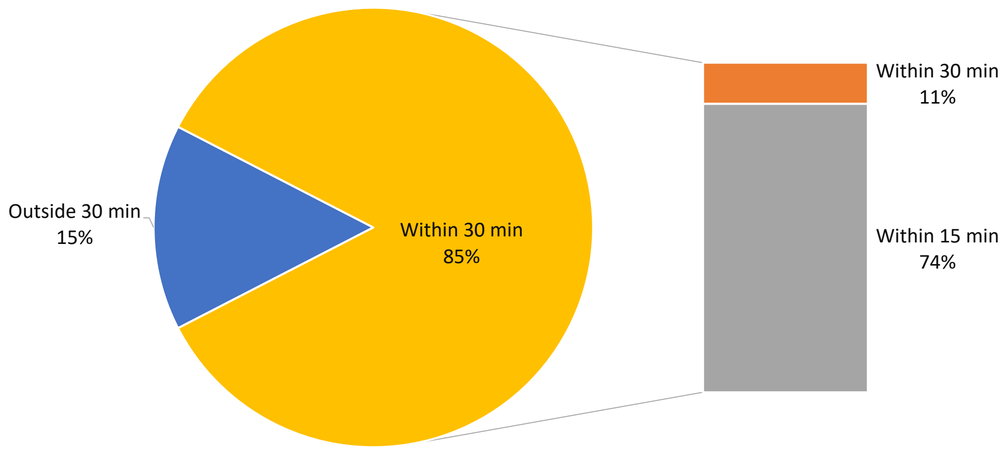
553 TOTAL RESPONSES

Ave. HH Size: **3.4**
College Degree: **89%**
Adults Without Kids At Home: **30%**
93% are previous Farm Visitors
76% are previous Nature Center Visitors



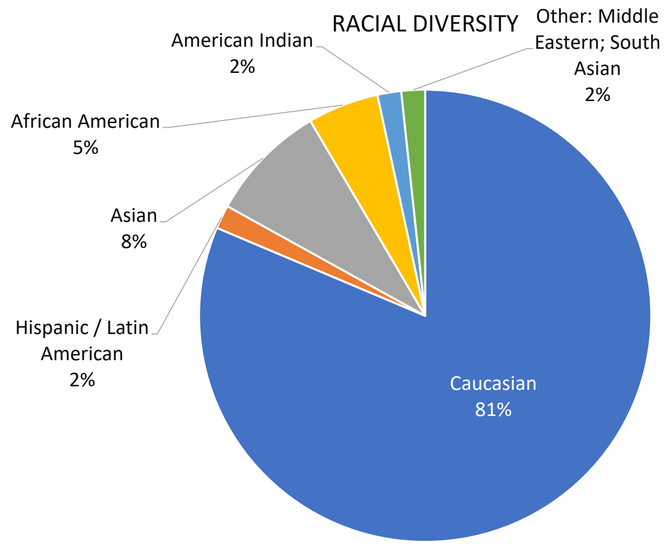
BSF & JNC Visitor Profiles look the same!

KEY POINTS:

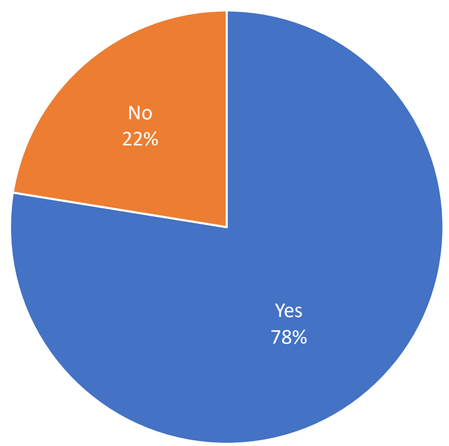


- Low responses from Non-Visitor segment
- Heavily Caucasian
- Black / African American underrepresented compared to population at 15, 30, and 120 min segments
- Underrepresented Gen Z segment and overrepresented Gen X segment compared to drive time populations
- Respondents' wealth is greater than drive time segment populations; Underrepresented low-income demo

UNAWARE NON-VISITORS



WERE YOU AWARE OF JNC BEFORE THE SURVEY?

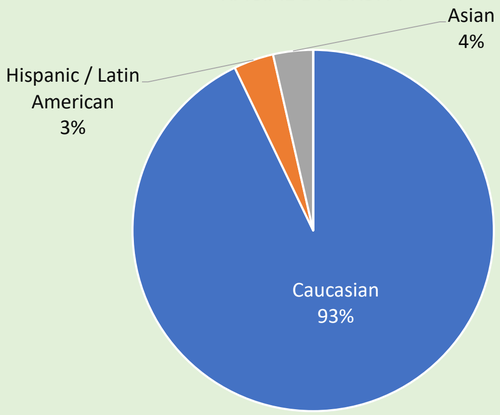


DRIVE TIME FOR THOSE UNAWARE

RACIAL DIVERSITY

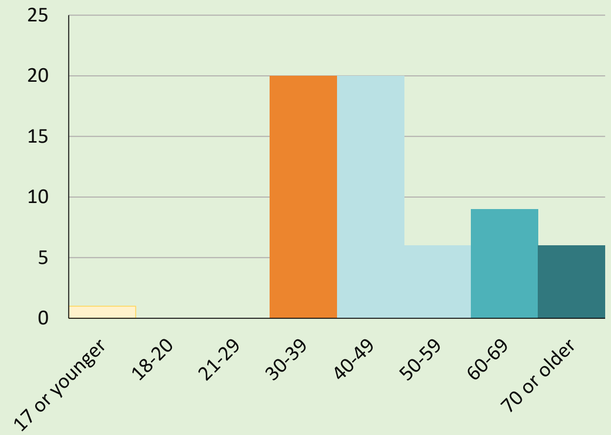
ALL NON-CAUCASIAN AWARENESS OF JNC

66 TOTAL RESPONSES



Ave. HH Size: **3.2**
College Degree: **80%**
Adults Without Kids At Home: 39%

KEY POINTS:



- 11% of all respondents
- Of those, the majority live within 15 min
- Higher racial diversity within the ‘unaware of JNC’ segment than overall survey profile AND proportionately, non-Caucasians are less aware of JNC
- Higher proportion of $100,000 - $199,999 household incomes than survey profile
- Lower proportion of respondents in the 40-49 age group than survey profile

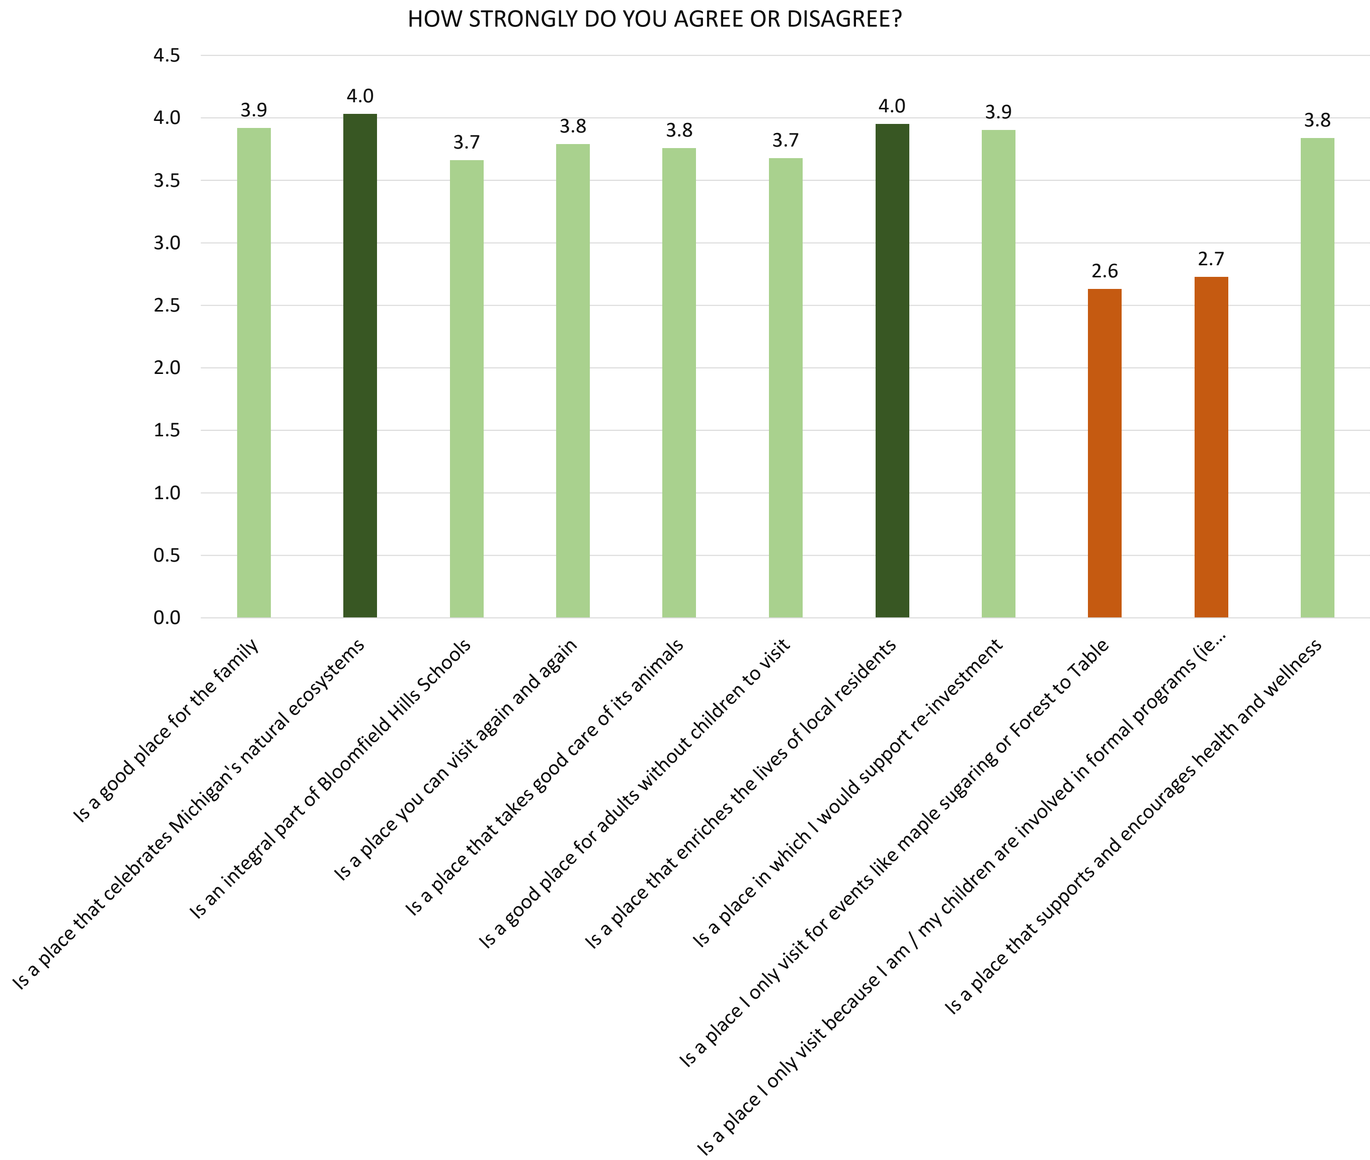
FREQUENTLY VISITED ATTRACTIONS

62 TOTAL RESPONSES

Ave. HH Size: **3.1**
College Degree: **94%**
Adults Without Kids At Home: **32%**

<u>Vast majority from within 15 min</u>



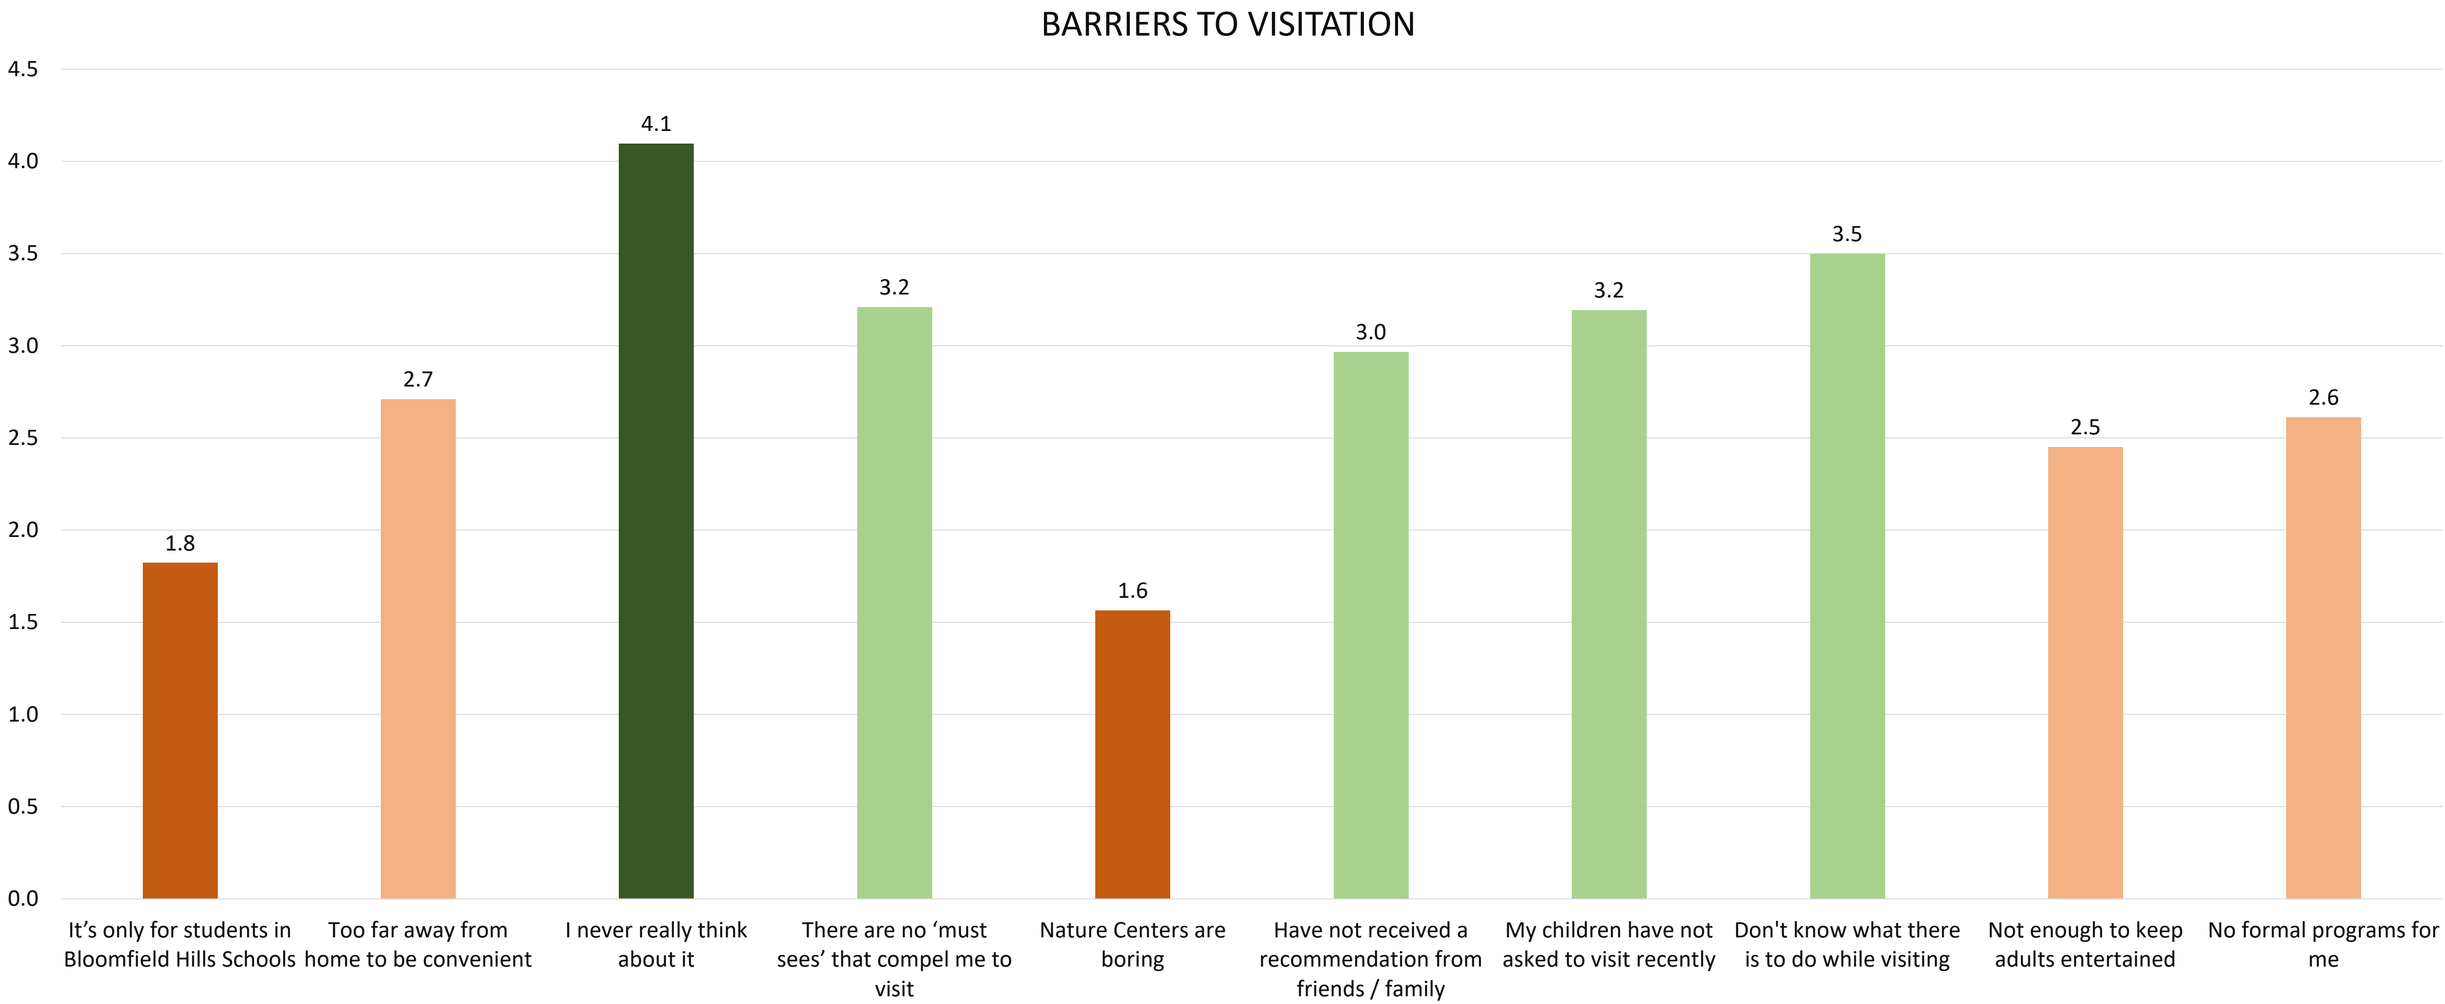
Non-Visitors follow the overall survey profile with less racial diversity

AWARE NON-VISITOR PERCEPTIONS

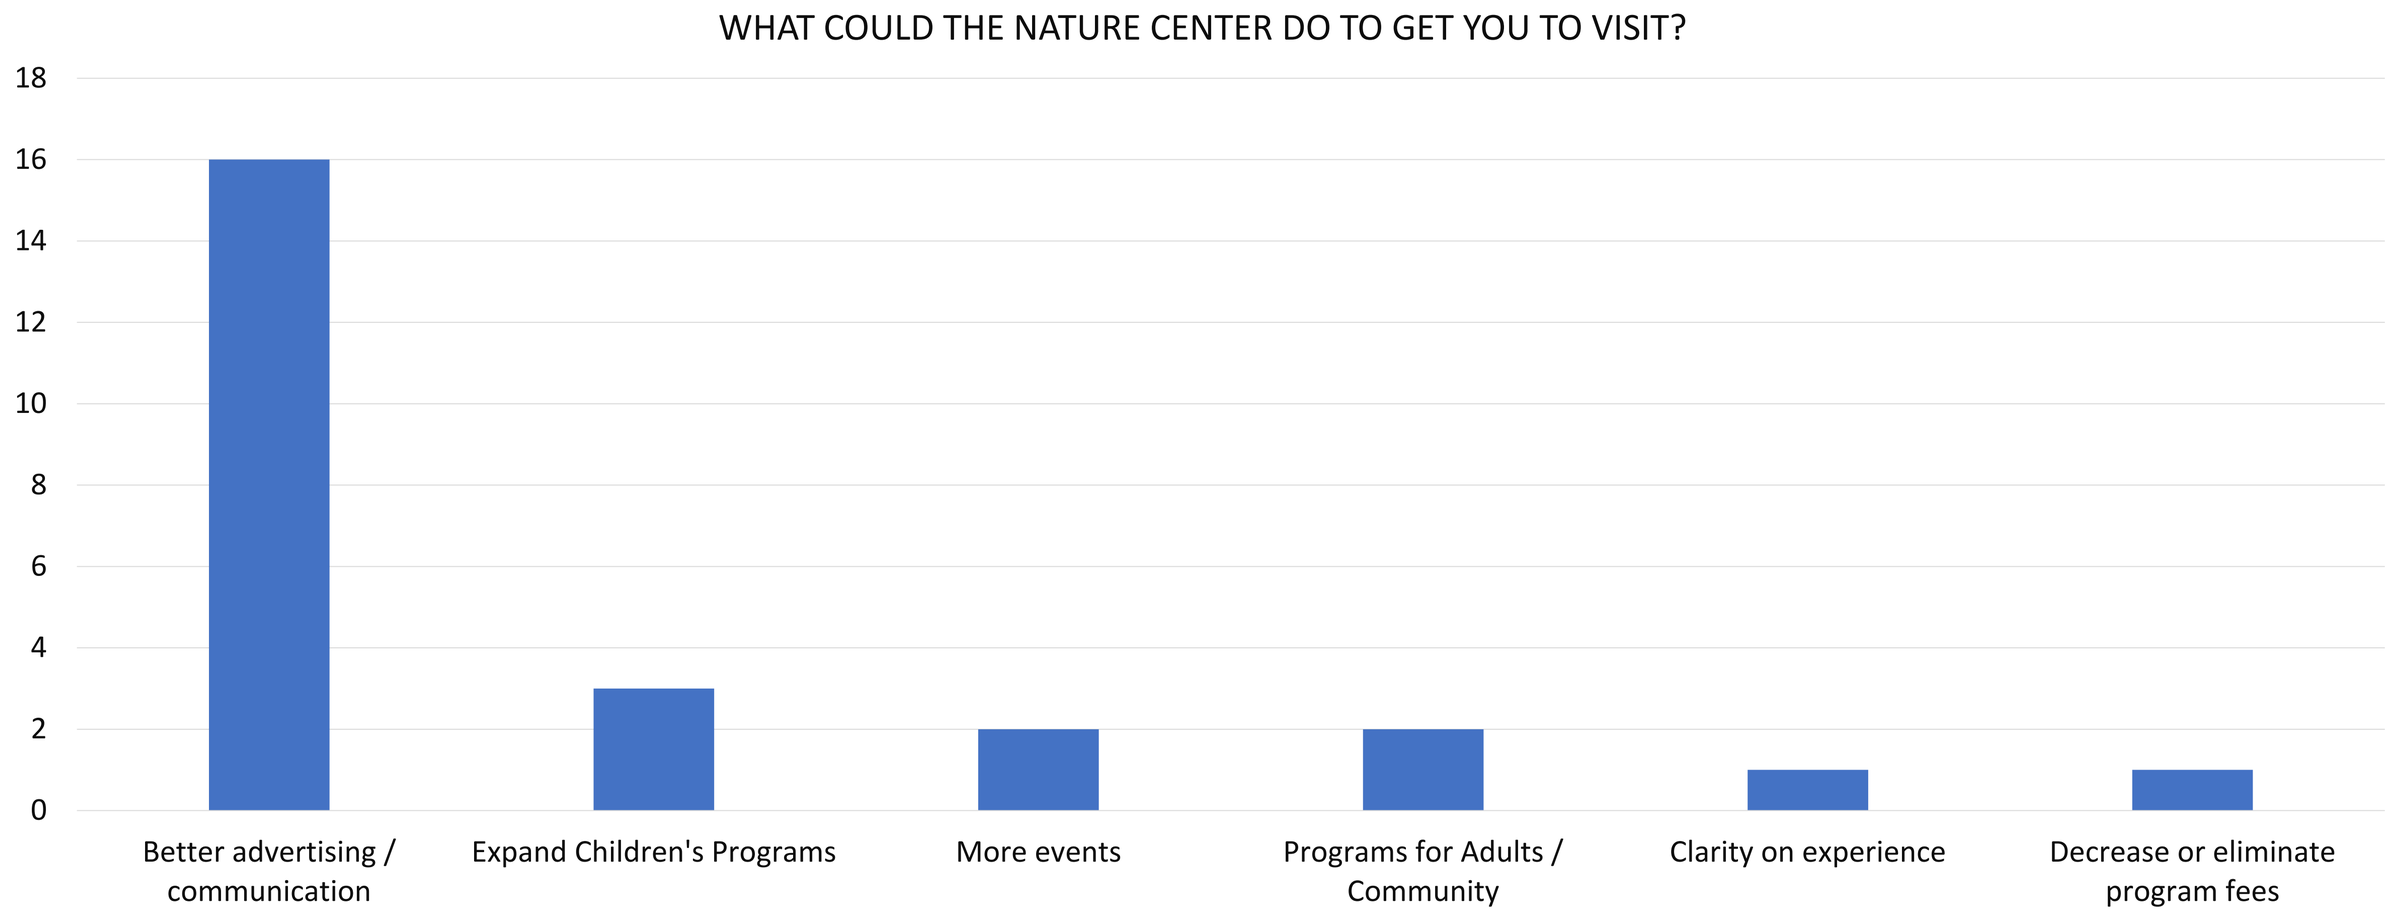
RANK YOUR BELIEF OF JNC PURPOSE:	
1	Improving student academic outcomes
2	Teaching about MI's ecosystems & cons.
3	Teaching about responsible use of natural resources
4	Recreation / Leisure
5	Community gathering space
6	Tourism

Non-Visitor perceptions are generally positive with very little variation across all statements—indicating no strong affiliations or perceptions of the Nature Center.

Reflects belief that Nature Center is primarily for education--and that they have very little knowledge of JNC.

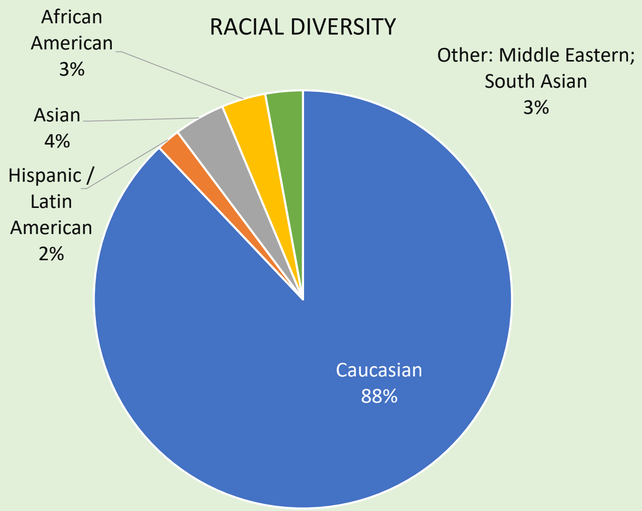


AWARE NON-VISITOR PERCEPTIONS

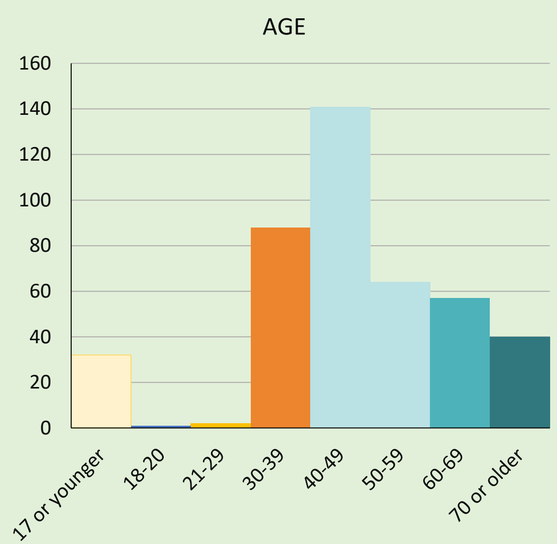


Non-Visitor perceptions of JNC describe a typical expectation for a nature center.

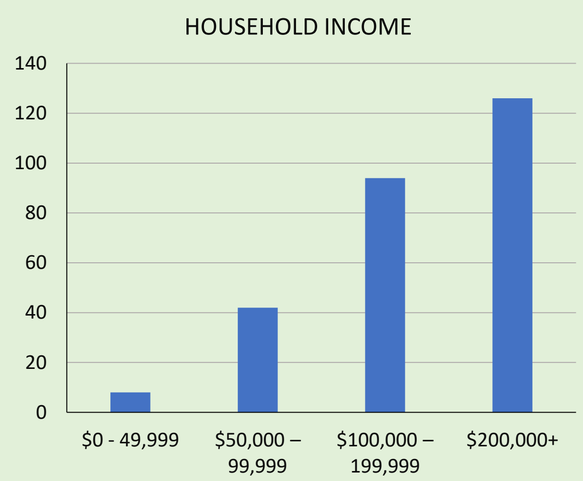
AWARE NON-VISITOR PERCEPTIONS



“I never really think about it” is top with **“Don’t know what there is to do.”**
“No Must Sees,” “My Children Haven’t Asked,” and “Have Not Received a Recommendation” are moderate barriers. Non-Visitors appear to know that JNC is not for **BHS students only** and do have an **interest in nature centers** in general.

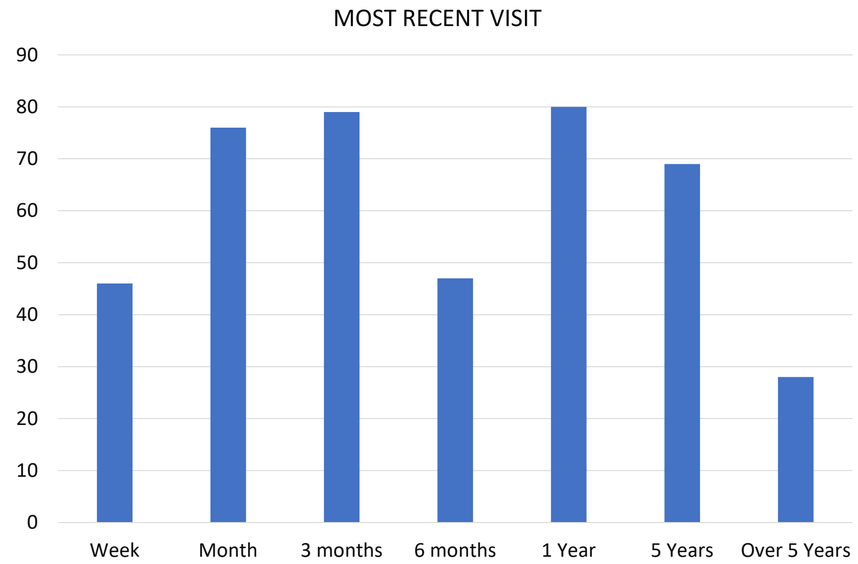


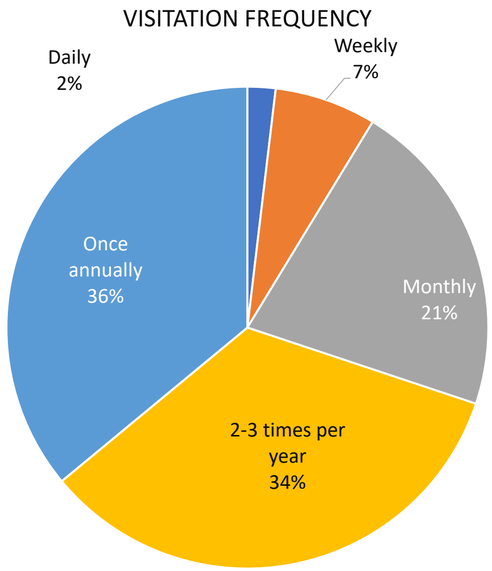
AWARE NON-VISITOR PERCEPTIONS



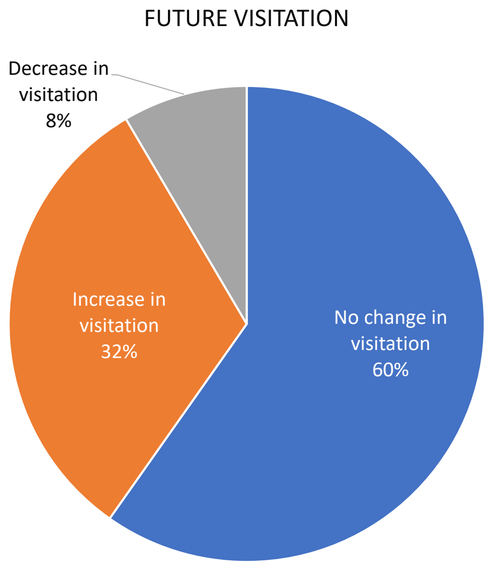
Suggestions for **better advertising** align with “I never really think of it” as a barrier.
However, unprompted suggestions of changes include **expanding programs, adding events, and discounting program / event fees**.

VISITORS

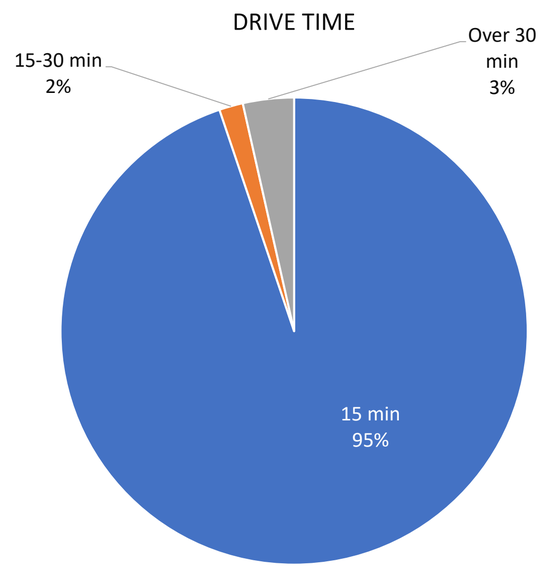




425 TOTAL RESPONSES

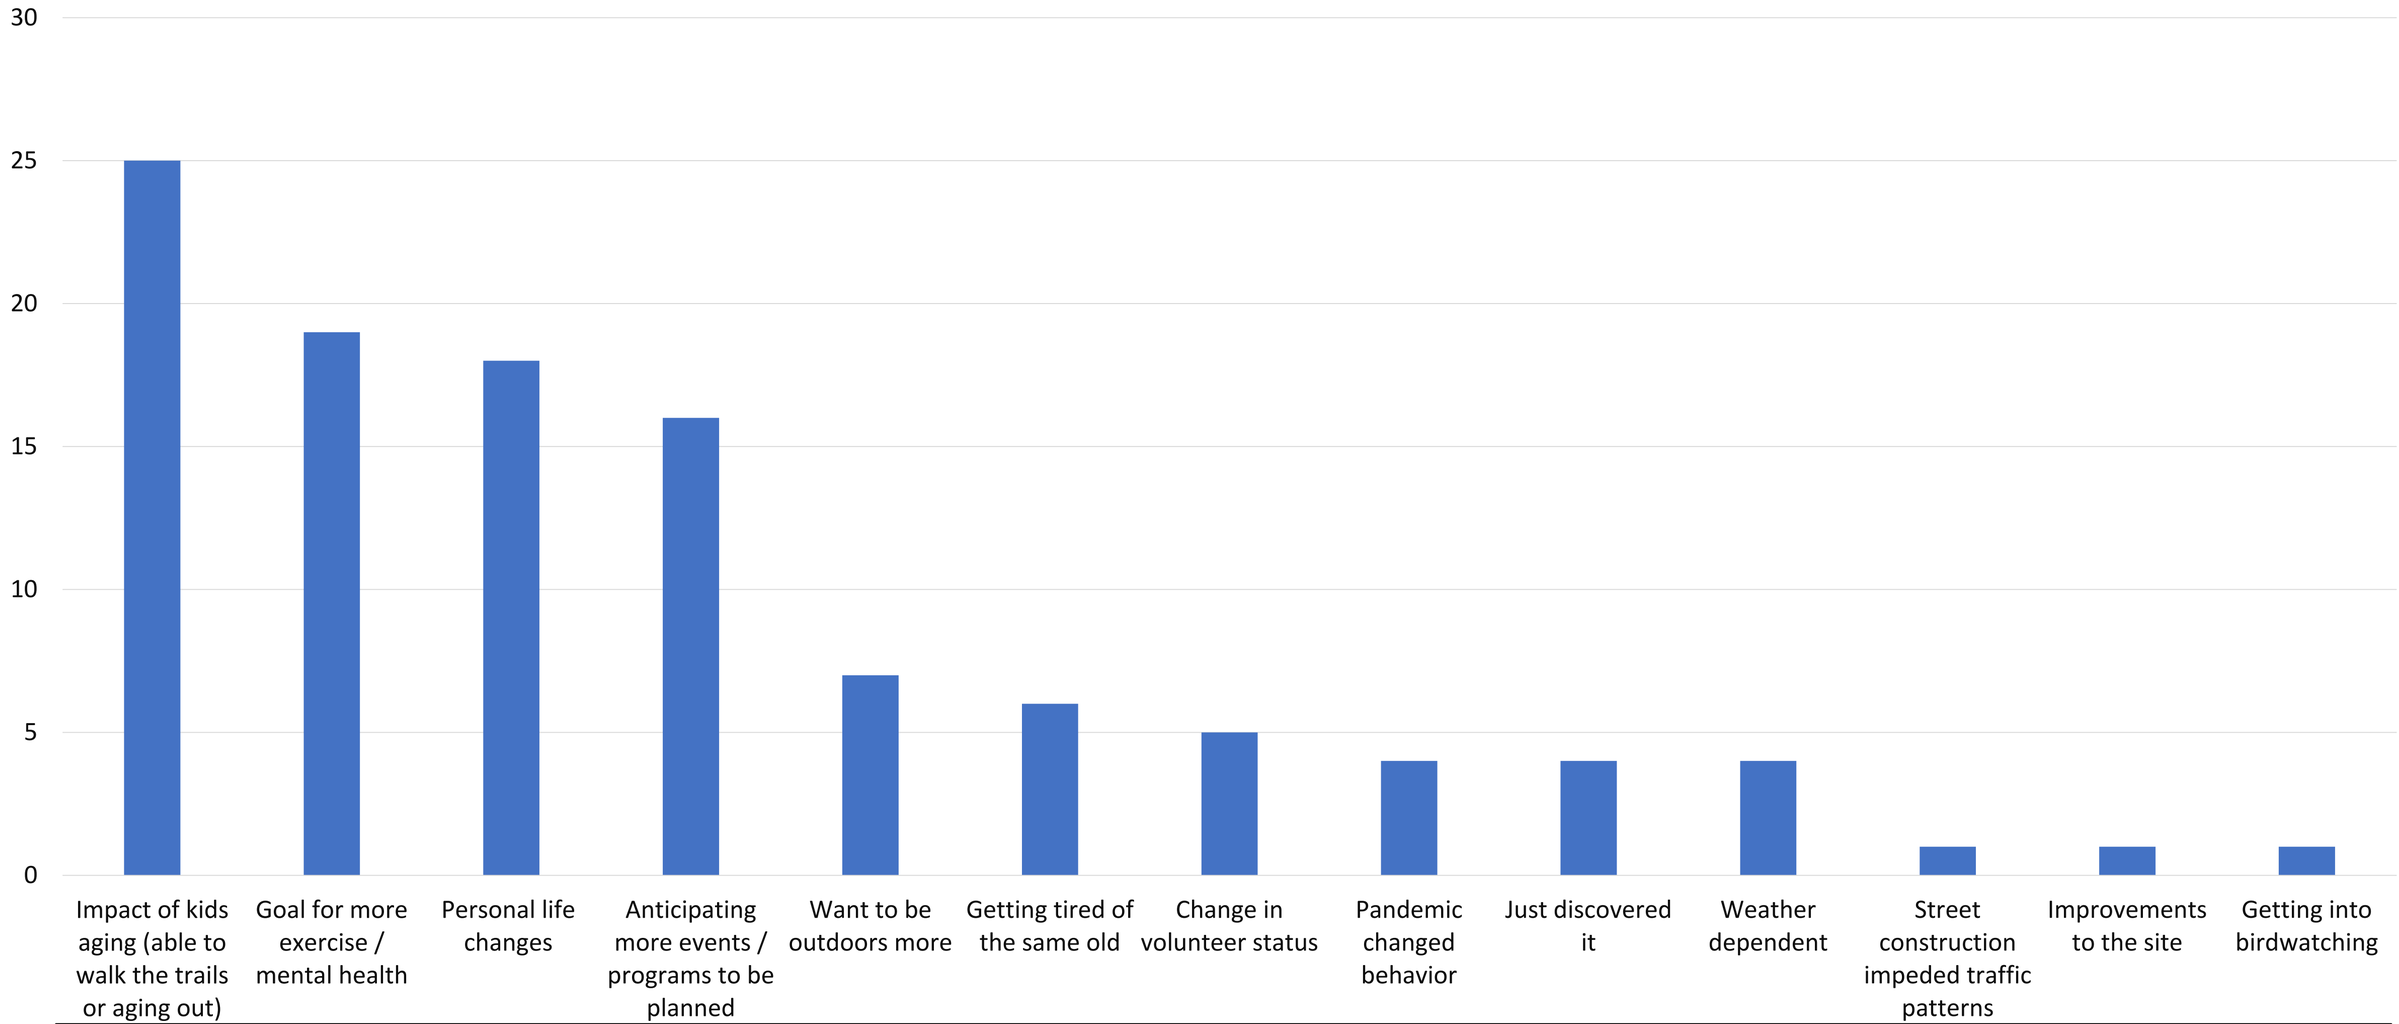


Ave. HH Size: **3.5**
College Degree: **90%**
Adults Without Kids At Home: **30%**



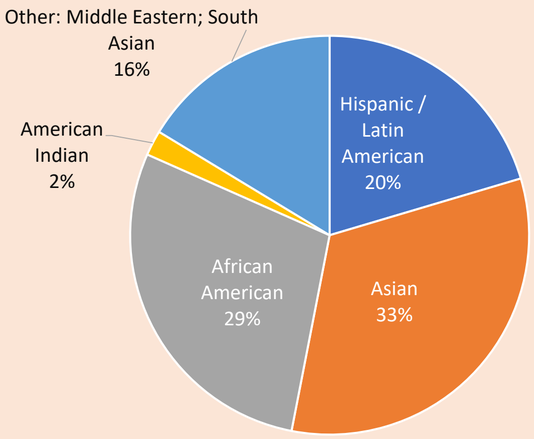
Respondents live within 15 min, have equally visited recently and not, and ~1/3 visit monthly+ and anticipate increased visitation.

The visitor profile is similar to overall survey.

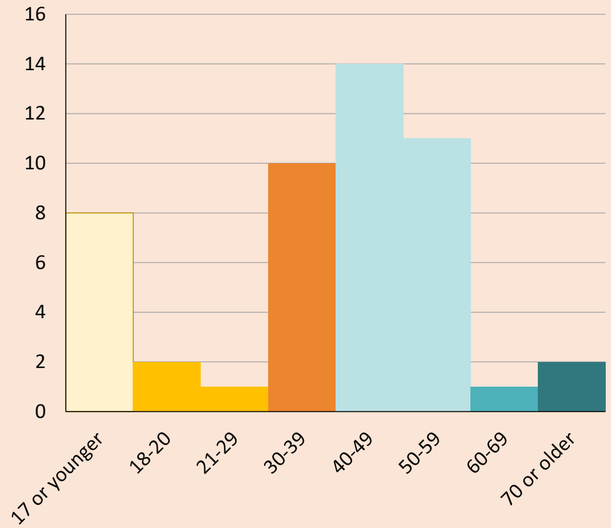


VISITORS

REASON FOR CHANGE IN VISITATION

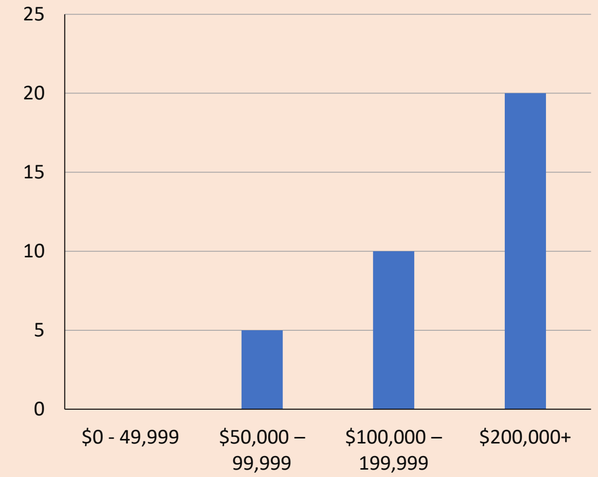


Biggest reason for any change to visitation (increase or decrease) related to **children's age**—old enough to walk now; more / less interested in nature; more field trips; graduating / not at home. Secondarily, new goals for **wellness** are increasing people's desire to visit. **Personal life changes** allow more or less time, and visitors anticipate more events and programs to be added.



69

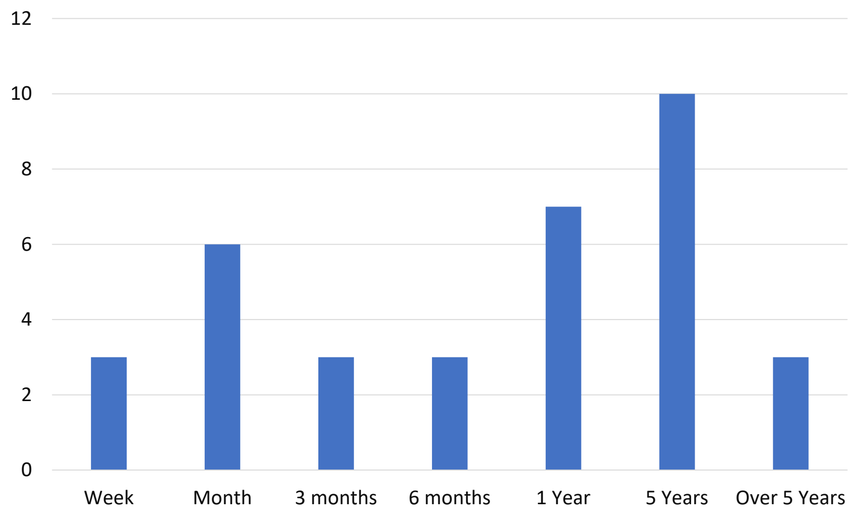
NON-CAUCASIAN VISITORS



RACIAL DIVERSITY

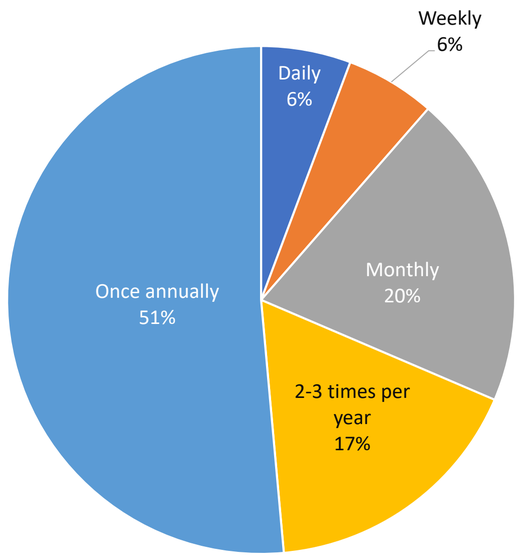
AGE

HOUSEHOLD INCOME



38 TOTAL RESPONSES

Ave. HH Size: **3.8**
College Degree: **76%**
Adults Without Kids At Home: **18%**
Age skews younger with fairly equal distribution across ethnicities.



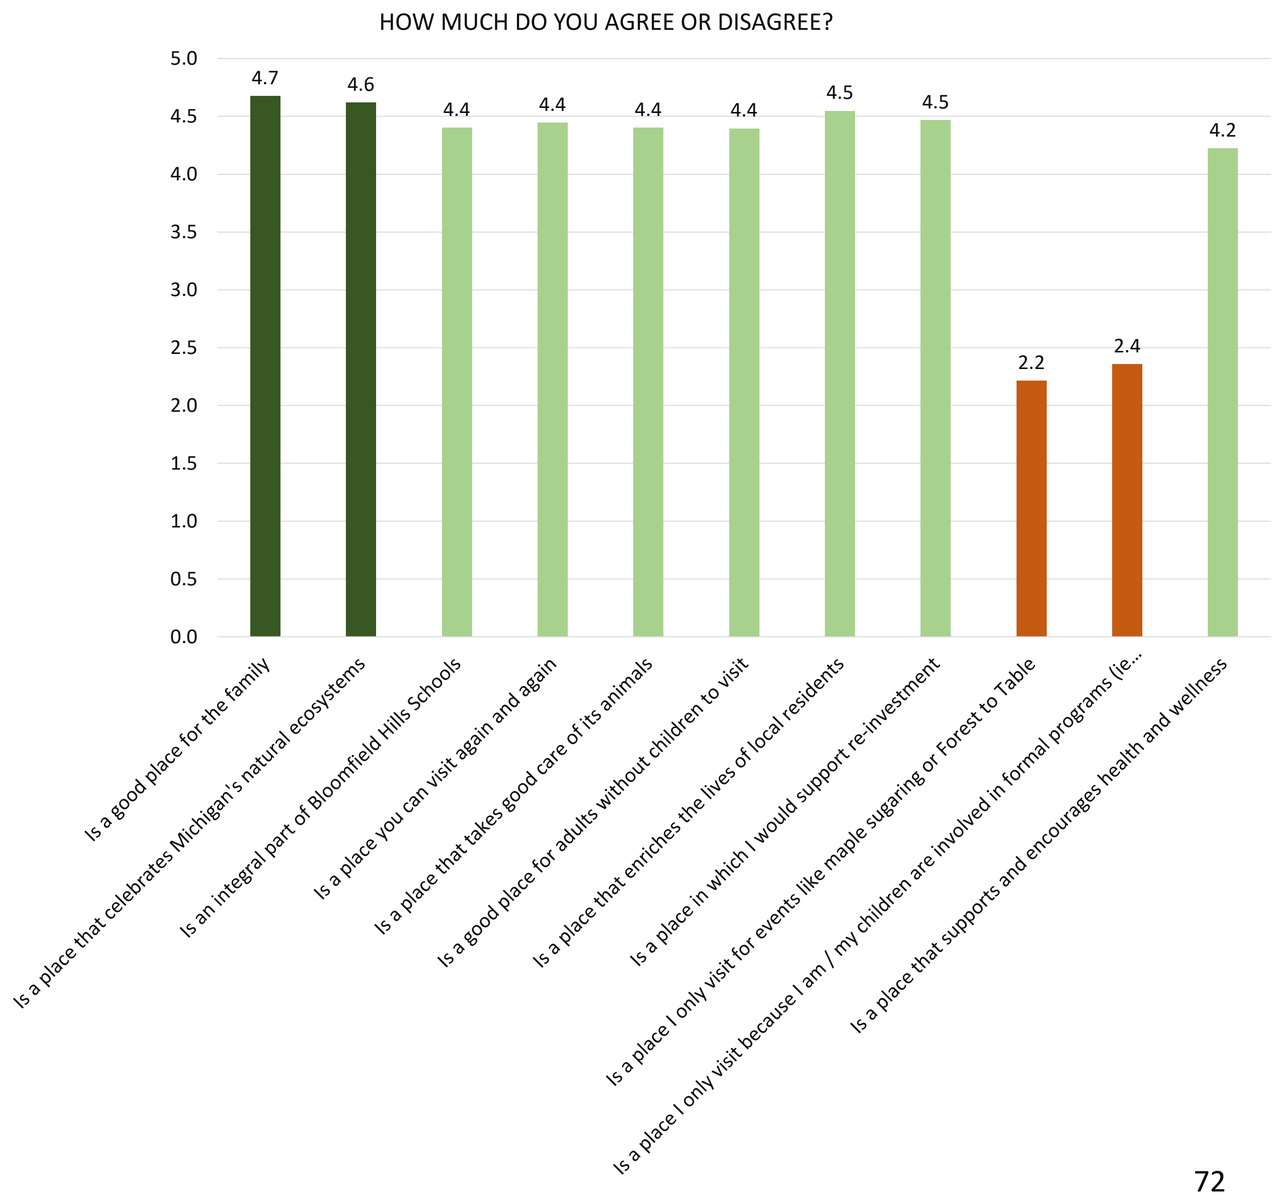
Group visits less frequently and less recently than overall visitors.

Income profile similar to all visitors.

MOST RECENT VISIT

VISIT FREQUENCY

VISITORS



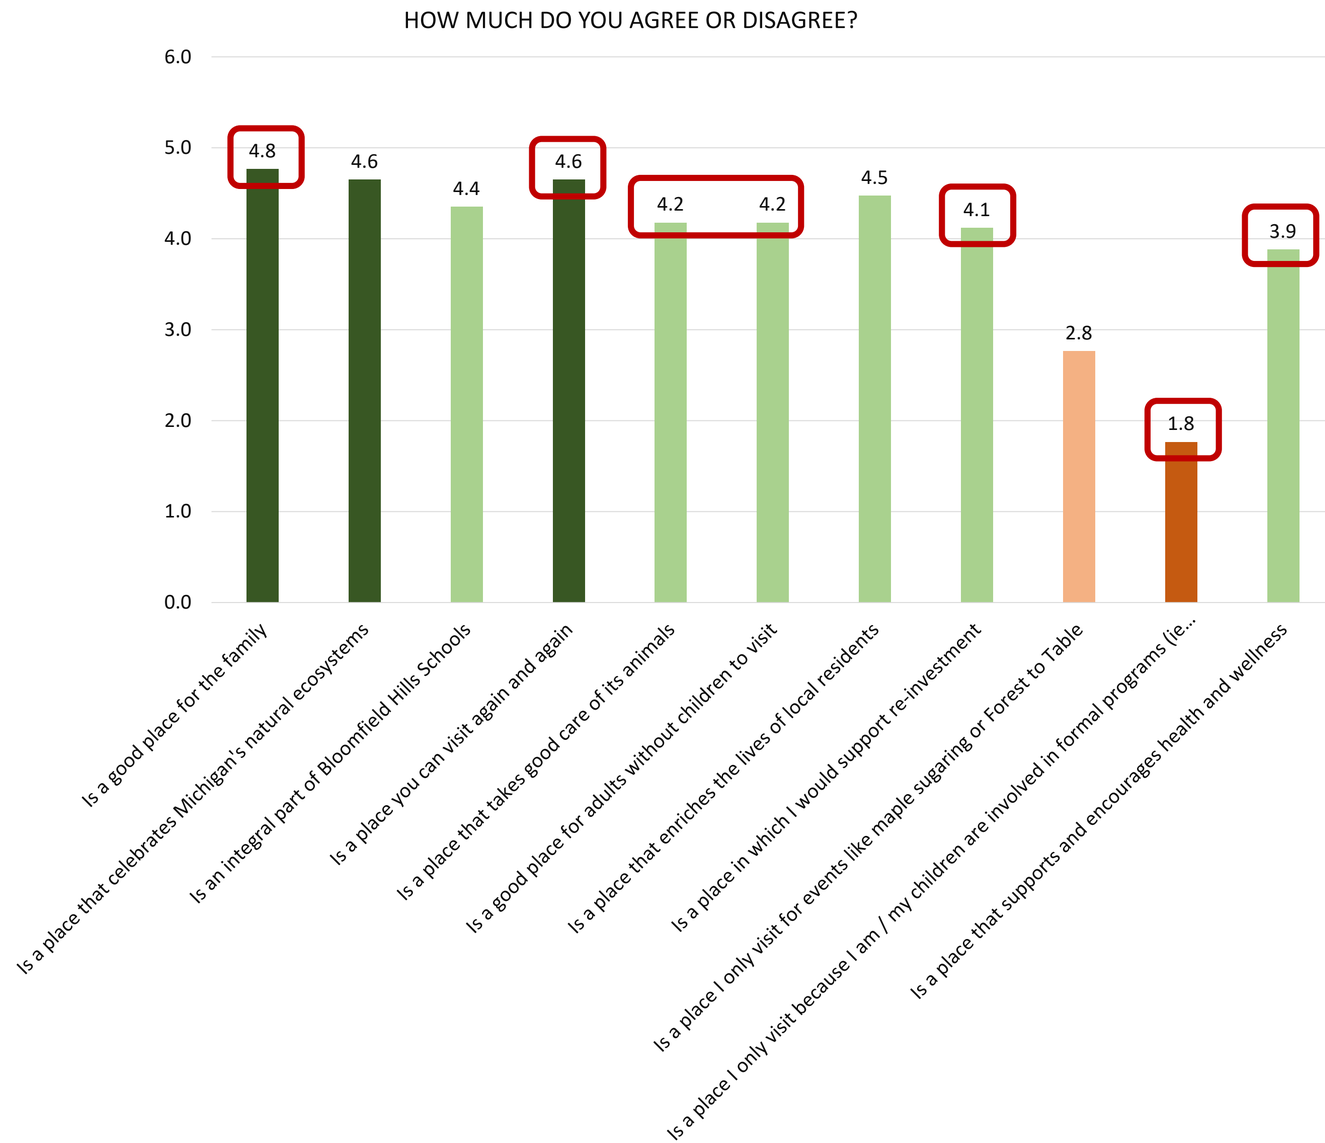
FREQUENTLY VISITED ATTRACTIONS

VISITOR PERCEPTIONS

RANK YOUR BELIEF OF JNC PURPOSE:
1 Improving student academic outcomes
2 Recreation / Leisure
3 Teaching about MI's ecosystems & cons.
4 Teaching about responsible use of natural resources
5 Community gathering space
6 Tourism

- Visitor perceptions are much more positive than Non-Visitor.
- Visitors place Recreation / Leisure as the secondary purpose for JNC; Non-Visitors placed that 4th.
- Visitors recognize JNC as a "Good Place for the Family" and "Celebrates MI's Natural Habitats" slightly more than all other statements.
- Least agreed upon—aside from only visiting for events or programs—"Is a place that supports health and wellness," but only slightly less.

Reflects belief that JNC is both a place for community members to recreate as well as an important part of BHS.



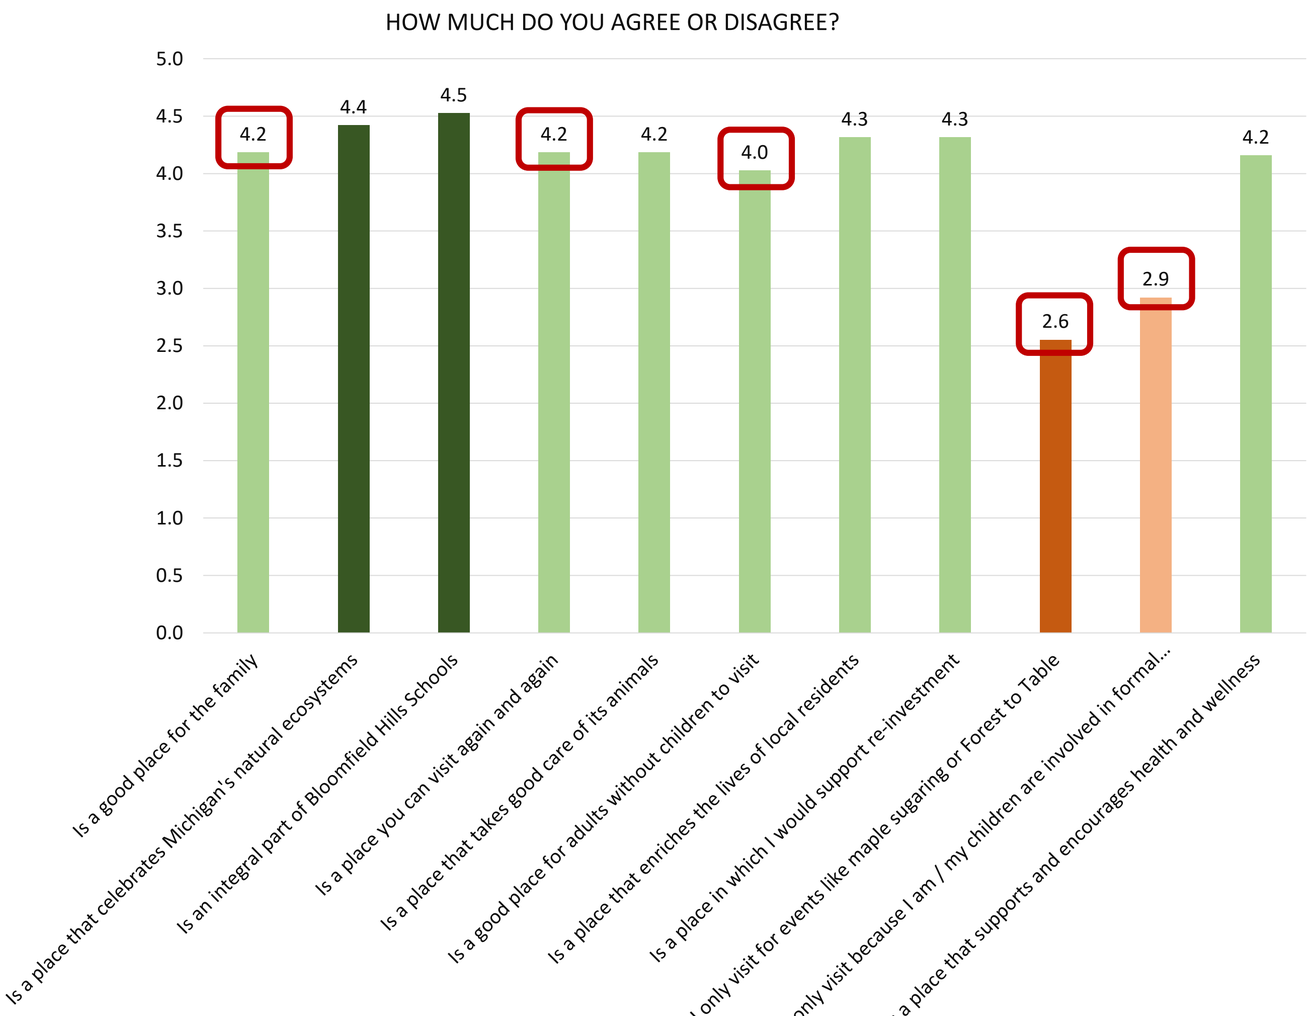
OVER 30 MIN DRIVE TIME

RANK YOUR BELIEF OF JNC PURPOSE:

1. Improving student academic outcomes
2. Teaching about responsible use of natural resources
3. Teaching about MI's ecosystems & cons.
4. Recreation / Leisure
5. Community gathering space
6. Tourism

- Ranking of purpose more resembles Non-Visitors than Visitors with Recreation at #4 rather than #2.
- Visitors that live over 30 min away from JNC have a larger variation on agreement with the statements—most agreement at 4.8 "Is a good place for family;" most disagree with "visiting only for programs."
- They agree less than other visitors that JNC "takes good care of animals," "is a good place for adults without kids," "support re-investment," and "is a place for wellness."
- They also more strongly agree that it is "a place you can visit again and again."

Reflects belief that JNC is primarily a place for family nature education.



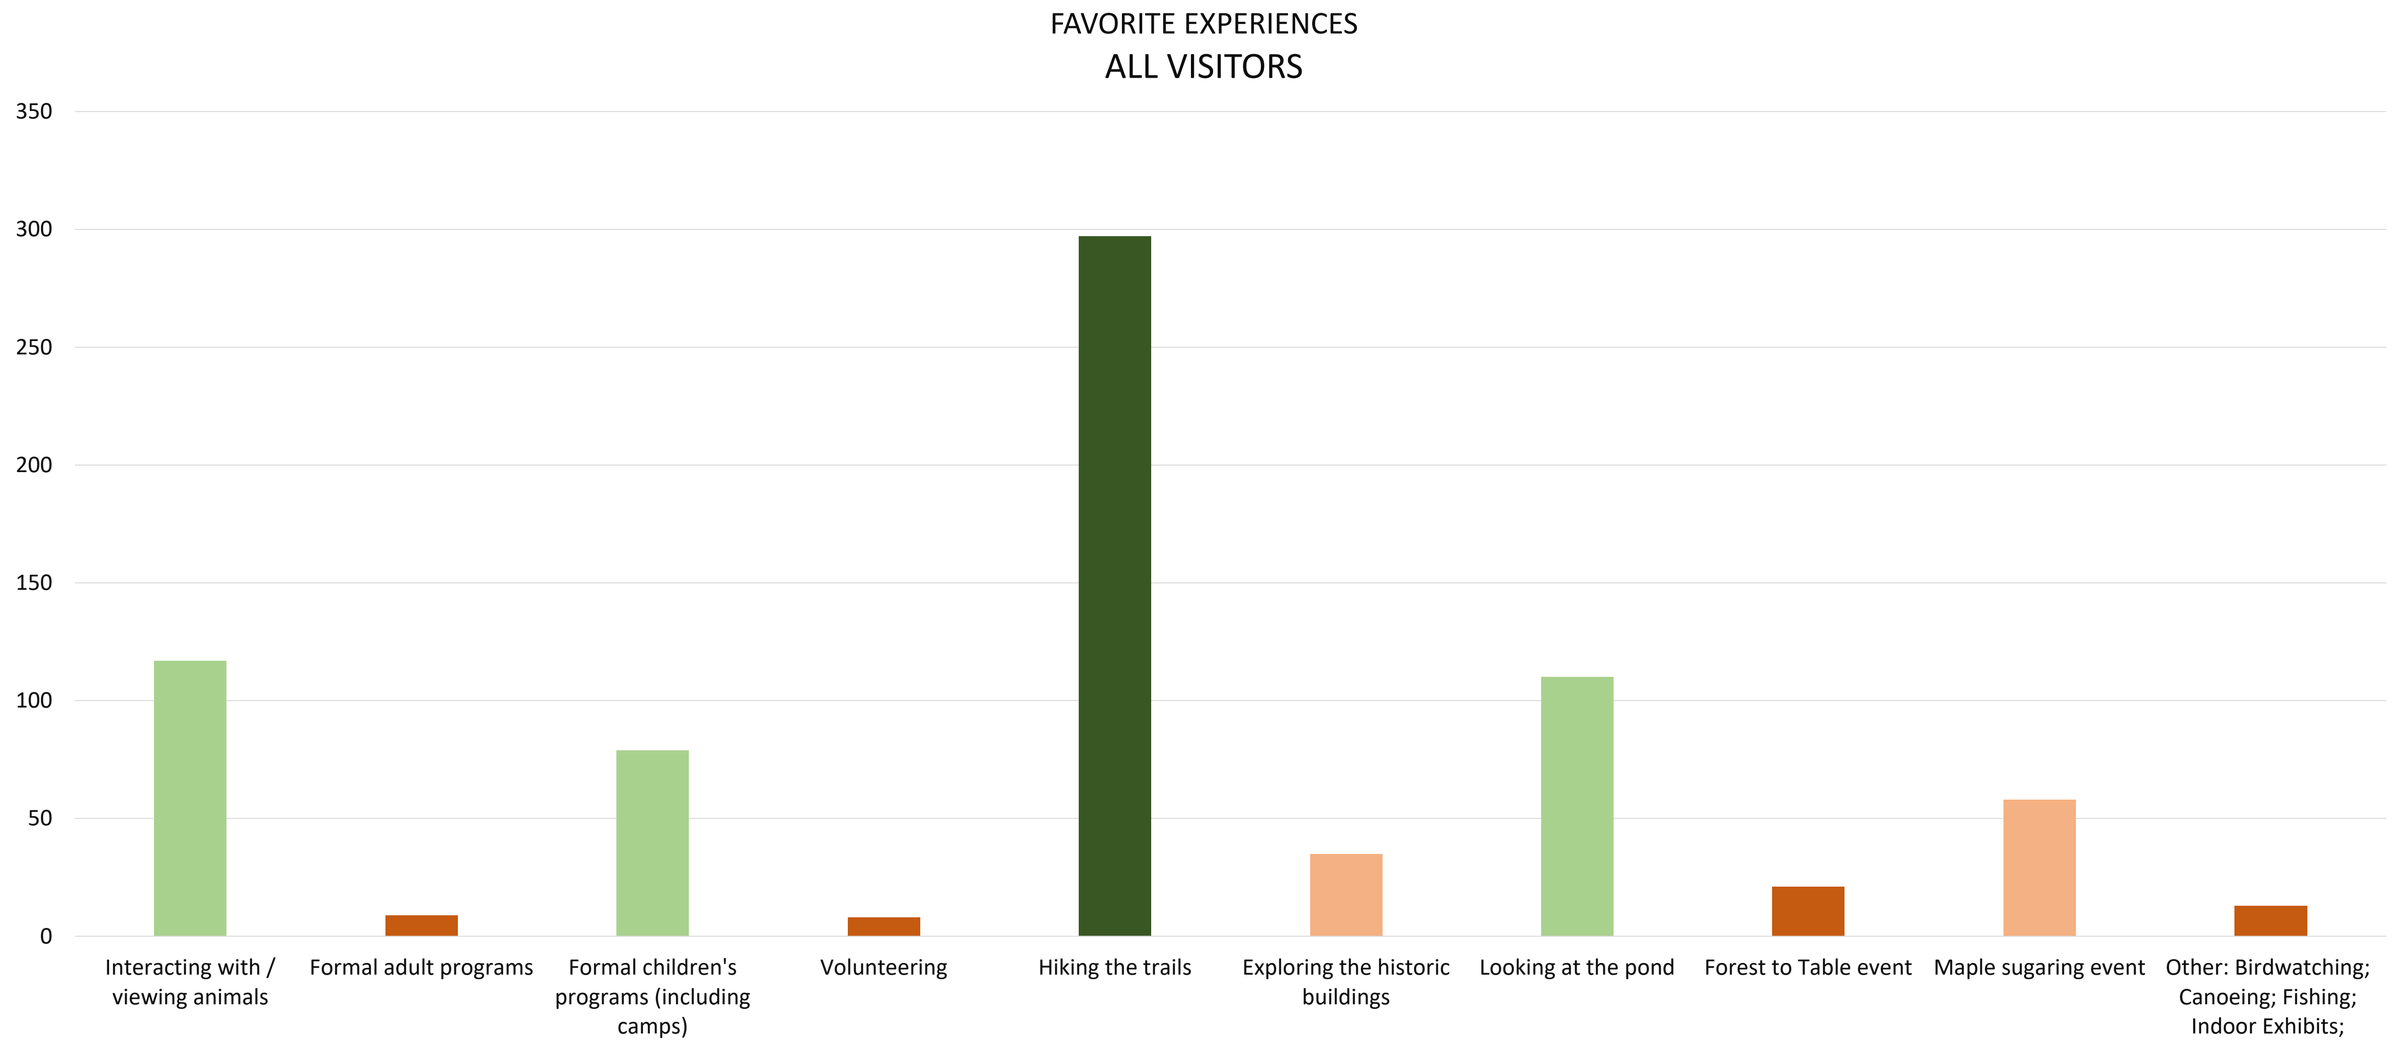
NON-CAUCASIAN

RANK YOUR BELIEF OF JNC PURPOSE:

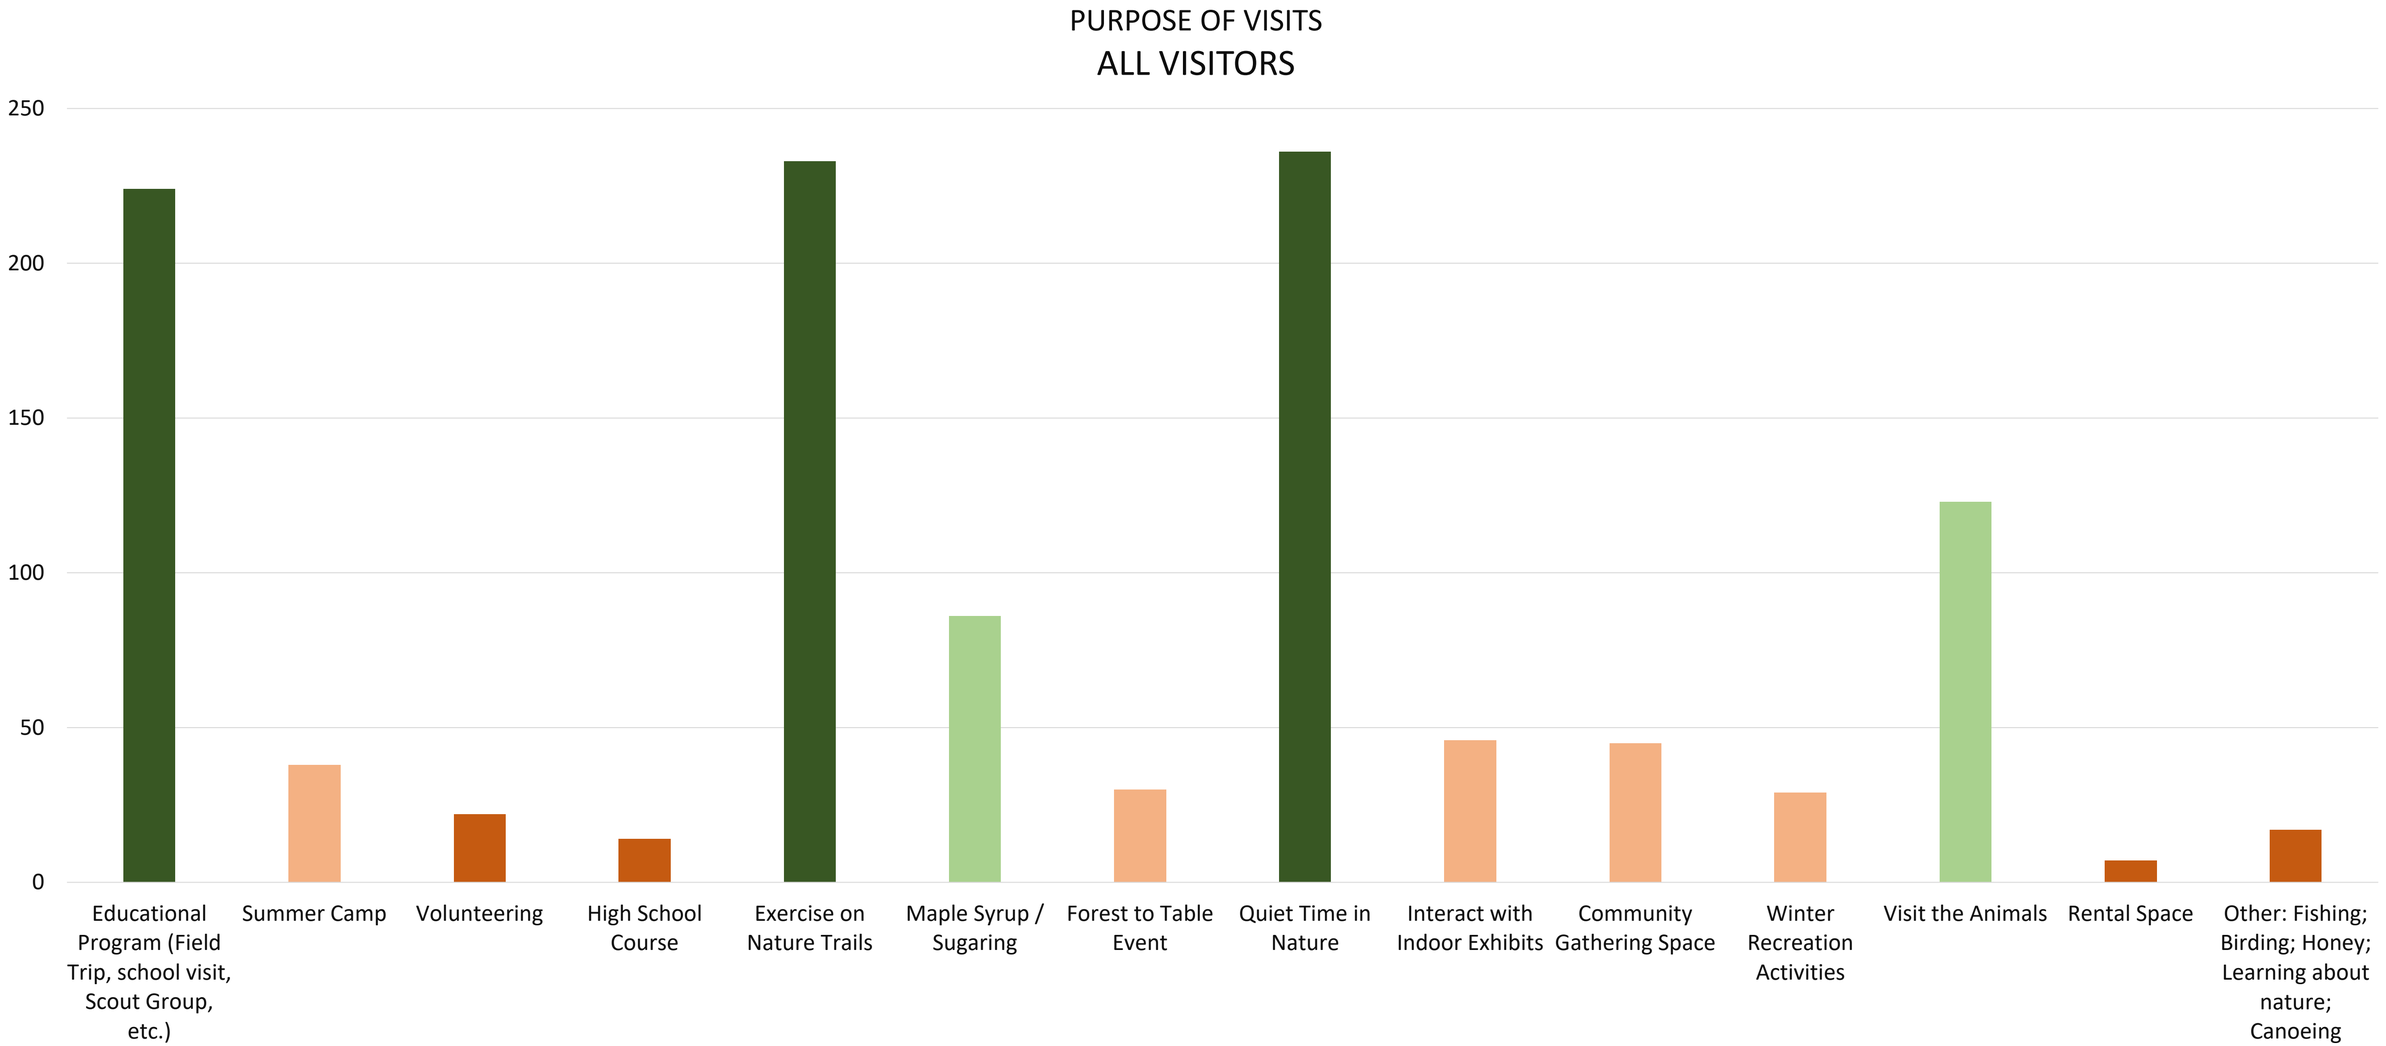
1. Improving student academic outcomes
2. Teaching about responsible use of natural resources
3. Recreation / Leisure
4. Teaching about MI's ecosystems & cons.
5. Community gathering space
6. Tourism

- This group places teaching about MI's ecosystems lower than recreation and much lower than teaching about responsible recreation.
- Non-Caucasian segment believes less strongly that JNC is a "good place for family" and can be "visited again and again." Contrarily, they also believe less strongly than any other group that it is a "place for adults without kids."
- This group less strongly disagrees with the statements that they only come for events or programs, which indicates that some of these respondents are primarily motivated by Events and Programs.

Reflects beliefs that Nature Center is a place to teach students about responsible recreation.

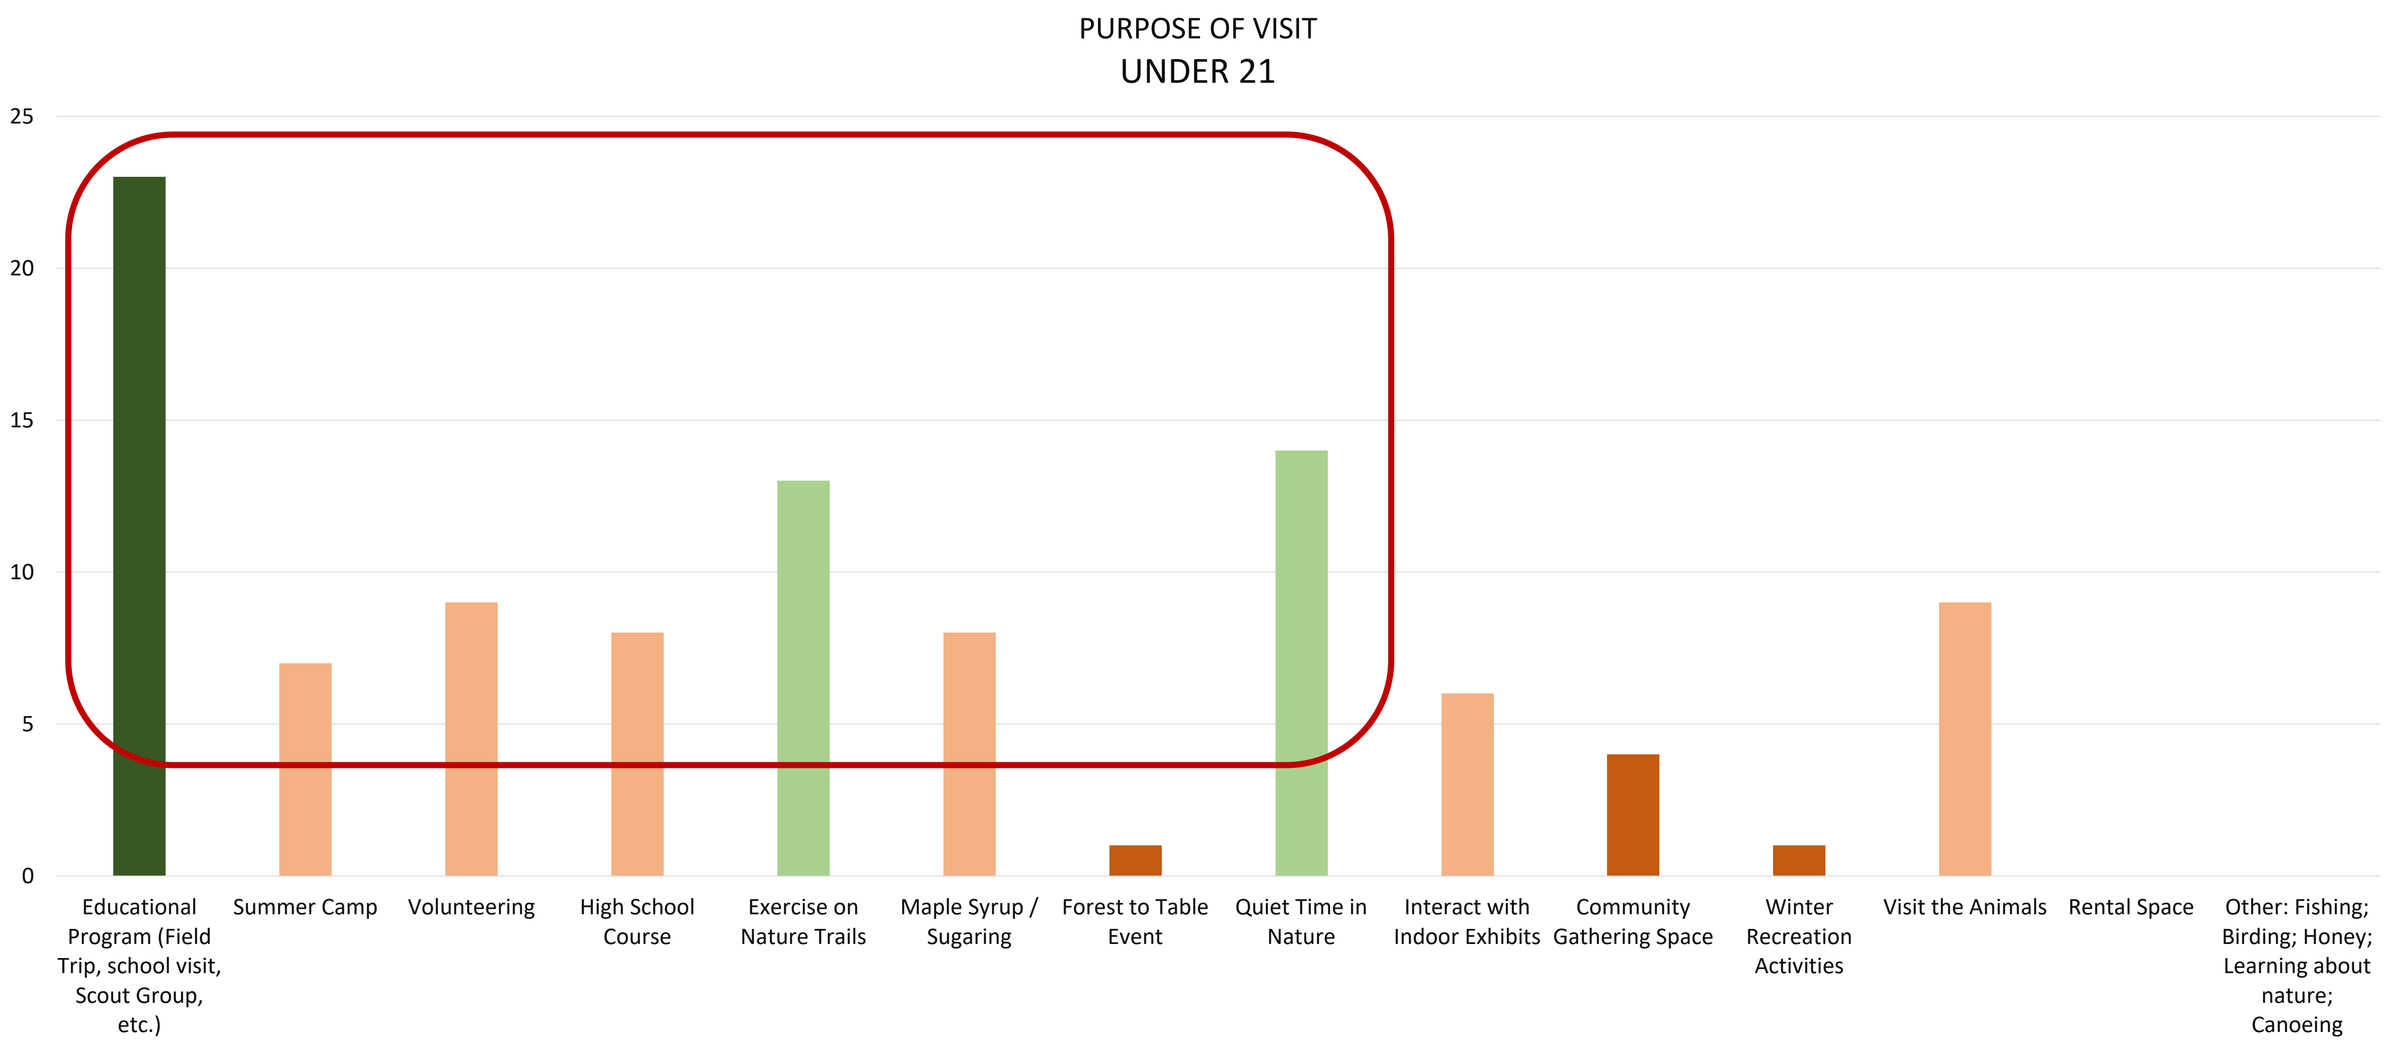


VISITOR PERCEPTIONS



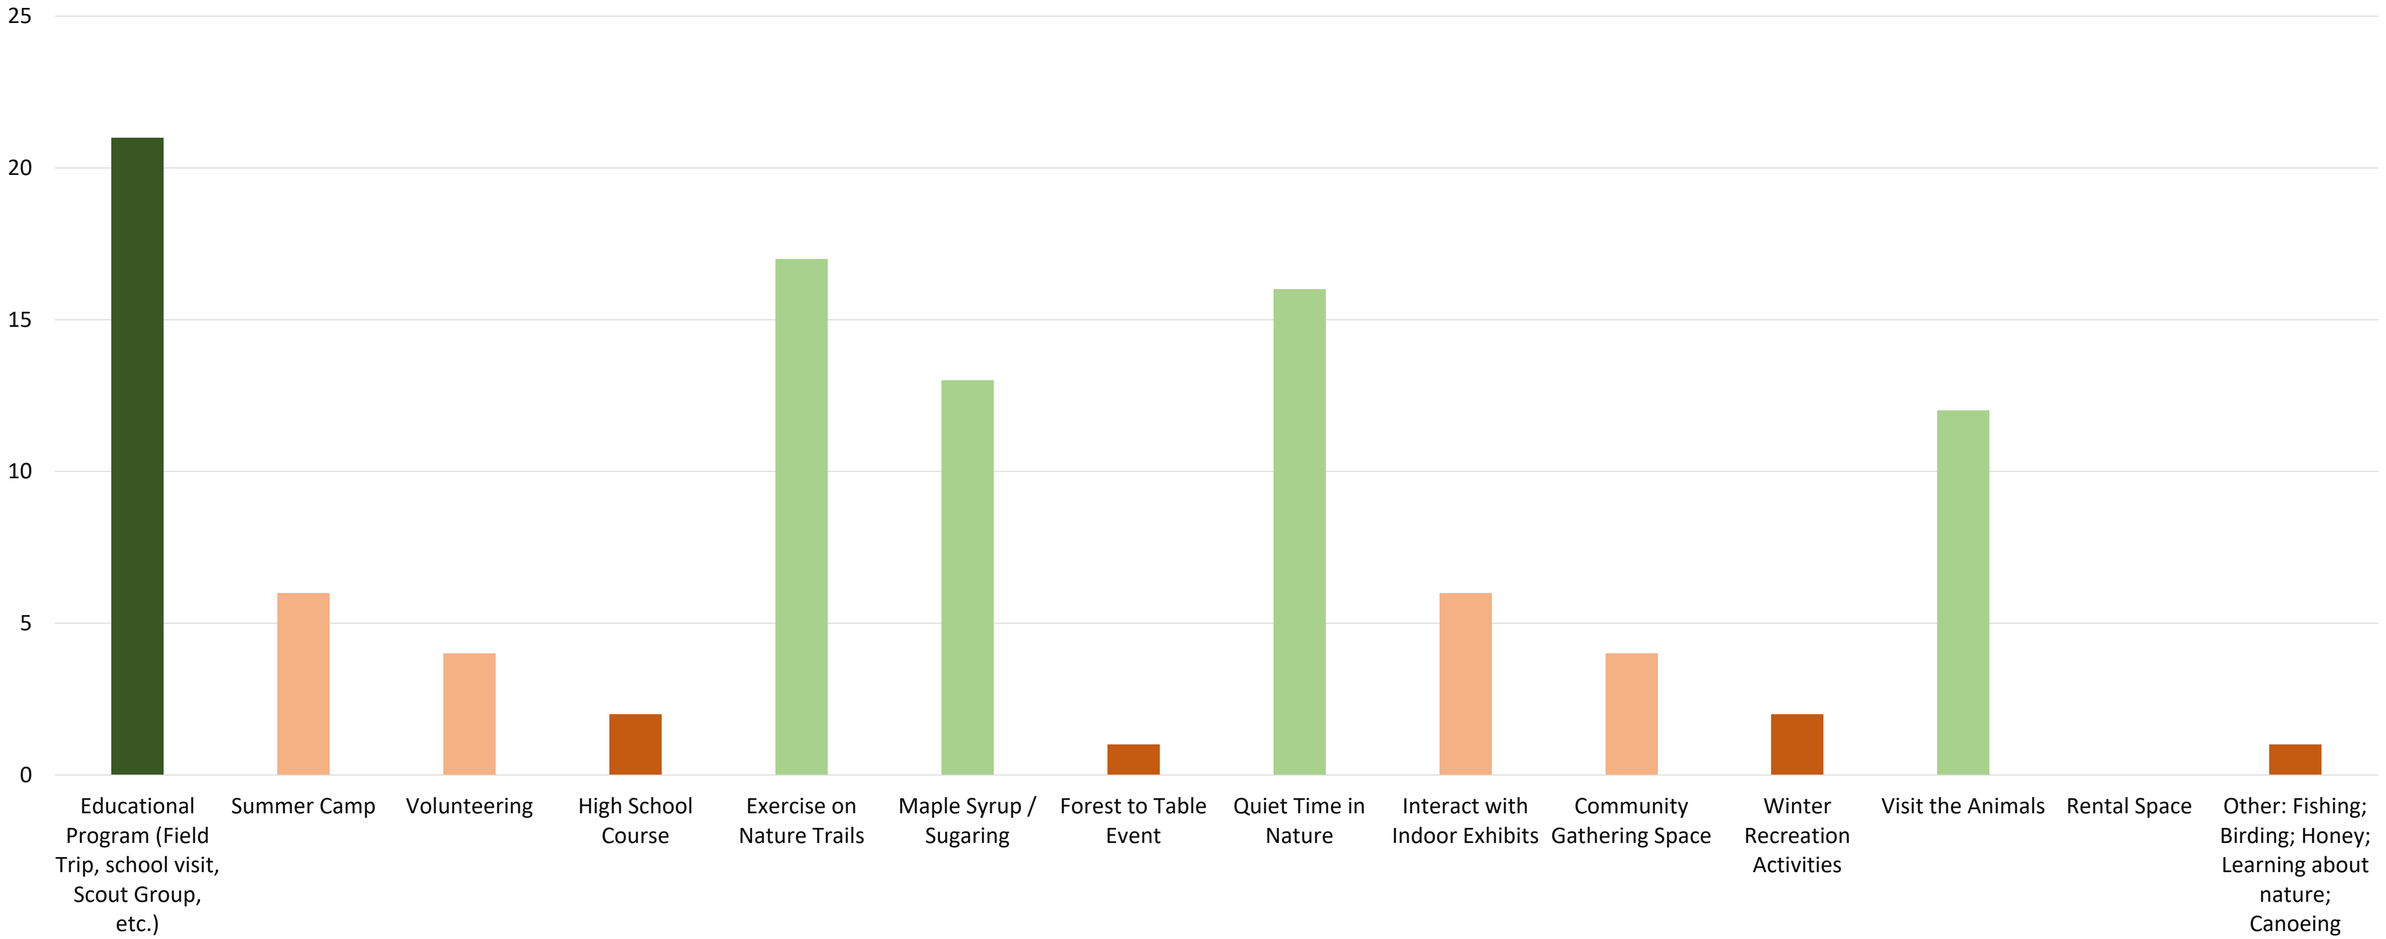
Visitor perception of JNC highlights some of the features unique to the site: **syrup, trails, deer**. Many positive and 'calm' descriptors like **peaceful, beautiful, walking**.

VISITOR PERCEPTIONS



Visitor favorite experience is **Hiking**. 2nd Favorites are **Looking at the Pond** and **Interacting with Animals**. **Formal Children's Programs** are also a favorite, although **Adult Programs** faired less favorably.

VISITOR PERCEPTIONS



Purpose of visits focuses on **enjoying nature and animals**, participating in **formal programs**, and visiting during the **Maple Sugaring events.**

Programs are the primary driver for visitors under age 21. **Summer camp, volunteering, high school course, and maple sugaring** are also strong drivers for this group compared to 'all visitors.' Inversely, while using **nature trails** and having **quiet time** are in the top three reasons for visiting, they are much weaker drivers compared to other audience segments.

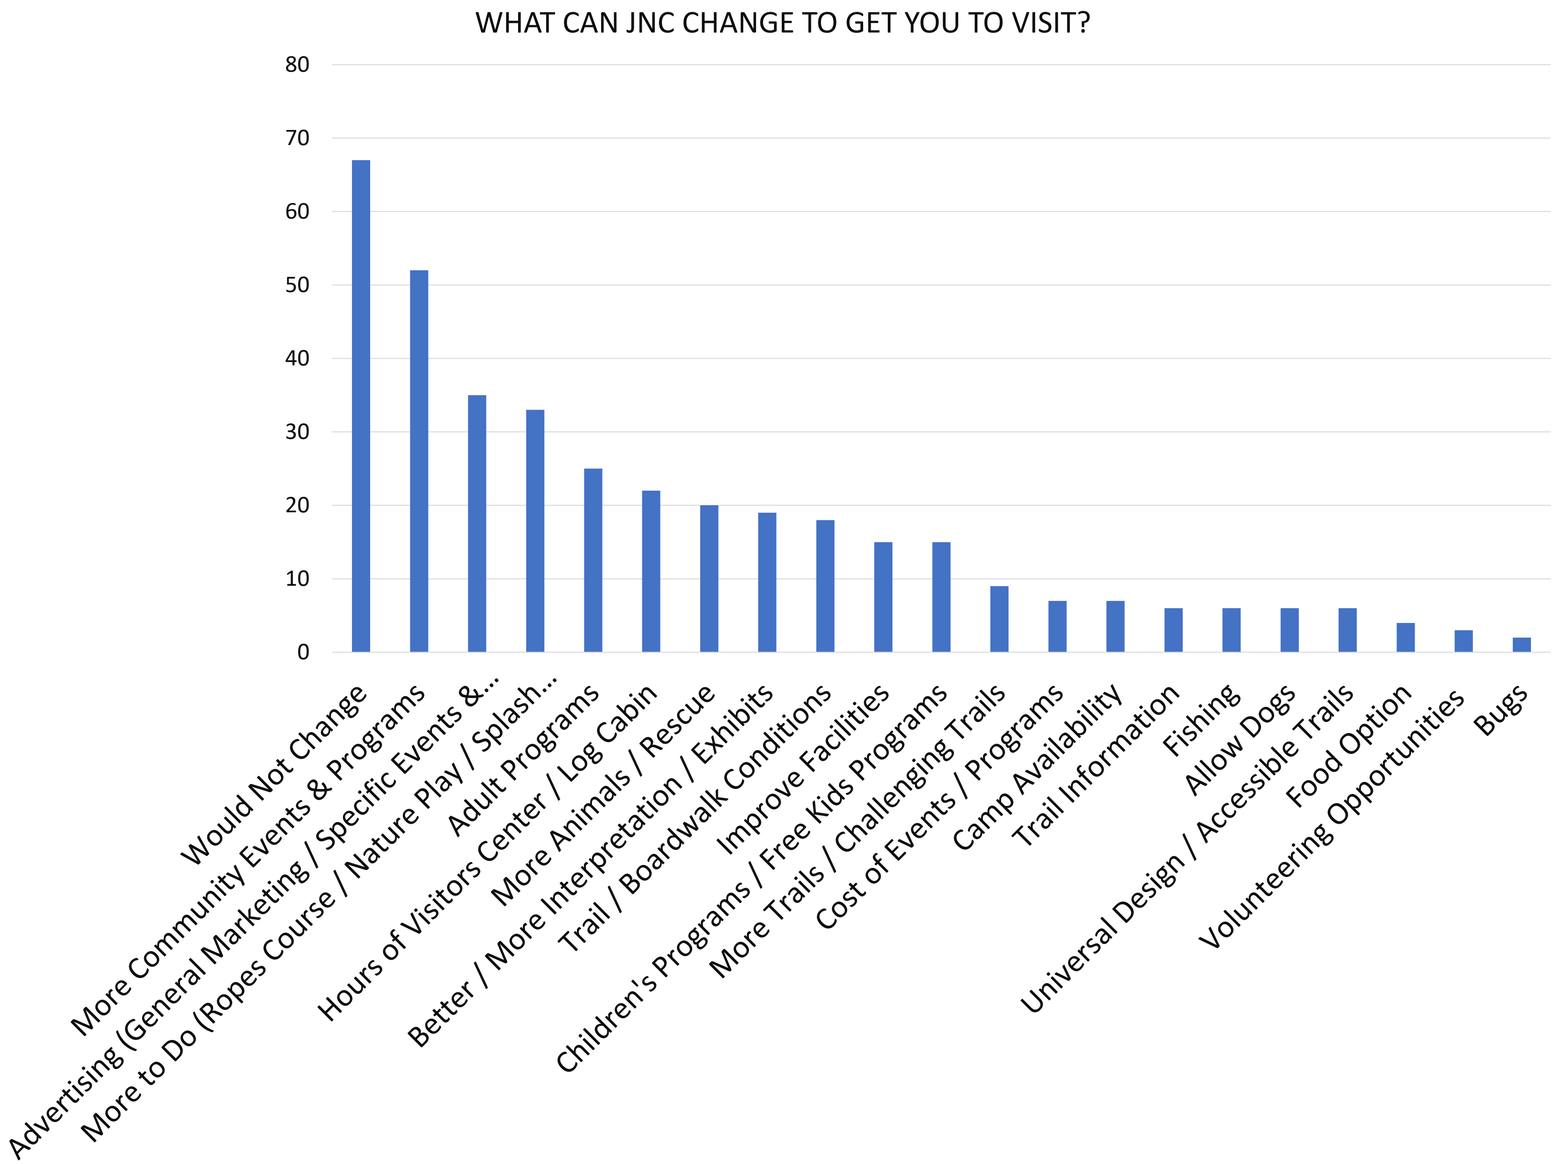
PURPOSE OF VISIT
NON-CAUCASIAN

Programs are the primary driver for non-Caucasians. While **Exercise and Quiet Time** are in this group's top 3, they are weaker drivers than with other groups. On the other hand, **Maple Sugaring** and **Visiting the Animals** are much stronger drivers with this group than other groups.

SUGGESTIONS FOR CHANGE

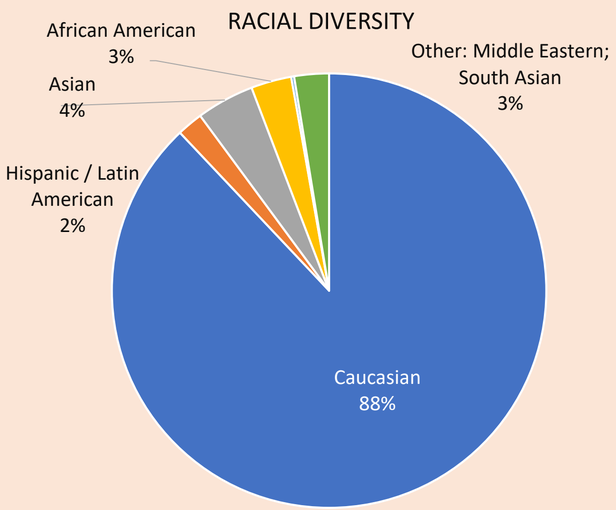
Would Not Change: Specifically “do not change,” “we love it,” “nothing to change”, etc. Did not include “N/A”, “I don’t know,” etc.

More Community Events & Programs: (Catch all for any that didn’t specify ‘Adult’ or ‘Children’) Birdwatching; Night Hikes; Guided Hikes; Seasonal events

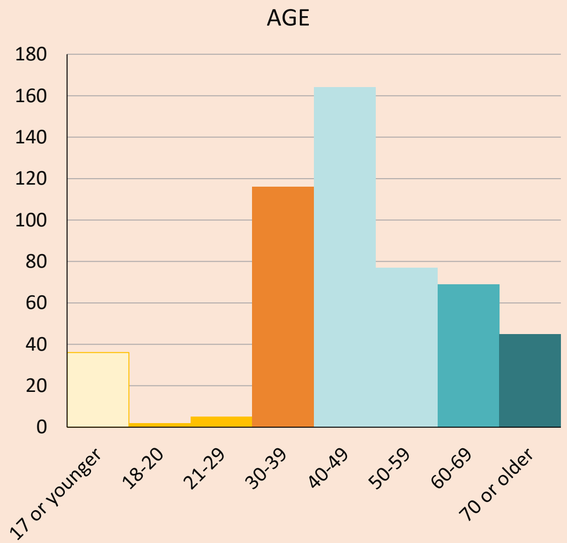


Advertising: Lack of awareness of events / programs and general reminders of JNC

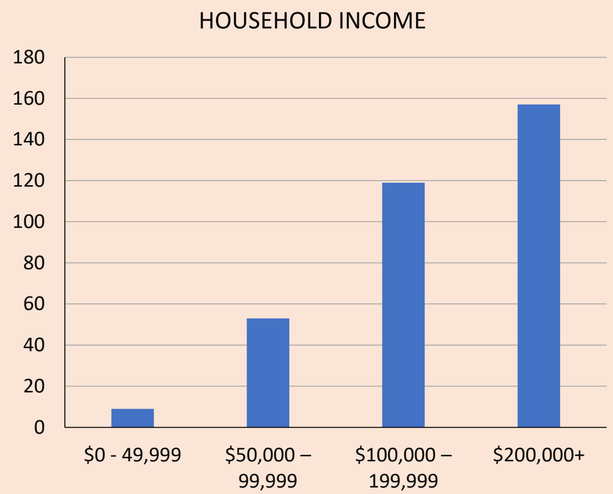
More to Do: Ropes course; Nature play; Splash pad; Winter recreation; Watersports; Things along Trails; Rustic camping



Interpretation: Indoor exhibits and outdoor signage



Improve Facilities: Animal habitats; Bathrooms; Remove invasives; Plant natives; Block noise / views from roads; Cozier indoor spaces; Better event space indoor and out

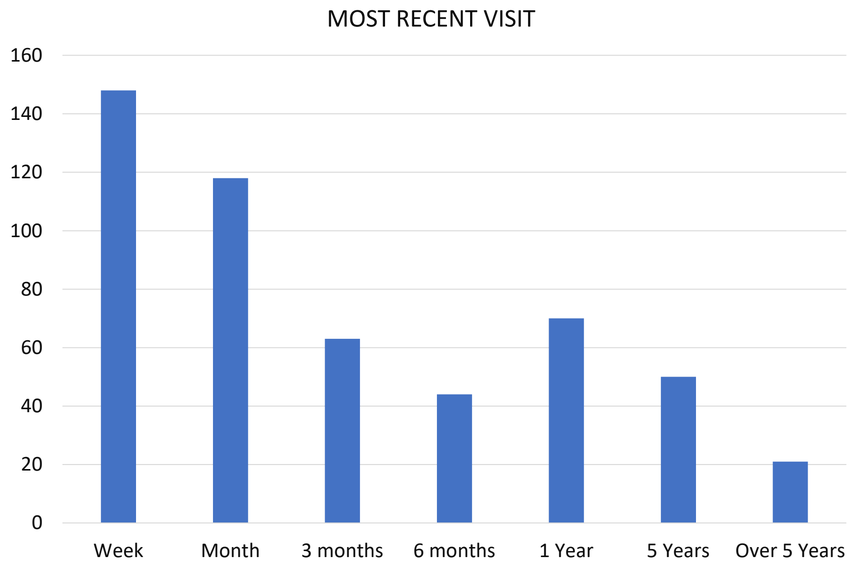


Allow Dogs: Understood why no dogs, but suggestion for specific area that allows dogs

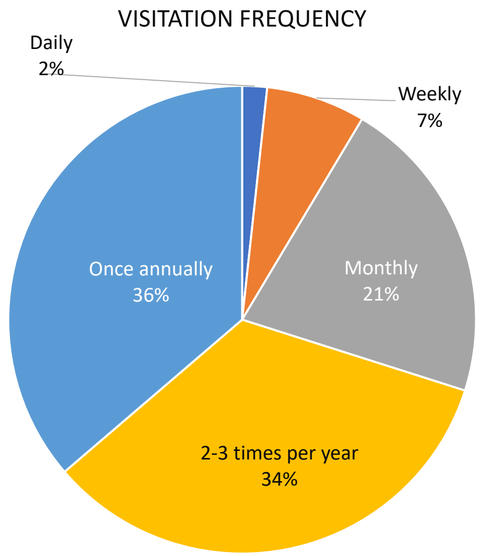
FARM & JNC VISITORS

408 TOTAL RESPONSES

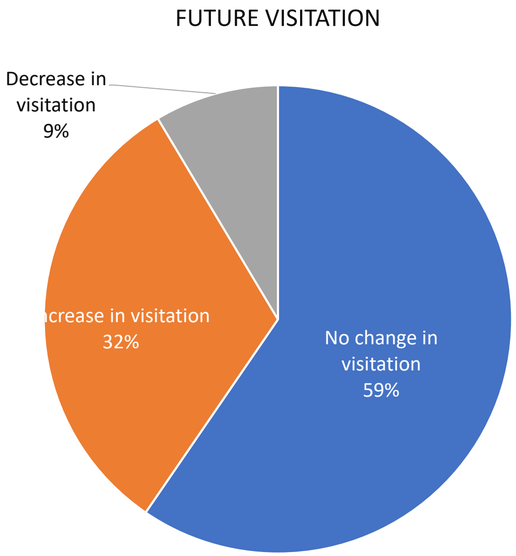
Ave. HH Size: **3.5**
College Degree: **90%**
Adults Without Kids At Home: **30%**



The only unique characteristic of this group is that they have visited recently.



Profile is the same as overall survey.



<u>TIE TO BOWERS SCHOOL FARM</u>

10% OF BSF VISITORS HAVE **<u>NOT HEARD</u>** OF JOHNSON NATURE CENTER

20% HAVE **<u>NEVER VISITED</u>**

SECTION 3:
SWOT
(STRENGTHS, WEAKNESSES, OPPORTUNITIES & THREATS)

STRENGTHS & WEAKNESSES

What do we do well and what can we leverage for future growth?

What are areas that could use improvement?

WHAT ARE OUR STRENGTHS?

Nature Center Features, Programs & Attractions

Publicly accessible trails

Site, historic structures and unique programs communicate stories of the past, present and future

Flexible Visitor Center space

Wing Lake Building has potential for greater use

Strong partnerships with BHS K-5 curriculum

Education Support & Career Pathways program

Successful community events

Trust grant in place to preserve the land

WHAT ARE OUR STRENGTHS?

Team & Internal Culture

Strong, talented, motivated and effective team

Friendly & welcoming staff focused on educating and engaging visitors

Strong creative problem-solving skills among all team members

Passionate and engaged volunteer groups

Active Friends of JNC group

Partnerships with local libraries, businesses and organizations

WHAT ARE OUR STRENGTHS?

Brand & Public Perception

Peaceful and safe retreat for people to connect with nature in the city/suburbs

Authentic and experiential environment that welcomes all

Birmingham resource

Strong community support

WHAT ARE AREAS THAT COULD BE IMPROVED?

Team & Internal Culture

Additional staff needed for any future growth including

- New attractions and programs
- Extended Visitor Center and Cabin hours
- More events

Current hiring constraints and limited HR capacity makes hiring new employees for the Nature Center a difficult process

Nature Center would benefit from stronger representation and positioning in BHS

BHS has limited resources to assist with conservation efforts

WHAT ARE AREAS THAT COULD BE IMPROVED?

Team & Internal Culture

Nature Center would be looking to fill the following positions.

- Land & Nature Center Manger
- Grant Writing / Fundraising Support
- Horticulture Resource
- Instructors
- Volunteer Coordinator
- Marketing Director
- Dedicated Visitor Center Receptionist

WHAT ARE AREAS THAT COULD BE IMPROVED?

Nature Center Features, Programs & Attractions

Site is landlocked with limited expansion options

Parking is a limiting factor for events

Facility is not designed for competing uses to occur simultaneously (e.g. education, public use, events, etc.)

Few hands-on exhibits in the Visitor's Center

Limited revenue streams currently in place to supplement BHS funding

Lack of data on general attendance visitors limits Nature Center's ability to quantify annual visitation and understand current audiences

Nature Center doesn't know the maximum visitor capacity for balancing visitor experiences and guest impacts on the site

WHAT ARE AREAS THAT COULD BE IMPROVED?

Nature Center Features, Programs & Attractions

Limited information available for current trail system

Physical accessibility of the site

Community based programs are limited due to cost, staffing and marketing

School educators leading tours & school experiences lack the fundamental knowledge about JNC site and facilities

Brand & Public Perception

Stronger marketing strategy needed to inform the community about the Nature Center's current attraction offerings, programs and upcoming events

Public doesn't understand the Center's funding structure

JNC is not strongly associated with BHS

OPPORTUNITIES & THREATS

What are the opportunities today that could contribute to our success?

What barriers could arise that would hinder our ability to grow?

WHAT ARE POTENTIAL OPPORTUNITIES?

New Markets

Nature Center could capitalize on current trends regarding commercial photography including

- Increase in number of people interested in photography
- Increase in the number of commercial sites that are restricting (or prohibiting) photography onsite

Public demand for the following could provide new visitors and sources of revenue.

- Public fishing
- Overnight camping
- Food experiences
- Private rentals for events

Customer and volunteer pools are growing among the following groups

- Retiring Boomers who are looking for something to do
- People looking to recover from burnout and stress

WHAT ARE POTENTIAL OPPORTUNITIES?

Funding and Growth

Economic downtowns result in increased BHS student enrollment

Large pool of potential donors in the Bloomfield Hills area

Grants available through the Dept. of Natural Resource to assist with improving accessibility issues and other site improvements

Corporate partnerships are looking to give donations and volunteer hours

Growing Friends of the JNC group with an ongoing focus to strengthen community support

Several upcoming opportunities for land acquisition (including parcels adjacent to the current Nature Center property)

WHAT ARE POTENTIAL THREATS?

BHS Board & Community

Private school attendance continues to limit the following.

- Financial support
- Students reached through field trips and BHS programs

Competition with municipal funded facilities and programs

Connection with BHS can hinder some grant and donor funding eligibility

WHAT ARE POTENTIAL THREATS?

Operations

The following issues impact staffing

- Retaining current staff and attracting new staff as many are looking elsewhere for jobs that pay more for less work
- Hiring process and training takes time

Wooded environment and open accessibility to public present opportunities for criminal activity

Conservation Efforts

The following could negatively impact the site's ecological footprint.

- Activity upstream on the Rouge River
- Residential fertilization and run-off
- Climate change
- Invasive species
- Increase wild animal populations
- Noise pollution from adjacent roads

STRATEGIC & MASTER PLANNING

3 PHASE PROCESS

Phase 1
Facility & Market Analysis
(Aug – Nov 2022)

Phase 2
Strategic Planning
(Nov 2022 – Jan 2023)

Phase 3
Master Planning
(March 2023 – July 2023)

Define our Starting Point

- Assess current site, facilities and operations
- Assess current market performance
- Identify SWOT

Define our Destination

- Identify goals and vision for next 5 yrs
- Define the strategies and action plan to reach these goals

Create a Roadmap for Implementation

- Design the program and site plan for Nature Center improvements
- Identify key stories and overarching messages for guest experience
- Phased diagrams and illustrations to build stakeholder excitement and assist with fundraising efforts

PHASE 2 EXECUTIVE SUMMARY

THE 20 YEAR VISION

Phase 2 Strategic Planning kicked off with a visioning workshop to describe the Nature Center in 20 years. During this workshop, we created vision boards for the following topics, describing how each contributes to our envisioned future.

- User groups: What will a day at the Nature Center look like for various user groups?
- Guest experience: What are the different experiences that one will encounter?
- Education: What role(s) will education play?
- Animals & Insects: What role(s) will animals & insects play?
- Food: What role(s) will food and retail play?
- History: What role will the Visitor's Center, historic structures and exhibits play and how does each support this story? How do visitors experience this story – observation only or highly interactive and immersive?

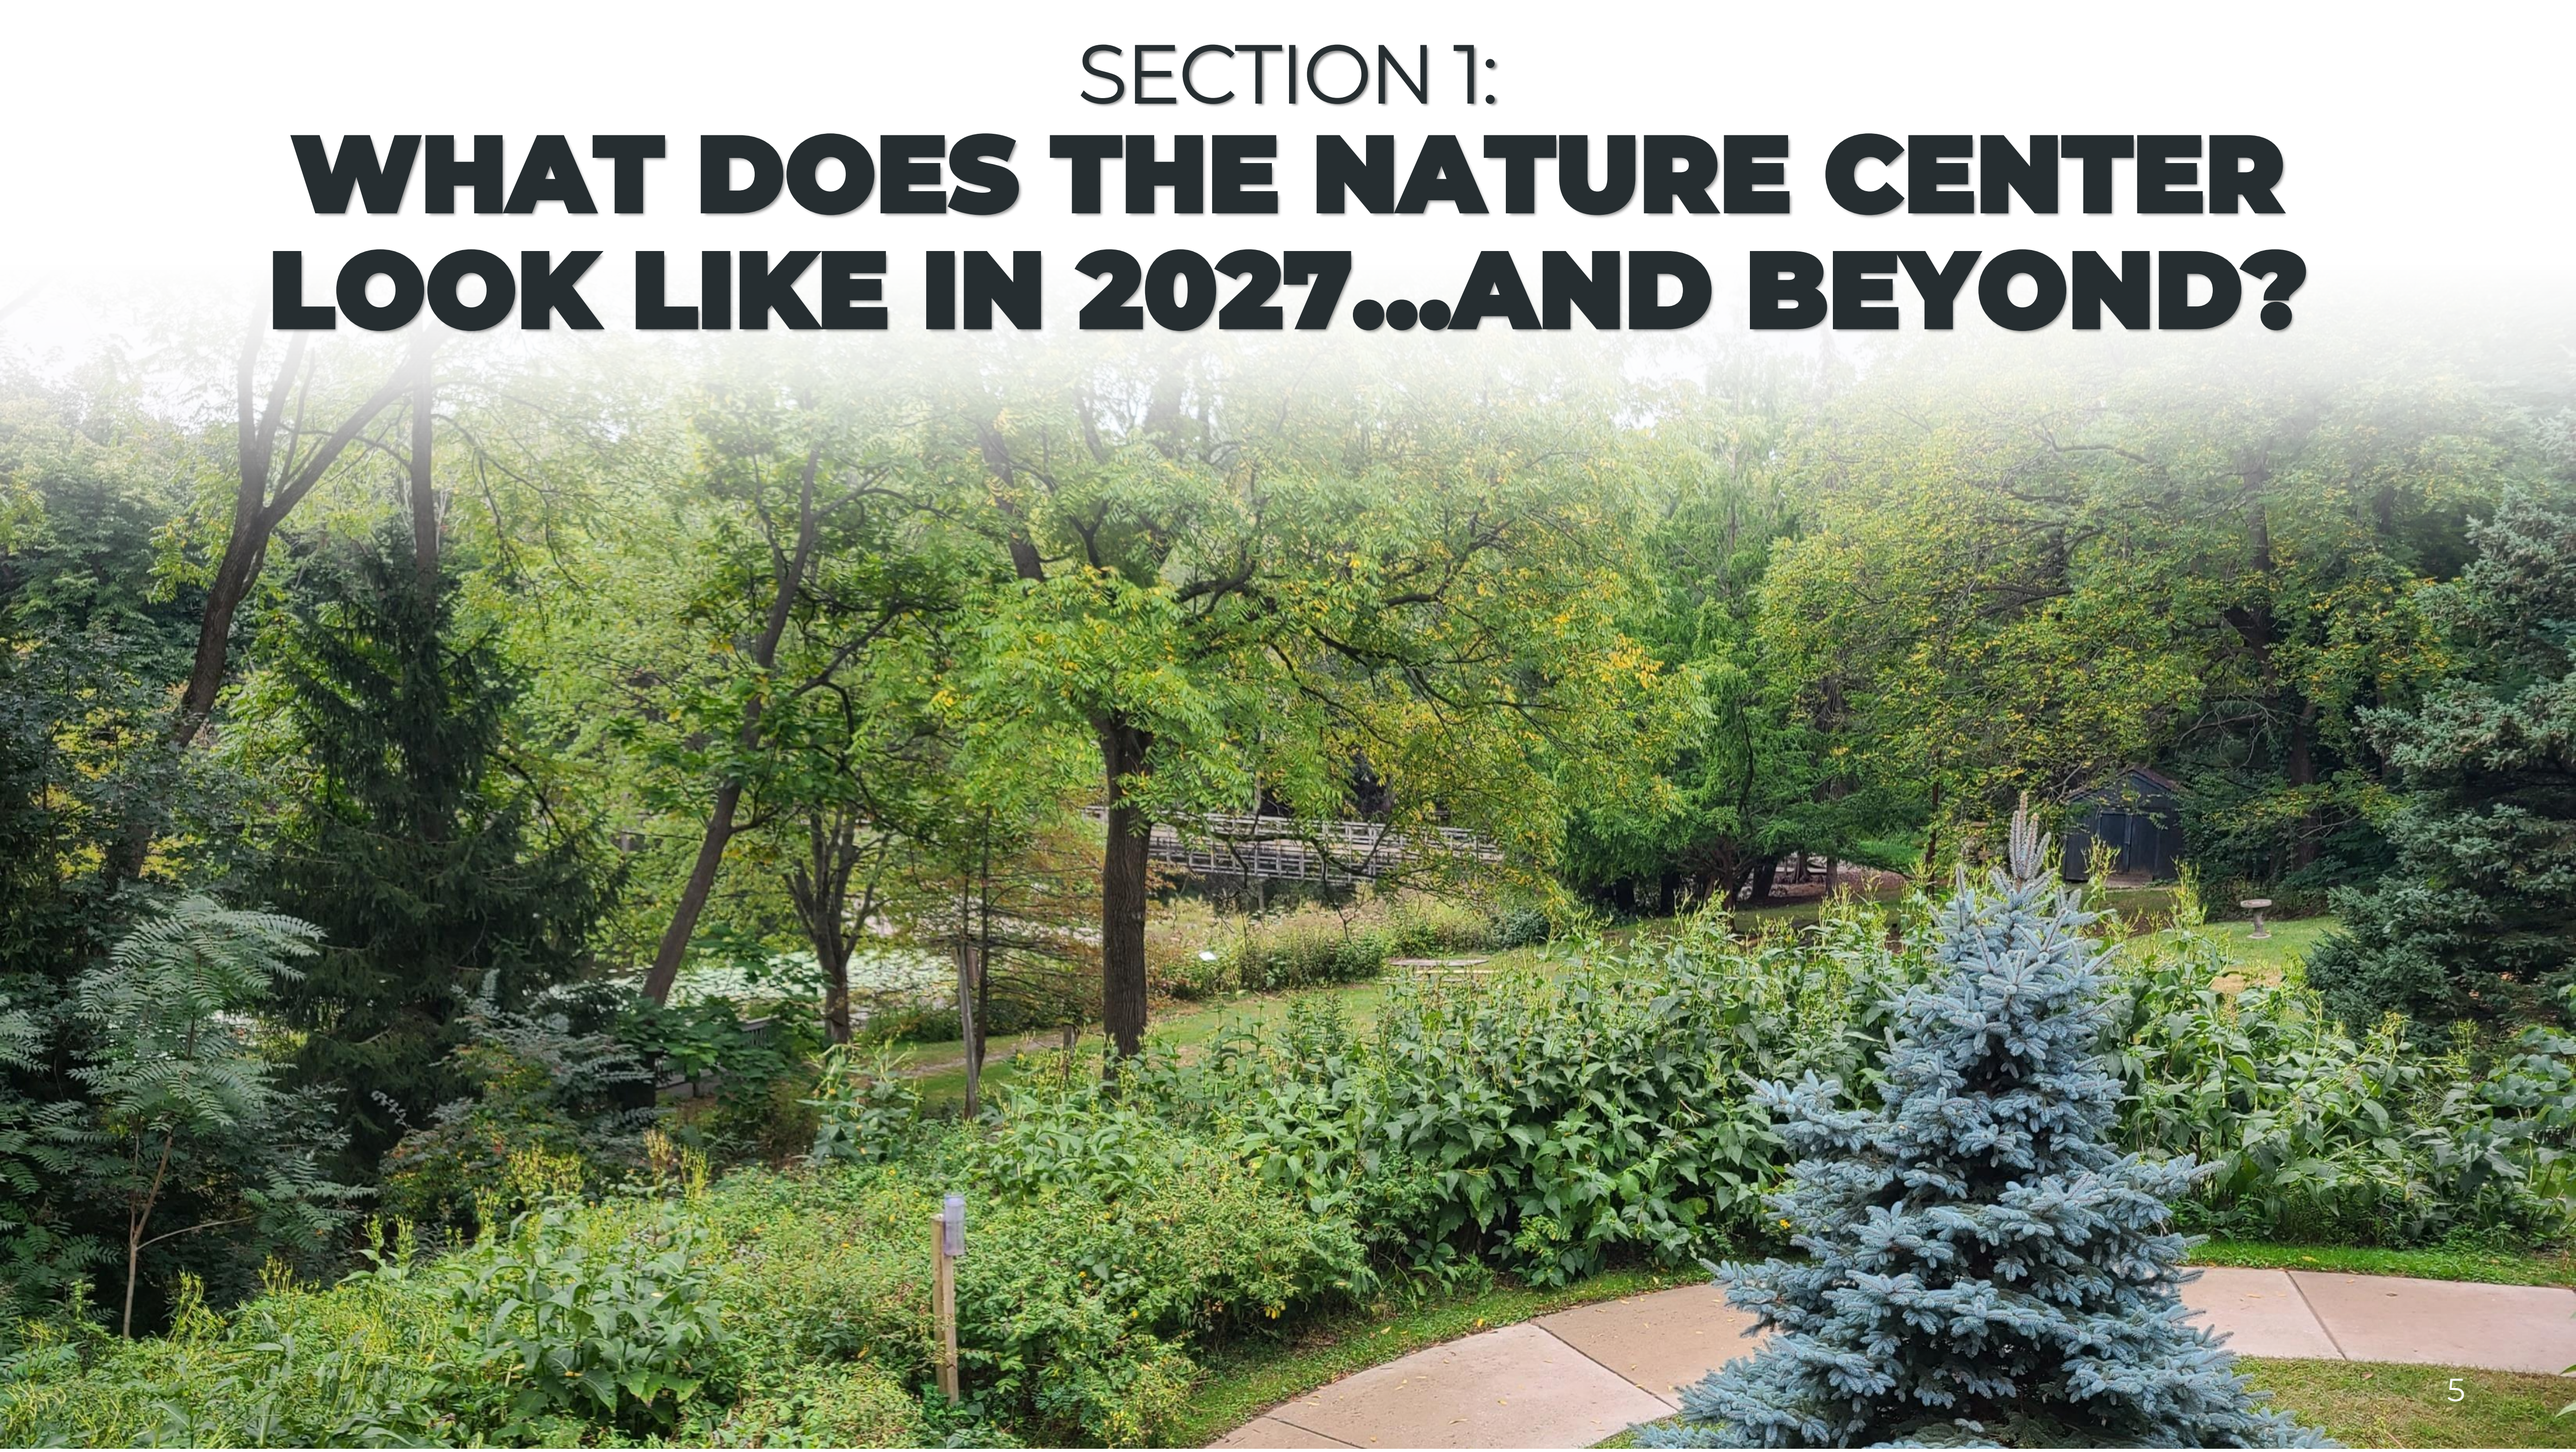
Also included in this visioning exercise were a review of the Nature Center's strengths, opportunities, unique characteristics, and stakeholder ideas for improvement identified during Phase 1. This enabled the group to build on things the Nature Center does well and include feedback from stakeholder engagement meetings.

The result of this workshop uncovered five major themes for our future vision – Innovation, Experiences, Permaculture, Inclusivity and Impact.

GOALS AND STRATEGIES FOR 2027

Next, the group crafted three goals to define what the Nature Center will be doing to achieve this outcome. Each goal serves to move the Nature Center towards this envisioned future yet is achievable in the next 5 years. Each also has a specific focus (education, community and sustainable operations) and is supported with objectives to describe how we are defining and measuring success. The goals are as follows:

Goal 1: Become a Leader in Outdoor Education, Conservation and Sustainability



Goal 2: Become a Highly Valued, Nature Focused Community Asset

Goal 3: Build a Sustainable Operating Model

Each goal was broken down into strategies and includes steps to address organizational weaknesses and reduce the impact of environmental threats identified in Phase 1. Similar to the goals, the team considered the metrics for measuring completion as well as groups involved in implementation, individual action tasks and overall duration for each strategy. Strategies were then organized into an action plan (or road map) that builds on current efforts, maximizes success and outlines the path forward for achieving these three goals over the next five years.

SECTION 1:

WHAT DOES THE NATURE CENTER LOOK LIKE IN 2027...AND BEYOND?

STRENGTHS

Nature Center Features, Programs & Attractions

Publicly accessible trails

Site, historic structures and unique programs communicate stories of the past, present and future

Flexible Visitor Center space

Wing Lake Building has potential for greater use

Strong partnerships with BHS K-5 curriculum

Education Support & Career Pathways program

Successful community events

Trust grant in place to preserve the land

Team & Internal Culture

Strong, talented, motivated and effective team

Friendly & welcoming staff focused on educating and engaging visitors

Strong creative problem-solving skills among all team members

Passionate and engaged volunteer groups

Active Friends of JNC group

Partnerships with local libraries, businesses and organizations

Brand & Public Perception

Peaceful and safe retreat for people to connect with nature in the city/suburbs

Authentic and experiential environment that welcomes all

Birmingham resource

Strong community support

WEAKNESSES

Team & Internal Culture

Additional staff needed for any future growth

Current hiring constraints and limited HR capacity makes hiring new employees a difficult process

Nature Center would benefit from stronger representation and positioning in BHS

BHS has limited resources to assist with conservation efforts

Nature Center Features, Programs & Attractions

Site is landlocked with limited expansion options

Parking is a limiting factor for events

Facility is not designed for competing uses to occur simultaneously (e.g. education, public use, events, etc.)

Few hands-on exhibits in the Visitor's Center

Limited revenue streams to supplement BHS funding

Lack of data on general attendance visitors limits JNC's ability to quantify annual visitation and understand current audiences

Nature Center doesn't know the maximum visitor capacity for balancing visitor experiences and guest impacts on the site

Limited information available for current trail system

Physical accessibility of the site

Community based programs are limited due to cost, staffing and marketing

School educators leading tours & school experiences lack the fundamental knowledge about JNC site and facilities

Brand & Public Perception

Stronger marketing strategy needed to inform the community about current attraction offerings, programs and events

Public doesn't understand the Center's funding structure

OPPORTUNITIES

New Markets

Commercial Photography

Public demand for the following could provide new visitors and sources of revenue

- Public fishing
- Overnight camping
- Food experiences
- Private rentals for events

Customer and volunteer pools are growing among the following groups

- Retiring Boomers who are looking for something to do
- People looking to recover from burnout and stress

Funding and Growth

Economic downtowns result in increased BHS student enrollment

Large pool of potential donors in the Bloomfield Hills area

Grants available through the Dept. of Natural Resource to assist with improving accessibility issues and other site improvements

Corporate partnerships are looking to give donations and volunteer hours

Growing Friends of the JNC group with an ongoing focus to strengthen community support

Several upcoming opportunities for land acquisition (including parcels adjacent to the current Nature Center property)

THREATS

BHS Board & Community

Private school attendance continues to limit the following.

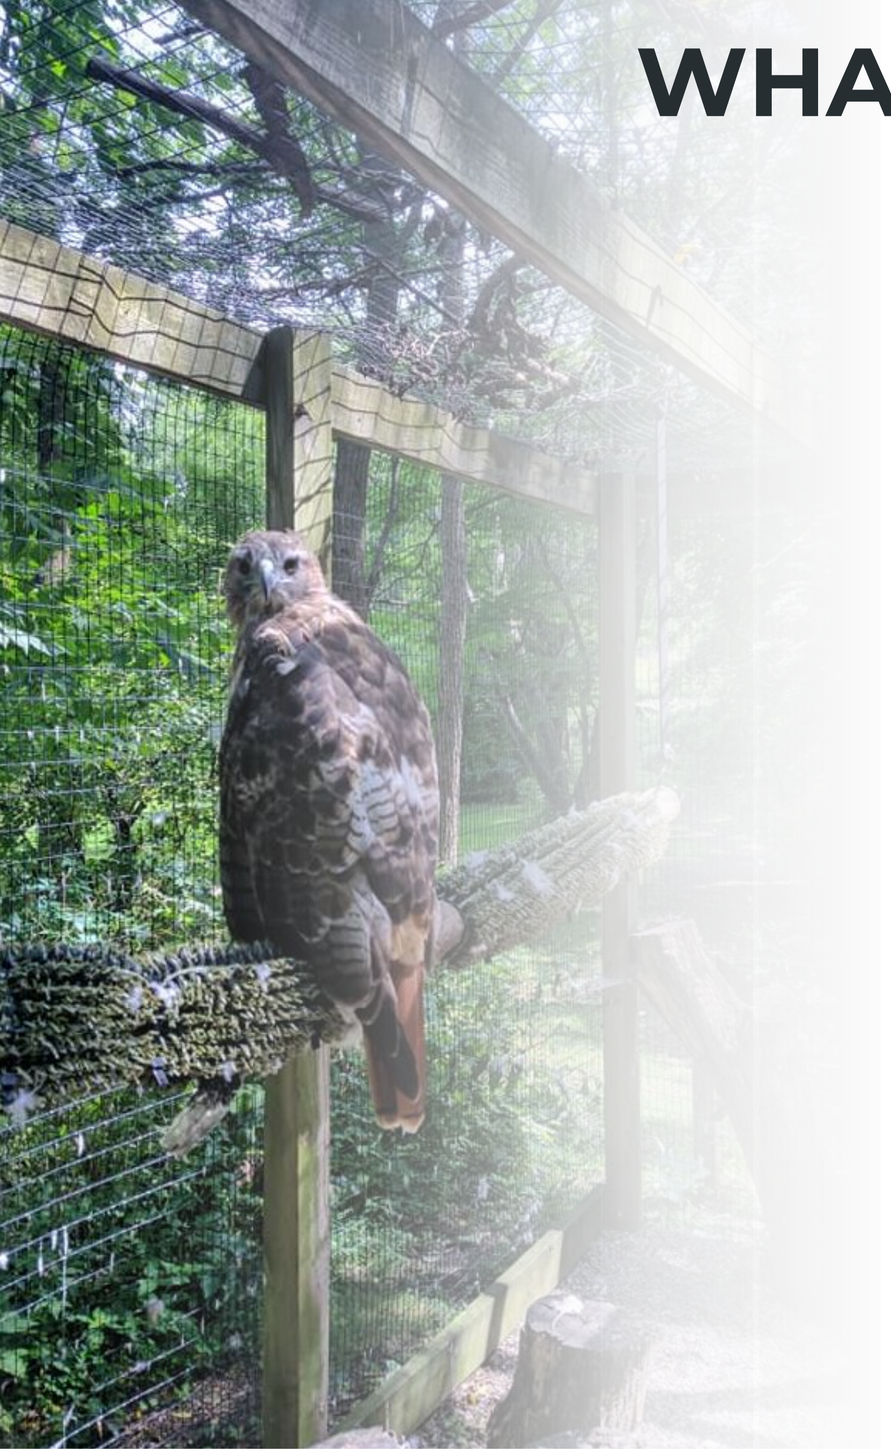
- Financial support
- Students reached through field trips and BHS programs

Competition with municipal funded facilities and programs

Connection with BHS can hinder some grant and donor funding eligibility

Operations

The following issues impact staffing



- Retaining current staff and attracting new staff as many are looking elsewhere for jobs that pay more for less work
- Hiring process and training takes time

Wooded environment and open accessibility to public present opportunities for criminal activity

Conservation Efforts

The following could negatively impact the site's ecological footprint.

- Activity upstream on the Rouge River
- Residential fertilization and run-off
- Climate change
- Invasive species
- Increases in wild animal populations
- Noise pollution from adjacent roads

WHAT MAKES US UNIQUE?

Unique Assets with Engaging Experiences

- Only place to experience nature in Bloomfield Hills
- Site has diverse tree species & ecological systems with strong historical roots/stories
- Effective Land Management program curates different experiences along the trails
- Historic log cabin & associated programs
- Healthy Maple Sugaring program & event
- Innovative fundraising events hosted onsite

Successful Educational Programs

- Friendly & welcoming staff focused on educating and engaging visitors
- Strong ties with surrounding K-5 schools
- Successful and integrated science, social studies & teacher professional development programs
- Bird research & banding program

STAKEHOLDER IDEAS FOR IMPROVEMENT

- Limit human development
- Add acreage if opportunities arise (Gill property targeted - 3.5 acres adjacent)
- Longer hours for Visitor's Center and Log Cabin
- More animals
- Better interpretation signs and exhibits
- More trails (and a variety of trail types)
- Universal design / accessible trails
- Allow dogs
- Food options
- Ropes Course or Nature Play area
- Tree house educational play structures
- Gain control over the creek water flow
- Become a hub for local green clubs
- More community outreach programs
- More connections with other conservational groups
- Add native species wherever possible
- Habitat improvement in areas where invasives are removed
- Hire staff that have a background in ecology, restoration and/or botany
- Hire an expert Wild Land Manager
- Expand education efforts to accompany the Controlled Burn program

THE VISION FOR THE NATURE CENTER IS ROOTED IN...

Innovation

- Innovation with Nature
- Leveraging Technology to Improve Operations and Guest Experience
- Relevant and Engaging Interpretive Signs & Exhibits

Experiences

- Hands-on, Authentic and Engaging All Senses
- Differentiated Trails with Curated Experiences
- Immersive Education / Learning Lab Meeting a Wide Spectrum of Student Needs
- Views & Experiences at Multiple Elevations (Underground, Underwater, Above Ground, Sky)

Permaculture

- Celebrating, Preserving and Enhancing JNC's Biodiversity
- Harmonious Integration of People with Nature (Wellness / Mindfulness, Sustainable Food Sources, Survival Skills)
- Sustainability and conservation

Inclusivity

- Vibrant Community Gathering Space
- Open & Accessible (Trails, Buildings, etc.)
- More Community Programs, Events, Camps, Etc.
- Partnerships for Funding & Targeted User Group Programs (Seniors, Runners, Companies, etc.)
- Equity through Funding Sources and Program Pricing

Impact

- Teach & Inspire Change and Action
- Wildlife Conservation, Education & Sustainability Resource / Leader / Hub
- Resource Rich (Staff, Funding, Community Involvement, Volunteering, etc.)
- Supporting Under Resourced Students

2027 GOALS

What are we doing over the next 5 years to move the Nature Center towards this 20-year vision?

2027 GOALS

Become a Leader in Outdoor Education, Conservation and Sustainability

Focus is on leading nature-based learning and conservation efforts to educate and inspire change and action for all ages

Initiatives will focus on BHS Students first, but also include the BHS Community and other students

Metrics of measurement for leadership impact include:

- Increase in BHS student enrollment
- Increase in standardized test scores
- Increase in nature-based interest topics (student projects, clubs & interest groups, career & college education choices)
- Increase in life skills development

Efforts are led by BHS

Become a Highly Valued, Nature Focused Community Asset

Focus is on building and strengthening relationships with the community

Metrics of measurement for engagement include:

- Increase in return visitation and length of stay
- Increase in JNC volunteerism (numbers and hours served) representing a larger age range
- Increase in revenue generated (sales, programs, events, etc.)
- Expanded membership program rooted in sense of ownership
- Stronger partnerships with community businesses and organizations

Efforts are led by Friends of JNC in collaboration with BHS

Build a Sustainable Operating Model

Focus is on improved operations for environmental, economic, and social successes today and with future growth

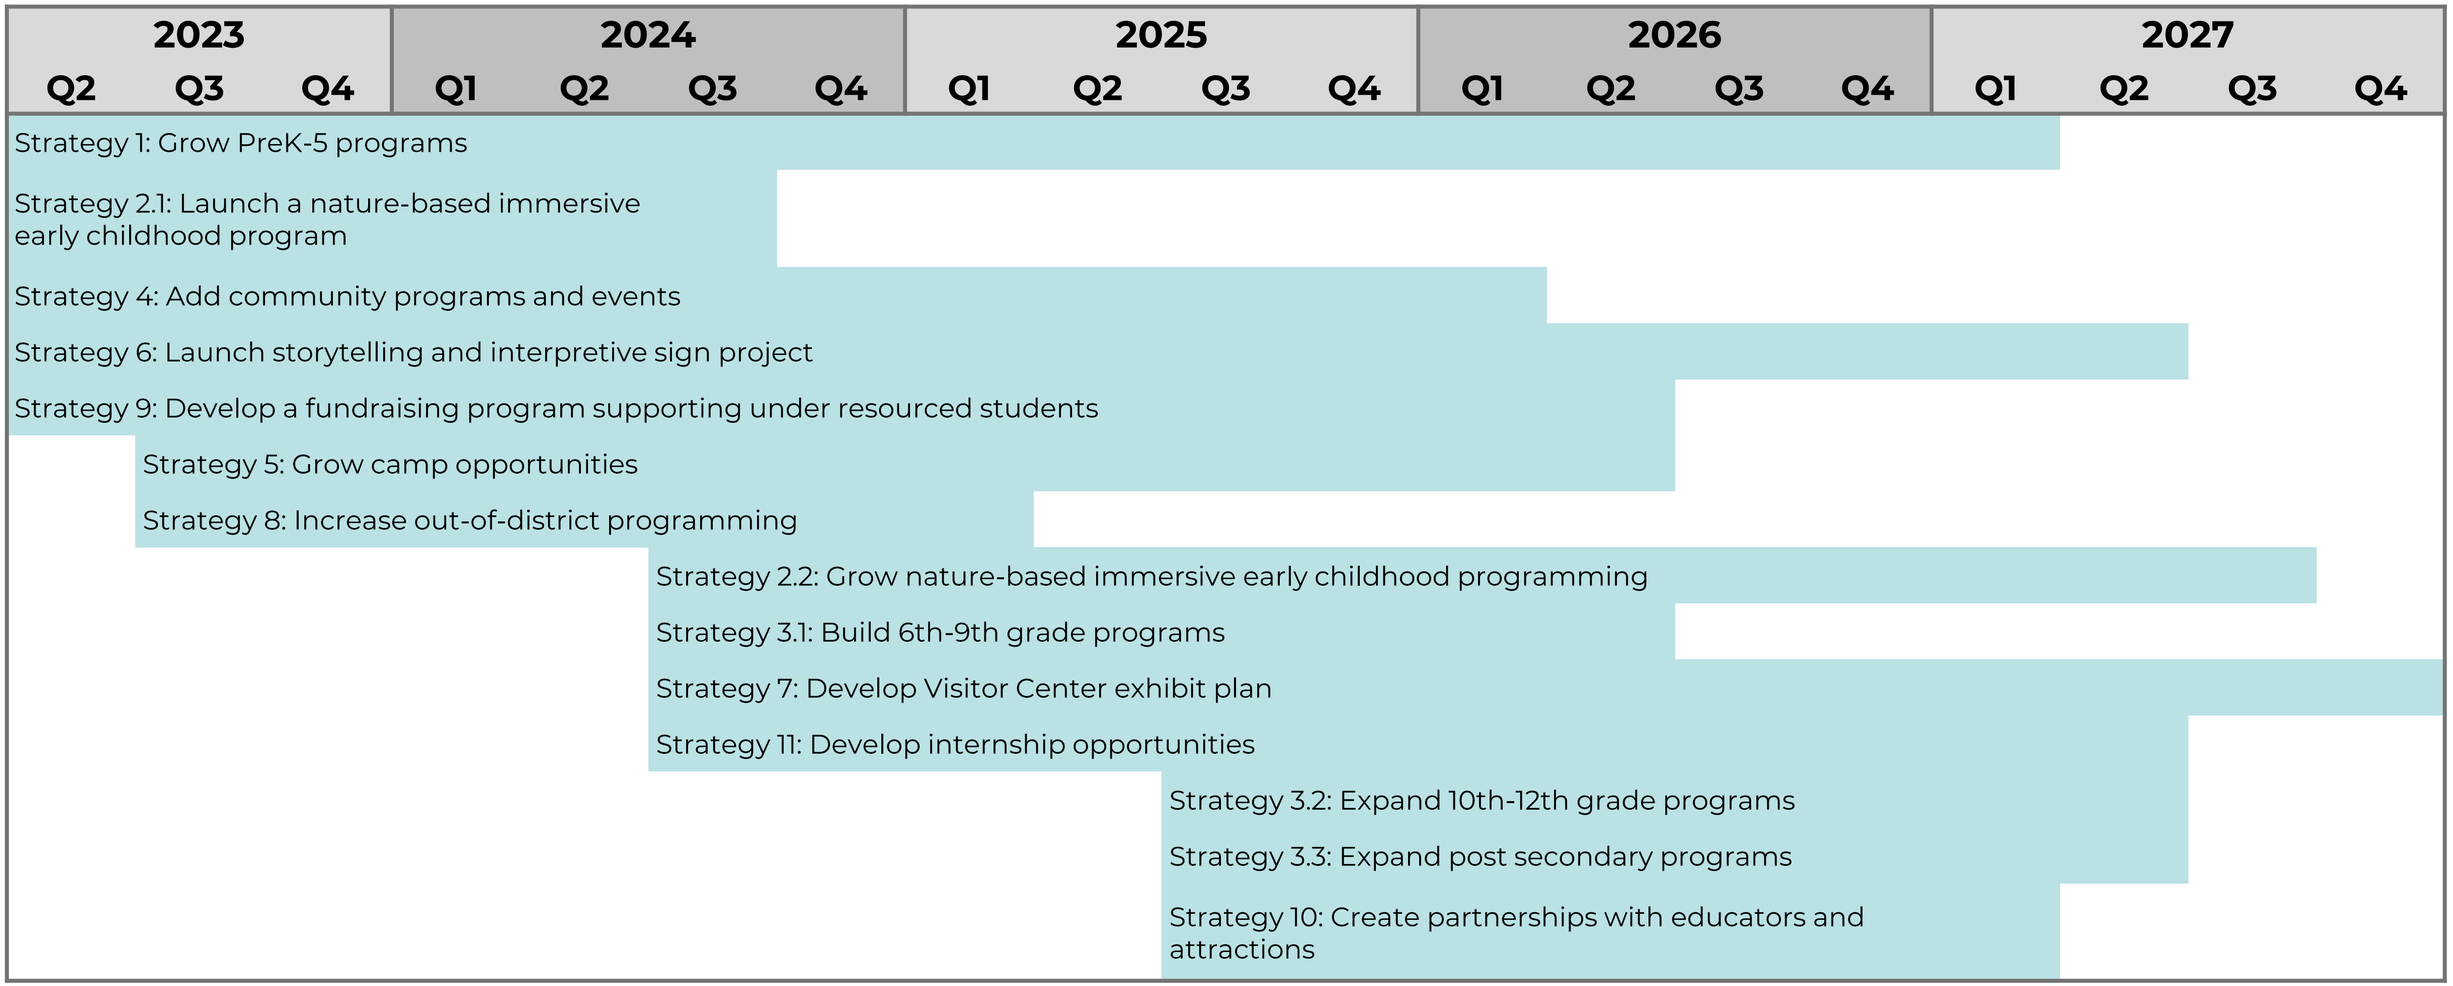
Metrics of measurement for sustainability include:

- Increase in BHS and JNC employment and volunteer numbers
- Strong and diversified funding sources and donor development
- Demonstrate practices that support sustainable philosophy
- Expanded programs rooted in Permaculture that influence JNC's land management efforts and educational messaging

Joint effort between BHS and Friends of JNC

SECTION 2:

HOW WILL WE ACHIEVE OUR GOALS?



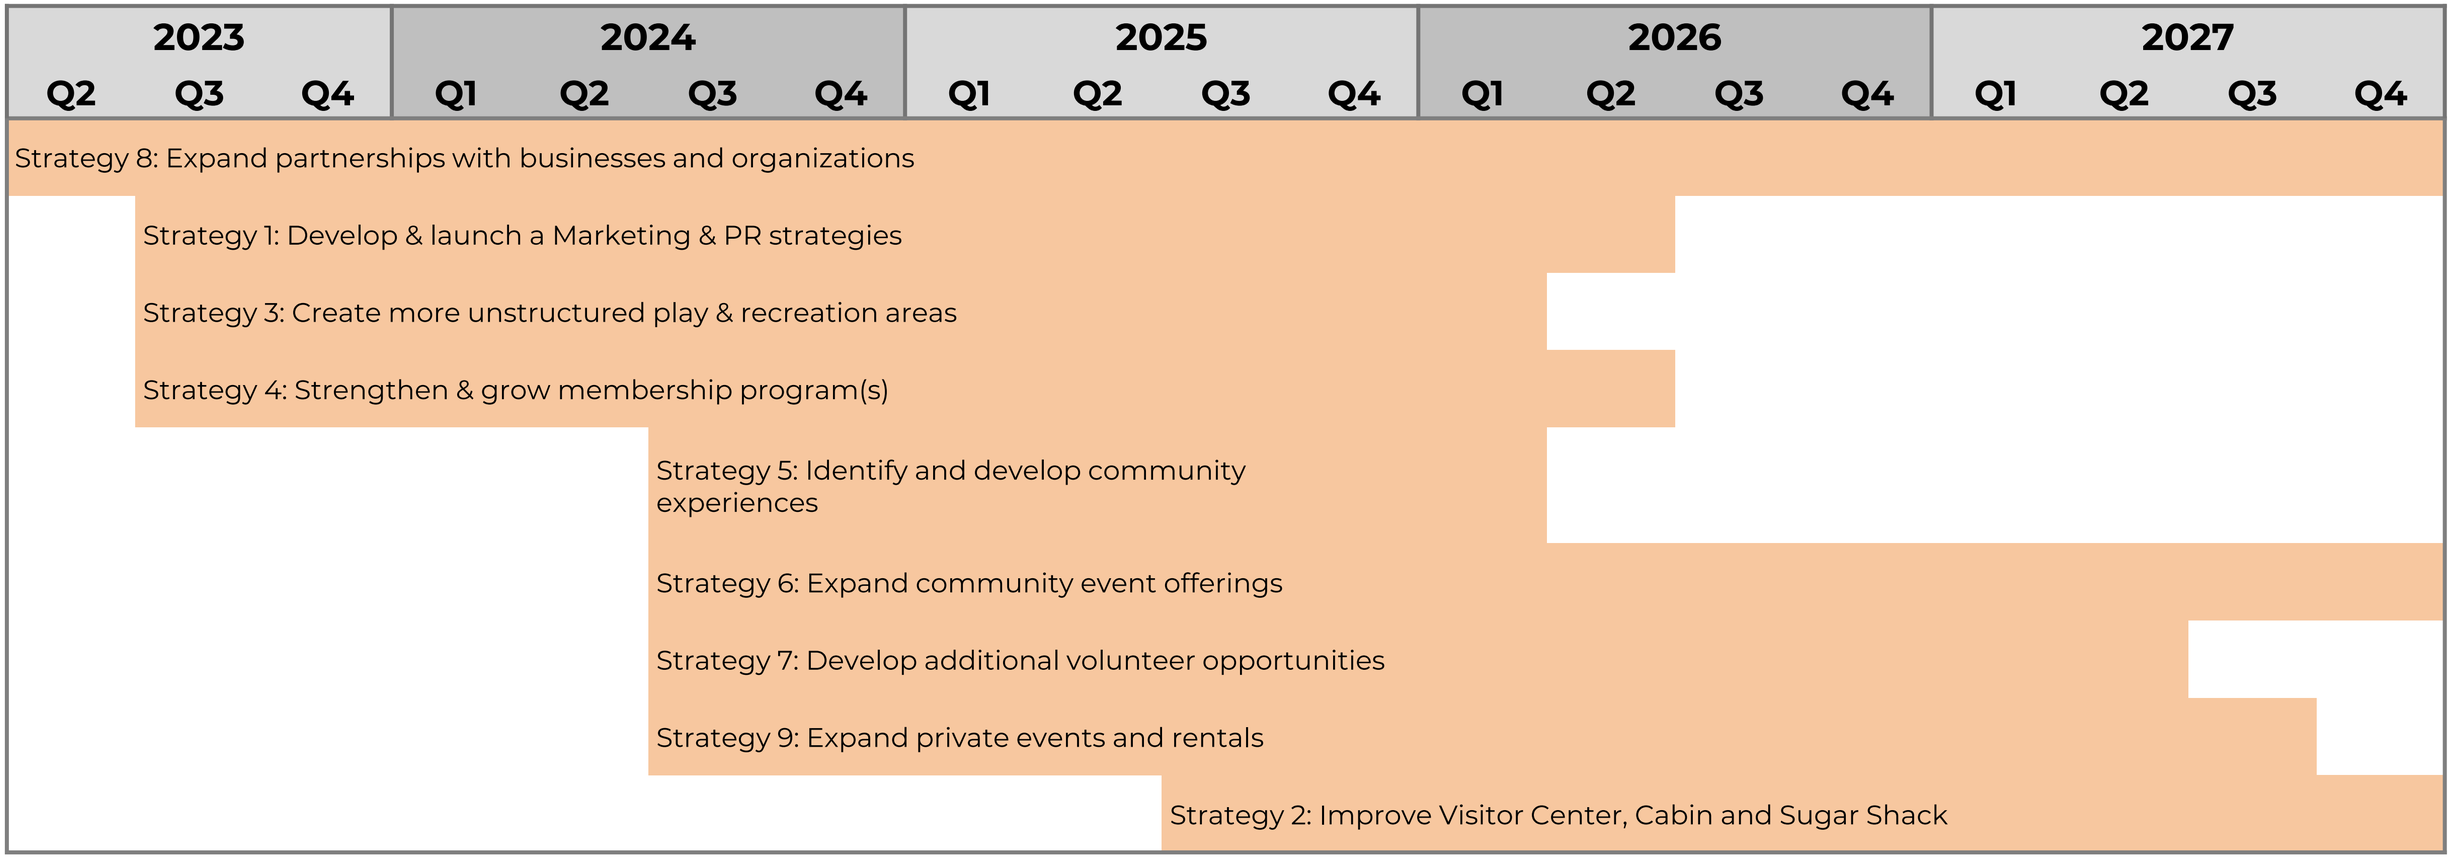
STRATEGIES & TIMELINE

Goal 1: Become a Leader in Outdoor Education, Conservation and Sustainability

1) Continue growing K-5 developing programs
2) Launch & grow a nature-based immersive early childhood program onsite
   - Soft launch in Feb 2023
   - Work on licensing and defining other program needs
3) Expand education programs targeting:
   - Middle school students
   - High school students
   - Post secondary students
4) Create more community programs and events for ALL ages
5) Grow camp opportunities
   - Expand seasonally
   - Expand audiences (all ages)
   - Expand targeted interests/hobbies
   - Work on licensing requirements
6) Launch storytelling, informational and interpretive sign project
   - Differentiate trail experiences and set guest expectations
   - Create a curated experience between trails and attractions (Visitor Center, Cabin, Sugar Shack, animal exhibits, pond)
7) Develop a plan (goals, education topics, schedule and partnerships for acquisition) for Visitor Center exhibits
8) Increase out-of-district school programming
9) Develop a fundraising program to support under resourced students
10) Create partnerships with educators and area learning based attractions to supplement learning objectives and expand educational opportunities
11) Develop additional internship opportunities

STRATEGIES & TIMELINE

Goal 1: Become a Leader in Outdoor Education, Conservation and Sustainability



STRATEGIES & TIMELINE

Goal 2: Become a Highly Valued Nature-Focused Community Asset

1) Develop & launch a Marketing/PR strategy
   - Target the BHS community
   - Communicate the JNC story and offerings (attractions, programs, events, etc.)
2) Improve the Visitor Center, Cabin and Sugar Shack, and align with sustainable operating model
3) Create more unstructured play & recreation areas
4) Strengthen & grow membership program(s)
5) Identify and develop types of experiences that community members are looking for
6) Expand community event offerings
7) Develop additional volunteer programs & opportunities
8) Identify & cultivate strategic partnerships with key businesses and organizations
   - Expand programs targeting specific user groups
   - Expand fundraising opportunities
9) Expand private events and rentals that align with the philosophy and principles of conservation and sustainability

STRATEGIES & TIMELINE

Goal 2: Become a Highly Valued Nature-Focused Community Asset

STRATEGIES & TIMELINE

Goal 3: Build a Sustainable Operating Model

1) Define sustainability and adopt a set of principles to guide all operational practices
2) Acquire parcels of adjacent land for growth
3) Develop a formal land management plan addressing invasives, visitor experience, stream flow control and Maple tree replenishing
4) Develop an accessibility plan (based on consultant's ADA evaluation) for improving guest accessed areas
5) Develop a maintenance plan for aging facilities
6) Develop a plan for Wing Lake School House to better support JNC story, programs and events
7) Develop a program to capture and assess the visitor information (attendance, length of stay, peak on property and impact on environment and guest experience)
8) Create a communication strategy between staff and volunteer groups that facilitates improved internal communications and externally showcases volunteer work
9) Develop a program that builds awareness of relationship with Bowers School Farm
10) Create employee programs to provide benefits and growth opportunities for all employees
11) Conduct staffing assessment that reviews current and future needs
    - Add Staff to fill current gaps
    - Evaluate workload and position responsibilities for better work/life balance
    - Increase future capacity through strategic hiring (example: Land & Nature Center Manager, Grant Writing / Fundraising Support, Horticulture Resource, Instructors, Community Impact Coordinator, Marketing Director, Dedicated Receptionist)
12) Grow the Friends of JNC group and expand their role to better support community focused initiatives and help eliminate funding and staffing barriers

STRATEGIES & TIMELINE

Goal 3: Build a Sustainable Operating Model

2023			2024				2025				2026				2027			
Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Strategy 1: Define sustainability																		
Strategy 2: Acquire parcels of adjacent land																		
Strategy 8: Create an internal comm. strategy																		
	Strategy 3: Develop a land management plan																	
	Strategy 4: Develop an accessibility improvement plan																	
	Strategy 5: Develop a maintenance plan																	
	Strategy 11: Conduct staffing assessment																	
	Strategy 12: Grow Friends of JNC group																	
							Strategy 6: Develop a plan for Wing Lake School House											
							Strategy 7: Develop a visitation data program											
							Strategy 9: Develop a program that builds awareness of BSF											
							Strategy 10: Create employee programs

Define our Starting Point

- Assess current site, facilities and operations
- Assess current market performance
- Identify SWOT

Define our Destination

- Identify goals and vision for next 5 yrs
- Define the strategies and action plan to reach these goals

Create a Roadmap for Implementation

- Design the program and site plan for Nature Center improvements
- Identify key stories and overarching messages for guest experience
- Phased diagrams and illustrations to build stakeholder excitement and assist with fundraising efforts

PHASE 3 EXECUTIVE SUMMARY

BRAND EXPERIENCE

After the results of Phase 1 and Phase 2 were compiled, the stakeholders met to discuss how the Goals and Strategies outlined in Phase 2 could be implemented at the Johnson Nature Center site to achieve the 20 year (i.e. long-term) vision. From this detailed discussion, which included facility and site programming, design styles, architectural materials, service and guest circulation, animal needs and visitor experiences, we concluded that our master plan should focus on creating stronger and more meaningful connections between these two sister sites (Johnson Nature Center and Bower School Farm).

By outlining the shared experiential characteristics of both facilities alongside the unique attributes that make each special, a shared brand experience was created. Entitled “Nourish,” the brand experience seeks to create a framework upon which all guest experiences shall be formulated. Messaging and experiences fall within categories which are easily marketable and understandable by the general public and can even influence wayfinding design. These four categories include: Mind, Body, Soul, and Land.

For Johnson Nature Center, the Nourish brand is expressed as multiple focused activities and messaging zones distributed throughout the site. Each represents a Nourish focus of Mind, Body, Soul or Land, supporting consistent messaging and identification. For example, the Soul zone message of the importance of connecting with nature for mental and spiritual health can be experienced through exploring the Reflection Trail, a walking trail along the stream and into the most remote areas of the park with interpretive signage prompting guests with meditations, thoughtful reflections, poetry about nature, etc. Outdoor art incorporated throughout the trail network is directly connected to the Soul focus.

IMPLEMENTING THE VISION

In order to define initial projects, the holistic long-term site vision was created. This long-term vision plan is the fully realized and implemented brand experience. Although growth in attendance is supportive of the mission of the nature center, the vision plan is more responsive to the need for increased education program capacity, ease and efficiency of wayfinding and accessibility throughout, and increased effectiveness of educational messages to all guests.

Because of these goals, the vision plan includes a fully redesigned entry experience from the road to the pond, pulling guests through an orientation of the nature center and down an accessible pathway to a gathering and rental pavilion overlooking the water. Another opportunity for community gathering and relaxation will be provided with a small coffee shop that also sells local and nature-related products. Adjacent to the renovated visitor center is a new education facility with dedicated drop-off zone, indoor and outdoor classrooms, staff offices and support spaces. Key interpretive elements within the site are replaced and / or renovated, such as a new enlarged sugar shack and new animal habitats, and an ADA accessible trail connecting major points of interest. Interpretation throughout the facility is upgraded including an innovative distributed approach to nature center messaging featuring interpretive hubs distributed throughout the park, which replace a more museum-like centralized interpretive center at the entrance. Finally, to make the Nature Center more appealing to local families, nature play is added throughout the park and within a centralized Nature Playground convenient to the parking area.

The first step in achieving this long-term plan is defined via a 5-year Master Plan subdivided into five phases. Many of the long-term vision elements will be accomplished in this short-term plan. The key exceptions include the new education building and service area.

The estimated budget of the short-term plan is $2.6 million (which accounts for inflation). In conjunction with added programming targeting students and community visitors and a marketing strategy, these improvements are projected to increase attendance to the Nature Center by 22% (from ~45,000 to ~58,000).

SECTION 1:

DEFINING THE BRAND EXPERIENCE

“WHAT DO YOU WANT TO NOURISH TODAY?”

DIFFERENTIATORS

OVERARCHING BRAND

Authentic

Southeast Michigan Focused

Approachable

Comfortable

Land Stewardship

Lifelong Personal Growth Focused

‘Get Yer Hands Dirty’ Experiential

Dynamic (Seasonally & Experientially)

THE FARM

- Agricultural Settings & Experiences
- Blending Historic & Modern
- Supportive
- Sustainable (Human Centered Stewardship)
- Colorful & Bold
- Concise and Clear (Efficient?)
- ‘Buzzing with Activity’ / Directed Activity

THE NATURE CENTER

- Nature Experiences
- Rustic & Timeless
- Nurturing
- Nature-first Stewardship
- ‘Of the Earth’—Subdued, Earth Tones
- Safely ‘Lost’ in the Woods
- Self-Reflective, Contemplative, Informal Rec.

BRAND IDENTITY

The NOURISH Project

The Farm

The Nature Center

LAND (Sustainability)	BODY (Health)	MIND (Learning)	SOUL (Connection)
• Facilities as Stewards • Ecosystems • Animal Exhibits • Our Roots (History w/ land)	• Food • Physical Fitness	• Formal Programs • Academy, Early Childhood & MS / HS • Learn a New Skill	• Connect to Land, Animals, Nature (Feed the Soul) • Artfulness • Mental Wellness • Community-focused spaces / events

BRAND EXPERIENCE

The Nourish NATURE CENTER

LAND

- Interpretive trail about ecosystems & prescribed burn
- Animal habitats
- Interpretation about edible & medicinal landscape (Nature's bounty)
- Various native gardens
- "Our ROOTS" zone: historic cabin & maple sugaring

BODY

- Physical play areas
- ADA accessible trail
- Nature-based fitness trail

MIND

- Spaces for all formal programs
- Early childhood programs facility needs
- Orientation space / entry / Interpretation hubs
- Staff support spaces

SOUL

- Meditation trail
- Quiet spaces
- Art in landscape (play structures or otherwise)
- Water connection
- Gathering / Event Space
- Café

BRAND EXPERIENCE

The Nourish NATURE CENTER

DESIGN AESTHETIC:

Rustic Contemporary Lakehouse

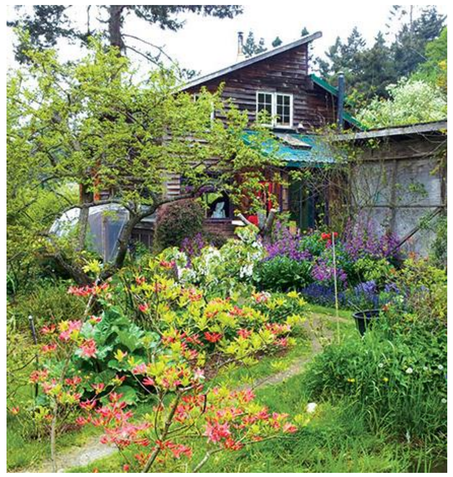
ATTRIBUTES:

- Local / green materials like wood natural stone
- Many windows w/ bird protection to connect indoors to outdoors; thoughtful lighting design
- Exposed wood ceilings and heavy timber structure / beams
- Multi-peaked roofs
- Contained, not controlled natural, wild native landscape
- Simple, clear, bold, oversized fonts on directional and wayfinding signs
- Muted earth tones
- Overall, directed by nature and connected to nature

NOURISH NATURE CENTER

LAND

KEY MESSAGE:



People must work to conserve & preserve our natural resources, and in return, we benefit in many ways from the natural systems.

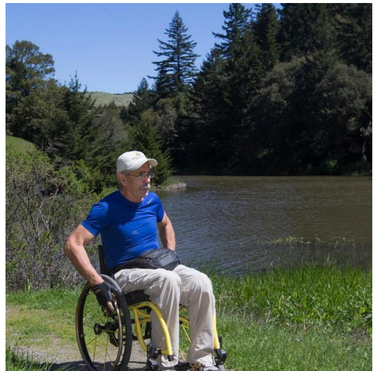
KEY EXPERIENCES:

- Forest trails with interpretation about local ecosystems & conservation efforts
- Native animal habitats
- “Nature’s bounty” and native gardens with interpretation about forest foraging, bee conservation, native vs invasives, & edible / medicinal plants
- “Our ROOTS” zone highlighting how early Michiganders lived off the land including maple sugaring

Sugar Shack

Sugar Maple
Spile
JOHNSON
NATURE CENTER
SUGAR
SHACK
Maple Sugaring
Let's get Sap Happy!
Maple Sugaring
Science of Sugaring

NOURISH NATURE CENTER



BODY

KEY MESSAGE:

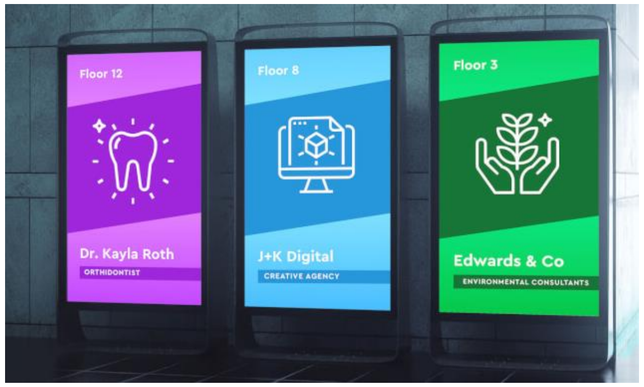
Nature is the perfect place for all abilities to engage in physical fitness.

KEY EXPERIENCES:

- Nature play with several focus zones allowing children of all ages to explore, imagine, and engage nature in physical play
- Challenge trail with steep grades and outdoor fitness prompts for those looking for formalized forest fitness
- Accessible trail around the pond featuring views, animal habitats, interpretation, universally-designed fitness equipment, and access to the Our Roots zone
- Formal play elements located throughout the forest trails for kids of all ages to explore

Nature Playground

NOURISH NATURE CENTER



MIND

KEY MESSAGE:

Nature itself is a classroom—where students of all ages learn about nature and themselves.

KEY EXPERIENCES:

- Beautiful education building seamlessly connecting interior spaces to nature is the headquarters and support for classes, field trips, camps, early childhood development, and community programs
- “Welcome Center” orients visitors to the on-site nature experiences and is the launch pad for learning at interpretive hubs found throughout the trails
- Interpretive hubs located throughout the Nature Center rather than in one central location

NOURISH NATURE CENTER

SOUL

KEY MESSAGE:

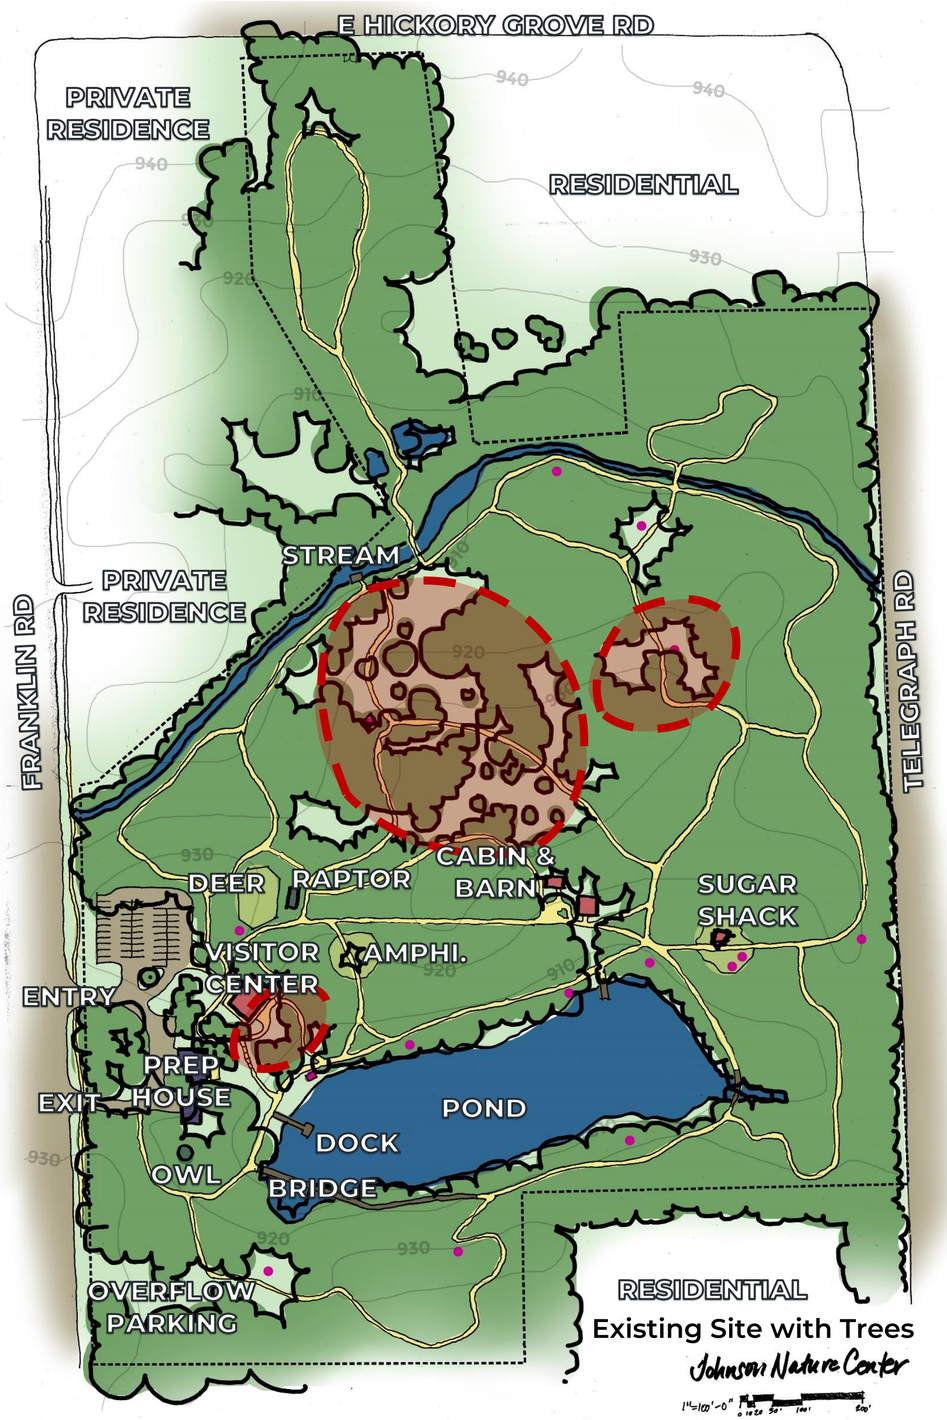
"Just being surrounded by bountiful nature, rejuvenates and inspires us." --EO Wilson

KEY EXPERIENCES:

- Reflection trail with guided meditations, mantras, and prompts for spiritual connection to nature
- Thoughtfully placed benches for respite
- Art incorporated into the landscape through poetry, sculpture, and playful interactive moments
- Gathering / Event Space overlooking pond for building community
- Small café and store with carefully curated products and opportunity to sit and recharge surrounded by nature

SECTION 2:

IMPLEMENTING THE VISION



‘NOURISHING’ THE SITE

Bloomfield Township Fire Department

4200 Telegraph Rd. P.O. Box 489
Bloomfield Township, MI 48303-0489
Office 248-433-7745
Fax 248-433-7787

Occupant Name:	EUGENE JOHNSON BLMF. HILLS NATURE CENTER	**Address:**	3325 FRANKLIN Road
InspectionType:	Annual Inspection	**Suite:**	
Inspection Date:	8/3/2026	**Occupant Number:**	1909301022
Inspected By:	Lt. Michelle Martin	**Property Owner:**	BLOOMFIELD HILLS SCHOOLS 4200 ANDOVER MI 48302

Complex Name:

Insp. Result	Location	Code Set	Code
Fail		IFC 2018 CHAPTER 10 MEANS OF EGRESS	1008.3 - Emergency power for illumination.

Inspector Comments: ACTION REQUIRED: REPAIR /REPLACE EMERGENCY LIGHT FIXTURE.

-Inside stairwell leading to basement classrooms emergency light

Fail		IFC 2018 CHAPTER 9 FIRE PROTECTION AND LIFE SAFETY SYSTEMS	903.5 - Testing and maintenance.

Inspector Comments: ACTION REQUIRED: TEST AND CERTIFY OPERATION OF WATER BASED SPRINKLER SYSTEMS, PROVIDE INSPECTION REPORTS AND CORRECT DEFICIENCIES IF NECESSARY. THIS TEST IS REQUIRED ANNUALLY.

-July 2025

Fail		IFC 2018 CHAPTER 9 FIRE PROTECTION AND LIFE SAFETY SYSTEMS	906.7 - Hangers and brackets.

Inspector Comments: ACTION REQUIRED: PROPERLY MOUNT FIRE EXTINGUISHERS IN A CONSPICUOUS LOCATION.

-Bat Cave

Fail		IFC 2018 CHAPTER 5 FIRE SERVICE FEATURES	509.1 - Identification of fire protection equipment

Inspector Comments: *A clear path is needed for the exterior FDC

Inspector will return on or after 9/3/2026

The Fire Department will reinspect your facility **on or after** the date provided above. At that time, we will expect all the violations listed in this inspection letter to be corrected.

The annual inspection and the first reinspection are at **no cost** to the business. However, each subsequent inspection after that will incur a $85.00 charge per inspection.

The business representative signing this document understands and accepts responsibility for any fees that may be assessed for non-compliance.

If you have any questions regarding this inspection contact the Fire Inspector that conducted your inspection. Their information is listed at the top of the page.

Inspector:

Lt. Michelle Martin

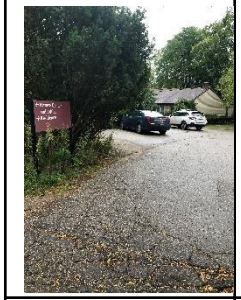
Accessibility Evaluation and Barrier Removal Recommendations

The identification of accessibility barriers is the key to developing strategies to remove barriers to enhance accessibility for all people of all abilities utilizing this environment. This accessibility evaluation was conducted on site September 26-28, 2022. The following report identifies accessibility barriers observed, the Americans with Disability Act Accessibility Guideline citation relevant to the identified barrier, and barrier removal recommendations for each identified barrier. The intent of the report is to assist the nature center staff in making thoughtful informed decisions to remove accessibility barriers and improve inclusive universally accessible experiences for everyone together. The following general observations and environmental, programmatic, and operational barrier removal strategies are intended to give overarching guidance that can affect specific accessibility decisions for the environment as well as programs and services.

Environmental, Programmatic and Operational Accessibility Barriers	**Accessibility Enhancement Recommendations**
No connected accessible routes to outdoor classrooms or interpretive experiences such as the cabin, sugar shack, wildlife enclosures, floating docks, fishing pier, canoe launch, benches, bridges, etc.	It is imperative that accessible connecting routes be developed to the outdoor classrooms and interpretive experiences. All students and guests should be able to, at a minimum, visit and experience these amenities. There is plenty land space to create these accessible routes with thoughtful planning and professional design, so routes don't go straight up and down steep slopes. Engaging trail design professionals to develop accessible reroutes to these main amenities will result in greater accessibility as well as environmental protection of the nature centers property. Additionally, the purchase of at least two accessible hiking wheelchairs such as the Action Track Chair, Terrain Hopper, or GRIT wheelchair will greatly enhance access. These hiking assistive devices should be available for free use for all programs and on all days/times the nature center is open. They should be advertised on the website and set out for use whenever staff is on site and the center is open.

Extreme slopes on every trail and pathway render them technically inaccessible to guests with mobility related disabilities who use personal mobility devices.	The layout of current trails and the new trails have not been designed to reduce running slopes. It is imperative to give guests steep slope information so they can decide if they have the ability and adaptive equipment to safely navigate each trail. This information should be given at each trail intersection and can be incorporated into the site map. In order to give accurate slope information a professional mapping of the entire site should be conducted. The ADA requires trail length, running slope, cross slope, trail tread width, resting locations, and surface condition information be provided. A great example of trail accessibility information signage is the Heritage Trail in Sleeping Bear Dunes National Lakeshore.
The inaccessible woodchip surface is neither firm or stable and very difficult to traverse with any personal mobility device, wheeled walkers, strollers, canes, crutches, etc. as well as for people with walking and balance difficulties and might be why many seniors and young parents pushing little ones in strollers underutilize the trails.	Many of the trails appear to have geotextile underlayment fabric which helps stabilize the soils beneath and provide some root protection, but it has not been maintained over time and is degrading in many areas. The chunky loose woodchips over this trail tread base makes the trail surface very unstable and therefore difficult to traverse. The woodchip surface also migrates off the underlayment and piles at the end of sloped segments creating woodchip mounds at hill bottoms. Removing the inaccessible woodchip surface by brushing it off to the sides, removing mounded piles at the bottom of sloped segments and not replenishing it is one idea to consider, this gets the trail tread back to natural packed earth. If there are soil segments that are loose/unstable there are a variety of soil stabilization products that can be topically applied. After removing the inaccessible woodchip surface, top dressing areas with exposed geotextile underlayment with accessible ¼" crushed aggregate provides further soil stabilization and enhances accessibility. Another option is to just stop replenishing the inaccessible woodchip surface and let it decompose and then top dress with accessible ¼" crushed aggregate to stabilize it.
The map on the web site gives no accessibility information regarding trail distances, bench locations, inaccessible slopes, surface information. The map is incomplete and has inaccurate information provided and the new proposed map has no accessibility information either, is also incomplete and inaccurate in the information provided and the size of font and color contrast make the map visually inaccessible as well.	As noted above, there are examples of good accessibility information signage and website information to help guide the development of better accessibility information for the nature centers signage, site maps and website information. It is imperative to have accurate information for accessibility barriers as well as for safety of guests in an emergency. Inaccurate signage and map information can lead to lost guests…
No directional or interpretive signs provide information in any alternative accessible formats	Providing information in alternative formats can greatly enhance access for people with vision impairments and non-readers alike. Automated systems exist that connect to cell phones that "ping" when someone approaches an interpretive information sign or trail intersection.

Some of the accessibility barriers are due not from design but ongoing maintenance of constructed features such as boardwalks and bridges.	Developing a robust maintenance program to maintain the accessible features of the site can greatly enhance accessibility for everyone. This requires time and expertise to identify areas in need of maintenance and to preform the upkeep. Some simple things like keeping encroaching vegetation cut back from the sides and overhead could be done by volunteers.
The website has no accessibility information regarding programs or the facility	As a school district program, you have an obligation to provide accessibility accommodations for all your programs and this should be articulated on your website. Developing informative accessibility information on the website will help visitors to plan their visits as well.



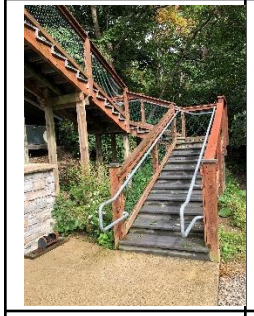


Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
 	Main parking lot – 43 total spaces No accessible parking spaces, 2 van accessible spaces required Asphalt surfacing has many changes of level due to cracking and disrepair Staff parking next to PREP program house – 4 spaces No accessible parking spaces, 1 van accessible space required	502	Add 2 accessible van parking spaces Add 1 van accessible parking space in the staff lot as well
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Access Route from staff parking to visitor center sidewalk Inaccessible woodchip surface Good stone edging to define trail tread Clear width obstructed by encroaching vegetation	402 403 302	Remove inaccessible woodchip surface and replace with accessible ¼” crushed aggregate surfacing Trim encroaching vegetation and develop an ongoing maintenance plan to keep encroaching vegetation cut back

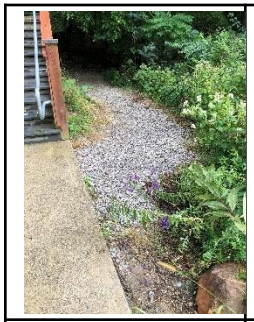

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Visitor center front entry Clear space in front of donation station blocked by trash can Inaccessible grass surface in the clear space of the donation station	402 403 302	Move trash out of the required clear space in front of the donation station Move donation station to the edge of the sidewalk accessible surfacing
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Access route to trail head from visitor center Inaccessible grass surface Indicated on map but no directional sign and inaccessible grass surface on the route	402 403 302	Either remove the route from the map or add accessible surfaced route from the visitor center sidewalk to the trail head
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Waterfall and viewing bench Too low at 12” Inaccessible grass and woodchip surface Drop off from concrete sidewalk to grass surface	402 403 302 903	Replace inaccessible grass and woodchip surface with accessible ¼” crushed aggregate surface from sidewalk in front of the bench and side creating inclusive side-by-side seating space Raise bench to accessible height 18”

Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com

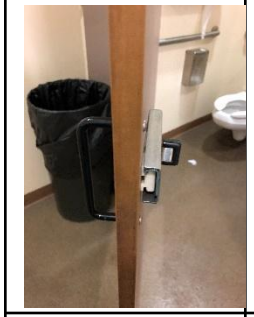
Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
 	Visitor center perimeter path to lower-level classroom entry Encroaching side vegetation reduces accessible route to less then 5’ Encroaching overhead vegetation lowers the head clearance to less than required 80”	402 403 302	Trim encroaching vegetation and develop an ongoing maintenance plan to keep encroaching vegetation cut back to the sides and overhead (80”)
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com

 	Interpretive information sign and rain gauge on perimeter route to lower-level classroom Encroaching vegetation blocks visual access to the interpretive information Rain gauge is located off the accessible route with encroaching vegetation in the clear space Rain gauge too high at 64”	402 403 302 308	Trim encroaching vegetation and develop an ongoing maintenance plan to keep encroaching vegetation cut back Lower rain gage to 48” max. within accessible reach ranges
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Stairs to upper deck of visitor center Good accessible design	504	
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

	Gravel path up to deer enclosure Shown on map but not named Inaccessible large chunk gravel greater than ¼” Steep slopes +25% up to deer enclosure and down to the fork to the outdoor classroom	402 403 302 Outdoor Rpt. 1017	 Name and sign as “caution steep slopes” and indicate on map Top dress with accessible ¼” crushed aggregate surface & develop a regular maintenance plan
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Stone steps down to Pondside Trail midway on access route to lower level of the visitor center Inaccessible grass surface Steep slope down to sloping lawn area	402 403 302 Outdoor Rpt. 1016	As this is the only route from the visitor center lower-level sidewalk to the lower lawn area, fishing pier, boat launch, boardwalk and Pondside Trail there is space to regrade/reroute to create accessible route to pond side amenities
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Visitor center women’s and men’s restrooms Entry door from outside deck Accessible sign located inappropriately on the door	703	Move accessible sign to latch side of the door and mount at max. 60”

Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com



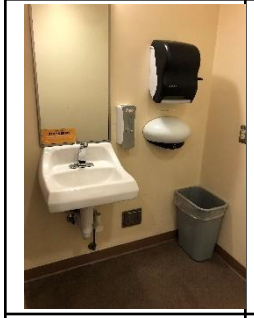


Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
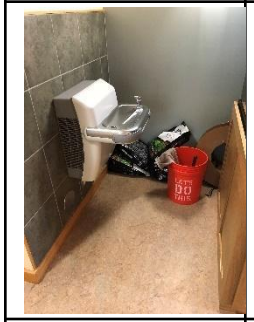
	Women's restroom Portable child's potty seat located in the clear space to the side of the accessible toilet	402 403 302 305	Move portable items out of the required clear space
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Women's accessible stall door No inside "U" handle	309	Add "U" handle below slide lock to facilitate one hand operation of door closing and locking
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Women's restroom Portable step in the clear space at front of sink	305	Move portable items out of the required clear space

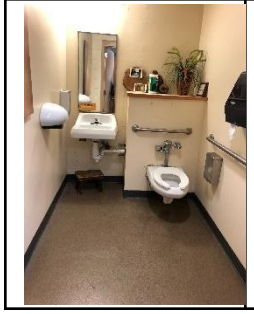
Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Visitor center women's and men's restrooms Entry door from inside visitor center Accessible sign located inappropriately on the door	703	Move accessible sign to latch side of the door and mount at max. 60"
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Visitor center men's restroom Paper towel dispenser too high at 54" Trash can in the clear space of the hand dryer and paper towel dispenser	308 305	Lower paper towel dispenser to 48" max. within accessible reach range Move trash can out of the required clear space under the hand dryer and paper towel dispenser
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Men's restroom Urinal too high at 18 ½"	605	Lower urinal to accessible height of less than 17"

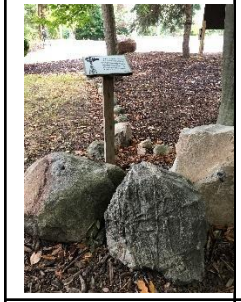
Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
 	Visitor Center main entry door Automatic door opener in-operable from outside and inside	404	Repair immediately and test on regular basis to see that it is operable during all public hours
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Visitor center reception counter Too high at 42”	902	Add a lowered reception counter max. 36” high If no longer used as a reception desk consider moving to a different location and using as display space

Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com







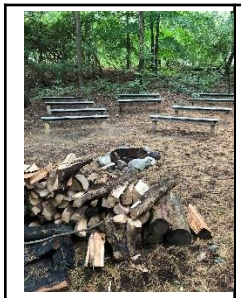


Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Accessible water fountain Clear space blocked by placement of non-permanent turtle tank and stored “stuff”	305	Remove/relocate portable “stuff” in the required clear space of the water fountain Move turtle tank out of the required clear space
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Visitor center lower-level unisex accessible restroom Trash can in the clear space of the accessible restroom sign	305	Remove/relocate portable “stuff” out of the required clear space in front of accessible sign
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Lower-level unisex accessible restroom Toilet paper dispenser located too far forward of the stool front at 20”	604.7	Reposition toilet paper dispenser to be 7” min. 9” max in front of toilet

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Lower-level unisex accessible restroom Interior door lock requires pinch grasp	309	Replace locking mechanism with design that is one hand operable that doesn't require pinch grasp/wrist twist
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Lower-level unisex accessible restroom Trash can in the clear space of the accessible paper towel dispenser	305	Move the trash can out of the required clear space in front of the paper towel dispenser
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

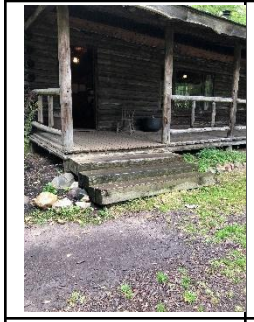
 	Information Kiosk near parking lot at entrance to trail from parking lot & sidewalk to visitor center Inaccessible woodchip surface in the clear space in front drop off change of level between unitary surfaces (asphalt parking lot and concrete sidewalk to visitor center) and woodchip surface Bird field check list dispenser Too high at 54” Inaccessible woodchip surface in the clear space	402 403 302 308	Replace inaccessible woodchip surface with accessible ¼” crushed aggregate surface or asphalt to match parking lot or concrete to meet the sidewalk Lower bird field check list dispenser to 48” max accessible reach range
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Main trail from parking lot Trail not signed or named at the site Not identified on the map Inaccessible woodchip surface Good stone edging to define trail tread	402 403 302 Outdoor Rpt. 1017	Name and indicate on map Remove and replace inaccessible woodchip surface with accessible ¼” crushed aggregate from parking lot to deer enclosure and side trail to nature center lower level
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Old windmill interpretive sign No clear space in front of interpretive sign, blocked by interpretive mill stones No braille or other type of accessible interpretation	305	Move interpretive sign to the right of the interpretive mill stones on accessible surface connected to the trail in from the parking lot and to the trail in from the nature center sidewalk if that is developed… Consider adding QR code with auto activation for audio description of interpretive information
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

	Deer enclosure interpretive sign Inaccessible woodchip surface in the clear space in front of the interpretive sign No braille or other type of accessible interpretation	305	It appears that there once was accessible ¼" crushed aggregate surface in the clear space of interpretive sign, maintain accessible surface and connect to the trail in from the parking lot Consider adding QR code with auto activation for audio description of interpretive information

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Trail from deer enclosure down to trail intersection of Cabin Trail and Fox Ridge Lookout trail Too steep at +13% running slope Inaccessible woodchip surface No steep slope warning information	Outdoor Rpt. 1017	Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface down to bottom of hill and to the right on the Cabin Trail to the first trail intersection on the right to the outdoor classroom area Add sign with max. slope information sign at top of the steep slope segment
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Side trail on right down to Pondside Trail and outdoor classroom area Trail not signed or labeled on map Too steep at +12% running slope Inaccessible woodchip surface with significant areas of washout creating woodchip mounds	Outdoor Rpt. 1016	Name and indicate on map Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface down to bottom of hill connecting to the Pondside Trail and to the intersection on the right to the outdoor classroom area Add sign with max. slope information sign at top of the steep slope segment
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

 	Outdoor classroom area Not named or listed on map Not connected by accessible route to the route to the lower level of the nature center Good accessible seating spacing between front benches as well as at bench ends for inclusive seating opportunities Reasonably level packed dirt surface No accessible route to fire pit or bench seating area from side trail Inaccessible woodchip surface and large branch debris on route	Outdoor Rpt. 1016	Name and indicate on map Consider adding a connecting access route with accessible ¼" crushed aggregate surface from the side trail into the space below the woodpile between trees (see 2nd photo) to the fire pit and first row of benches and connecting this space to the side trail to the nature center Develop and implement an ongoing maintenance plan to remove large debris from accessible routes and clear spaces on a regular basis on the day before the nature center is open to the public
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
 	Cabin Trail Too steep with +12% running slopes up to the hilltop and +14% running slopes down to the bottom of the hill Inaccessible woodchip surface with significant areas of washout creating woodchip mounds	Outdoor Rpt. 1017	Consider brushing off the inaccessible woodchip surface and returning the trail surface to native packed earth, utilizing soil stabilizers in areas that are "unstable" or top dressing those areas with accessible ¼" crushed aggregate surface Add "steep slope" sign indicating max. slopes up to hilltop and down the other side Consider alternative hiking access via the provision of all-terrain hiking wheelchairs such as the Action Track Chair (most versatile and accessible), the Terrain Hopper, GOGRIT, etc. These devices would need to be available for public use when the nature center is open and staffed and for all groups using staffed experiences. The chairs need to be charged and ready for use, set out for viewing and signed with information on how to obtain access from staff
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**

	Access route to cabin from bottom of trail hill Reasonably level packed dirt and grass surface in some areas Inaccessible woodchip surface	Outdoor Rpt. 1016	Consider a regrade/reroute to reduce running slope to less than 5% (1'/20/) and removing inaccessible woodchip surface and replacing with accessible ¼" crushed aggregate surface on a route to the front of the cabin and up to the barn entry



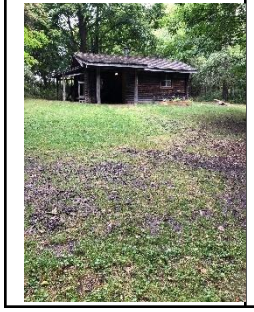


Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
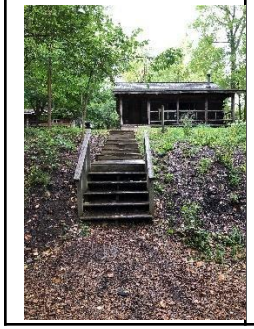
	Working water pump Inaccessible clear space, blocked by constructed wooden box Pounds of force too hard at greater than 5lbs.	305 309	Consider a regrade/reroute to reduce running slope to less than 5% (1'/20/) and removing inaccessible woodchip surface and replacing with accessible ¼" crushed aggregate surface connecting to the trail from the cabin to the barn Consider removing the constructed wood box and surrounding the pump with accessible ¼" crushed aggregate surface Investigate possibility of reducing the pounds of force for pump operation
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Cabin entry No accessible route onto cabin porch Inaccessible non-historic large wood beam steps	402 403 302	Consider constructing a 5' wide ramp onto the porch surface with running slopes less than 5% (1'/20') from the trail
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Porch entry into cabin No accessible route into cabin from front porch +2" change of level at threshold	404	Add beveled threshold to negate +2" change of level

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
  	Cabin interior No accessible route to upper-level loft area Good clear space to all main floor displays	402 403 302	Provide interpretive photos of the loft area at the base of the stairs for those who can't or choose not to climb up to see the loft interpretive information
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Route to barn from cabin No accessible route to the barn Inaccessible woodchip surface mixed with some packed dirt and grass surface	Outdoor Rpt. 1016	Consider a regrade/reroute to reduce running slope to less than 5% (1'/20/) and removing inaccessible woodchip surface and replacing with accessible ¼" crushed aggregate surface from the Cabin Trail to the barn front entry, to garden boxes, teeter totter, and around to back door and route to tree swing

Access Recreation Group, LLC
616-560-2378
AccessRecreationGroup@gmail.com

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Barn doors (both front & back) No accessible route into the barn Change of level +2” and +2” = 4” at threshold	404	Add beveled threshold to negate +2” and 2” changes of level
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Barn interior No accessible route through the barn, route is less than 36” wide due to placement of interpretive items	402 403 302	Reposition items to create a 36” minimum wide route though the barn and to the back doorway
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Rope and board swing behind barn No accessible route to swing Inaccessible woodchip surface	Outdoor Rpt. 1016	Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface from back barn door to swing



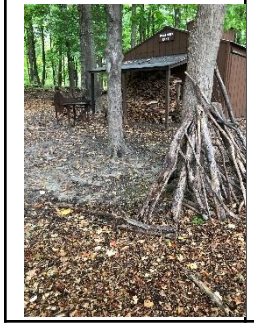


Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Cabin barn tot garden and teetertotter Route surface is packed dirt and grass	Outdoor Rpt. 1016	Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface from the barn front entry to garden boxes, teeter totter, and around to back door and route to tree swing
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
 	Stairs between cabin and Pondside Trail Not accessible design steps No handrail on upper set of stairs	504	Consider adding accessible design handrails on both sides of steps Consider replacing steps with accessible design steps to Pondside Trail Add directional sign to trail to Cabin Trail connection to Pondside Trail

Photo	Barrier Description	ADAAG	Barrier Removal Recommendations
	Side trail up to cabin from Pondside Trail Too steep at 19% running slope with 12.5% cross slope Inaccessible woodchip surface	Outdoor Rpt. 1017	Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface Add “steep slope” sign indicating max. slopes down to the Pondside Trail
Photo	**Barrier Description**	**ADAAG**	**Barrier Removal Recommendations**
	Route to Sugar Shack from Cabin Trail connecting to Sugar Maple Loop Packed dirt surface with woodland debris	Outdoor Rpt. 1016	Consider a regrade/reroute to reduce running slope to less than 5% (1’/20/) and removing inaccessible woodchip surface and replacing with accessible ¼” crushed aggregate surface on a trail to the fire circle and to the entry and exit of the sugar shack

1.0 EXECUTIVE SUMMARY

ASTI Environmental (ASTI) was retained by Oakland County Parks and Recreation to conduct a Phase I Environmental Site Assessment (ESA) of the site at 3325 Franklin Road, Bloomfield Hills, Oakland County, Michigan 48302 (Subject Property). The Phase I ESA was conducted in accordance with United States Environmental Protection Agency (US EPA) Standards and Practices for All Appropriate Inquiries (AAI, 40 CFR Part 312) and the American Society for Testing and Materials (ASTM) Practice E1527-21. The information and opinions presented in this report are intended solely for the reliance of Oakland County Parks and Recreation.

Subject Property Overview	
Address/Location	3325 Franklin Road, Bloomfield Hills, Oakland County, Michigan 48302
Parcel Number	C-19-09-301-022 C-19-09-301-050
Acreage	± 34.57
Current Use	Park and trails

The Phase I ESA included (1) a site inspection on May 1, 2026, (2) interviews with knowledgeable site contacts, (3) review of pertinent Michigan Department of Environment, Great Lakes, and Energy (EGLE), Bloomfield Hills, and Wayne County records, (4) acquisition and review of a federal and state database search, and (5) review of historical aerial photographs, topographic maps, and city directories.

Below is a summary of our opinion, which represents the findings of this Phase I ESA. Affirmative answers are discussed following the summary table.

Condition as defined in ASTM E1527 and/or AAI	Identified through a search of ***Reasonably Ascertainable*** **records**
Significant Data Gap	No
De Minimis Condition	Yes
Historically Recognized Environmental Condition (HREC)	No
Controlled Recognized Environmental Condition (CREC)	No
Recognized Environmental Condition (REC)	No

There appears to have been an approximate 5-acre orchard located on the north-central portion of the Subject Property, but its use was already in decline by 1937. The sparse orchard trees were evident into the 1970s, when they were overtaken by other trees and vegetation that make up the current woodland. Based on the observed operational window, and purpose for this Phase

I ESA (no change in use), the former orchard is considered a de minimis condition. *Furthermore, there is a CERCLA liability exemption for pesticide application for the typical pesticide user when they have done nothing more than purchase and applied a pesticide in a customary manner; however, the burden of establishing entitlement rests on a defendant.*

Refer to Section 10.0 for a more detailed summary of the findings.

Recognized Environmental Conditions

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has not identified any RECs, CRECs, and/or significant data gaps in connection with the Subject Property.

2.0 INTRODUCTION

ASTI was retained by Oakland County Parks and Recreation to conduct a Phase I ESA of the Subject Property. The Phase I ESA was conducted in accordance with the U.S. EPA Standards and Practices for AAI and the ASTM Practice E1527-21.

2.1 Purpose

The assessment was conducted to identify *recognized environmental conditions* (RECs), *historically recognized environmental conditions* (HRECs), and *controlled recognized environmental condition*s (CRECs) associated with the historical uses of the Subject Property, current site operations, and the condition of surrounding properties. This Phase I ESA can be used by Oakland County Parks and Recreation to qualify for one of three landowner liability protections (contiguous property owner, innocent landowner, or bona fide prospective purchaser) available under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. This Phase I ESA may also be used to qualify for State of Michigan liability defenses and exemptions that may be available under Part 201 of the Natural Resources and Environmental Protection Act.

2.2 Detailed Scope of Services

Information required to complete the Phase I ESA was obtained from personal interviews and a review of *practically reviewable* and *reasonably ascertainable* records. Informational sources include the following:

Section	Item	Adequate	Inadequate/ Data Gap	Source
7.0	Interviews		x	Owner Questionnaire
4.0	User-Provided Information		x	Questionnaire
4.1/4.2	AUL/Liens Search		x	User
5.2.3	Assessing Documents	x		Bloomfield Hills
5.2.4	Building Permits	x		Bloomfield Hills
5.2.5	Zoning Documents	x		Bloomfield Hills
5.2.2	Fire Department Records	x		Bloomfield Hills
5.2.1	Health Department Records	x		Oakland County
5.3.1	Aerial Photographs	x		EDR
5.3.2	Sanborn Map Search	x		EDR
5.3.3	City Directories	x		EDR
5.3.4	Topographic Maps	x		EDR
5.1	Regulatory Database Review	x		EDR

2.3 Significant Assumptions

Information obtained during this assessment, to the extent it was relied on to form our opinion, was assumed to be complete and accurate. ASTI cannot be held responsible for the quality or content of information obtained from interviews and standard sources. Since ASTI cannot warrant or guarantee that the information provided by interviews and standard sources is accurate or complete, the intention of this Phase I ESA is to reduce, but not eliminate, uncertainty for the potential for RECs, HRECs, and CRECs on the Subject Property.

2.4 Deviations, Exceptions, and Limitations

The information and opinions included in this report were provided in response to a limited scope of work, specifically a Phase I ESA as per ASTM Practice E1527-21 and AAI. They should be considered and implemented only in light of that particular scope of work. The services provided by ASTI in completing this assessment have been provided in a manner consistent with the expected standards of the profession. No other warranties, expressed or implied, are made.

Non-scope issues are considered by ASTM Practice E1527-21 to be beyond the scope of a Phase I ESA. These issues may affect *business environmental risk* at the Subject Property. These non-scope issues may warrant assessment based on the type of Subject Property

transaction. Non-scope issues such as those described in ASTM Practice E1527-21 Appendix X6 were not investigated.

No deviations to ASTM Practice E1527-21 or AAI have occurred during this assessment.

No testing or sampling of materials (i.e., soil, water, and air) was conducted as part of this assessment. No limiting conditions were identified during the site reconnaissance, except for those described in Section 6.1.

ASTM Practice E1527-21 does not require a review of standard historical sources at intervals of less than approximately five years. Past uses of the Subject Property at intervals of less than approximately five years may not have been uncovered.

Responses received from regulatory agencies or other secondary sources of information after the issuance of this report may alter the facts, findings, conclusions, or recommendations in this Phase I ESA.

2.5 Special Terms and Conditions

The Phase I ESA was performed in conformance with the scope and limitations of ASTM Practice E1527-21 and AAI. No special terms and conditions outside ASTM Practice E1527-21 and AAI have been addressed. Under the AAI Rule and ASTM Practice E1527-21, AAI must be conducted within one year prior to the date of the transaction of the Subject Property. However, according to Section 4.6 of ASTM Practice E1527-21, "Certain Components" of the AAI must be conducted or updated within 180 days prior to the date of the Subject Property transaction. These "Certain Components" and the corresponding dates they were conducted are provided below:

- Interviews with owners, operators, and occupants (conducted May 1, 2026)
- Governmental records review (conducted April 7, 2026)
- Site reconnaissance (conducted May 1, 2026)
- Searches for records of environmental cleanup liens (a User responsibility, ASTI conducted a review of liens perfected by the EGLE Remediation and Redevelopment Division on April 8, 2026)
- Declaration by the Environmental Professional responsible for the assessment (signed June 8, 2026)

2.6 User Reliance

The Phase I ESA was performed for the benefit of Oakland County Parks and Recreation. ASTI acknowledges that this party may rely on the contents and conclusions presented in this report. This effort was performed per the authorization of Oakland County Parks and Recreation on April 3, 2026. The information and opinions presented in this report are intended exclusively for the use of Oakland County Parks and Recreation. ASTI will not distribute or publish this report without the prior consent of Oakland County Parks and Recreation, except as required by law or court order.

Any use a third party makes of this report, any reliance upon it, or any decision based on it is the sole responsibility of the third party. A third party is not afforded the status of a third-party beneficiary unless ASTI expressly agrees to such status in writing. ASTI has no liability for any damages that may be incurred by a third party as a result of any decision made or action taken by that party based on this report.

3.0 SITE DESCRIPTION

3.1 Location, Legal Description, Vicinity Characteristics

General Location	A Site Location Map is provided in Appendix A.
Legal Description	A copy of the assessment record, including the legal description, is included in Appendix D.
Section & Township and Range	SW¼ of Section 09, Township 2 North, Range 10 East
City/Township, County, State, Zip Code	Bloomfield Hills, Oakland County, Michigan 48302
Parcel Number	C-19-09-301-022 C-19-09-301-050
Acreage	± 34.57
Subject Property Zoning	R-3: One Family Residential
Local Development Utilization	Nature center, woodland, and residences

A Site Features Map is included in Appendix A. Photographs of the Subject Property and adjoining properties were taken during the site inspection and are provided in Appendix B.

3.2 Current Use of the Subject Property

The Subject Property is used as a nature center.

3.3 Descriptions of Structures, Roads, Other Improvements on the Site

I.D.	Building Type	Primary Use	Functional Spaces	Built Date	Stories
1	Nature Center	Education	Office, classroom, maintenance, restroom	2000s	2
2	Dwelling	Office	Office, laundry, restroom, and garage	1940s, 1970s	2

Building Construction			
I.D.	**Square Footage**	**Primary Construction**	**Interior Finishes**
1	± 6,000	Basement with concrete poured floor wood framing, and gable roof with metal paneling	Drywall, wood paneling, carpet, paint, ceramic, linoleum, wood trim
2	± 2,450	Concrete slab foundation, wood framing, and gable roof with singles	Drywall, wood paneling, carpet, paint, ceramic, linoleum, wood trim, wallpaper

Roads and Other Improvements	
Access	Via nearby roadways
Paved Areas	Limited areas around buildings
Maintained Lawn	
Landscaped Areas	Limited areas around dwellings
Surface Water	Pond in the southern portion, stream in the northern portion
Additional Improvements	Fencing and trails

Municipal Services and Utilities			
Service or Utility	**Present**	**Provider**	**Comments**
Potable Water Source	Yes		Combination of a private well and municipal service
Irrigation Well	No		
Sewage	Yes		Municipal service
Storm Sewer	No		
Electrical	Yes	DTE Energy	
Natural Gas	Yes	Consumers Energy	
Solid Waste Disposal	Yes	Green For Life	
Heating & Cooling	Yes		Natural gas heating and electric cooling

3.4 Current Uses of Adjoining Properties

ASTI observed adjoining properties during the site inspection to evaluate the potential risk these properties may pose to the Subject Property. Observations were made from the Subject Property and public access areas, as appropriate. Each is described as follows:

Adjoining Property Use			
Direction	**Description**	**Use**	**Potential Concerns Observed During Site Reconnaissance**
North	Private Residences	Residential	None
East	Telegraph Road	Right-of-Way (200 feet wide)	None
	Private Residences	Residential	
South	Private Residences	Residential	None
West	Private Residences	Residential	None

No stained areas, stressed vegetation, or signs of material spillage were observed along the shared property lines with the Subject Property. No pits, waste lagoons, above-ground storage tanks (ASTs), physical evidence of underground storage tanks (USTs), or other forms of chemical storage were observed on the adjoining properties.

3.5 Physical Setting Sources

The EDR report in Appendix D provides a Physical Setting Sources Map, which includes an overlay of the United States Geological Survey (USGS) topographic map (7.5-minute series) for the Thornville, Michigan quadrangle, which includes the Subject Property. The USGS map is also the basis of the Site Location Map in Appendix A.

Average Elevation (feet above mean sea level)	936 feet
Local Gradient	Declines to the southeast
Regional Gradient	Declines to the south-southwest
Nearest Surface Water Body	Rouge River and pond
Groundwater Depth (feet below ground)	Approximately 35 feet according to onsite well records.
Groundwater Flow Direction	Inferred to flow southeast towards the Rouge River

EGLE GeoWebFace describes the quaternary geology of the Subject Property as end moraines of medium-textured till.

Onsite well records indicated the lithology consists of topsoil underlain by sandy clay to 13 feet bgs, sand and gravel to 29 feet bgs, gray clay to 45 feet bgs, and fine gray sand to 64 feet bgs, the maximum depth explored.

4.0 USER-PROVIDED INFORMATION

To qualify for one of the landowner liability protections offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2002, the User, defined by ASTM as *the party seeking to use Practice E1527 to complete an environmental site assessment of the property*, has specific obligations for completing a successful application of this practice as outlined in Section 6 of ASTM Practice E1527-21. Failure to provide information regarding the obligations outlined to the Environmental Professional may result in a determination that AAI is not complete.

ASTI did not receive a completed User Questionnaire by the completion of this Phase I ESA. A blank copy of the User Questionnaire is included in Appendix C.

Question		Response
1	Did a search of recorded land title records identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?	No response
2	Did a search of recorded land title records identify any Activity Use Limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state, or local law?	No response
3	Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No response

Question		Response
4	Is the purchase price significantly lower than the fair market value? If you conclude there is a difference, have you considered whether a lower price is due to contamination known or believed to be present at the Subject Property?	No response
5	Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	No response
5a	Do you know past uses of the Subject Property?	No response
5b	Do you know of specific chemicals that are present or once were present at the Subject Property?	No response
5c	Do you know of spills or other chemical releases that have taken place at the Subject Property?	No response
5d	Do you know of any environmental cleanups that have taken place at the Subject Property?	No response
5e	Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?	No response
6	Are you aware of any prior environmental investigations that may be available for review?	No response

4.1 Environmental Liens and Activity Use Limitations (AULs)

The User did not identify AULs or liens related to environmental matters.

4.2 Search of Recorded Land Title Records

The User did not provide recorded land title records for the Subject Property.

4.3 Additional Records Provided by the User

The User did not provide any additional records.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

ASTI ordered a government records search for the Subject Property from Environmental Data Resources, Inc. (EDR) in Shelton, Connecticut. A copy of the EDR Radius Map Report with GeoCheck®, dated April 7, 2026, is included in Appendix D. The EDR report presents a description of the databases, search distances, and results.

5.1.1 Discussion of Subject Property Listings

Site Name	63-3325 Franklin Rd-Bloomfield Hills, WB-4316-1: El Johnson Pond: Lake Pro, Inc., WB-4316: El Johnson Pond
ASTM Listings	None
Non-ASTM Listings	Enviro
Location	No address
Documentation Requested/Reviewed	• RRD: Remediation and Redevelopment Division of EGLE • EGLE RIDE Mapper • MIEnviro Map Explorer
Summary of Findings	A permit authorized 10 cubic yards of fill for the construction of two pedestrian crossings of the Long Lake-Forest Lake Drain. A permit for the chemical treatment of the pond for aquatic nuisance control was issued in 2021 and was terminated in 2024 when chemical treatments were retired. Based on the reviewed information, these listings do not represent a REC to the Subject Property.

The EGLE Remediation and Redevelopment Division (RRD) maintains a list of environmental liens that EGLE RRD has placed on properties in the state to recover costs associated with state-led response activities. No EGLE RRD environmental liens were listed for the Subject Property in the online database as of April 8, 2026 (Appendix D).

According to the EDR report, the Subject Property was not listed in the search of institutional control and engineering control registries.

5.1.2 Discussion of Sites of Potential Environmental Concern

There are no listings for adjoining sites.

For the remaining listings, ASTI considers select criteria to determine which listings represent an environmental concern to the Subject Property. The criteria include but are not limited to the following:

- Database type
- Topography relative to the Subject Property
- Direction and distance
- Soil profile identified in available sources
- Known or inferred groundwater depth and flow direction
- Status of applicable investigation
- Surface and subsurface conditions including but not limited to buildings, pavement, utility corridors, and surface water features
- Potable water source (well or municipal)

An evaluation of these criteria is completed to determine the level of risk associated with each listing. Listings with likely releases that are found to have the potential to represent an elevated or high risk are requested through the Freedom of Information Act (FOIA) from applicable agencies.

Using the referenced criteria and based on the information in the EDR report, ASTI did not identify any additional listings beyond adjoining properties that were considered to represent an elevated or high risk to the Subject Property.

5.1.3 Discussion of Orphan Sites

No orphan sites were listed in the EDR Radius Map Report.

5.2 Additional Agency/Regulatory Sources

5.2.1 Local Health Department

ASTI requested information about the Subject Property from the Oakland County Health Department. Available records were provided on April 9, 2026, and copies are included Appendix D. The records included water well permits and several compliance documents regarding a Type II potable well. In the past, there was a failed test due to the detection of chloroform bacteria. The issue was corrected by cleaning the wells with chlorine treatments and follow-up testing confirmed the effectiveness.

5.2.2 Local Fire Department

ASTI requested information about the Subject Property from the Bloomfield Township Fire Department. In a response dated April 16, 2026, the township clerk indicated that there were no records. A copy of the response is included in Appendix D.

5.2.3 Subject Property Assessor/Tax Files

ASTI requested information about the Subject Property from the Bloomfield Township Assessing Department. A current assessment record is provided in Appendix D. No RECs were identified.

5.2.4 Building Permit/Inspections

ASTI requested information about the Subject Property from the Bloomfield Township Building Department. Reviewed records include limited information on electrical, mechanical, and building permits. Copies of records are provided in Appendix D.

5.2.5 Zoning/Land Use Records

ASTI reviewed information about the Subject Property from the Bloomfield Township Zoning Department. The Subject Property is zoned R-3 (One Family Residential District). A copy of the zoning map is provided in Appendix D.

5.2.6 Oil and Gas Wells

Based on a review of the EGLE GeoWebFace search system and the EDR report, no oil or gas wells were identified on or adjacent to the Subject Property.

5.3 Historical Use Information

Reasonably ascertainable historical sources, as outlined in Section 8.3.4 of ASTM Practice E1527-21, were utilized to determine the previous use of the Subject Property and its surrounding area. A chronological summary of the sources used may include, but is not limited to, aerial photographs, Sanborn maps, city directories, agency records, and prior environmental assessments. ASTI made a *good faith* effort to identify the obvious uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. *Data Failures* were encountered as part of this assessment and are discussed as data gaps in Section 9.0.

5.3.1 Aerial Photographs

ASTI reviewed aerial photographs provided by EDR. Observations about the Subject Property and adjoining sites are summarized in the table below. Copies of the obtained information are provided in Appendix E.

Year	Observations
1937	Subject Property: Farmland, woodland, a stream and a lowland area are evident. Remnants of an approximate 5-acre orchard are evident near the north-central area. The orchard is sparse and appears to be in decline.
	Adjoining: Rural land is evident. The area is dominated by farmland, and a highway is constructed to the east.
1940	No significant change is identified.
1949	Subject Property: A residence is evident near Franklin Road. The orchard is in further decline. A driveway is evident near Telegraph Road. The lowland area is more saturated.
	North Adjoining: Two residences and an outbuilding are evident.
	West Adjoining: A residence is evident.
1952	Subject Property: Additional dredging and driveways are evident near the lowland area.
	West Adjoining: Pre-development grading is evident.
1956	Subject Property: The lowland area resembles the current a pond.
	Adjoining: Residential use dominates the area.
1967	Subject Property: Two additional buildings are evident south of the residence.
1972	Subject Property: Trails are evident. The area is becoming overgrown with vegetation.
1976	No significant change is identified.
1983	
1987	
1997	Subject Property: The area is entirely overgrown with trees and vegetation. A barn and cabin are evident north of the pond. A larger building was constructed in place of the building north of the residence.
1999	Subject Property: A parking lot is evident north of the residence.
2005	No significant change is identified.
2009	Subject Property: The buildings south of the residence have been demolished. A building was replaced north of the residence. The parking lot was expanded.
2012	No significant change is identified.
2016	
2020	Subject Property: A lookout tower is evident near the northern boundary.
2024	No significant change is identified.

5.3.2 Sanborn Maps

There are no Sanborn maps for the area. A Certified Sanborn Map Report, which identifies the search results as unmapped, is included in Appendix D.

5.3.3 City Directories

City directory research was conducted by EDR (Appendix E). The non-residential occupant information was considered as part of the summaries provided in Sections 5.3.6 and 5.3.7.

5.3.4 Topographic Maps

ASTI reviewed the United States Geological Survey (USGS) topographic maps provided by EDR. Observations about the Subject Property and adjoining sites are summarized in the table below. Copies of the obtained information are provided in Appendix E.

Year	Observations
1907	The area is rural land. A building is evident on the Subject Property.
1936	The building on the Subject Property is no longer evident. Buildings are evident on the west adjoining site. The highway is constructed on the east adjoining site.
1943	No significant change is identified.
1952	A building is evident on the Subject Property near Franklin Road. Several buildings are evident at the north adjoining site.
1968	An orchard is depicted at the Subject Property.
1973	An additional building is evident at the Subject Property. A building is evident at the south adjoining site.
1983	No significant change is identified.
1997	
2014	Buildings are no longer included in map images. The orchard at the Subject Property is no longer depicted.
2017	No significant changes are evident.
2019	
2023	

5.3.5 Previous Environmental Reports

ASTI was not provided with any environmental reports.

5.3.6 Historical Use Summary of the Subject Property

Based on a review of the historical sources obtained, the former uses of the Subject Property are summarized as follows.

The Subject Property was developed with farmland or for residential use from at least 1937 until the late 1960s, when the area was repurposed for use as a nature center. Several buildings were constructed over time, including temporary education buildings, a barn, cabins, and a tower. An orchard was evident in the northern area of the Subject Property by 1937 but appeared left to fallow by 1940 and the area became dominated by natural woodlands by the early 1980s.

5.3.7 Historical Use Summary of the Adjoining Properties

Based on a review of the obtained historical sources, the former uses of adjoining properties are summarized as follows:

The area has been rural land with farmland with dwellings since the early 1900s. The east adjoining Telegraph Road was evident by the 1930s. The hunting club has operated on the west adjoining sites as early as the 1950s. Some addresses have been identified with home-based businesses, but they pose minimal environmental risk.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Assessor Name and Title	Brady Metzger, Environmental Technician
Date of Inspection	May 1, 2026
Weather Conditions	46 º F and cloudy
Methodology	ASTI inspected the Subject Property in a meander and search pattern, including all property boundaries, adjoining properties from the Subject Property, and public access areas.
Access Limitations	Untrimmed vegetation, storage, lighting
Adverse Subject Property Conditions	None

6.2 Exterior Observations

The following table summarizes the site's exterior observations. Observed items are further discussed below.

Category	Item	Item Observed
Above Ground Hazardous Substance/Petroleum Product Storage	Drums, barrels, or containers ≥5 gallons in connection with identified uses	No
	Drums, barrels, or containers ≥5 gallons not in connection with identified uses	No
	Unidentified Substance Containers	No
	ASTs	No
Underground Hazardous Substance/Petroleum Product Storage	USTs (fill ports and/or vent pipes)	No
	Fuel dispensers	No
	Natural gas or petroleum pipelines/wells	No
Basic & Specialized Systems	Pole-mounted or pad-mounted transformers	Yes
	Hydraulic equipment	No

Category	Item	Item Observed
Indications of Releases or Potential Releases	Stained soil or pavement	No
	Stressed vegetation	No
	Pools of liquid	No
	Strong or pungent odors	No
	Filled Land/Soil Piles/Mounding	No
	Unregulated/Unauthorized Waste Disposal	No
	Dumpsters with Staining	No
	Monitor wells	No
Drainage & Waste Collection Systems	Pits	No
	Ponds	Yes
	Lagoons	No
	Sumps/Oil-Water Separators	No
	Stormwater collection basins	No
	Dry wells/crocks/cisterns	No
Other Notable Items	None observed	N/A

Items noted as unobserved do not fully warrant that these items are not present on the Subject Property, as some items may not have been readily observable.

ASTI observed a pad-mounted transformer. The unit was in fair condition and is presumed to be owned by the local utilized provider.

ASTI observed a pond.

6.3 Interior Observations

The following table summarizes the site's interior observations. Observed items are further discussed below.

Category	Item	Item Observed
Above Ground Hazardous Substance/Petroleum Product Storage	Drums, barrels, or containers ≥5 gallons in connection with identified uses	No
	Drums, barrels, or containers ≥5 gallons not in connection with identified uses	No
	Unidentified Substance Containers	No
	ASTs	No
Underground Hazardous Substance/Petroleum Product Storage	USTs (fill ports and/or vent pipes)	No
	Dispensing Systems	No

Category	Item	Item Observed
Basic & Specialized Systems	Transformers	No
	Elevators	No
	Compressors	No
	Compactors	No
	Hydraulic Hoists/Lifts	No
	Hydraulic Equipment other than those above	No
	Emergency generators	No
Indications of Releases or Potential Releases	Staining	No
	Pools of liquid	No
	Strong or pungent odors	No
	Monitor wells	No
Drainage & Waste Collection Systems	Pits	No
	Standard floor drains	Yes
	Sumps/manhole covers/oil-water separators	Yes
	Trench drains	No
	Dry wells/crocks	No
Other Notable Items	None observed	N/A

Standard floor drains and a sump were observed. It presumed that they connect to municipal sewer service.

7.0 INTERVIEWS

7.1 Interview with Owner

ASTI requested the completion of an Owner Questionnaire; however, no response was received during the completion of this Phase I ESA.

7.2 Interview with Site Manager

ASTI interviewed Brian (last name not given), Operations with Bloomfield Hills School/Johnson Nature Center, during site reconnaissance on May 1, 2026. They explained site use and provided site access. No RECs were identified during the interview.

7.3 Interview with Occupants

The Subject Property is occupied for recreational use.

7.4 Interviews with Local Government Officials

Conversations with local government officials were limited to requesting department records.

7.5 Interviews with Others

No others were interviewed as part of this assessment.

8.0 Discussion Regarding Potential Vapor Migration/Encroachment

Tier 1 Non-Invasive screening aims to conduct an initial screen to determine whether a vapor migration/encroachment condition (VEC) exists, is likely to exist, cannot be ruled out, or can be ruled out at the Subject Property.

No onsite or offsite VEC concerns were identified.

The screening process concludes that a VEC can be ruled out because it does not or is unlikely to exist.

9.0 Data Failure and Data Gaps

Data gaps occur when the EP is unable to obtain the required information despite making a *good-faith* effort.

Data failure is one type of data gap. According to ASTM Practice E1527-21, data failure occurs when all the standard historical sources that are *reasonably ascertainable* and likely to be useful have been reviewed, and yet the objectives have not been met. Historical sources are required to document the property's use back to the Subject Property's first developed use or to 1940, whichever is earlier. A data failure is considered to have occurred and is described below.

Data Gap	The Subject Property was developed prior to the earliest reasonably ascertainable standard historical source.
Is this a significant data gap?	No
Rationale	The earliest identified uses were residential and agricultural.

No additional data gaps were identified during this investigation, except for those listed below.

Data Gap	ASTI was unable to interview the Owner despite a request to do so. ASTI requested the completion of an Owner Questionnaire as an interview tool, but no response was received during the completion of this Phase I ESA.

Is this a significant data gap?	No
Rationale	Given the history of the site as a residence, farm, and nature center, the reviewed information is sufficient to determine risk. If the Owner is available in the future, they should be interviewed.

Data Gap	ASTI requested the completion of a User Questionnaire to cover the obligations, but no response was received during the completion of this Phase I ESA.
Is this a significant data gap?	No
Rationale	Given the history of the site as a residence, farm, and nature center, the reviewed information is sufficient to determine risk.

Data Gap	ASTI was unable to determine past heating fuel sources for the Subject Property. The fuel sources may have included electric, wood, coal, propane, or fuel oil.
Is this a significant data gap?	No
Rationale	Although no evidence (i.e., fill ports, vent pipes, or pressure gauges, etc.) or information regarding the use of heating fuel was found during the assessment, based on the age of the former residences/buildings (built in the early 1900s and 1940s), there is a potential that heating oil was used as a fuel source prior to natural gas. If a buried heating oil fuel tank is found during any redevelopment activities, the tank should be properly decommissioned with verification sampling conducted.

Data Gap	The foundation type of the former dwelling is unknown. Dwellings can be built with the following foundations: concrete slab, crawl space, partial basement, and full basement.
Is this a significant data gap?	No
Rationale	The foundation type is unknown and there is no indication or evidence to suggest a specific foundation type based on interviews or reviewed municipal records and historical records. Outbuildings typically have concrete floors, wood floors, or earthen floors. Therefore, the risk of fill material is minimal. If it is found that the former building contained a basement and fill material is encountered in the future, an assessment of fill material can be performed to further reduce environmental risk.

10.0 FINDINGS AND OPINION

FINDINGS

Below is a summary of the findings of this Phase I ESA.

Subject Property - Uses

The Subject Property was developed with farmland or for residential use from at least 1937 until

the late 1960s, when the area was repurposed for use as a nature center. Several buildings were constructed over time, including temporary education buildings, a barn, cabins, and a tower. An orchard was evident in the northern area of the Subject Property by 1937 but appeared left to fallow by 1940 and the area became dominated by natural woodlands by the early 1980s.

Subject Property – County Records

ASTI requested information about the Subject Property from the Oakland County Health Department. Available records were provided on April 9, 2026, and copies are included Appendix D. The records included water well permits and several compliance documents regarding a Type II potable well. In the past, there was a failed test due to the detection of chloroform bacteria. The issue was corrected by cleaning the wells with chlorine treatments and follow-up testing confirmed the effectiveness.

Subject Property – Database Listings

Site Name	63-3325 Franklin Rd-Bloomfield Hills, WB-4316-1: El Johnson Pond: Lake Pro, Inc., WB-4316: El Johnson Pond
ASTM Listings	None
Non-ASTM Listings	Enviro
Location	No address
Documentation Requested/Reviewed	• RRD: Remediation and Redevelopment Division of EGLE • EGLE RIDE Mapper • MIEnviro Map Explorer
Summary of Findings	A permit authorized 10 cubic yards of fill for the construction of two pedestrian crossings of the Long Lake-Forest Lake Drain. A permit for the chemical treatment of the pond for aquatic nuisance control was issued in 2021 and was terminated in 2024 when chemical treatments were retired. Based on the reviewed information, these listings do not represent a REC to the Subject Property.

OPINION

Based on the site inspection, interviews, review of regulatory and municipal records, and examination of historical documentation, the following is opined by the EP.

<u>De Minimis Conditions</u>

The EP identified the following de minimis condition associated with the Subject Property.

- There appears to have been an approximate 5-acre orchard located on the north-central portion of the Subject Property, but its use was already in decline by 1937. The sparse orchard trees were evident into the 1970s, when they were overtaken by other trees and vegetation that make up the current woodland. Based on the observed operational window, and purpose for this Phase I ESA (no change in use), the former orchard is considered a de minimis condition. *Furthermore, there is a CERCLA liability exemption for pesticide application for the typical pesticide user when they have done nothing more than purchase and applied a pesticide in a customary manner; however, the burden of establishing entitlement rests on a defendant.*

Significant Data Gaps

The EP did not identify any significant data gaps associated with the Subject Property.

Historical Recognized Environmental Conditions

The EP did not identify any HRECs associated with the Subject Property.

Controlled Recognized Environmental Conditions

The EP did not identify any CRECs associated with the Subject Property.

Recognized Environmental Conditions

The EP did not identify any RECs associated with the Subject Property.

11.0 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has not identified any RECs, CRECs, and/or significant data gaps in connection with the Subject Property.

There appears to have been an approximate 5-acre orchard located on the north-central portion of the Subject Property, but its use was already in decline by 1937. The sparse orchard trees were evident into the 1970s, when they were overtaken by other trees and vegetation that make up the current woodland. Based on the observed operational window, and purpose for this Phase I ESA (no change in use), the former orchard is considered a de minimis condition. *Furthermore, there is a CERCLA liability exemption for pesticide application for the typical pesticide user when*

they have done nothing more than purchase and applied a pesticide in a customary manner; however, the burden of establishing entitlement rests on a defendant.

12.0 ADDITIONAL SERVICES

Non-Scope Considerations under Appendix X6 of ASTM Practice E1527-21 were not addressed in this investigation.

14.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

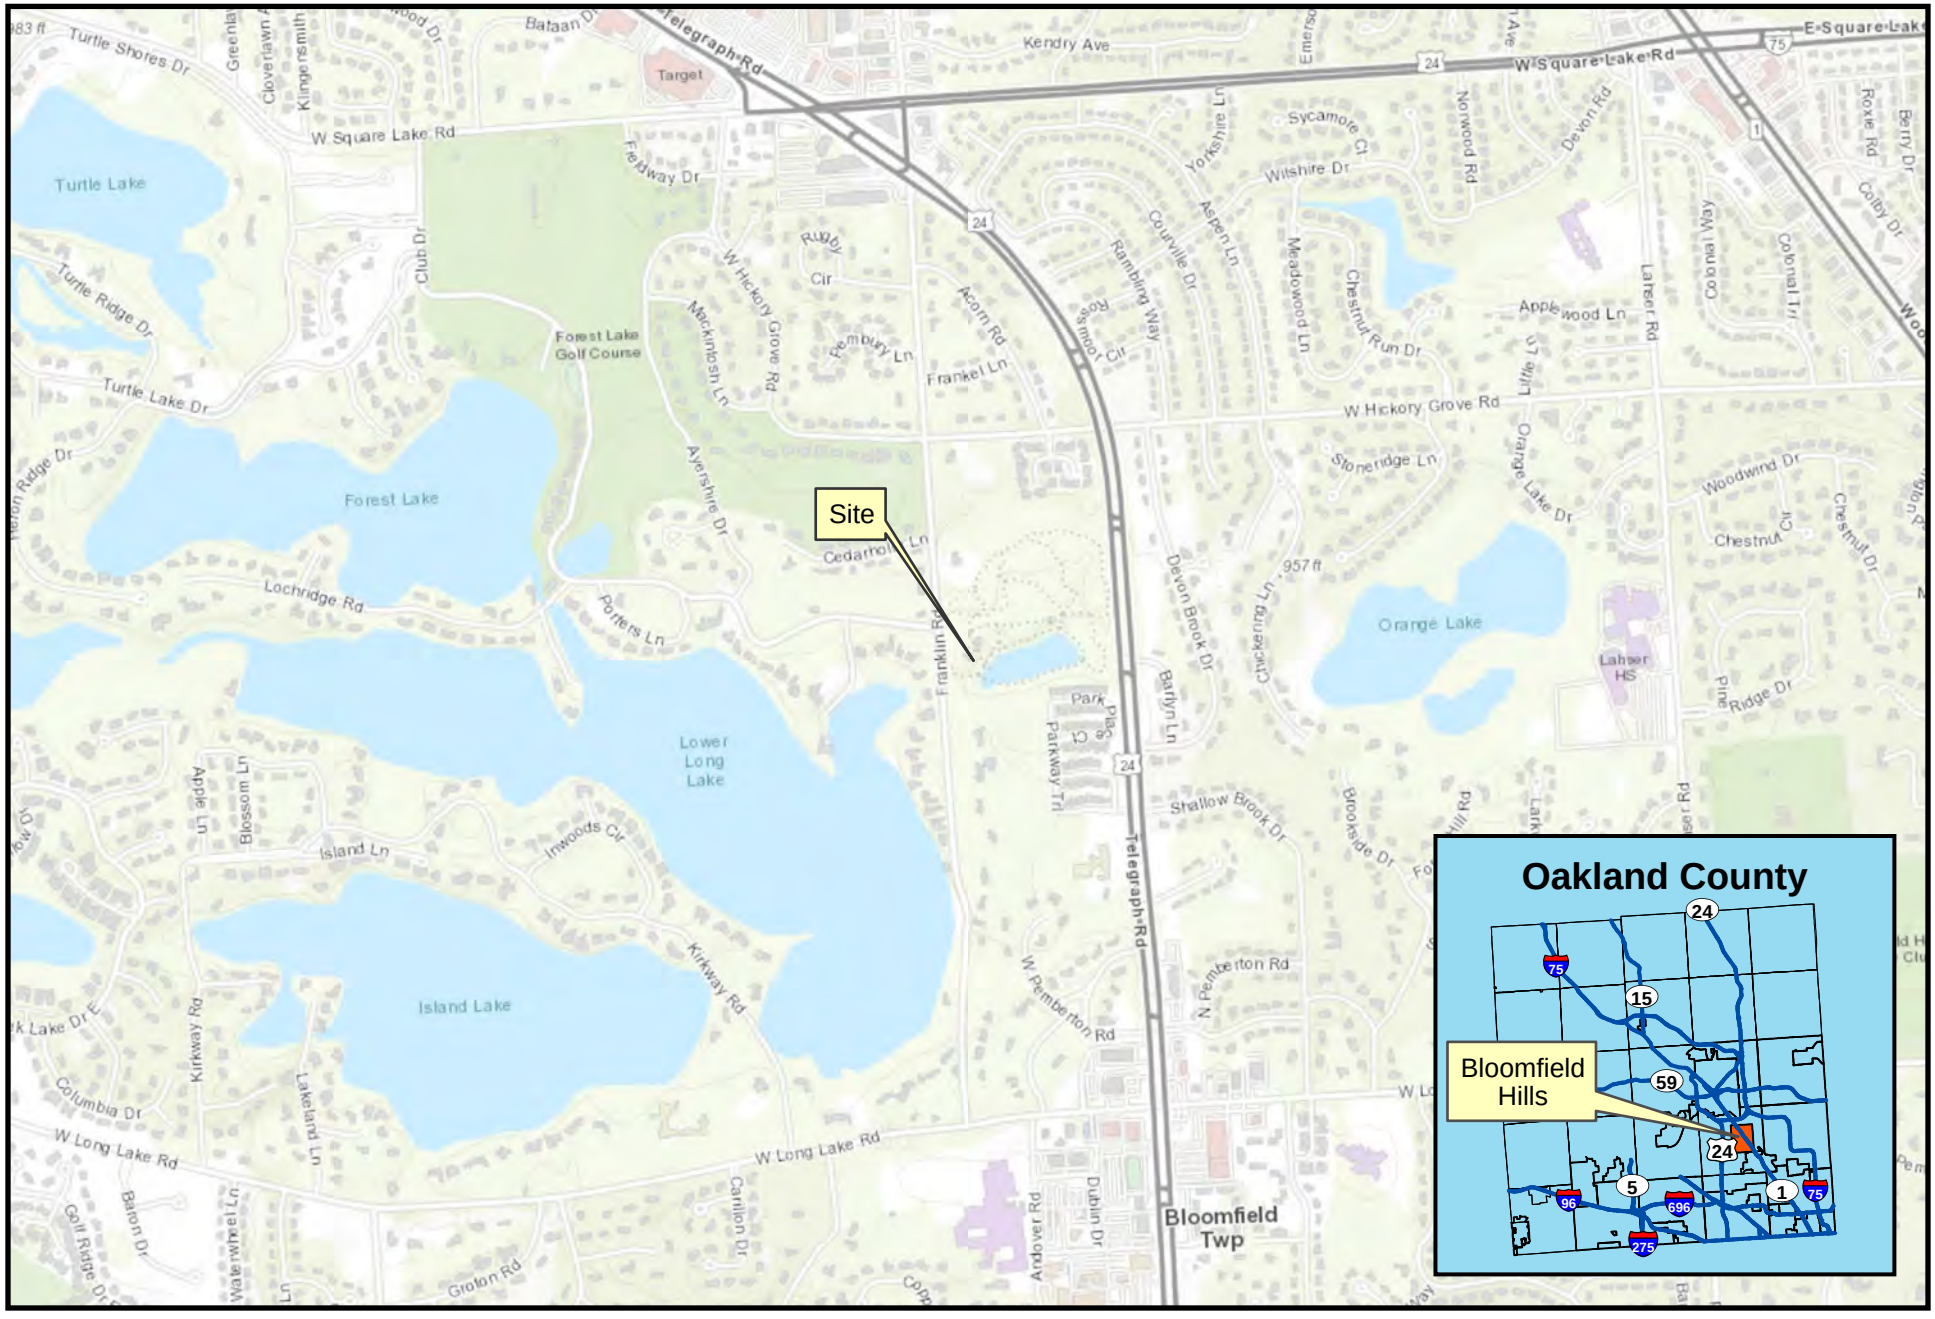
I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312.

I possess the specific qualifications, based on education, training, and experience, to assess the property in terms of its nature, history, and setting, specifically the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Anthony Spencer, EP
Environmental Project Manager
Date: June 15, 2026

Glossary

- *Business Environmental Risk:* A risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in ASTM Practice E1527.
- *Controlled REC*: A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities, with hazardous substances or petroleum products allowed to remain in place, subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).
- *Data Gap: A lack of or inability to obtain information required by this practice, despite the EP's good faith efforts* to gather such information.
- *De Minimis Condition:* De minimis conditions refer to releases that generally do not pose a threat to human health or the environment and would not typically be the subject of an enforcement action if brought to the attention of relevant governmental agencies. Conditions deemed de minimis are neither RECs nor CRECs.
- *Environmental Condition:* ASTI defines an Environmental Condition as the presence or likely presence, currently or in the past, of a hazardous substance or petroleum product in, on, or at the Subject Property of which the Environmental Professional requires an opinion regarding the likelihood of a release to the environment to determine if a REC is present.
- *Good Faith:* The absence of any intention to see an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.
- *Hazardous Substance:* A substance defined as A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, B) any element, compound, mixture, solution, or substance designated to section 9602 of this title, C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the RCRA Act of 1976, as amended, D) any toxic pollutant listed under section 1317(a) to Title 33, E) any hazardous air pollutant listed under section 112 of the Clean Air Act, and F) any imminently hazardous chemical substance or mixture with respect to which the Administrator of the EPA has taken action pursuant to section 2606 of Title 15.
- *Historical REC*: A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). HRECs are not considered to be RECs.
- *Material Threat: An obvious threat that is likely to lead to a release and that, in the opinion of the EP, would likely result in an adverse impact on* public health or the environment.
- *Migration*: The movement of hazardous substances or petroleum products in any form, including solids, liquids, and vapors at the surface or subsurface.
- *Petroleum Product:* Petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. 9601 (14), natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
- *Practically Reviewable: The information is provided by the source in a manner and form that, upon examination, yields relevant information about the Subject Property without requiring* extraordinary analysis of irrelevant data.
- *Subject Property:* The real property that is the subject of the environmental assessment described in ASTM Practice E1527. The User defines the real property boundaries, and these boundaries may not be consistent with the boundaries of a legal parcel.
- *Reasonably Ascertainable:* Information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.
- *Recognized Environmental Conditio*n: (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or



petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. For this definition, “likely” refers to that which is neither certain nor proven but can be expected or believed by a reasonable observer based on the logic and/or experience of the EP and/or available evidence, as stated in this report to support the opinions given herein. The term REC is not intended to include de minimis conditions.

- *Release*: Spilling, leaking, pumping, pouring, emitting, discharging, injecting, escaping, leaching, dumping, or disposing into the environment.
- *Significant Data Gap: A data gap that affects the environmental professional's ability* to identify a recognized environmental condition.

User-Provided Information and Interview Documentation

User Questionnaire (blank)

ASTI Project No. P26-0481.00
June 15, 2026

E1527 USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CRF 312.25, 312.28, 312.29, 312.30, and 312.31. Failure to provide knowledge pertaining to this information could result in a determination that "all appropriate inquiry" is not completed. Please complete this questionnaire and return via email or fax to 810-225-3800. Details regarding "yes" responses should be provided with a brief explanation in the comment section.

Respondent Name:_____ **Signature:**_____

Date:_____

Subject Property Address: _____

ASTI Project #_____

Please answer all questions to the best of your knowledge and in good faith. Please provide details on comments to "yes" responses.

	Question	Response		Comments
		Yes	No	
1	Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribe, state, or local law?	☐	☐	
2	Did a search of recorded land title records identify any Activity and Land Use Limitations such as engineering controls, land use restrictions, or institutional controls that are in place and/or have been filed in a recorded registry under federal, tribe, state, or local law?	☐	☐	
3	Do you have specialized knowledge or experiences related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and process used by this type of business?	☐	☐	
4	Is the purchase price significantly lower than the fair market value of the property? If you conclude there is a difference, have you considered whether a lower price is due to contamination known or believed to be present?	☐	☐	

Question			Response		Comments
			Yes	No	
5	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of a release or threatened release?		☐	☐	
	5a	Do you know past uses of the property?	☐	☐	
	5b	Do you know specific chemicals that are present or once were present at the property?	☐	☐	
	5c	Do you know of spills or chemical releases that have occurred at the property?	☐	☐	
	5d	Do you know of any environmental cleanups that have taken place at the Property?	☐	☐	
	5e	Are there any obvious indicators that point to the presence or likely presence of contamination at the property?	☐	☐	
6	Are you aware of any prior environmental investigation reports that may be available for review?		☐	☐

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

PART 201: A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

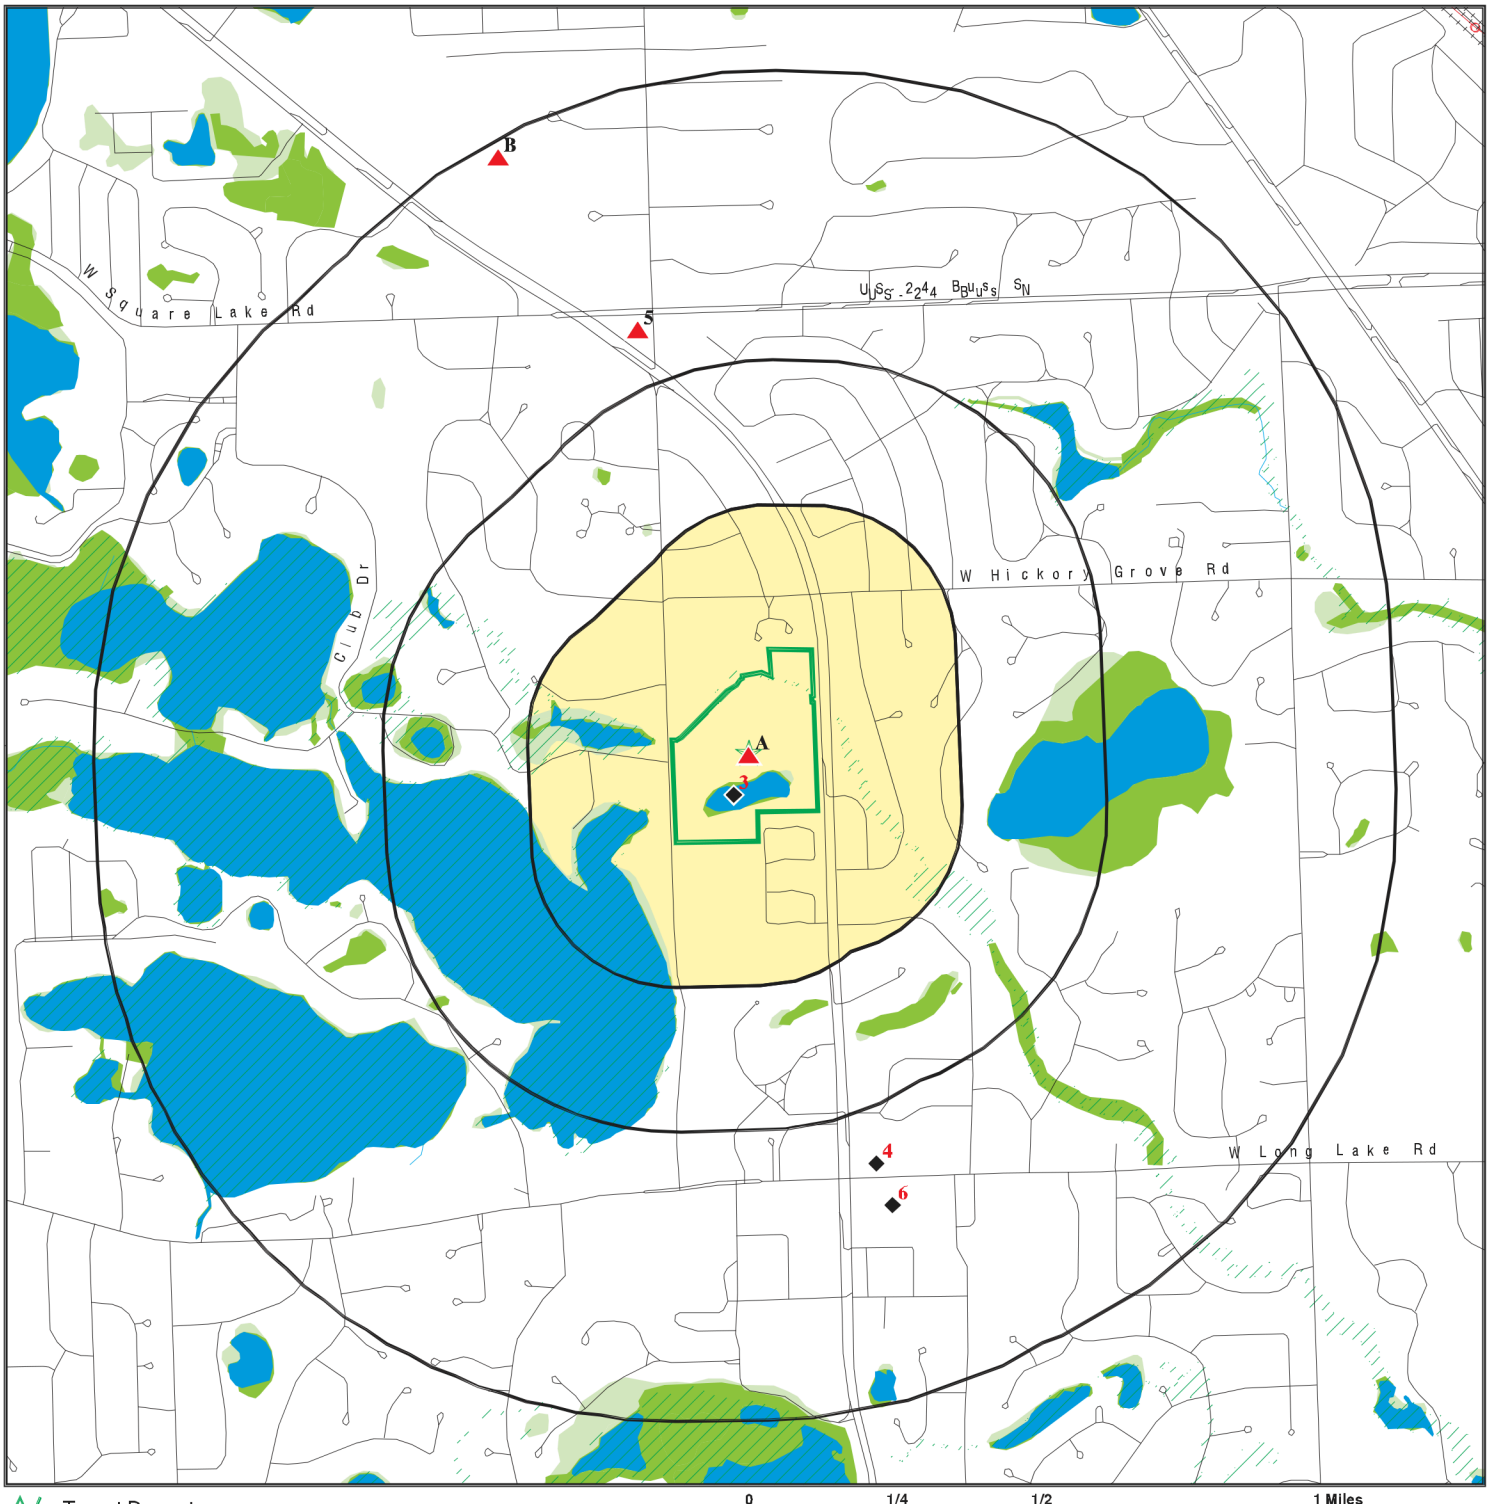
A review of the PART 201 list, as provided by EDR, and dated 01/12/2026 has revealed that there are 3 PART 201 sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
2343 SOUTH TELEGRAPH	***2343 SOUTH TELEGRAPH***	***NNW 1/2 - 1 (0.970 mi.)***	***B8***	***18***
Facility ID: 63005363				
Facility ID: 63501662				

Lower Elevation	Address	Direction / Distance	Map ID	Page
970 WEST LONG LAKE R	***970 WEST LONG LAKE R***	***SSE 1/2 - 1 (0.594 mi.)***	***4***	***13***
Facility ID: 63501667				
KROGER CO OF MICHIGA	***4099 TELEGRAPH RD***	***SSE 1/2 - 1 (0.670 mi.)***	***6***	***14***
Facility ID: 63501007				

EXECUTIVE SUMMARY

DEL PART 201: A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.



A review of the DEL PART 201 list, as provided by EDR, and dated 01/12/2026 has revealed that there are 2 DEL PART 201 sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
META DEVELOPMENT COM Facility Id: 63005320	2555 SOUTH TELEGRAPH	NNW 1/2 - 1 (0.596 mi.)	5	14
2343 TELEGRAPH ROAD Facility Id: 63005439	2343 TELEGRAPH ROAD	NNW 1/2 - 1 (0.970 mi.)	B7	17

		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2025
Date Data Arrived at EDR: 01/05/2026

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2025
Date Data Arrived at EDR: 01/05/2026

Next Scheduled EDR Contact: 07/06/2026
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/26/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2025

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/30/2025
Date Data Arrived at EDR: 12/03/2025

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/30/2025

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

INVENTORY: Inventory of Facilities

The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

DEL PART 201: Delisted List of Contaminated Sites

A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion.
A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/02/2025
Date Data Arrived at EDR: 11/03/2025

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

3325 FRANKLIN RD
3325 FRANKLIN RD
BLOOMFIELD HILLS, MI 48302

TARGET PROPERTY COORDINATES

Latitude (North):	42.591903 - 42° 35' 30.85''
Longitude (West):	83.284196 - 83° 17' 3.11''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	312582.1
UTM Y (Meters):	4717812.5
Elevation:	936 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50029944 PONTIAC SOUTH, MI
Version Date:	2023

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

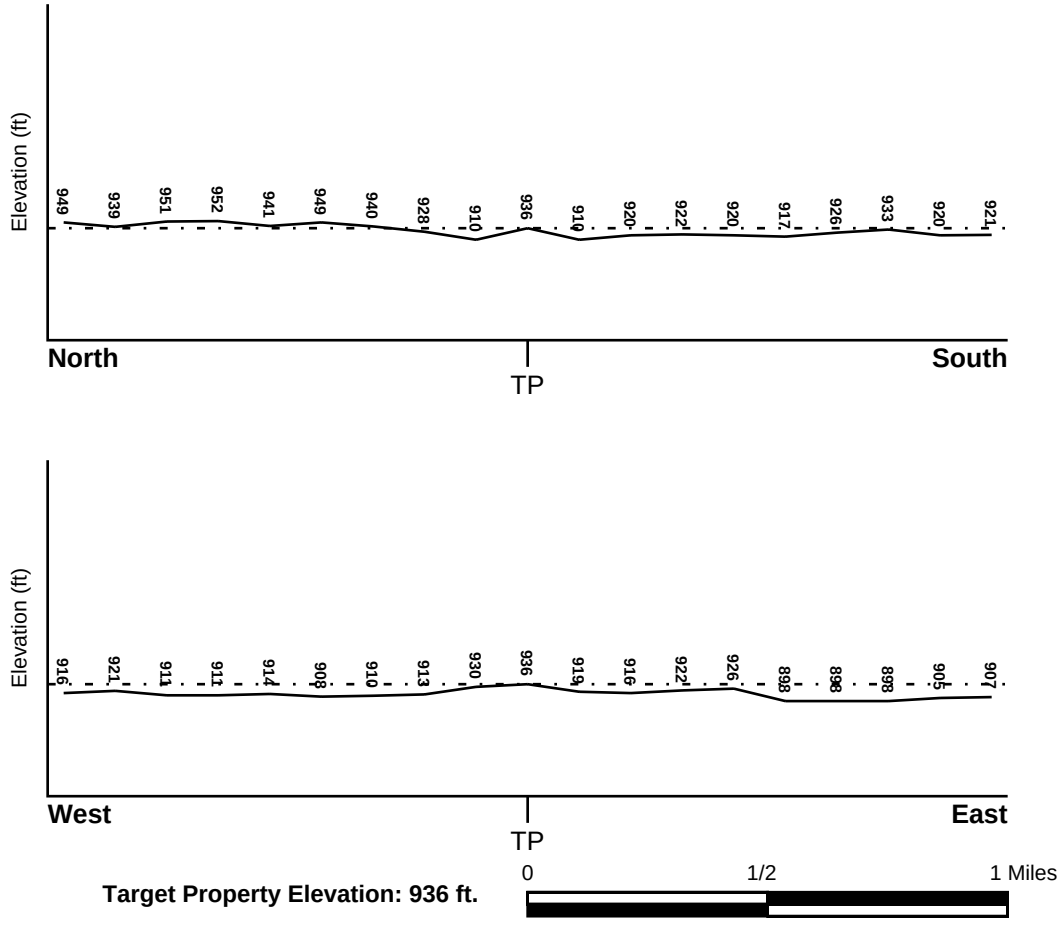
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
26125C0508F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
26125C0506F	FEMA FIRM Flood data
26125C0507F	FEMA FIRM Flood data
26125C0509F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PONTIAC SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
62	1/2 - 1 Mile SSE	E
1G	1/2 - 1 Mile SSE	E

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Marlette

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	7 inches	22 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	22 inches	31 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	31 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Fox

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	16 inches	29 inches	gravelly sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	29 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: Brookston

Soil Surface Texture: loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.4
2	16 inches	35 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.4
3	35 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.4

Soil Map ID: 9

Soil Component Name: Urban land

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 130 inches

No Layer Information available.

Soil Map ID: 10

Soil Component Name: Capac

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources
Telephone: 517-241-2254

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

ASTI Environmental is conducting an environmental assessment and respectfully request any:

-Assessing Department records regarding historical and current assessing records and field sheets;

-Building Department records regarding any building permits, site plans, sketches, code violations, and

inspections; and

-Fire Department records regarding any reports of spills/releases, above ground and underground storage tanks, landfilling, fires, and Hazmat incidents.

If costs exceed $50.00, please let me know before proceeding. Thank you.

Request closed Anyone with access to this request

Hello,

Your FOIA Request was sent to three departments for review; below are their responses.

1. **Building Department:** Request granted partially. A document has been uploaded to your file.
    - All Building permits from 2000 to present can be found on www.bsaonline.com. Attached to this request is a list from Cornerstone with permits issued prior to 2000. If the requester would like copies of any of these permits, the Building Dept. will estimate the fee amount for copies.
2. **Assessing Department:** Request granted. A document has been uploaded to your file.
3. **Fire Department:** No records pertaining to your request.

- **REMINDER**: You will need to log into your account in order to view your documents. If this is your first time using this portal, click the link to Finish Creating an Account.

Please view the link of the Notice of Your Rights under the FOIA.

A copy of the Township's Procedures and Guidelines as well as our Written Public Summary may be found on the Township website at Bloomfield Twp, MI - Request for Public Records.

Sincerely,

Catarina Yankey

RE: FOIA REQUEST of April 08, 2026, Reference # F002404-040826

Dear Aliya Spotts:

This letter is in response to your Freedom of Information Act (FOIA) request referenced above.

Your request is granted in part. You may log in to the Oakland County Records Center to view the responsive records able to be released, which includes an active "Type II" well file for WSSN #2246463/El Johnson Nature Center Historical.

YOUR FURTHER LEGAL RIGHTS

To the extent that this response, in your opinion, constitutes a denial of your Freedom of Information Act (FOIA) rights, your statutory remedies are as follows:

For FOIA denials, you may submit to the head of the public body a written appeal that specifically states the word "appeal" and identifies the reason or reasons for reversal of the denial. Within 10 business days after the head of the public body receives a written appeal he or she will do one of the following:

1. Reverse the denial.
2. Issue a written notice to you upholding the denial.
3. Reverse the denial in part and issue a written notice to you upholding the denial in part.
4. Under unusual circumstances, issue a notice extending for not more than 10 business days the time to respond.

You may begin a civil action in circuit court to compel the public body's disclosure of the public records within 180 days after a public body's final determination to deny a request.

You have the right to receive attorneys' fees and damages as provided in MCL 15.240 if, after judicial review, the court determines that the public body has not complied with MCL 15.235 and orders disclosure of all or a portion of a public record.

For fee appeals, if the public body requires a fee that, in your opinion, exceeds the amount permitted under its procedures and guidelines or MCL 15.234, you may submit to the head of the public body a written fee appeal for a fee reduction that specifically states the word "appeal" and identifies how the required fee exceeds the amount permitted. Within 10 business days after the head of the public body receives a written fee appeal, he or she will do one of the following:

1. Waive the fee.
2. Reduce the fee and issue a written determination to the requesting person indicating the basis for the remaining fee.
3. Uphold the fee and issue a written determination to the requesting person indicating the basis for upholding the fee.
4. If necessary, issue a notice extending for not more than 10 business days the time to respond.

Within 45 days after the head of the public body issues a written determination on the fee appeal or if the head of the public body failed to respond to the fee appeal, you may begin a civil action in circuit court.

Oakland County's FOIA Procedures and Guidelines, and its Public Summary, can be found at https://www.oakgov.com/government/FOIA

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

RE: COLIFORM SAMPLING FREQUENCY WAIVER FOR E.L.JOHNSON NATURE CENTER

WSSN # 22484-63

Dear Operator:

In accordance with the Safe Drinking Water Act 399, P.A. of 1976 and Administrative Rules (R325.10706) water supplies which are serving less than 1,001 persons with a protected groundwater source may vary the frequency of sampling.

This facility is currently sampling monthly for coliform bacteria. It has been the determination of this office that your frequency be decreased to quarterly coliform sampling (once every three months). This determination was made due to the fact that this facility has one complete year of satisfactory monthly samples following a number of positive bacteriological samples.

Your next coliform bacteria sample is due by March 31, 2024.

If you have any questions please call me at (248) 897-2731.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

RE: POSITIVE TOTAL COLIFORM WATER SAMPLE RESULT AT E.L. JOHNSON NATURE CENTER HANDPUMP
WSSN: # 22464-63

Dear Owner/Operator:

A water sample was collected from your noncommunity water supply serving 1000 or fewer people per day on September 26, 2023. The sample tested positive for coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399 P.A. 1976 and the Rules as amended, you must collect four (4) repeat samples within 24 hours of notification of unsatisfactory sample results.

Repeat samples must be collected at locations designated on your sample siting plan including:

- Four samples from the handpump

If you have not re-sampled as described above, do so immediately. If needed, please contact this office to review sample collection techniques and locations. Until safe samples are obtained, precautionary measures, such as providing bottled water, are highly encouraged.

Failure to collect all of your repeat samples or follow up in a timely manner will result in triggering a Level 1 or Level 2 Assessment and may result in increased monitoring.

If you have any questions, please contact me at 248-431-0930.

Sincerely,

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliforms are commonly associated with sewage and used as indicator organisms. This is due to their origin in the intestinal tract in humans and other warm blooded animals.

For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

RE: RETURN TO COMPLIANCE FOR E.L. JOHNSON NATURE CENTER HANDPUMP

WSSN # 22464-63

Dear Owner/Operator:

The Oakland County Health Division has received the results of the coliform repeat samples that were taken on October 4, 2023 from E.L. Johnson Nature Center water supply. All sample results were satisfactory, indicating the presence of **no** coliform bacteria.

You may resume your routine coliform sampling of one coliform sample per calendar month. *Please consider this letter as notification to collect the required water samples.*

If utilizing the Oakland County Health Division Laboratory, normal business hours are Monday – Wednesday from 8:00 AM to 4:30 PM and Thursday from 8:00 AM to 3:00 PM. The lab is closed on Fridays.

If you have any questions please call me at (248) 285-8621.

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliforms are commonly associated with sewage and used as indicator organisms. This is due to their origin in the intestinal tract in humans and other warm blooded animals.
For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

RE: **POSITIVE TOTAL COLIFORM WATER SAMPLE RESULT AT E.L. JOHNSON NATURE CENTER, 3325 FRANKLIN RD, BLOOMFIELD HILLS**
WSSN: **# 22464-63**

Dear Owner/Operator:

A water sample was collected from your noncommunity water supply serving 1000 or fewer people per day on November 21, 2022. The sample tested positive for coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399 P.A. 1976 and the Rules as amended, you must collect four (4) repeat samples within 24 hours of notification of unsatisfactory sample results.

Repeat samples must be collected at locations designated on your sample siting plan including:

- four from the handpump

If you have not re-sampled as described above, do so immediately. If needed, please contact this office to review sample collection techniques and locations. Until safe samples are obtained, precautionary measures, such as providing bottled water, are highly encouraged.

Failure to collect all of your repeat samples or follow up in a timely manner will result in triggering a Level 1 or Level 2 Assessment and may result in increased monitoring.

In December 2022, 3 additional routine bacteriological samples will be required. The 3 additional samples will need to be collected on 3 different days. If you have any questions, please contact me at 248-285-8621.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

E.L. JOHNSON NATURE CENTER
3325 FRANKLIN RD
BLOOMFIELD HILLS, MI 48302

RE: E. COLI MAXIMUM CONTAMINANT LEVEL VIOLATION AT E.L. JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Owner/Operator:

Water samples from the above listed well were collected on November 21, 2022 and were positive for total coliform bacteria.

A second set of samples was collected on November 30, 2022 and at least one of these samples was positive for E. coli and/or total coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399 P.A. 1976 and the Rules as amended, this constitutes an E. coli maximum contaminate level (MCL) violation. Therefore you must now do the following:

1. Take the well out of service. This includes providing a safe alternate source of water available to the public for consumption. For continued business operation, you must use bottled water for all drinking water purposes, including making coffee and dishwashing.
2. The standard procedure and this departments recommendation is to have the well and water supply system chlorinated by a Michigan Registered Water Well Contractor. Once chlorination is completed and the well is flushed 2 additional samples collected 24 hours apart are required as indicated in step 3.
   We recommend the displacement method be used for chlorinating the well. A volume of chlorinated water (200 ppm concentration) equal to at least 5 times the casing volume be placed or pumped into the well. Allow a contact time (overnight). Pump the well to waste until no trace of chlorine is present.
3. Resample the well. Contact this office for assistance. Collect 2 samples, at least 24 hours apart, with verification that no chlorine residual is present. Submit a copy of the sample results to this office.
4. Public notice is required to be posted while the well is out of service. Please sign and fax the enclosed public notice as soon as possible and return to this office.
5. The water system may not be put back into service until approval from this health department has been issued.
6. In December 2022, three (3) additional bacteriological samples will need to be taken.

As a result of the E. coli MCL violation, a Level 2 Assessment (LV2) is required to be conducted and completed by the Oakland County Health Division. The purpose of the LV2 is to identify sanitary defects, establish corrective actions, and propose a timetable for any corrective actions.

As the result of triggering the LV2, the monitoring frequency for this facility will be increased to monthly sampling starting December 2022. A reduction in monitoring will be determined by Oakland County Health Division after 12 months of compliance.

A site visit will be conducted to review these requirements and conduct the Level 2 Assessment.

If you have questions concerning this correspondence please contact me at (248) 285-8621, or Shelby DeWitt at the Michigan Department of Environment, Great Lakes, and Energy, Noncommunity Drinking Water Unit, at (517) 388-9123. Thank you for your cooperation.

Sincerely,

Do Not Use Tap Water For:
- Drinking
- Soup, Juice, Coffee
- Making Ice
- Brushing teeth
- Dishwashing

Use Special Precautions For:
- Hand Washing
- Bathing

For your safety, until the problem is corrected, safe water is provided as follows: <fill in>

E. coli bacteria were found in the E.L. Johnson Nature Center water supply on November 30, 2022.

DO NOT DRINK THE WATER.
USE ALTERNATE SUPPLY OF WATER FOR CONSUMPTION AND OTHER USES AS NOTED

Potential Health Effects
E. coli are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely-compromised immune systems.

The symptoms above are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice. People at increased risk should seek advice about drinking water from their health care providers. Use commercially prepared hand sanitizer/wipes for hand washing. Do not allow infants or young children to bathe or shower in contaminated water since they may ingest it.

What happened and what is being done

Bacterial contamination can occur when surface waters gains entry to the drinking water source, storage or distribution system (after construction, repairs, or damage to the well, tanks or piping).

We are working with the local health department to resolve this problem. We anticipate resolving the problem within 10 days. For more information, please contact E.L. Nature Center at 248-341-6487 or the Oakland County Health Division at 248-858-1312.

PROOF OF DELIVERY

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

RE: CONCLUSION OF LEVEL TWO ASSESSMENT FOR EL JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Owner/Operator:

I am in receipt of the results of the repeat coliform bacteria water samples, which were reported as "not detected".

You are required to submit a set of 3 routine coliform samples in DECEMBER 2022 – these samples have been waived to January 2023 as the facility is closed until January. Beginning February 2023 your new coliform monitoring frequency will be monthly, one coliform sample per month for at least 12 months.

Statute 325.1007 of Michigan's Safe Drinking Water Act allows this Division to impose a civil fine of $200 against a public water system that fails to collect the required water samples. Each subsequent violation may result in a $400 civil fine. We urge you to submit water samples diligently to avoid this type of enforcement action. *Please consider this letter as notification to collect the required water samples.*

Thank you for your cooperation. If you have any questions please call me at (248) 431-0930.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

Comments:

Reported By: marteka, 12/15/2022 **Date and Time Analyzed:** 12/14/2022 14:40

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliforms are commonly associated with sewage and used as indicator organisms. This is due to their origin in the intestinal tract in humans and other warm blooded animals.

For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

Analysis provided by Oakland County Health Division Laboratory, 1200 N. Telegraph Rd., Pontiac, MI 48341-0432 (MIDEQ ID 0012, and EPA ID MI00101)

Conclusions:

- ☐ Sanitary defect(s) were found (see above).
- ☐ Issues were found (see above).
- ☒ No obvious deficiencies or issues were identified.
- ☐ Annual Site Visit Only – System approved to remain on annual monitoring.

The following Corrective Action Plan (CAP) and/or action(s) are now required:

- ☒ Increase to monthly monitoring (required as a result of a trigger into a Level 2 Assessment).
- ☒ CAP – Disinfect the water supply system, flush the system, and collect two samples 24 hours apart*.
- ☐ CAP – Repair/replace the following*:
- ☐ CAP – Other*:
- ☐ None (Satisfactory Annual Site Visit Only):

* Actions required to be completed by 1/15/23 (date).

Total Coliform Sampling Postponement Waiver Form

ssued under authority of the Safe Drinking Water Act, 1976 PA 399, as amended, MCL 325.1001 et seq., and its Administrative Rules (Act 399).

Supply Name: EL JOHNSON NATURE CENTER	
WSSN: 2246463	Source ID: 001
Bacteriological Sampling Frequency: MONTHLY	Number of Routine Samples Required: 3
Level 1 Assessment Trigger Date: 11/21/22	Level 1 Assessment reviewed Date: 12/1/22

This postponement waiver is solely for noncommunity systems utilizing groundwater; serving 1,000 people a day or fewer; and on quarterly or annual routine bacteria monitoring.

Requirement for collecting three routine coliform samples for the month of DECEMBER 2022 is postponed in accordance with R325.10704d(10), based on a site investigation and subsequent findings.

Date of site visit:

Check specific cause of repeat total coliform positive sample: (If no cause was found, a postponement waiver should not be considered.)

- ☐ System conducted construction and/or repairs followed by inadequate disinfection
- ☐ Sanitary deficiency in well, pumping equipment, distribution system (dead end lines in basement)
- ☒ Other: Describe: HANDPUMP - INADEQUATE PRESSURE.

Check applicable action taken to correct cause identified above:

- ☐ Corrected sanitary deficiency in well or pumping equipment. Date:
- ☐ Corrected sanitary deficiency in distribution system. Date:
- ☒ Disinfected well/distribution system according to procedure. Date: 12/8/22
- ☐ Additional monitoring will be required: Describe:
- ☐ Other: Describe:

* NOTE - FACILITY CLOSED 12/21 - JAN 3rd.

Three additional routine samples shall be collected during the month of JAN 2023 to satisfy Rule 704d(10). These samples must come from different drinking water sites if collected on the same date. If fewer sites are available, the additional routine samples shall be collected at regular time intervals throughout the month.

A Waiver postponement recommended by: MADER Date: 12/21/22

A previous waiver postponement has been issued to this system: ☐ Yes ☒ No

Date of previous waiver postponement:

No system should receive more than two postponement waivers in a rolling 12-month period.

Supervisor Signature: Deborah McArthur Date: 1/4/2023

RE: RETURN TO COMPLIANCE FOR EL JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Owner/Operator:

The Oakland County Health Division has received the results of the 3 routine coliform samples that were taken from EL Johnson Nature water supply. All sample results were satisfactory, indicating the presence of **no** Coliform bacteria.

You may now return to your normal monitoring frequency. The next coliform bacteria sample is due by February 28, 2023.

If you have any questions please call me at (248) 285-8621.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Health and Human Services

RE: SANITARY SURVEY OF THE WATER SUPPLY AT– E.L. JOHNSON NATURE CENTER – 3325 FRANKLIN RD, BLOOMFIELD HILLS, MI

WSSN # 22464-63

Dear Owner/Operator:

A copy of the sanitary survey of your public water system is enclosed. The survey performed at the above captioned address on June 21, 2022 was conducted under the authority of the Michigan Safe Drinking Water Act, Act 399, P.A. of 1976, as amended and rules (Act), was to:

1. Determine if the system meets minimum construction and operation standards and require correction where necessary,
2. Determine if the system currently meets applicable state drinking water standards, and
3. Establish water quality monitoring (water sampling) requirements.

The following describes the results of the survey and your water quality monitoring requirements.

Construction/Operation

This public water supply is served by 1 well. The well is identified as source 001. The exact location of this well is indicated on the map of the site enclosed with this letter.

Water Storage and Pumps:
The water supply is a handpump.

Distribution System:
The water supply does not have a distribution system.

Water Treatment and Water Quality
A review of the most recent water quality test results shows that the water supply is in compliance with the appropriate drinking water standards at the time of sampling.

Water Treatment Systems:
The water supply does not utilize treatment.

Routine Monitoring (Sampling) Requirements

Unless you are required to sample more frequently as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -
Frequency: Quarterly (1 sample every 3 months)
Last sample was taken May 31, 2022
Next sample due before September 30, 2022
Sampling location: Handpump

***Nitrate (inorganic) -**
Frequency: Annually (1 sample every year)
Last sample was taken June 21, 2022
Next sample due before December 31, 2023
Sampling location: Handpump.

***Note:** A nitrite sample only has to be collected one time. The nitrite sample should be collected as part of the initial approval process. No additional nitrite samples are required.

Sample Procedures

The Oakland County laboratory offers drinking water analysis for coliform bacteria for a $12 fee, and nitrate/nitrite for a $10 fee. Sample bottles and forms may be obtained from our two offices in Pontiac and Southfield.

If you choose to use the EGLE laboratory, sample bottles may be obtained by ordering them directly from the EGLE laboratory.

If a laboratory other than the EGLE or Oakland County laboratory is used for sample analysis, it must be EGLE certified for the analysis performed. A copy of the results of the analysis must be provided to this office by the water supply owner/operator within ten days of the end of the monitoring period. Please be aware that all positive coliform sample results must be reported to this office within 48 hours. Payments of all laboratory fees are the responsibility of the owner/operator of the water supply.

A Water Supply Serial Number (WSSN), a computer number used for identification purposes, has been assigned to each public water supply in the state. Your water supply serial number is **WSSN #22464-63**, and must be recorded on each water sample form. Without this number on the sample form, you will not be credited for collecting a required sample.

Act 399 specifies that it is the owner/operator's responsibility to collect and submit the required water samples for analysis and to maintain and operate the water system in a sanitary condition.

The well that serves your facility has been mapped in a statewide ground water database through the use of geographical positioning system (GPS) units. When this information is compiled, the state can develop maps showing areas where public water supplies may be at risk.

If you have questions regarding the sanitary survey, the required upgrading, or monitoring (sampling) requirements, please contact me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

RE: POSITIVE TOTAL COLIFORM WATER SAMPLE RESULT AT E.L. JOHNSON NATURE CENTER HANDPUMP
WSSN: # 22464-63

Dear Owner/Operator:

A water sample was collected from your noncommunity water supply serving 1000 or fewer people per day on November 23, 2021. The sample tested positive for coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399 P.A. 1976 and the Rules as amended, you must collect four (4) repeat samples within 24 hours of notification of unsatisfactory sample results.

Repeat samples must be collected at locations designated on your sample siting plan including:

- Four samples from the handpump

If you have not re-sampled as described above, do so immediately. If needed, please contact this office to review sample collection techniques and locations. Until safe samples are obtained, precautionary measures, such as providing bottled water, are highly encouraged.

Failure to collect all of your repeat samples or follow up in a timely manner will result in triggering a Level 1 or Level 2 Assessment and may result in increased monitoring.

In December 2021, 3 additional routine bacteriological samples will be required. If you have any questions, please contact me at 248-858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

RE: RETURN TO COMPLIANCE FOR E.L. JOHNSON NATURE CENTER HANDPUMP

WSSN # 22464-63

Dear Owner/Operator:

The Oakland County Health Division has received the results of the coliform repeat samples that were taken on November 29, 2021 from E.L. Johnson Nature Center Handpump water supply. All sample results were satisfactory, indicating the presence of **no** coliform bacteria.

You are required to submit **three (3) additional** bacteriological samples during the month of December 2021. ***They must be collected on 3 different days***. *Please consider this letter as notification to collect the required water samples.*

If utilizing the Oakland County Health Division Laboratory, normal business hours are Monday – Wednesday from 8:00 AM to 4:30 PM and Thursday from 8:00 AM to 3:00 PM. The lab is closed on Fridays.

If you have any questions, please call me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

BLOOMFIELD HILLS, MI 48302

RE: POSITIVE TOTAL COLIFORM WATER SAMPLE RESULT AT E.L. JOHNSON NATURE CENTER
WSSN: # 22464-63

Dear Owner/Operator:

A water sample was collected from your noncommunity water supply serving 1000 or fewer people per day on June 12, 2018. The sample tested positive for coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399 P.A. 1976 and the Rules as amended, you must collect four (4) repeat samples within 24 hours of notification of unsatisfactory sample results.

Repeat samples must be collected at locations designated on your sample siting plan including:

- one from the same tap as the initial positive – initial sampling location - pump
- one from the raw water sample tap as the groundwater source – raw water tap
- two from the LHD designated sampling locations in the distribution system

If you have not re-sampled as described above, do so immediately. If needed, please contact this office to review sample collection techniques and locations. Until safe samples are obtained, precautionary measures, such as providing bottled water, are highly encouraged.

Failure to collect all of your repeat samples or follow up in a timely manner will result in triggering a Level 1 or Level 2 Assessment and may result in increased monitoring.

In July 2018, 3 additional routine bacteriological samples will be required. If you have any questions, please contact me at 248-858-1342.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Health and Human Services

RE: RETURN TO COMPLIANCE FOR E.L. JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Sir or Madam:

The Oakland County Health Division has received the results of the 3 routine coliform samples that were taken from E.L. Johnson Nature Center water supply. All sample results were satisfactory, indicating the presence of **no** Coliform bacteria.

You may now return to your normal monitoring frequency. The next coliform bacteria sample is due by September 30, 2018.

If you have any questions please call me at (248) 858-1342.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

RE: SANITARY SURVEY OF THE WATER SUPPLY AT – E.L. JOHNSON NATURE CENTER, 3325 FRANKLIN ROAD, BLOOMFIELD HILLS, MI 48302

WSSN # 22464-63

Dear Owner/Operator:

A copy of the sanitary survey of your public water system is enclosed. The purpose of this sanitary survey, conducted under the authority of the Michigan Safe Drinking Water Act, Act 399, P.A. of 1976, as amended and rules (Act), was to:

1. Determine if the system meets minimum construction and operation standards and require correction where necessary,
2. Determine if the system currently meets applicable state drinking water standards, and
3. Establish water quality monitoring (water sampling) requirements.

The following describes the results of the survey and your water quality monitoring requirements.

Construction/Operation
According to the items surveyed, the water system is in compliance with the construction standards established by the Act.

Routine Monitoring (Sampling) Requirements

Unless you are required to sample more frequently as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -

Frequency: Quarterly (1 sample every 3 months)
Last sample was taken July 6, 2017
Next sample due between: October 1, 2017 – December 31, 2017
Sampling location: Drinking water faucet.
Sample containers: Order unit 30, test code BPTC if using the Michigan Department of Environmental Quality (DEQ) laboratory.

*** Nitrate (inorganic) -**

Frequency: Annually (1 sample every year)
Last sample was taken July 6, 2017
Next sample due before July 6, 2018
Sampling location: A raw water sampling tap as close to the well as possible, and before any water treatment device.
Sample containers: Order unit 32, test code R if using DEQ laboratory.

***Note:** A nitrite sample only has to be collected one time. The nitrite sample should be collected as part of the initial approval process. No additional nitrite samples are required.

Sample Procedures

The Oakland County laboratory offers water analysis for coliform bacteria for a $6 fee, and nitrate/nitrite for a $5 fee. Sample bottles and forms may be obtained from our two offices in Pontiac and Southfield.

If you choose to use the DEQ laboratory, sample bottles may be obtained by ordering them directly from the DEQ laboratory.

If a laboratory other than the DEQ or Oakland County laboratory is used for sample analysis, it must be DEQ certified for the analysis performed. A copy of the results of the analysis must be provided to this office by the water supply owner/operator within ten days of the end of the monitoring period. Please be aware that all positive coliform sample results must be reported to this office within 48 hours. Payments of all laboratory fees are the responsibility of the owner/operator of the water supply.

A Water Supply Serial Number (WSSN), a computer number used for identification purposes, has been assigned to each public water supply in the state.
Your water supply serial number is **WSSN # 22464-63**, and must be recorded on each water sample form. Without this number on the sample form, you will not be credited for collecting a required sample.

Act 399 specifies that it is the owner/operator's responsibility to collect and submit the required water samples for analysis and to maintain and operate the water system in a sanitary condition.

The well that serves your facility has been mapped in a statewide ground water database through the use of geographical positioning system (GPS) units. When this information is compiled, the state can develop maps showing areas where public water supplies may be at risk.

If you have questions regarding the sanitary survey, the required upgrading, or monitoring (sampling) requirements, please contact me at (248) 858-1342.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Health and Human Services

Amanda McMahon, REHS, MS

INTERPRETATION OF TESTS

The Oakland County Health Division analyzes drinking water for five parameters in a routine testing procedure referred to as a partial chemical analysis. Below is a table of these parameters and associated problems.

Except for fluoride and nitrate, the levels listed below are general guidelines. State drinking water standards have been established and are listed for these two chemicals.

Analysis Provided by:
Oakland County Health Division Laboratory
1200 N. Telegraph Rd., Pontiac, MI 48341-0432

CHANGE OF COLIFORM BACTERIA SAMPLING FREQUENCY
E. L. JOHNSON NATURE CENTER
WSSN: 2246463

Dear Water Supply Owner:

On April 1, 2016, the Revised Total Coliform Rule (RTCR) replaces the current requirements in The Safe Drinking Water Act, 1976 PA 399, as amended (SDWA). In anticipation of this rule change, the Oakland County Health Division is placing all Type II facilities on quarterly coliform monitoring. Most facilities are already sampling quarterly for coliform, but a few are sampling annually. Your Type II facility is one of those few.

Be advised, your public water supply will be placed on quarterly sampling (one sample every three months) beginning January 1, 2016. You will be required to submit a coliform bacterial sample each calendar quarter: January – March, April – June, July – September and October – December. You will begin receiving quarterly reminders for coliform samples in February 2016. Remember, you may sample anytime in the quarter and do not have to wait until the due date on the postcard to submit your sample.

Please keep this documentation for your records. If you have any questions regarding this correspondence, please contact me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Health and Human Services

RE: SANITARY SURVEY OF THE WATER SUPPLY AT– E.L. JOHNSON NATURE CENTER – 3325 FRANKLIN RD, BLOOMFIELD HILLS, MI

WSSN # 22464-63

Dear Owner/Operator:

A copy of the sanitary survey of your public water system is enclosed. The purpose of this sanitary survey, conducted under the authority of the Michigan Safe Drinking Water Act, Act 399, P.A. of 1976, as amended and rules (Act), was to:

1. Determine if the system meets minimum construction and operation standards and require correction where necessary,
2. Determine if the system currently meets applicable state drinking water standards, and
3. Establish water quality monitoring (water sampling) requirements.

The following describes the results of the survey and your water quality monitoring requirements.

Construction/Operation

According to the items surveyed, the water system is in compliance with the construction standards established by the Act.

Routine Monitoring (Sampling) Requirements

Unless you are required to sample more frequently as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -

Frequency: Annually (1 sample every year)
Last sample was taken July 9, 2012
Next sample due before July 9, 2013
Sampling location: Drinking water faucet.
Sample containers: Order unit 30, test code BPTC if using the Michigan Department of Environmental Quality (DEQ) laboratory.

*** Nitrate (inorganic) -**

Frequency: Annually (1 sample every year)
Last sample was taken July 9, 2012
Next sample due before July 9, 2013
Sampling location: A raw water sampling tap as close to the well as possible, and before any water treatment device.
Sample containers: Order unit 32, test code R if using DEQ laboratory.

***Note:** A nitrite sample only has to be collected one time. The nitrite sample should be collected as part of the initial approval process. No additional nitrite samples are required.

Sample Procedures

The Oakland County laboratory offers water analysis for coliform bacteria for a $6 fee, and nitrate/nitrite for a $5 fee. Sample bottles and forms may be obtained from our two offices in Pontiac and Southfield.

If you choose to use the DEQ laboratory, sample bottles may be obtained by ordering them directly from the DEQ laboratory.

If a laboratory other than the DEQ or Oakland County laboratory is used for sample analysis, it must be DEQ certified for the analysis performed. A copy of the results of the analysis must be provided to this office by the water supply owner/operator within ten days of the end of the monitoring period. Please be aware that all positive coliform sample results must be reported to this office within 48 hours. Payments of all laboratory fees are the responsibility of the owner/operator of the water supply.

A Water Supply Serial Number (WSSN), a computer number used for identification purposes, has been assigned to each public water supply in the state. Your water supply serial number is **WSSN #22464-63**, and must be recorded on each water sample form. Without this number on the sample form, you will not be credited for collecting a required sample.

Act 399 specifies that it is the owner/operator's responsibility to collect and submit the required water samples for analysis and to maintain and operate the water system in a sanitary condition.

The well that serves your facility has been mapped in a statewide ground water database through the use of geographical positioning system (GPS) units. When this information is compiled, the state can develop maps showing areas where public water supplies may be at risk.

If you have questions regarding the sanitary survey, the required upgrading, or monitoring (sampling) requirements, please contact me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

Bacteriological analysis of **SWIMMING POOL** sample:

☐ Satisfactory ☐ Unsatisfactory

Bacteriological analysis of **LAKE, STREAM, SURFACE** bathing area:

☐ Satisfactory ☐ Unsatisfactory

☐ **RESAMPLING RECOMMENDED**

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliforms are commonly associated with sewage and used as indicator organisms. This is due to their origin in the intestinal tract in humans and other warm blooded animals.

For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

INTERPRETATION OF TESTS

The Oakland County Health Division analyzes drinking water for five parameters in a routine testing procedure referred to as a partial chemical analysis. Below is a table of these parameters and associated problems.

Except for fluoride and nitrate, the levels listed below are general guidelines. State drinking water standards have been established and are listed for these two chemicals.

Analysis Provided by:
Oakland County Health Division Laboratory
1200 N. Telegraph Rd., Pontiac, MI 48341-0432
BLDG. 32E MDEQ #0012

TEST RESULTS IN MILLIGRAMS PER LITER (MG/L)				
TEST	**EXCELLENT**	**SATISFACTORY**	**OBJECTIONABLE**	**PROBLEM**
Fluoride	0.8-1.7*	1.7-4.0	Over 4.0 (State drinking water standardsis 4)	Low levels are beneficial in preventing tooth decay. High levels may cause mottling of teeth
Chloride	ND-20	20-250	Over 250	Taste; corrosion
Nitrite	ND	0-1	Over 1	Nitrite poisoning especially infants
Nitrate as N	ND	1-10	Over 10 (State drinking water standards is 10)	Nitrate poisoning especially infants
Sulfate	ND-50	50-250	Over 250	Laxative, taste, odor, scaling in boilers, heat exchangers

*** A doctor/dentist prescribed fluoride supplement may be appropriate below 0.8 mg/L.**

The Oakland County Health Division will not deny participation in its programs based on race, sex, religion, national origin, age or disability. State and federal eligibility requirements apply for certain programs.

RE: RETURN TO COMPLIANCE FOR EL JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Sir or Madam:

I have received the results of the 5 repeat coliform samples that were taken from EL Johnson Nature Center water supply. All sample results were satisfactory, indicating the presence of **no** Coliform bacteria.

You may now return to your normal monitoring frequency. The next coliform bacteria sample is due by March 31, 2011.

If you have any questions please call me at (248) 858-1332.

RE: RETURN TO COMPLIANCE FOR E L JOHNSON NATURE CENTER

WSSN # 22464-63

Dear Supply Owner/Operator:

I have received the results of the coliform repeat samples that were taken November 22, 2010 from the E L Johnson Nature Center water supply. All sample results were satisfactory, indicating the presence of **no** Coliform bacteria.

You are required to submit **five (5) additional** bacteriological sample results by December 27, 2010. They may be collected all at once or on different days. **Please be advised that if using the Oakland County Lab, the hours are Monday – Wednesday 8:00am – 4:30pm and Thursday 8:00am – 3:00pm and they are on closed Fridays.**

Rule 325.1007 of Michigan's Safe Drinking Water Act allows this division to impose a civil fine of $200 against a public water system that fails to collect the required water sample on more than one occasion in a 12-month period. Each subsequent violation may result in a $400 civil fine. We urge you to submit water samples diligently to avoid this type of enforcement action

If you have any questions please call me at (248) 858-1332.

RE: **UNACCEPTABLE WATER SAMPLE RESULTS – E L JOHNSON NATURE CENTER**
WSSN: **# 22464-63**

Dear Sir or Madam:

On November 16, 2010, water samples were collected from E L Johnson Nature Center. One sample was positive (POS) for Coliform bacteria. Under the provisions of the Safe Drinking Water Act, Act 399, P.A. 1976 and Rules as amended, you must collect four (4) repeat samples **within 24 hours of notification** of unsatisfactory sampling results.

- One sample must be collected from the same tap as the initial POS.
- One sample must be collected from the raw water tap.
- The other resamples may be collected from other locations in the distribution system.

This letter is written notification. Verbal communication of its content occurred. If you have not resampled, please do so immediately.

If all four repeat samples are satisfactory, you are required to submit **five (5) additional** bacteriological samples the following month. They may be collected all at once or on different days. **Rule 325.1007 of Michigan's Safe Drinking Water Act allows this division to impose a civil fine of $200 against a public water system that fails to collect the required water sample on more than one occasion in a 12-month period. Each subsequent violation may result in a $400 civil fine. We urge you to submit water samples diligently to avoid this type of enforcement action.**

You must include your WSSN (water supply serial number) on the sample report form in order for OCHD to be able to credit you for sampling. Thank you for your cooperation. If you have any questions regarding the resampling, please call me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

ANALYSIS OF WATER

Bacteriological analysis of **DRINKING WATER** sample:

☐ Satisfactory ☐ Unsatisfactory

Bacteriological analysis of **SWIMMING POOL** sample:

☐ Satisfactory ☐ Unsatisfactory

Bacteriological analysis of **LAKE, STREAM, SURFACE** bathing area:

☐ Satisfactory ☐ Unsatisfactory

☐ **RESAMPLING RECOMMENDED**

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliforms are commonly associated with sewage and used as indicator organisms. This is due to their origin in the intestinal tract in humans and other warm blooded animals.

For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

RE: WATER SUPPLY AT E L JOHNSON NATURE CENTER
WSSN # 22464-63

Dear Mr. Badgley:

A copy of the sanitary survey of your public water system is enclosed. The purpose of this sanitary survey conducted under the authority of Michigan's Safe Drinking Water Act (Act 399 of the Public Acts of 1976) and Administrative Rules, was to:

1. Determine if the system meets minimum construction and operation standards and require correction where necessary;
2. Determine if the system currently meets applicable state drinking water standards;
3. Establish water quality monitoring (water sampling) requirements; and
4. Complete a source water assessment that will assess the susceptibility of the water supply to contamination.

The following describes the results of the survey and your water quality monitoring requirements.

Construction/Operation

According to the items surveyed, the water system is in compliance with the construction standards established by the Act..

Routine Monitoring (Sampling) Requirements

Unless you are required to sample more frequently as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -
Frequency: Annually (1 sample every year)
Last sample was taken July 25, 2007
Next sample due before July 25, 2008
Sampling location: Drinking water faucet.
Sample containers: Order unit 30, test code BPTC if using MDEQ laboratory.

*** Nitrate (inorganic) -**

Frequency: Annually (1 sample every year)
Last sample was taken July 25, 2007
Next sample due before July 25, 2008
Sampling location: A raw water sampling tap as close to the well as possible, and before any water treatment device.
Sample containers: Order unit 32, test code R if using MDEQ laboratory.

- Beginning January 1, 1993, all noncommunity systems must sample annually for nitrate and collect at least one initial sample for nitrite. The nitrite analysis will be incorporated into the automated testing and will be done when a nitrate is run at the MDEQ or OCHD laboratory. However, if another lab is used the supplier must request both nitrate and nitrite analysis.

Sample Procedures

The Oakland County laboratory offers analysis of drinking water for coliform bacteria and nitrate/nitrite at no cost to Oakland County residents and businesses. Sample bottles and forms may be obtained from any of our three offices in Pontiac, Walled Lake and Southfield.

If you choose to use the Michigan Department of Environmental Quality (MDEQ) laboratory, sample bottles may be obtained by ordering them directly from the MDEQ laboratory (order form and fee schedule enclosed). Payments of MDEQ laboratory fees are the responsibility of the owner/operator of the water supply.

If a laboratory other than the MDEQ or Oakland County laboratory is used for sample analysis, it must be MDEQ certified for the analysis performed. A copy of the results of the analysis must be provided to this office by the water supply owner/operator within ten days of the end of the monitoring period. Please be aware that all positive coliform sample results must be reported to this office.

A Water Supply Serial Number (WSSN), a computer number used for identification purposes, has been assigned to each public water supply in the state. Your water supply serial number is **WSSN #22464-63**, and must be recorded on each water sample form. Without this number on the sample form, you will not be credited for collecting a required sample.

Act 399 specifies that it is the owner/operator's responsibility to collect and submit the required water samples for analysis and to maintain and operate the water system in a sanitary condition.

The well that serves your facility has been mapped in a statewide ground water database through the use of geographical positioning system (GPS) units. When this information is compiled, the state can develop maps showing area where public water supplies may be at risk.

If you have questions regarding the sanitary survey, the required upgrading, monitoring (sampling) requirements or source water assessment, please contact me at (248) 858-1332.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION

TEST CONDUCTED	REPORTING DETECTION LIMIT	RESULTS	REPORTED BY: BL
Fluoride	.5	0.7 mg/L	* = REPEATED
Chloride	5.0	23.6 mg/L	
Nitrite	.1	ND mg/L	
Nitrate	1.0	ND mg/L	JUL 27 2007
Sulfate	5.0	84.4 mg/L	

ND = Not Detected

INTERPRETATION OF TESTS

The Oakland County Health Division analyzes drinking water for five parameters in a routine testing procedure referred to as a partial chemical analysis. Below is a table of these parameters and associated problems.

Except for fluoride and nitrate, the levels listed below are general guidelines. State drinking water standards have been established and are listed for these two chemicals.

TEST RESULTS IN MILLIGRAMS PER LITER (MG/L)

TEST	EXCELLENT	SATISFACTORY	OBJECTIONABLE	PROBLEM
Fluoride	0.8-1.7*	1.7-4.0	Over 4.0 (State drinking water standardsis 4)	Low levels are beneficial in preventing tooth decay. High levels may cause mottling of teeth
Chloride	ND-20	20-250	Over 250	Taste; corrosion
Nitrite	ND	0-1	Over 1	Nitrite poisoning especially infants
Nitrate as N	ND	1-10	Over 10 (State drinking water standards is 10)	Nitrate poisoning especially infants
Sulfate	ND-50	50-250	Over 250	Laxative, taste, odor, scaling in boilers, heat exchangers

*** A doctor/dentist prescribed fluoride supplement may be appropriate below 0.8 mg/L.**

RE: WATER SUPPLY
WSSN #22464-63

Dear Mr. Badgley:

A copy of the sanitary survey of your public water system is enclosed. The purpose of this sanitary survey conducted under the authority of Michigan's Safe Drinking Water Act (Act 399 of the Public Acts of 1976) and Administrative Rules, was to:

1. Determine if the system meets minimum construction and operation standards and require correction where necessary;
2. Determine if the system currently meets applicable state drinking water standards;
3. Establish water quality monitoring (water sampling) requirements; and
4. Complete a source water assessment that will assess the susceptibility of the water supply to contamination.

The following describes the results of the survey and your water quality monitoring requirements.

Construction/Operation

According to the items surveyed, the water system is in compliance with the construction standards established by the Act. The items of noncompliance and the necessary corrections are as follows:

Water Quality

The results of the laboratory analysis of water samples collected as part of the survey indicate that the water was in compliance with the appropriate drinking water standards for Coliform and Nitrate at the time of sampling.

Routine Monitoring (Sampling) Requirements

Unless you are required to sample more frequently as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -

Frequency: Annually (1 sample every year)
Last sample was taken September 17, 2002
Next sample due before September 17, 2003
Sampling location: Drinking water faucet.
Sample containers: Order unit 30, test code BPTC if using MDEQ laboratory.

*** Nitrate (inorganic) -**

Frequency: Annually (1 sample every year)
Last sample was taken September 17, 2002
Next sample due before September 17, 2003
Sampling location: A raw water sampling tap as close to the well as possible, and before any water treatment device.
Sample containers: Order unit 32, test code R if using MDEQ laboratory.

- Beginning January 1, 1993, all noncommunity systems must sample annually for nitrate and collect at least one initial sample for nitrite. The nitrite analysis will be incorporated into the automated testing and will be done when a nitrate is run at the MDEQ or OCHD laboratory. However, if another lab is used the supplier must request both nitrate and nitrite analysis.

Sample Procedures

The Oakland County laboratory offers analysis of drinking water for coliform bacteria and nitrate/nitrite at no cost to Oakland County residents and businesses. Sample bottles and forms may be obtained from any of our three offices in Pontiac, Walled Lake and Southfield.

If you choose to use the Michigan Department of Environmental Quality (MDEQ) laboratory, sample bottles may be obtained by ordering them directly from the MDEQ laboratory (order form and fee schedule enclosed). Payments of MDEQ laboratory fees are the responsibility of the owner/operator of the water supply.

If a laboratory other than the MDEQ or Oakland County laboratory is used for sample analysis, it must be MDEQ certified for the analysis performed. A copy of the results of the analysis must be provided to this office by the water supply owner/operator within ten days of the end of the monitoring period. Please be aware that all positive coliform sample results must be reported to this office.

A Water Supply Serial Number (WSSN), a computer number used for identification purposes, has been assigned to each public water supply in the state. Your water supply serial number is **WSSN #22464-63**, and must be recorded on each water sample form. Without this number on the sample form, you will not be credited for collecting a required sample.

Act 399 specifies that it is the owner/operator's responsibility to collect and submit the required water samples for analysis and to maintain and operate the water system in a sanitary condition.

Source Water Assessment

The 1996 amendments to the federal Safe Drinking Water Act (SDWA) require states to develop a source water assessment program (SWAP) to:

1. Identify the areas that supply public drinking water;

2. Assess the susceptibility of those water supplies to contamination;

3. Inform the public of the results.

Source water assessments are being performed on all of the approximately 10,500 noncommunity public water supplies and approximately 1300 community water supplies throughout the state of Michigan. The assessments performed on noncommunity public water supplies will result in a source water assessment score, which reflects the "inherent vulnerability" of the well and source water. The score is based on the following information:

1. Geologic Sensitivity - the degree of natural protection afforded by the overlying soils or rock formations and depth to water table;

2. Physical Properties of the Well - the well depth, age, depth of casing, grouting method and other key factors that contribute to the integrity of the water system;

3. Water Quality History - the chemical and isotope data of the well water as it indicates any influence from surface or near surface activities;

4. Contaminant Sources - the isolation of the water supply well from potential sources of contamination such as sewers, septic systems, fuel/chemical storage, lagoon, landfills and others.

The score that has been calculated for your water supply is indicated on an attachment to this letter.

The well that serves your facility will also be mapped in a statewide ground water database through the use of geographical positioning system (GPS) units. When this information is compiled, the state can develop maps showing area where public water supplies may be at risk.

If you have questions regarding the sanitary survey, the required upgrading, monitoring (sampling) requirements or source water assessment, please contact me at (248) 858-1332.

Very truly yours,

INTERPRETATION OF TESTS

The Oakland County Health Division analyzes drinking water for five parameters in a routine testing procedure referred to as a partial chemical analysis. Below is a table of these parameters and associated problems.

Except for fluoride and nitrate, the levels listed below are general guidelines. State drinking water standards have been established and are listed for these two chemicals.

TEST RESULTS IN MILLIGRAMS PER LITER (MG/L)

TEST	EXCELLENT	SATISFACTORY	OBJECTIONABLE	PROBLEM
Fluoride	0.8-1.7*	1.7-4.0	Over 4.0 (State drinking water standards is 4)	Low levels are beneficial in preventing tooth decay. High levels may cause mottling of teeth
Chloride	ND-20	20-250	Over 250	Taste; corrosion
Nitrite	ND	0-1	Over 1	Nitrite poisoning especially infants
Nitrate as N	ND	1-10	Over 10 (State drinking water standards is 10)	Nitrate poisoning especially infants
Sulfate	ND-50	50-250	Over 250	Laxative, taste, odor, scaling in boilers, heat exchangers

* A doctor/dentist prescribed fluoride supplement may be appropriate below 0.8 mg/1.

ANALYSIS OF WATER

Bacteriological analysis of DRINKING WATER sample: Satisfactory ☒ Unsatisfac.

Bacteriological analysis of SWIMMING POOL sample: Satisfactory ☐ Unsatisfactory ☐

Bacteriological analysis of LAKE-STREAM-SURFACE bathing area: Normal ☐ Unsatisfactory ☐

☐ **RESAMPLING RECOMMENDED**

Note that the bacteriological analysis of water is for the coliform bacterial group only. Such an analysis does not detect the presence of other types of bacteria or chemical contamination which may be present. Coliform are used as indicator organisms because they are found in sewage since they have their origin in the intestinal tract of humans and all other warm-blooded animals.

For on-site drinking water supplies, this analysis reports only the results of the water test. No evaluation of the safety of well construction features can be made by Environmental Health Services without a complete on-site inspection of the water supply system.

RE: Type II transient public water supply permit final inspection, and sanitary survey.

WSSN: 22464-63

Dear Mr. Badgley:

Enclosed is a copy of the final inspection report, and water sample report results for the new type II public water supply well, and public water supply distribution system located at the above captioned address.

In accordance with the State of Michigan, Safe Drinking Water Act, Act 399, P.A. of 1976, and Administrative Rules as Amended, it is the responsibility of the supplier of water to the public to meet minimum water system construction, operation, sampling, and water quality standards. The purpose of the Type II public water supply permit final inspection, and sanitary survey of the public water supply distribution system is to:

1. Determine if the public water supply well, and distribution system meets minimum construction, and operation standards.

2. Determine if the public water supply well, and distribution system meets applicable water quality standards.

3. Establish future sampling requirements in accordance with state, and Federal law.

The following describes the results of the final inspection, sanitary survey, and your future sampling requirements.

CONSTRUCTION/OPERATION

According to the final inspection of all items surveyed, the Type II public water supply well, and public water supply distribution system is in compliance with the construction standards established by the Act. All records related to this Type II public water supply system which includes the final inspection report/approved permit, water well log, water sample result forms, and any repair receipts are required to be maintained as a file of the water system for a minimum of five (5) years.

WATER QUALITY

The results of the laboratory analysis of the water samples collected as part of the final inspection, and survey are also enclosed. These results indicate that the water was in compliance with the appropriate drinking water standards at the time of sampling.

MONITORING (SAMPLING) REQUIREMENTS

Unless you are required to sample more frequently by the Michigan Department of Public Health, or the Oakland County Health Division as a condition of a license or policy, your system must meet the following sampling schedule:

Coliform (bacteriologic) -

Frequency:	1 sample per year
Next sample due before:	May 1, 1998
Sampling location:	handpump
Sample containers:	Order unit 30, test code BPTC if using MDPH laboratory.

Nitrate (inorganic) -

Frequency:	1 sample per year
Next sample due before:	May 1, 1998
Sampling location:	A raw water sampling tap located as close to the well as possible, and before any water treatment device.
Sample containers:	Order unit 32, test code R if using MDPH laboratory.

Sample Procedures

Sample bottles may be obtained by ordering them directly from the MDPH laboratory (order form and fee schedule enclosed). Payment of MDPH laboratory fees are the responsibility of the owner/operator of the water supply.

If a laboratory other than the MDPH laboratory is used for sample analysis, it must be MDPH certified for the analysis performed, and a copy of the results of the analysis must be provided to this office by the water supply owner/operator. The Oakland County laboratory can only test for Bacti, Nitrites, and Nitrates - each of which are done at no charge.

A computer number used for identification purposes called a Water Supply Serial Number (WSSN) has been assigned to each public water supply in the State of Michigan. Your public Water Supply Serial Number is **WSSN 72464-63** and must be recorded on each water sample form. Without this number on the sample form, you may not be credited for collecting a required sample.

Act 399 specifies that it is the owner, and/or operator's responsibility to collect, and submit the required water samples for analysis. Also, Act 399 specifies that the owner, and/or operator must maintain, and operate the public water system in a sanitary condition.

If you have any questions regarding the Type II public water supply permit final inspection, sanitary survey, or monitoring (sampling) requirements, please contact the Oakland County Health Division at (810) 858-1332. Thank you for your cooperation.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Institutional and Human Services

RE: Type II water supply well permit for E.L. Johnson Nature Center

Dear Mr. Badgley:

Enclosed is the approved Type II well permit application for the above captioned site.

Please note the conditions of the permit are as follows:

ISOLATION

Type II water wells are to be located at least 800 feet from underground storage tanks.

Type II water wells are to be located at least 75 feet away from septic systems, sewer lines, storm water run-off catch basins and buried storm water lines.

GROUTING

The well must be grouted using material and methods approved by the Michigan Department of Public Health. The grouting addendum enclosed with the permit addresses proper grouting requirements. The grouting addendum specifies grout from the bottom of the casing up to the surface.

INSPECTION

Please inform the well driller that in addition to a final well inspection, a grouting inspection is required. The well driller should call (810) 858-1332 to plan an inspection during the grouting operation.

WELL RECORD

The well contractor is to complete the well record upon completion of the well, and submit a copy directly to the Oakland County Health Division.

The well record will be used for verification of well installation at time of final inspection.

DISINFECTION AND SAMPLING

The Michigan Department of Public Health has found that the most effective method is placing heavily chlorinated water into the well to displace at least two times the amount of water in the casing. This method is called the displacement method. Heavily chlorinated water is pumped into the system, and allowed to remain in the system for a minimum of twenty four (24) hours. After a contact time of a minimum of twenty four (24) hours, the system is pumped to waste. After disinfection and pumping to waste, and the entire distribution system is operational, the Oakland County Health Division must be contacted for final inspection, and sampling. A minimum of two (2) consecutive samples (at least eight (8) hours apart with no chlorine residual in the system) must be obtained prior to use of the well by the public.

If there are any question regarding what is required, or if changes to the permit are proposed, please contact the Oakland County Health Division prior to well construction at (810) 858-1332.

Very truly yours,

OAKLAND COUNTY HEALTH DIVISION

Bloomfield Hills, MI 48302

Permit No:	**WRP024492 v.1**
Submission No.:	**HNW-A3EW-T6E43**
Site Name:	**63-3325 Franklin Rd-Bloomfield Hills**
Issued:	**August 24, 2020**
Revised:	
Expires:	**August 24, 2025**

This permit is being issued by the Michigan Department of Environment, Great Lakes, and Energy (EGLE), Water Resources Division, under the provisions of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA); specifically:

- ☐ **Part 301, Inland Lakes and Streams**
- ☐ **Part 303, Wetlands Protection**
- ☐ **Part 315, Dam Safety**
- ☐ **Part 323, Shorelands Protection and Management**
- ☐ **Part 325, Great Lakes Submerged Lands**
- ☐ **Part 353, Sand Dunes Protection and Management**
- ☒ **Part 31, Water Resources Protection (Floodplain Regulatory Authority)**

Permission is hereby granted, based on permittee assurance of adherence to State of Michigan requirements and permit conditions, to:

Authorized Activity:

This permit authorizes 10 cubic yards of fill for the construction of two pedestrian crossings of the Long Lake-Forest Lake Drain.

The 100 base flood elevation at this site ranges from 906.98 to 907.15 NAVD 88.

All work shall be completed in accordance with the attached approved plans and conditions of this permit.

Waterbody Affected:	Long Lake-Forest Lake Drain
Property Location:	Oakland County, Bloomfield Hills, Town/Range/Section 02N10E09, Property Tax No. 19-09-301-051

Authority granted by this permit is subject to the following limitations:

A. Initiation of any work on the permitted project confirms the permittee's acceptance and agreement to comply with all terms and conditions of this permit.
B. The permittee, in exercising the authority granted by this permit, shall not cause unlawful pollution as defined by Part 31 of the NREPA.

EGLE
WRP024492 v1.0
Approved
Issued On:08/24/2020
Expires On:08/24/2025

C. This permit shall be kept at the site of the work and available for inspection at all times during the duration of the project or until its date of expiration.
D. All work shall be completed in accordance with the approved plans and specifications submitted with the application and/or plans and specifications attached to this permit.
E. No attempt shall be made by the permittee to forbid the full and free use by the public of public waters at or adjacent to the structure or work approved.
F. It is made a requirement of this permit that the permittee give notice to public utilities in accordance with 2013 PA 174 (Act 174) and comply with each of the requirements of Act 174.
G. This permit does not convey property rights in either real estate or material, nor does it authorize any injury to private property or invasion of public or private rights, nor does it waive the necessity of seeking federal assent, all local permits, or complying with other state statutes.
H. This permit does not prejudice or limit the right of a riparian owner or other person to institute proceedings in any circuit court of this state when necessary to protect his rights.
I. Permittee shall notify EGLE within one week after the completion of the activity authorized by this permit by completing and forwarding the attached preaddressed postcard to the office addressed thereon.
J. This permit shall not be assigned or transferred without the written approval of EGLE.
K. Failure to comply with conditions of this permit may subject the permittee to revocation of permit and criminal and/or civil action as cited by the specific state act, federal act, and/or rule under which this permit is granted.
L. All dredged or excavated materials shall be disposed of in an upland site (outside of floodplains, unless exempt under Part 31 of the NREPA, and wetlands).
M. In issuing this permit, EGLE has relied on the information and data that the permittee has provided in connection with the submitted application for permit. If, subsequent to the issuance of a permit, such information and data prove to be false, incomplete, or inaccurate, EGLE may modify, revoke, or suspend the permit, in whole or in part, in accordance with the new information.
N. The permittee shall indemnify and hold harmless the State of Michigan and its departments, agencies, officials, employees, agents, and representatives for any and all claims or causes of action arising from acts or omissions of the permittee, or employees, agents, or representative of the permittee, undertaken in connection with this permit. The permittee's obligation to indemnify the State of Michigan applies only if the state: (1) provides the permittee or its designated representative written notice of the claim or cause of action within 30 days after it is received by the state, and (2) consents to the permittee's participation in the proceeding on the claim or cause of action. It does not apply to contested case proceedings under the Administrative Procedures Act, 1969 PA 306, as amended, challenging the permit. This permit shall not be construed as an indemnity by the State of Michigan for the benefit of the permittee or any other person.
O. Noncompliance with these terms and conditions and/or the initiation of other regulated activities not specifically authorized shall be cause for the modification, suspension, or revocation of this permit, in whole or in part. Further, EGLE may initiate criminal and/or civil proceedings as may be deemed necessary to correct project deficiencies, protect natural resource values, and secure compliance with statutes.
P. If any change or deviation from the permitted activity becomes necessary, the permittee shall request, in writing, a revision of the permitted activity from EGLE. Such revision request shall include complete documentation supporting the modification and revised plans detailing the proposed modification. Proposed modifications must be approved, in writing, by EGLE prior to being implemented.
Q. This permit may be transferred to another person upon written approval of EGLE. The permittee must submit a written request to EGLE to transfer the permit to the new owner. The new owner must also submit a written request to EGLE to accept transfer. The new owner must agree, in writing, to accept all conditions of the permit. A single letter signed by both parties that includes all the above information may be provided to EGLE. EGLE will review the request and, if approved, will provide written notification to the new owner.
R. Prior to initiating permitted construction, the permittee is required to provide a copy of the permit to the contractor(s) for review. The property owner, contractor(s), and any agent involved in exercising the permit are held responsible to ensure that the project is constructed in accordance with all drawings and specifications. The contractor is required to provide a copy of the permit to all subcontractors doing work authorized by the permit.

EGLE
WRP024492 v1.0
Approved
Issued On:08/24/2020
Expires On:08/24/2025

S. Construction must be undertaken and completed during the dry period of the wetland. If the area does not dry out, construction shall be done on equipment mats to prevent compaction of the soil.
T. Authority granted by this permit does not waive permit requirements under Part 91, Soil Erosion and Sedimentation Control, of the NREPA, or the need to acquire applicable permits from the County Enforcing Agent (CEA).
U. Authority granted by this permit does not waive permit requirements under the authority of Part 305, Natural Rivers, of the NREPA. A Natural Rivers Zoning Permit may be required for construction, land alteration, streambank stabilization, or vegetation removal along or near a natural river.
V. The permittee is cautioned that grade changes resulting in increased runoff onto adjacent property is subject to civil damage litigation.
W. Unless specifically stated in this permit, construction pads, haul roads, temporary structures, or other structural appurtenances to be placed in a wetland or on bottomland of the water body are not authorized and shall not be constructed unless authorized by a separate permit or permit revision granted in accordance with the applicable law.
X. For projects with potential impacts to fish spawning or migration, no work shall occur within fish spawning or migration timelines (i.e., windows) unless otherwise approved in writing by the Michigan Department of Natural Resources, Fisheries Division.
Y. Work to be done under authority of this permit is further subject to the following special instructions and specifications:

1. Authority granted by this permit does not waive permit or program requirements under Part 91 of the NREPA or the need to acquire applicable permits from the CEA. To locate the Soil Erosion Program Administrator for your county, visit www.mi.gov/eglestormwater and select "Soil Erosion and Sedimentation Control Program" under "Related Links."
2. The authority to conduct the activity as authorized by this permit is granted solely under the provisions of the governing act as identified above. This permit does not convey, provide, or otherwise imply approval of any other governing act, ordinance, or regulation, nor does it waive the permittee's obligation to acquire any local, county, state, or federal approval or authorization necessary to conduct the activity.
3. No fill, excess soil, or other material shall be placed in any wetland, floodplain, or surface water area not specifically authorized by this permit, its plans, and specifications.
4. This permit does not authorize or sanction work that has been completed in violation of applicable federal, state, or local statutes.
5. The permit placard shall be kept posted at the work site in a prominent location at all times for the duration of the project or until permit expiration.
6. This permit is being issued for the maximum time allowed and no extensions of this permit will be granted. Initiation of the construction work authorized by this permit indicates the permittee's acceptance of this condition. The permit, when signed by EGLE, will be for a five-year period beginning on the date of issuance. If the project is not completed by the expiration date, a new permit must be sought.

All work shall be completed in accordance with plans prepared by Fishbeck, dated January 31, 2020, being sheets 1-4 entitled Bloomfield Hills Schools, E. L. Johnson Nature Center. Said plans are kept on file at EGLE's Water Resources Division, Warren.

All fill/backfill shall consist of clean inert material that will not cause siltation nor contain soluble chemicals, organic matter, pollutants, or contaminants. All fill shall be contained in such a manner so as not to erode into any surface water, floodplain, or wetland. All raw areas associated with the permitted activity shall be stabilized with sod and/or seed and mulch, riprap, or other technically effective methods as necessary to prevent erosion.

The design flood or 1% annual chance (100-year) floodplain elevation at this location on Long Lake-Forest Lake Drain ranges from 906.98 to 907.15 feet NAVD 88.

EGLE
WRP024492 v1.0
Approved
Issued On:08/24/2020
Expires On:08/24/2025

Under Appendix G of the Michigan Building Code 2009, a local building permit is required for development located in flood hazard areas.

The compensating cut (excavations) for floodplain fill, as authorized by this permit, shall be completed prior to, or concurrently with, the placement of the fill. The compensating cut and fill areas shall be properly stabilized to prevent soil erosion and off-site sedimentation in conformance with Part 91, Soil Erosion and Sedimentation Control, of the NREPA.

This permit does not waive the requirements of Michigan Building Code and its referenced standards, ASCE 7: Minimum Design Loads for Buildings and Other Structures, and ASCE 24: Flood Resistant Design and Construction, for substantial improvements to existing structures or new construction. Please reference the Code for details.

The project is located within a community that participates in the National Flood Insurance Program (NFIP). As a participant in the NFIP, the community must comply with the Michigan Building Code (including Appendix G and listed supporting materials); the Michigan Residential Code; and Title 44 of the Code of Federal Regulations, Part 60, Criteria for Land Management and Use. The community is also responsible to ensure that its floodplain maps and studies are maintained to show changes to flood elevations and flood delineations as described in 44 CFR, Part 65, Identification and Mapping of Special Hazard Areas.

December 10, 2024

IN THE MATTER OF THE AQUATIC NUISANCE CONTROL (ANC)
PERMIT NO. ANC9806709

LakePro, Inc.
9353 Hill Road
Swartz Creek, MI 48473

SUBJECT: Declaration of Termination, ANC9806709, WB-4316-1: El Johnson Pond: Lake Pro, Inc., Oakland County

Dear LakePro, Inc.:

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Water Resources Division (WRD), Permits Section, has reviewed LakePro, Inc.'s December 4, 2024 request for termination of ANC Permit No. ANC9806709, issued May 11, 2021, for the chemical treatment of WB-4316-1: El Johnson Pond: Lake Pro, Inc. Based on the information provided to the WRD in the request for termination, it is understood that LakePro, Inc. no longer intends to conduct chemical treatment at this location under the ANC Permit No. ANC9806709.

Therefore, ANC Permit No. ANC9806709 is hereby terminated. There shall be no treatment conducted by LakePro, Inc. at this site without applying for and obtaining a new permit from EGLE's Aquatic Nuisance Control Program, through the MiEnviro Portal permitting database.

Be advised that this Declaration of Termination does not in any way release LakePro, Inc. from any of its obligations under Part 31, Water Resources Protection; and Part 33, Aquatic Nuisance Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) for past conduct outside the bounds of the terminated ANC Permit.

The ANC Permit No. ANC9806709 is terminated as of December 10, 2024.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Applied Science & Technology were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Applied Science & Technology were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Bailey Bishop

Environmental Technician

ASTI ENVIRONMENTAL
A DIVISION OF PEA GROUP

Bailey Bishop is an environmental technician at ASTI Environmental, specializing in Hydrology, Geomorphology, GIS, and AQTESOLV. She supports Phase I Environmental Site Assessments (ESAs) across Michigan and Indiana, conducting site inspections, initiating projects, and preparing reports for various property types. In addition, Bailey reviews municipal and county Freedom of Information Act documents to ensure compliance.

Beyond Phase I work, Bailey is skilled in Phase II ESA investigations, including soil and water sampling, overseeing drillers, and conducting hydrological studies. Her technical expertise ensures thorough and accurate assessments, supporting project success.

Education

Eastern Michigan University, BS in Environmental Science, 2024

Washtenaw Community College, Associate in Environmental Science, 2022

Years of Practice

2023-Present

Certifications

40-Hour OSHA HAZWOPER Training and Annual Refreshers

Select Project Experience

Phase I Environmental Site Assessments, Livingston, Washtenaw, Jackson, Wayne, Oakland, Macomb, Genessee, Hillsdale, Kent, Ottawa, Van Buren, Allegan, St. Joseph, Cheboygan, Muskeogon, Grand Traverse, and Leelanau Counties, MI, and Elkhart County, IN

Phase II Environmental Site Assessments, Livingston, Washtenaw, Jackson, Wayne, and Oakland Counties, MI

Lead Inspection Assistance, Flint, MI

Hydrological Investigation, Bruce Township, MI

Per- and Polyfluoroalkyl Substances Ground Water Sampling, Farmington Hills, MI

Anthony Spencer

Project Manager

ASTI ENVIRONMENTAL
A DIVISION OF PEA GROUP

Anthony Spencer brings nearly 15 years of experience in Phase I and Phase II Environmental Site Assessments. He has worked on a variety of projects across Michigan, Ohio, Kentucky, Oklahoma, Pennsylvania, and North Carolina, including residential, commercial, and industrial sites. His portfolio features assessments for apartment complexes, shopping plazas, and auto dealerships.

Anthony's comprehensive evaluations encompass site inspections, historical research, interactions with federal, state, and local agencies, subsurface sampling, geophysical surveys, and underground tank closures.

Education

Wayne State University, BS in Environmental Science, Minor in Geology, 2011

Years of Practice

2010-Present

Certifications

EPA Environmental Professional: ASTM Practice, E1527-21

Description of Landowner Liability Protections for All Appropriate Inquiry and User Continuing Obligations

In order to maintain a LLP, landowners must also comply with pre-acquisition and post-acquisition requirements under CERCLA and All Appropriate Inquiry. A summary of each LLP is provided below.

Innocent Landowner Defense (ILO): The defendant did not know and had no reason to know of the hazardous substance with respect to the Subject Property and must show that All Appropriate Inquiries into the past ownership and uses of the property in accordance with generally good commercial and customary standards and practices. All Appropriate Inquiries cannot result in knowledge of contamination.

Post- Acquisition Obligations

1. Cooperate, assist, and provide access to persons that are authorized to conduct response actions or natural resource restoration at the property.
2. Comply with any land use restrictions established or relied on in connection with the response action at a vessel or facility.
3. Must not impede on the effectiveness or integrity of any institutional control employed at the vessel or facility in connection with a response action.
4. Take reasonable steps to 1) stop any continuing release, 2) prevent any threatened future release, and 3) prevent or limit any human, environmental, or natural resources exposure to any previously released hazardous substance.

Bona Fide Prospective Purchaser (BFPP): Allows a purchaser to acquire a property with knowledge that it is contaminated. This applies to purchasers (and their tenants) that acquire ownership of a facility after January 11, 2002. To qualify, prior to acquiring title, a person must show 1) that all disposal of hazardous substances at the facility occurred before the person acquired the facility, 2) conducted All Appropriate Inquiry, and 3) the person is not a Potentially Responsible Party (PRP) or affiliated with any other PRP for the property through any direct or indirect familial relationship, any contractual, corporate or financial relationship or as a result of a reorganization of a business entity that was a PRP.

Post- Acquisition Obligations

1. Provide all legally required notices with respect to the discovery or release of any hazardous substances at the facility.
2. Exercise appropriate care with respect to hazardous substances by taking reasonable steps to stop any continuing release; prevent any threatened future release; and prevent or limit human, environmental, or natural resource exposure to any previously released hazardous substance.
3. Provide full cooperation, assistance, and access to persons who are authorized to conduct response actions or natural resource restoration (including the cooperation and access necessary for the installation, integrity, and maintenance of any complete or partial response actions or natural resource restoration).
4. Comply with any land use restrictions established or relied on in connection with the response action, and not impede the effectiveness or integrity of any institutional control employed at the vessel or facility in connection with a response action.
5. Comply with any request for information or administrative subpoena issues under CERCLA.

Explanation of LLPs and User Continuing Obligations Continued

Contiguous Property Owner (CPO): A CPO must not know or have reason to know following performance of All Appropriate Inquiries that their property was or could be contaminated by the adjacent or contiguous real property. The property owner must show that they did not cause, contribute, or consent to the release and is not a PRP or affiliated with any other PRP, and conducted All Appropriate Inquiries.

Post- Acquisition Obligations

1. Take reasonable steps to 1) stop any continuing release, 2) prevent any threatened future release, and 3) prevent or limit any human, environmental, or natural resources exposure to any previously released hazardous substance.
2. Provide full cooperation, assistance, and access to persons who are authorized to conduct response actions or natural resource restoration (including the cooperation and access necessary for the installation, integrity, and maintenance of any complete or partial response actions or natural resource restoration).
3. Comply with any land use restrictions established or relied on in connection with the response action at the facility.
4. Not impede the effectiveness or integrity of any institutional control employed in connection with a response action.
5. Comply with any request for information or administrative subpoena issues under CERCLA.
6. Provide all legally required notices with respect to the discovery or release of any hazardous substances at the facility.

ASTI ENVIRONMENTAL

A DIVISION OF PEA GROUP

Our services include:

- Asbestos, Lead, Mold, and Radon Assessments
- Brownfield/Greyfield Redevelopment Assistance
- Development Incentives and Grant Management
- Ecological Assessments and Restoration
- Environmental Assessments and Impact Statements
- Environmental Opportunities Assessment
- GIS Mapping
- Hazard Mitigation Planning
- Mining and Reclamation Assistance
- Phase I ESA and Environmental Due Diligence Assessments
- Regulatory Compliance and Permitting
- Remediation Implementation, Operation, and Maintenance
- Soil and Groundwater Assessments
- Soil and Groundwater Remediation
- Storage Tank Compliance and Closure
- Stream Assessments and Mitigation Design
- Threatened and Endangered Species Surveys
- Tree Surveys
- Watershed and Stormwater Management Programs
- Wetland Delineation, Permitting, Mitigation, and Banking

JNC Property Management Zones

Zone #1-Thicket, scattered trees.
West border along Franklin Rd. north of parking lot/east border Warbler Loop trail
North border stream/south border parking lot

- Special species to protect-misc. native spring wildflowers near parking lot
- Aesthetics to protect-Protect habitat of Warbler Loop trail. Always screen Franklin Rd./screen parking lot/protect habitat near stream.
- Suggested Improvements- Slow removal of limited buckthorn and immediate replacement with native trees/shrubs/forbs.

Zone #2-Some thicket, newly planted forest restoration, vernal pond.
North border Streamside Trail/South border west end Fox Ridge Trail/east border along Fox Ridge trail/west border along mowed meadow and Stream Trail down to stream

- Special species to protect-many species of trees/shrubs planted in 2018-19 at bottom of hill parallel to stream. Some native forbs also moving into that space.
- Aesthetics to protect-the south part of this zone visually separates the Fox Ridge Trail from the mowed meadow. That should be maintained. A buffer of vegetation should always be maintained near the stream. Cover should be maintained in/around vernal pond.
- Suggested improvements- A slow, limited removal of buckthorn and immediate replacement with native trees/shrubs. Continue to monitor new trees/shrubs, maintain cages as long as needed/remove invasive plants in the newly planted area.

Zone #3- A very large zone, half prairie, half thicket including "wet thicket-formally old orchard".
North border stream prairie and Stream Trail/South border an E-W Line between F.R. and C.P. Trails. East border Cottontail Pass Trail/West border Fox Ridge Trail and tower prairie.

- Special species to protect- all the native prairie species that have been introduced need monitoring and managed (fire/hand pulling/top seeding/ etc.)
- Aesthetics to protect-This zone visually separates the Fox Ridge and Cottontail Pass Trails. That visual barrier needs to be maintained.
- Suggested improvements-A limited buckthorn removal could take place near the intersection of Stream Trail and Cottontail Pass with immediate replacement using native trees/shrubs. The wet thicket is valuable spring bird habitat.

Zone #4-The largest zone, some thicket, planted evergreens, some native hardwoods.
North border Sugar Maple Loop/East border Telegraph Rd./South border the sugar bush/West border Sugar Maple Loop, Cottontail Pass, and Schrot prairie.

- Special species to protect-Native Oaks and hickories and other native trees.
- Aesthetics to protect-This zone provides a vital visual barrier along Telegraph Rd.
- Suggested improvements-EXTREMELY LIMITED removal of buckthorn with native species replacement. A mix of evergreens and hardwoods. Introduce native spring forbs, ferns. Etc.

Zone #5-Mix of evergreens planted by Olsen's and a few hickory.
formerly SW corner of property/North border is the south driveway and owl cage area/East border pond/South border old Bowers prop. Line/West border Franklin Rd.

- Special species to protect-there are some native wildflowers spread throughout, a few tamarack growing near the pond, spice bush near the shed.
  The trees in this zone provide cover for wild owls to roost near the owl cage.
- Aesthetics to protect-the trees along Franklin Rd. provide a visual barrier for the Owl Loop Trail.
- Suggested Improvements-carefully remove garlic mustard and any other invasive weed, maintain tree cover, consider adding new trees if sufficient sunlight, manage as a forest.

Zone #6-Mix of white pine, jack pine, and some hardwoods, limited native shrubs & buckthorn

The upland area between the cabin trail south to the top of the hill overlooking pond. The North border is the Cabin Trail/East border cabin steps to pond/South border the top of the hill overlooking pond/West border the un-named trail that connects cabin and pond trails.

- Special species to protect-there are few jack pine on the property, this is one of the places. Some native shrubs were planted in this zone in early 2000's. The tall white pines will probably live several more years.
- Aesthetics to protect- Visitors have always enjoyed walking under the white pine canopy.
- Suggested improvements-retain the white pines as long as possible, remove scattered buckthorn without losing visual cover between Cabin Trail and pond.

Zone #7-Mix of sugar maple along north border, jack pine and buckthorn thicket in center area, large stand of black locust trees near Telegraph and south border, a mix of other native hardwoods near south border. A vernal wet area is in the center.

The southeast corner of the property (Locust Trail area)/North border is the sugar bush/East border Telegraph Rd./South border the fence line along condo's/West border Pond trail.

•Special species to protect-all native trees, especially sugar maple and jack pine.
•Aesthetics to protect-this zone is a very important buffer along Telegraph Rd. and the south border near the condominiums. Any removal of buckthorn or other invasives needs to protect that visual barrier.
•Suggested improvements-some limited buckthorn removal could occur with native replacement. Some sugar maple may spread south into the area from existing sugar bush.

Zone #8- Mixed forest surrounding deer pen and hawk cage area. Remnants of a Red Pine stand planted by Olsen family.

North border Stream Trail/East border mowed meadow/South border Cabin Trail/West border beginning of Stream Trail.

•Special species to protect-there are some native wildflowers along the west border. The trees on north side of deer pen were planted recently. There are some young shagbark hickory mixed with the pines.
•Aesthetics to protect- Maintain a diverse tree stand around the deer pen so that it blends in with the surroundings, looking natural rather than like a "pen".
•Suggested improvements-as the red pines continue to die, replace with new trees as sunlight conditions allow. Maintain the hickory and any other hardwoods growing there.

Zone #9-A mixed evergreen stand with some hardwoods present.

Across from deer pen, includes outdoor classroom/North border Cabin Trail/East border the trail that connects Pond Trail with Cabin Trail/South border near pond/West border Visitor Center paths.

•Species to protect- Woodland Poppies, Baneberry and other native forbs are found near split-rail fence. White Pine, Hemlock, and Norway Spruce dominate canopy.
•Aesthetics to protect- Very important zone due to high visibility near building and trail heads.
•Suggested improvements- Maintain as a forest, replace trees as light conditions allow, continue adding native forbs.

Zone #10- Circle drive area, contains a bio-swale, mix of trees, shrubs, and wetland forbs.

Bordered by Franklin Rd. on the west and the circle drive on the north, south, and east.

•Special species to protect- Many native trees, shrubs, and wetland forbs have been planted throughout the zone in 2020 through 2022. They were paid for by the Wild Ones Chapter and the Tuesday volunteers planted and monitored their condition.
•Aesthetics to protect- This zone offers an important visual barrier to Franklin Rd. and is a highly visible site for visitors when they arrive. The fence row vegetation needs to be protected and the effects of water run-off from the parking lot monitored.
•Suggested improvements- If benches are added near the trail make sure they do not infringe upon the wetland forbs planted there. If the amount of water run-off is altered by an improved parking lot monitor that impact. As some of the old blue spruce trees die they should carefully be removed. This zone will need continued monitoring and maintenance by "knowledgeable" plant staff and volunteers due to its highly visible location and fragile growing conditions.

Zone #11- Wooded SE corner of pond, includes old red pine stand and mixed hardwoods.

North border the Pond Trail/ East border a N-S line starting at intersection of Locust Trail and Pond Trail/South border the fence along condominiums/West border at condo property line.

•Special species to protect-The mixed hardwoods on the east part of this zone seem stable for many years. The red pine stand is in decline and will eventually need replacing. There may be some native wildflowers growing in the hardwoods. A few Giant Green Arborvitae were planted in 2019 to help screen the last condo
•Aesthetics to protect- Once again this zone is very important as a visual barrier to screen the condominiums. Tree replacement should be done in small stages as light conditions allow. The mixed hardwoods is one of the few forest patches on the property that look like a typical Michigan forest.
•Suggested improvements- Start replacing dead red pine if light conditions allow. Maintain a tree buffer along fencerow to screen condo's. A few large Norway Maples, planted by the Olsen's, are declining and may present hazards to the fence, neighbors condo's, or valuable plants. Might have to top them or remove at some point.

Zone #12- Wooded hillside overlooking north side of pond.

North border top of hill/East border cabin area/South border Pond Trail/West border connecting trail between Pond Trail and Cabin Trail.

•Special species to protect- There is a nice mix of hardwoods growing here including birch, black cherry, red oak, and a butternut, probably the only one on the property. Some wildflowers and ferns have been planted along the edge of the Pond Trail in past years.
•Aesthetics to protect- This zone helps screen the pond area from the Cabin Trail and the trees provide important erosion control on the hillside.
•Suggested improvements-remove limited buckthorn if present but always maintain a green screen and mixed forest. Native forbs could be added where they will not be walked on.

Zone #13- A mixed forest, heavily planted in 2018/2019 and wooded vernal pond area.

North border the Warbler Loop Trail/East border edge of meadow and Stream Trail/South border top of hill near deer pen/West border Warbler Loop Trail

•Special Species to protect- Many native trees and shrubs were planted and caged in 2018-19. Some native wildflowers have been introduced or are moving in such as Jack-In-Pulpit, Wild Geranium, Trillium, Bloodroot, and others.
•Special aesthetics to protect-The goal for this zone was to create a natural looking mixed hardwood forest typical of Michigan.
•Suggested improvements- continue to remove invasive plants, monitor planted trees and shrubs, maintain cages as long as necessary. Replace boardwalk through vernal pond area.

Zone #14- A dense thicket of buckthorn growing in old orchard area.

North border Sugar Maple Loop/East border Schrot Prairie/South border Schrot Praire edge/West border Cottontail Pass Trail.

•Special Species to protect- Old apple trees and any native trees/shrubs. Most of the zone is buckthorn though it does provide good bird habitat near the stream.
•Special aesthetics to protect-If all the buckthorn was removed at the same time it may open up views of the homes across the stream.
•Suggested Improvements- This zone could be converted from thicket to native forest, perhaps best done in stages with immediate re-planting. Save all native species.

Zone #15- Mixed hardwoods and a few evergreens north side of sugar bush.

North border – short connector trail between Cottontail Pass and Sugar Maple Loop/East border Sugar Maple Loop/South border edge of Sugar Bush/West border Cottontail Pass Trail.

•Special species to protect- Some sugar maple may be seeding into this zone. Ferns and some wildflowers have been planted here in the past. Evergreens were planted many years ago to help screen Telegraph Rd.
•Special aesthetics to protect- Evergreen trees were planted in this zone years ago to help screen Telegraph. They still provide that function.
•Suggested improvements- Monitor if sugar maple seedlings/saplings are present and encourage their growth to help replace some trees from the existing sugar bush.

Zone #16- Savanna like area comprised of mixed hardwoods and prairie forbs/grasses.

Triangle shape- North border an E-W line between Fox Ridge Trail on the west and Cottontail Pass on the east/East border Cottontail Pass/South border intersection of Fox Ridge and Cottontail Pass/West border Fox Ridge Trail.

•Special species to protect- Many native prairie plants (forbs, grasses) were planted in 2016. The trees give this area the look of a true savanna habitat.
•Special aesthetics to protect- Maintain as a savanna. This represents a remnant of what the entire property looked like before settlement.
•Suggested improvements- Periodic prescribed burns will be needed to prevent woody species from taking over the understory.

Zone #17- A natural stand of Shagbark Hickory and small thicket area.

Just south of tower. This zone is surrounded by the Fox Ridge Prairie on the N/E/S sides and Fox Ridge Trail on the West.

•Special species to protect- The hickory trees are a natural stand having been seeded in by one very large hickory that stood in the center of the stand. Native wildflowers and a few shrubs have been added along the trail in recent years. Non-native Lily of the Valley is present but not worth removing.
•Aesthetics to protect- The trees provide great fall color.
•Suggested improvements- On two different occasions understory buckthorn was completely removed from the hickory stand. Unsuccessful attempts were made to plant native shrubs there. The stand was included in the prescribed burns. Any removal of buckthorn in the zone should be replaced by native shrubs with attention to the native wildflowers currently growing there.

Zone #18- Wetland. The entire pond edge encircling the pond including the buffer zone on the west end, paw-paw enclosure on the north side, and pollinator garden enclosed in the split rail fence area on the east end of the pond.

This zone completely encircles the pond reaching back to the edge of the surrounding Pond Trail.

•Special species to protect-The buffer zone on west end has been planted with many native wetland forbs over the years. (Cardinal Flower, Marsh Marigold, Joe Pye Weed, Ironweed, etc.) The paw-paw enclosure includes species not found elsewhere on the property. The pollinator garden on the east end of the pond has been planted with several native species in recent years. There is a tall Tamarack Tree and a Sweetgum along the north shore of the pond.
•Special aesthetics to protect- Maintaining a green buffer around the pond is very important both aesthetically and ecologically. Many bird species use the overhanging branches of trees and shrubs to rest and feed, especially during migration.
•Suggested improvements- Continue to burn the buffer zone on the west end and top seed it occasionally with native wetland seed. Keep the paw-paw enclosure intact until the trees are large enough to not be damaged by deer. Some limited buckthorn removal could take place with immediate native species replacement. The fluctuating water levels make pond edge planting difficult. Planting Tamarack around the pond would add great value.

Zone #19- Called the "Grow Zone" planted with native prairie species in 2009 and 2010.

Includes the hillside outside the Visitor Center building. The borders include the building, the trail leading from the building to the pond, the lawn at the bottom of the hill, and the steps leading down the hill to the lawn area.

Special species to protect- The entire zone was planted with native seed (see lists). It has been part of the prescribed burn area. Hand pulling aggressive non-natives helps protect the natives.
•Special aesthetics to protect- This zone provides color and interest next to the building and helps protect the pond from erosion.
•Suggested improvements- Continue prescribed burning and occasional top seeding. Hand pulling of invasive species may be needed. Add appropriate native species currently not found there.

Zone #20- A small triangle-shape mixed hardwood stand between the cabin and sugar bush.

This small zone is bordered by three trails-North border just past log cabin/ East border is the start of the Cottontail Pass Trail/West border is the hillside trail just past cabin.

Zone #20 cont.
•Special species to protect- Several spring wildflowers and ferns have been planted here in recent years throughout the zone. White-snakeroot is spreading from across the trail. This is one of the rare forested parts of the NC that appears to look like a natural MI forest-it lacks buckthorn and other invasive plants. There may be young sugar maple present.
•Aesthetics to protect- This zone provides a nice example of MI hardwood forest.
•Suggested improvements- Since it is in good shape probably nothing should be done at the present time unless problems pop up.

Zone #21- The area along both sides of the old tennis ct. trail. A mix of evergreens, a few hardwoods, some thicket, a black raspberry patch, and a few old lilac planted by Olsen's.

The North border is the mowed meadow and Fox Ridge prairie/East border is the old tennis ct./South border is the row of white pine along cabin trail/West border is across from hawk cage.

•Special species to protect- No recent planting has been done here. This zone does provide important dense habitat good for birds, rabbits, etc. and is a transition zone between the open prairie and the rows of white pine on the south side.
•Aesthetics to protect- This zone provides a visual barrier, screening the center of the property.
•Suggested improvements- There has been some removal of bittersweet vines from this zone and might need more. The dense shrubbery provides good habitat. New trees or shrubs may need to be planted across from the hawk cage as the old lilac dies. The old tennis ct. is a good teaching example of how "nature takes over" what humans build.

Zone #22- The Fox Ridge prairie/savanna. Seeded entirely with native prairie mix in 2000. Also contains a few native trees that were saved.

This zone is surrounded by the Fox Ridge Trail. The South border runs parallel to the tennis ct. trail.

•Special species to protect- The many native prairie-savanna forbs and grasses that have been planted there. See lists.
•Aesthetics to protect- This zone is one of the few "open" habitats on the property and it is an example of the pre-settlement vegetation that once grew here.
•Suggested improvements- Continue to burn periodically and top-seed occasionally. Watch for invasive plants trying to move in. Trim back the south border edge if it is encroaching on the prairie. Add appropriate native forbs currently not found there.

Zone #23- The Tower Prairie starts at the tower, runs downhill and to the east. Seeded originally in 2000, native prairie mix.

North border is the tree line at the bottom of the hill and along the Stream Trail/East border is the tree line edge/South border the tree line edge and Fox Ridge Trail/West border the tree line west of tower.

•Special species to protect- The many native prairie forbs-grasses currently growing there. See lists.
•Aesthetics to protect- Another one of the few "open habitats" supporting a diversity of plants, birds. Insects, and other species. An example of pre-settlement vegetation.
•Suggested improvements- Same as Zone #22.

Zone #24- The Schrot prairie. Seeded originally in 2001.

This zone is outlined by either thicket or forest on all four sides with the Cottontail Pass Trail running through it.

•Special species to protect- The many native prairie forbs-grasses that have been planted there. See lists.
•Aesthetics to protect- Another "grassland-like" habitat giving the property diversity of both plant and animal. An example of pre-settlement vegetation.
•Suggested improvements- Same as Zone #22 and Zone #23.

Zone #25- Log Cabin buffer woods. A mix of thicket, some native trees, and prairie plants.

This zone is located behind both cabins and the east side of the big cabin.

•Special species to protect- The east side of the cabin was cleared and seeded with native prairie plants (see lists).
•Aesthetics to protect- The tree line behind the cabins serves an important function in separating the cabin area from the center of the property to the north. This zone provides an appropriate "wooded" background setting for the log cabins.
•Suggested improvements- The large Norway maple behind the log barn may need trimming at some point. If any of the existing buffer needs removed, it should be done in small increments over several years so the buffering effect is not lost. The small prairie on the east side of the big cabin should be maintained as such using same strategies as in Zone #'s 22, 23, 24.

Zone #26- Bowers forested area.

This zone comprises the east half of the former Bower's property (wooded area). The North border is the Pond Trail/East border is a brick wall along the Bloomfield Chase sub/South border an east-west line along the adjacent property owners lot/West border is the tree line that meets the former backyard.

•Special species to protect-The trees in this zone have ID tags placed there by the former owner. There is a key listing the species. There are some valuable trees found along the west border including sweet gum and white oak. The Bowers family planted a row of evergreens to screen their backyard, most of the other trees present seeded themselves in naturally. No native plant introductions have been conducted here though there may be some wildflowers present. Dolls-eye has been observed and Jack-In-the-Pulpit.
•Aesthetics to protect-The wooded area above the pond was the most important reason to acquire this property. The wooded nature should be maintained both to protect the pond ecologically and to provide habitat.
•Suggested improvements- Invasive plants can be removed if that activity does not diminish the forest cover significantly. Native tree/shrub plantings can take place where enough light is present, such as in the center of this zone where the tree canopy seems thin.

Zone #27- Tool shed area near parking lot.

This area is adjacent to the driveway/parking lot and is behind the tool shed. The borders include the driveway, the VC walkway and the short path that leads to staff parking.

•Special species to protect- Several trees/shrubs have been planted here over the years including Red Bud, Eastern Hemlock, Hazelnut, Kentucky Coffee Tree, and others. There are a few large Yews along the driveway that provide a nice screen. There are also large yews that screen the residence from the VC.
•Aesthetics to protect- This is one of the most important zones aesthetically due to its "upfront" visibility when visitors arrive. A diverse green screen needs to hide both the tool shed and the residence.
•Suggested improvements- The old Blue Spruce trees that are found here could be removed carefully as long as new trees/shrubs are planted "immediately" afterword. The trees/shrubs that should be kept have been flagged with tape. The old large yews still provide nice green screening.

Zone #28- Kiosk area/protected wildflower area within split-rail fence north of Visitor Center building.

This zone contains mostly wildflowers that have been planted over the years on the north end of the VC. It includes the area behind the kiosk and the beds within the split-rail fence across from the deer pen. The zone also includes 13-15 species of trees.

•Special species to protect- There are many native wildflowers that should be monitored and protected. Foot traffic should be kept to a minimum and mulch should not be added. The aspen trees found here are rare on the property.
•Aesthetics to protect- This zone once again is very important due to its highly visible location. Some of the plants found here are not found elsewhere on the property.
•Suggested improvements- Limited additions of native plants can be made as conditions require. Monitor light conditions dictated by the overhanging trees. Some careful trimming of the trees may be needed. Maintain fences to restrict foot traffic.

Zone #29- Cabin hillside- contains many wildflowers/ferns planted in 2022.

This zone is located on either side of the steps leading from the front of the large cabin to the bottom of the short hill found there**.**

•Special species to protect- All of the plants added here in 2022 need to be monitored, protected, and maintained, including the two apple trees planted in memory of Bob Schrupp. A list of plants is available.
•Special aesthetics to protect- These native plants are not only highly visible, but also add to the atmosphere of the pioneer cabin and due to their low profile help maintain a nice open view of the pond from the cabin porch.
•Suggested improvements- Native plants may need to be added in the future depending on how well the 2022 planting takes hold. It is important to keep foot traffic out of this area-that may require a split-rail fence be added.

Zone #30- West half of the former Bower's property. (formerly the front and backyard)

This zone includes the mostly open space that was formerly mowed yard. The East border is the tree line.

•Special species to protect-The Bower's family planted a variety of trees, several are still living. Jim Bowers has provided a pictorial key of these trees.
•Aesthetics to protect- This is a zone where the neighbors view should be highly considered. If "overflow" parking is created here, a carefully thought out landscaping plan should be included which screens the parking lot from Franklin Rd.

Zone #30 cont.
•Suggested improvements- The former backyard area could be planted as a native grassland/prairie since it does not have a shade factor. There are some existing invasive shrubs that would need to be removed first. The former front yard could serve as overflow parking provided screening occurs along Franklin Rd. There is a dense stand of box elder trees along the north border of this zone that could be removed and replanted with natives. Some understory shrubs may need to be added to screen the home along south border of this zone.

Zone #31- 4-5 acre parcel north of the stream bordering Hickory Grove Rd. Some scattered native trees, wetlands near the stream, and dense buckthorn thickets.

This zone is north of the stream bordered by Hickory Grove Rd. to the North/Hickory Ridge subdivision on the East/stream on the South/private property on the West.

•Special species to protect- This zone has not been closely studied but it is known that Swamp-white Oaks grow here, Douglas Fir may still be living along the west border, and large white or red oaks grow along Hickory Grove Rd.
•Aesthetics to protect- This zone is watched closely by the neighbors to the east so screening efforts are important. Maintaining a stream border is important. If dense thickets of buckthorn are to be removed, it should be done in small increments with a native replanting plan implemented immediately afterword.
•Suggested improvements- The creosoted telephone pole wall located just across the stream should be removed. A sampling dock could be added to the larger of the two ponds. A new trail could be added along the stream to connect the two existing loops north of the stream. 75 feet of boardwalk would be required and a permit from EAGLE.

Zone #32- 2-3 acre parcel north of stream along Telegraph Rd. Some scattered native trees, stream frontage, and dense buckthorn thickets.

This zone is bordered by the Hickory Ridge subdivision to the north/Telegraph Rd. to the East/the stream to the South/ and Hickory Ridge commons area to the West.

•Special species to protect- This zone has not been studied much due to inaccessibility in past years. The existing plants provide a nice buffer along Telegraph Rd. and stream.
•Aesthetics to protect- Maintaining a visual buffer along Telegraph and the subdivision to the north are very important.
•Suggested improvements- Like Zone #31 any removal of buckthorn or other invasive should be done in small increments so the buffer function is not lost. Conducting an existing plant survey would be helpful to know what is currently there.

Zone #33- Sugar bush

This zone is bordered by the current sugar bush. It includes mostly Sugar Maple and a few Red Maple.

•Special species to protect- the mature maple trees and sugar maple seedlings which will hopefully provide sap in the future.
•Aesthetics to protect- Having a sugar bush is a special feature that should always be maintained.
•Suggested improvements- The existing sugar bush may be able to tolerate a limited thinning without negative effects to other trees. However, due to how tall/thin the current trees are, thinning may make the trees susceptible to high wind damage. Allowing the maple trees to naturally seed themselves to the north or south is the best option for expanding the bush. Limiting foot traffic in the off season where many current seedlings are growing would also help.

Zone #34- Stream corridor

This zone runs along the stream from Franklin Rd. to Telegraph Rd. including both sides of the stream where school property is located.

•Special species to protect- While no formal plant survey has been done here there are some native wetland shrubs such as buttonbush and dogwood growing there.
•Aesthetics to protect- A plant buffer along the stream is an important habitat requirement for many birds and mammals. The buffer is also important for erosion protection and water quality improvement (water temp., oxygen, etc.)
•Suggested improvements- Some limited log removal and occasional trimming of overhanging vegetation could take place to help keep the stream flow moving. If any buckthorn is removed along the stream edge it should be replaced with natives immediately. The sampling docks should be replaced and the new bridges monitored. Monitor the entire corridor for invasive plants such as purple loosestrife, phragmites, and other wetland non-natives.

JNC Property Management Zone List

1. Thicket, scattered native trees.
2. Some thicket, newly planted forest restoration, vernal pond.
3. A very large zone, half prairie, half thicket including “wet thicket and old orchard”.
4. The largest zone, some thicket, planted evergreens, some native hardwoods.
5. Mix of evergreens planted by Olsen family and a few hickory.
6. Mix of white pine, jack pine, and some hardwoods, limited native shrubs & buckthorn.
7. Mix of sugar maple along north border, jack pine and buckthorn thicket in center area which often floods in spring. A large stand of black locust trees dominates the area along Telegraph and the south border. A nice mix of hardwoods along the west border of this zone.
8. Mixed forest surrounding the deer pen and hawk cage area. Remnants of a red pine stand planted by the Olsen family.
9. A mixed evergreen stand with some hardwoods present.
10. Circle drive area that contains a bio-swale, mix of trees, shrubs, and wetland forbs all recently planted.
11. Wooded SE corner of pond, includes declining red pine stand and some mixed hardwoods along the east border.
12. Wooded hillside overlooking the north side of the pond.
13. A mixed forest, heavily planted in 2018/19 and wooded vernal pond area.
14. A dense thicket of buckthorn growing in old orchard area.
15. Mixed hardwoods and a few evergreens north side of sugar bush.
16. Savanna-like area comprised of mixed hardwoods and prairie forbs/grasses.
17. A natural stand of Shagbark Hickory and small thicket area.
18. Wetland. The entire pond edge encircling the pond including a planted buffer zone on the west end, paw-paw planting on the north side, and pollinator garden enclosed in a split-rail fence on the east end of the pond.
19. Called the “Grow Zone” planted with native prairie species in 2009-10.
20. A small triangle shaped zone of mixed hardwoods between the cabin and sugar bush.
21. The area along both sides of the old tennis court trail. A mix of evergreens, a few hardwoods, some thicket, a black raspberry patch, and a few old lilac planted by the Olsen’s.
22. The Fox Ridge prairie/savanna. Once a dense buckthorn thicket, this area was cleared and seeded entirely with native prairie mix in 2000. Also contains a few native trees that were saved.
23. The Tower prairie. Once a dense buckthorn thicket, it was cleared and seeded in 2000 with native prairie mix.
24. The Schrot prairie. Once a dense buckthorn thicket, it was cleared and seeded with prairie mix in the fall of 2001.
25. Log cabin buffer woods. A mix of thicket, some native trees, and prairie plants.
26. Bower’s forested area. The wooded portion of the former Bowers property.

27. Behind tool shed near parking lot-a highly visible green and valuable green space.
28. Kiosk area and surrounding flower beds on north end of Visitor Center.
29. Cabin hillside-contains many native wildflowers and ferns planted in 2022.
30. West half of former Bower's property.
31. A 5-acre parcel north of the stream bordering Hickory Grove Rd. Mostly thicket.
32. A 2.5-acre parcel north of the stream bordering Telegraph Rd. Mostly thicket.
33. Sugar Bush
34. Stream corridor from Franklin Rd. to Telegraph Rd.

EXCEL ANYWHERE

Overview

Purpose of online survey:

- Measure the amount of public support for Bloomfield Hills Schools to continue dialogue with Oakland County Parks about this potential partnership.
- Determine community priorities related to Bowers School Farm and the Johnson Nature Center.
- Analyze how often these facilities are visited and the different ways visitors use them.

Stakeholders:

- Bloomfield Hills Schools
  - Bowers School Farm
  - Johnson Nature Center
- Oakland County Parks
- Bloomfield Hills Schools residents
- Current and potential visitors to Bowers School Farm and the Johnson Nature Center

Engagement Opportunities:

- Saturday, October 18th, 2025 – In-Person @ Bowers School Farm
- Monday, October 20th, 2025 – In-Person @ Johnson Nature Center
- October 6th – October 31st – Online survey open

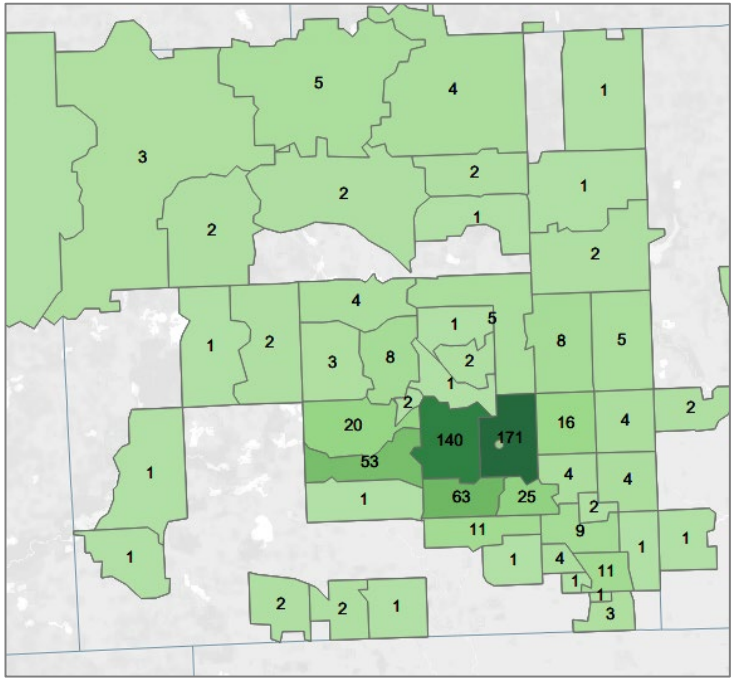
Community Feedback at a Glance

- Engagement Overview:
  - Nearly **750 participants** (646 complete, valid online responses, 80 in-person)
- Opinions on Potential Partnership:
  - **61% in support**
  - 25% need more information to decide
  - **14% not in support**
  - These groups of participants are most opposed by percentage:
    - Residents of zipcodes in Bloomfield Township (21%)
    - Respondents who have donated money to the Johnson Nature Center (21%)
    - Respondents who have never visited Bowers School Farm (23%)
- Community Priorities:
  - Participants highly **value agriculture education, weekend events, natural areas/trails, and youth education opportunities**
  - Popular activities include the **farm store and kitchen, Fall Festival, field trips, and hiking**
- Differences by Group:
  - The following factors influence results: the **age** of the participant, whether the participant has **children under 19 y/o**, **how often they visit** the locations, and whether they are **in support of the potential partnership**



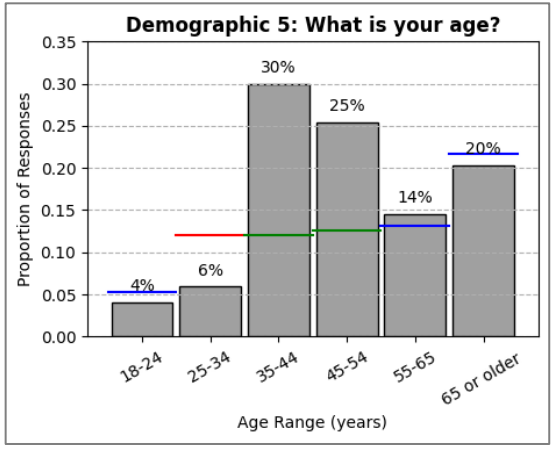
Bloomfield Hills Schools

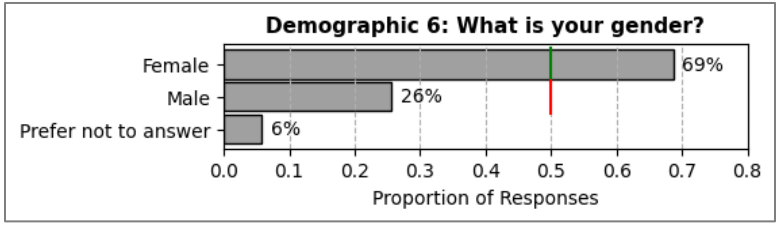
Belong Here
EXCEL ANYWHERE

Participant Demographics

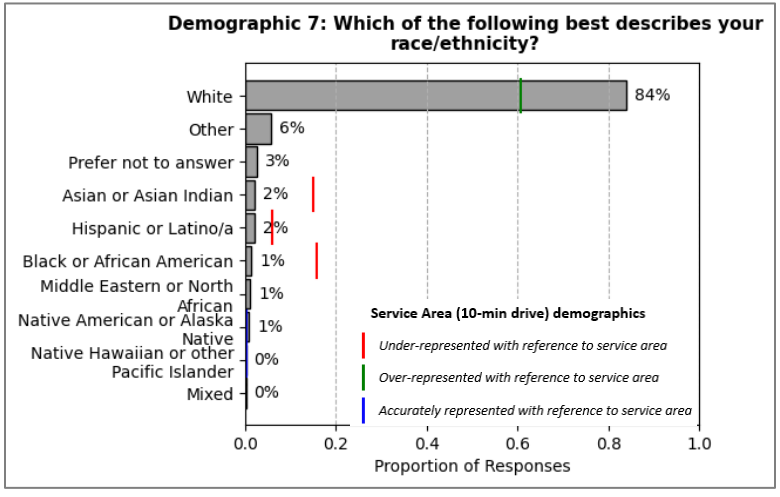
- 97% live within Oakland County
  - **32% live in Bloomfield Township**
  - 27% live in Bloomfield Hills
- **68% live within Bloomfield Hills Schools** district boundaries
- **41% are a parent or guardian** of a child currently enrolled in Bloomfield Hills Schools
- **56% have children** under 19 years old in their household
  - Most common child age range is 6-11 years

A few responses are from areas outside map boundaries





Bloomfield Hills Schools



Belong Here
EXCEL ANYWHERE

Representation

- The 35-54 y/o age range is greatly over-represented compared to the 10-minute drive service areas for both facilities
  - The 25-34 y/o age range is under-represented
- Participants overwhelmingly identify as female and are over-represented relative to the service area
- White participants are over-represented relative to the service area, while Black, Hispanic, and Asian respondents are under-represented.

EXCEL ANYWHERE

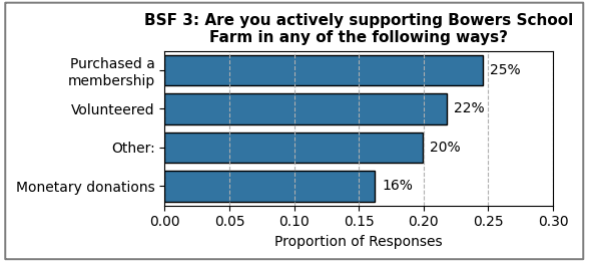
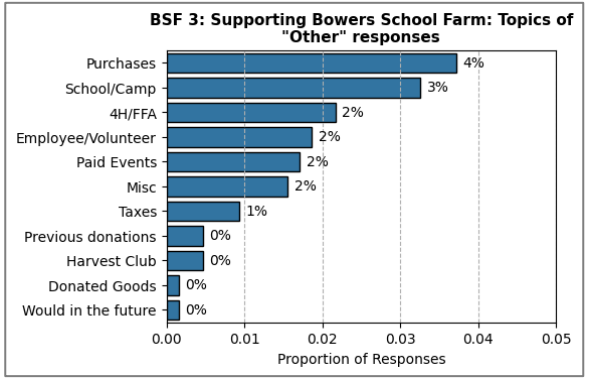
Q1. Approximately how many guests do you estimate visit Bowers School Farm annually?
Q2. How often do you visit Bowers School Farm?

- 13% of participants guessed correctly that Bowers School Farm sees 40,000 visitors annually

- 49% of participants visit Bowers School Farm more than once but less than 10 times per year
- 17% visit more than once per month
- 5% have never visited



Bloomfield Hills Schools

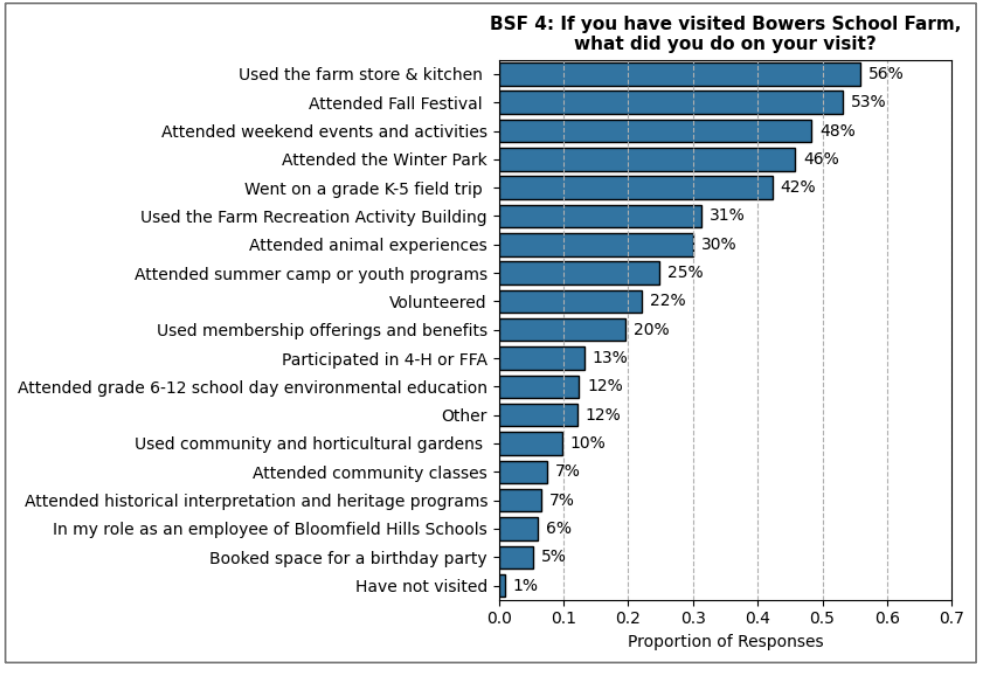


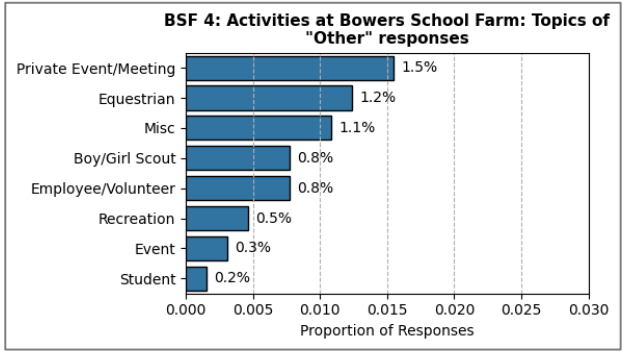
Belong Here
EXCEL ANYWHERE

Q3. Are you actively supporting Bowers School Farm in any of the following ways?

- 83% of participants say they actively support Bowers School Farm in some way

- 25% have purchased a membership
- 22% have volunteered
- 16% have made monetary donations
- 20% contribute in some other way:
  - Purchasing items from the farm
  - Attending school or camp
  - Various others





Bloomfield Hills Schools

EXCEL ANYWHERE

Q8. Please share your creative ideas for the future of Bowers School Farm, such as new amenities and activities.

Partner with plain air painting groups and bring artists to the farm

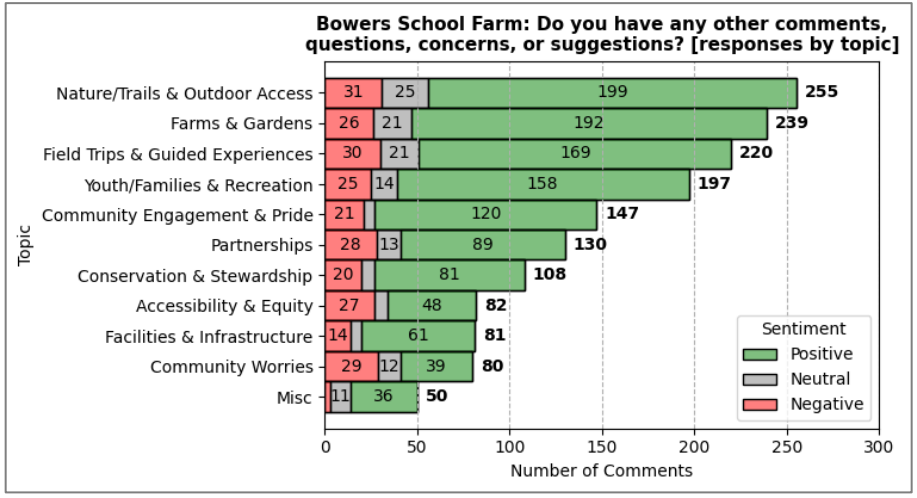
Expanded STEM programs and integration of student research

Offer community garden plots with oversight on gardening

Play structures and playground for children

It would be great to have accessible trails for quiet walks

Open the ropes course for public use



Bloomfield Hills Schools

Belong Here
EXCEL ANYWHERE

Q9. Do you have any other comments, questions, concerns, or suggestions?

Bowers Farm is an important part of the Bloomfield Schools community and it's important to keep the relationship there for our children

We love Bowers. Please do not move forward with this plan. Work with the community, the Bloomfield Foundation, grants, etc. to help with costs. Charge more for out of district field trips, perhaps?"

Expand curricular programs to grades 6-12. The programs seem mostly limited to grade schoolers

Camps are amazing but so difficult to get into. Perhaps a lottery selection would be better

Outdoor (green) spaces are more important than ever. We need to keep and maintain them for public use

EXCEL ANYWHERE

Q9. Do you have any other comments, questions, concerns, or suggestions?

We enjoy the trails to get some peace and quiet without having to travel farm from home!

This is such an important asset to protect. It is already well visited, so bringing in more visitors might make things worse for everyone

I feel like the community is not aware enough about the nature center. I think that if people knew about it more, it would be used way more

Bring program costs down

Sounds like you want to pave it over for yoga studios, corporate party rental pavilions, and cross country skiing – this was supposed to be a natural area, not a playground

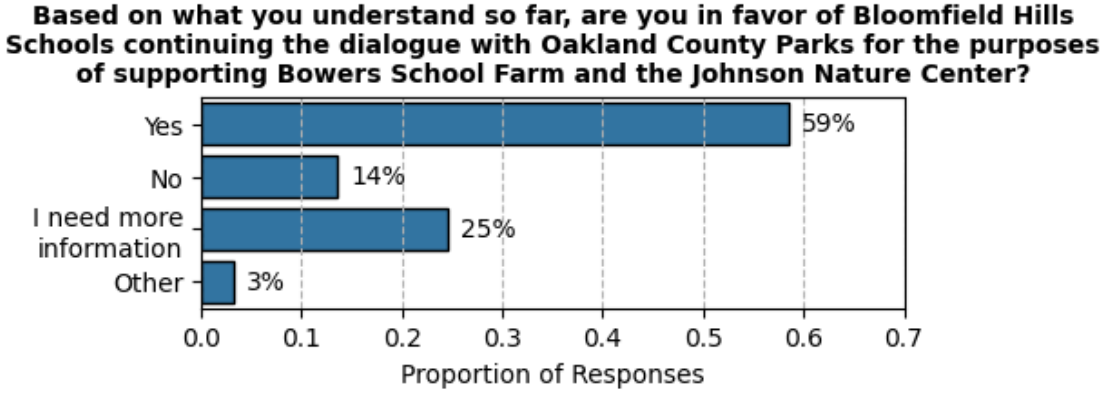
Background

Oakland County Parks (OCP) and Bloomfield Hills Schools (BHS) are exploring a potential intergovernmental partnership to support and strengthen Bowers School Farm (BSF) and the Johnson Nature Center (JNC). While no agreements have been made, early discussions suggest a model where Bloomfield Hills Schools would continue to have priority access for educational programming, while Oakland County Parks would oversee operations and management with a focus on bolstering recreation activities.

In-person community engagement opportunities were held at both Bowers School Farm and the Johnson Nature Center, and an online survey was also available to provide feedback on this potential partnership. The purpose of the online survey was three-fold:

1. To measure the amount of public support for Bloomfield Hills Schools to continue dialogue with Oakland County parks about this potential partnership.
2. To determine community priorities related to offerings, features, and activities related to Bowers School Farm and the Johnson Nature Center
3. To analyze how often these facilities are visited and the different ways visitors use them.

Around 80 people engaged with the materials present at the in-person events and 646 individuals sent in complete responses to the online survey, for a total of 727 participants.



Community Feedback Summary

Support for the Potential Partnership

59% of respondents answered “Yes” to a question about whether they support the dialogue that may lead to a partnership. An additional 1.5% answered “Yes, with conditions” and an additional 0.5% are “leaning yes”, for a total of **61% in support**. 25% need more information and **14% are not in support** (*Figure 1*).

The more often a respondent visits either Bowers School Farm or the Johnson Nature Center, the more strongly they feel about the facility and its ownership. However, this does not mean loyal supporters are opposed to the idea of the partnership, as 47% of respondents who visit the Johnson Nature Center more than once a month say they need more information on the subject to decide (*Figure 45*). The percentage of respondents who explicitly do not support the partnership is roughly the same (14%) regardless of how often they visit the facilities (*Figure 44*).

Figure 1. Percent of respondents in support of partnership dialogue

Community Priorities

Visitors to Bowers School Farm who took this survey highly value agriculture education, weekend events, and natural areas (*Figure 20*). Popular features and activities at the Farm include farm store and kitchen (56%), Fall Festival (53% attended), Winter Park (46%), and grade K-5 field trips (42%) (*Figure 18*). Visitors to the Johnson nature Center who took this survey highly value natural areas/trails and youth education opportunities (*Figure 31*). Popular features and activities at the Nature Center include trails and hiking (59%), youth education (46%), visiting rescue animals (45%), and maple sugaring (33% attended) (*Figure 29*).

1. In-Person Events

Two in-person engagement opportunities were held:

- Saturday, October 18th, 2025 @ Bowers School Farm's Fall Festival event from 10AM-12PM (paid admission)
- Monday, October 20th, 2025 @ Johnson Nature Center from 4-6PM

Representatives from both Bloomfield Hills Schools and Oakland County Parks were present at both events and available to answer questions from visitors. Each person engaged at an in-person pop-up event (80 total) was given four stickers to "vote" for their priorities (*Figure 2*).

In-Person Feedback

Figure 2. In-Person priority boards with stickers

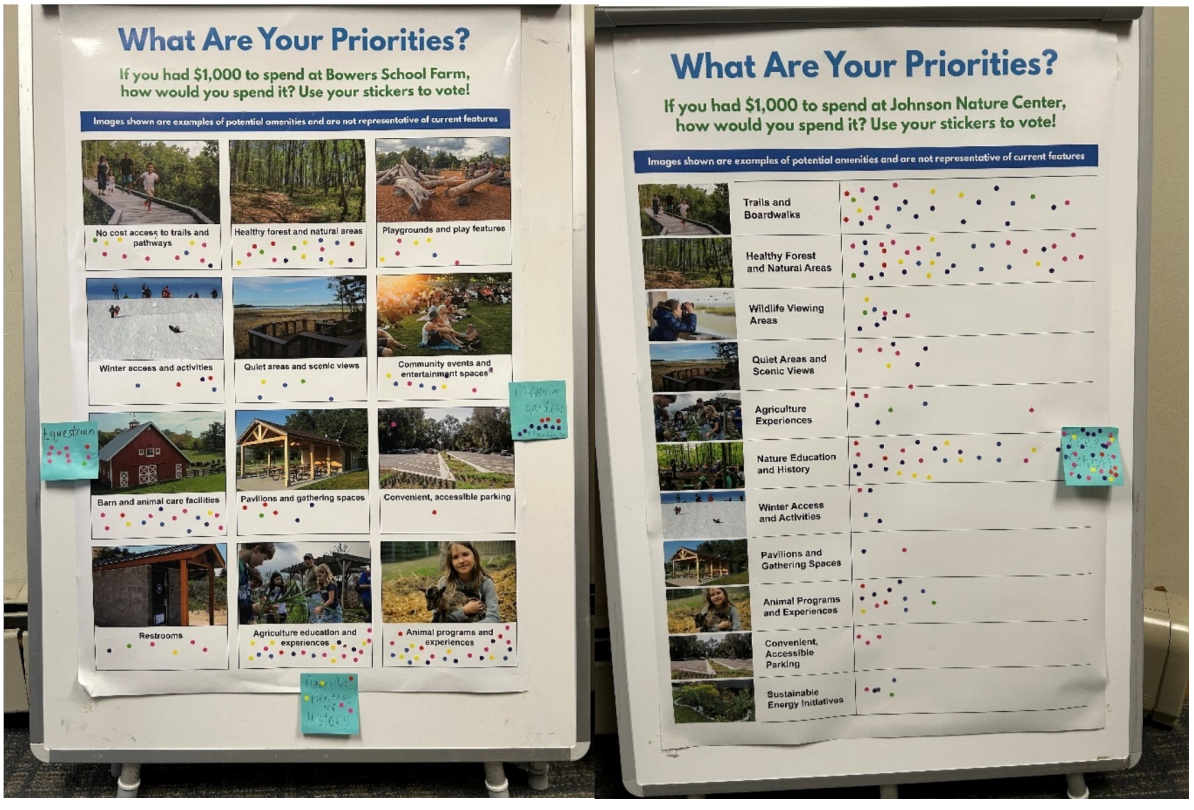


Figure 3. Priorities in financial expenditure at BSF with added assets highlighted

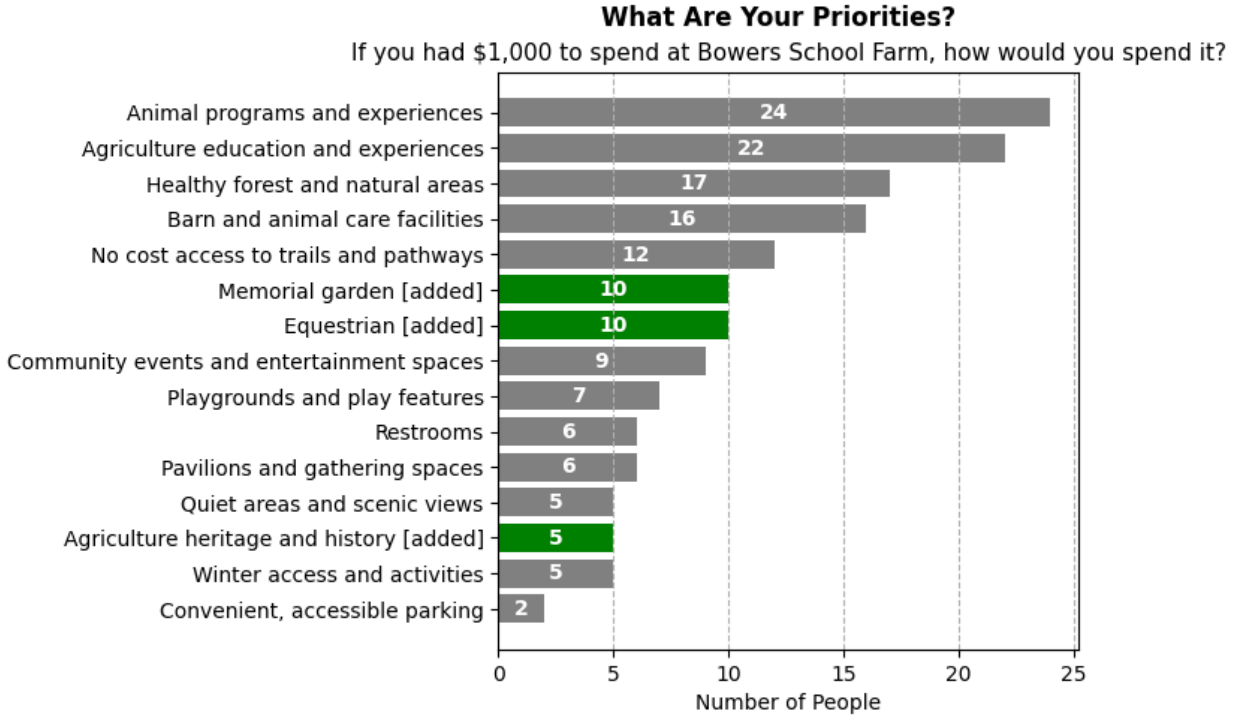

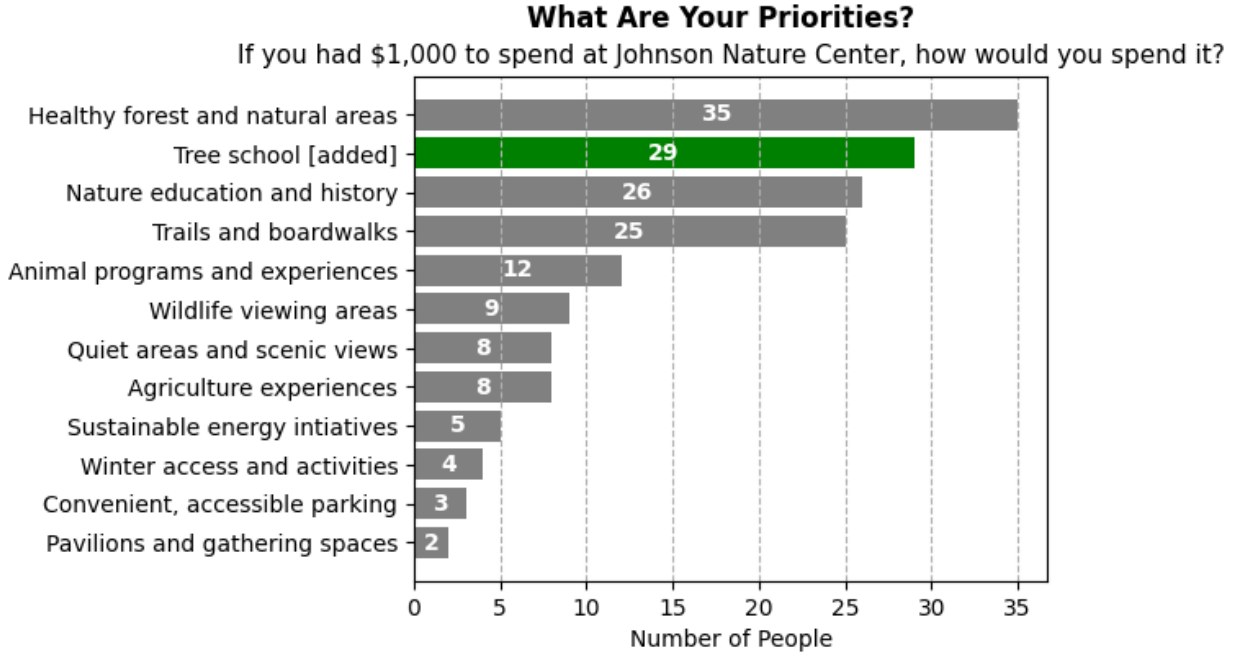

Figure 4.Priorities in financial expenditure at JNC with added assets highlighted

In-Person Priorities vs Online Priorities

The priorities expressed by participants at the in-person events and the priorities expressed by individuals taking the online survey are very similar. At Bowers School Farm in-person participants rated animal experiences and agriculture education more highly important than the online participants, who valued natural areas above education (*Figure 3*). At Johnson Nature Center, both in-person and online participants rated healthy forest and natural areas as the top priority. In-person participants were also very enthusiastic about Tree School specifically, adding that voting option to the board and gathering 29 votes (*Figure 4*).

2. Online Survey

Survey Methods

A total of 646 complete responses were collected between October 7th and October 31st, 2025. The survey was shared via social media and email newsletters and via postcards with a QR code link to residents in the Bloomfield Hills school district boundaries.

The full survey text is included in the appendix (*Full Survey Text*) and consists of 28 questions. Five of those questions were open-ended. Four of those questions were rating different features out a preset scale. Eight of those questions were related to demographics. The remaining questions were related to visitor experiences and participation at Bowers School Farm and the Johnson Nature Center.

Typical Demographics

97% of respondents live in Oakland County (*Figure 8*), with 32% living in Bloomfield Township followed by 27% in Bloomfield Hills (*Figure 9*). 68% of survey respondents live within BHS district boundaries (*Figure 5*), and 41% of them are a parent or guardian or a child currently enrolled in a BHS school (*Figure 6*). 56% of respondents have children under 19 years old in their household (*Error: Reference source not found*), and of those, the most common age range is 6-11 years (*Figure 7*).

The area within a 10-minute drive of either Bowers School Farm or the Johnson Nature Center contains 70,910 households (population of 173,233) and contains the entirety of the Bloomfield Hills Schools district boundaries. Where relevant, the charts below will indicate the demographics of that service area compared to the demographics of respondents. Additional horizontal or vertical lines on the chart represent the value of that demographic within the service area. The color of the line will indicate whether the survey under-represents (red), accurately represents (blue), or over-represents (green) that demographic.

The most common age range of respondents is 35-54 years old, which is greatly over-represented compared to BSF and JNC's 10-minute drive service areas (*Figure 11*). 69% of respondents identify as female (*Error: Reference source not found*), and 84% are White (*Figure 12*). Both the female gender and the White race are also greatly over-represented compared to the target service area. 93% speak English at home (*Figure 13*).

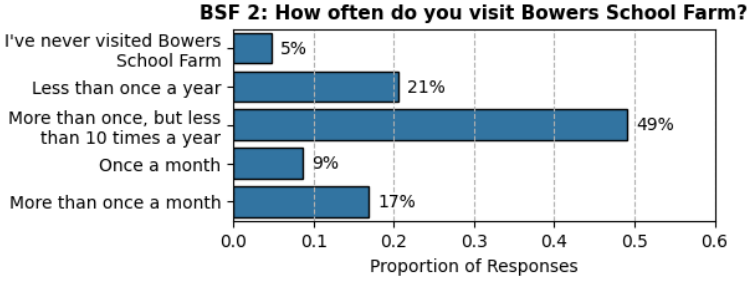
Survey Results

Bowers School Farm Questions



13% of respondents guessed correctly that Bowers School Farm sees 40,000 visitors annually.

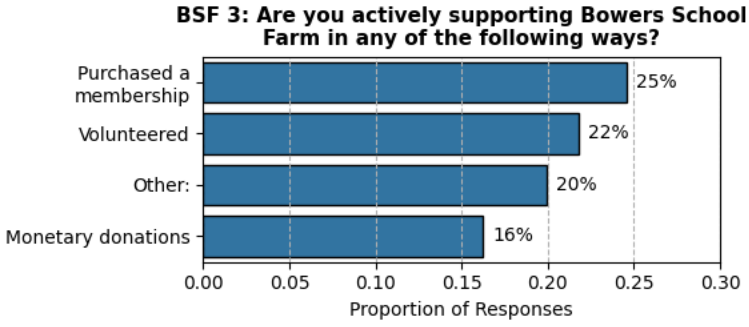
Figure 14. Respondent guess on BSF visitation with correct highlighted

49% of respondents visit Bowers School Farm more than once, but less than 10 times per year. 17% visit more than once per month, and 5% have never visited.

Figure 15. Respondent BSF visitation frequency

83% of respondents say they actively support Bowers School Farm in some way. 25% have purchased a membership, 22% have volunteered, 16% have made monetary donations, and 20% contribute in some other way, including purchasing items from the farm, attending school or camp, or participating in other ways.

Figure 16. Respondent BSF support style



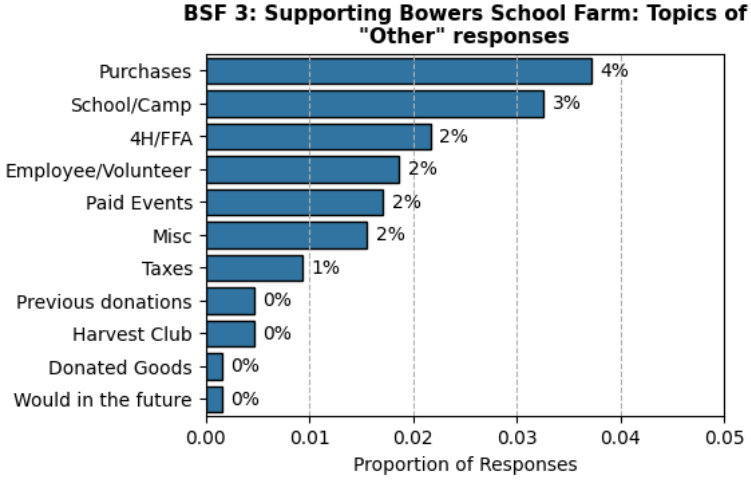


Figure 17. Respondent BSF support style "other" elaborated

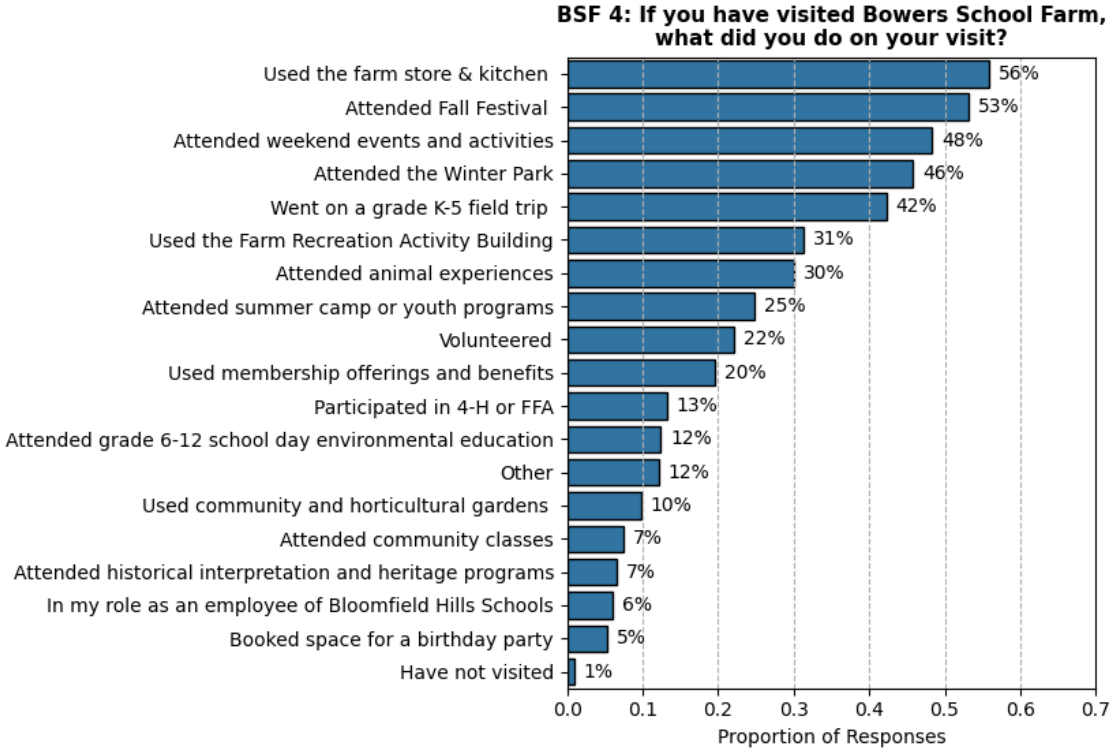
56% of respondents have used the farm store and kitchen when visiting Bowers School Farm. 53% have attended the Fall Festival and 46% have attended the Winter Park event. There are many other popular activities listed in the two figures below.

Figure 18. Respondent activity upon visitation



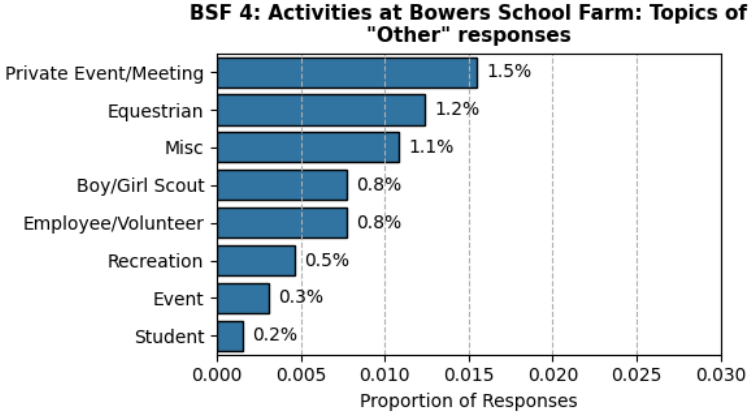


Figure 19. Respondent activity upon visitation "other" elaborated

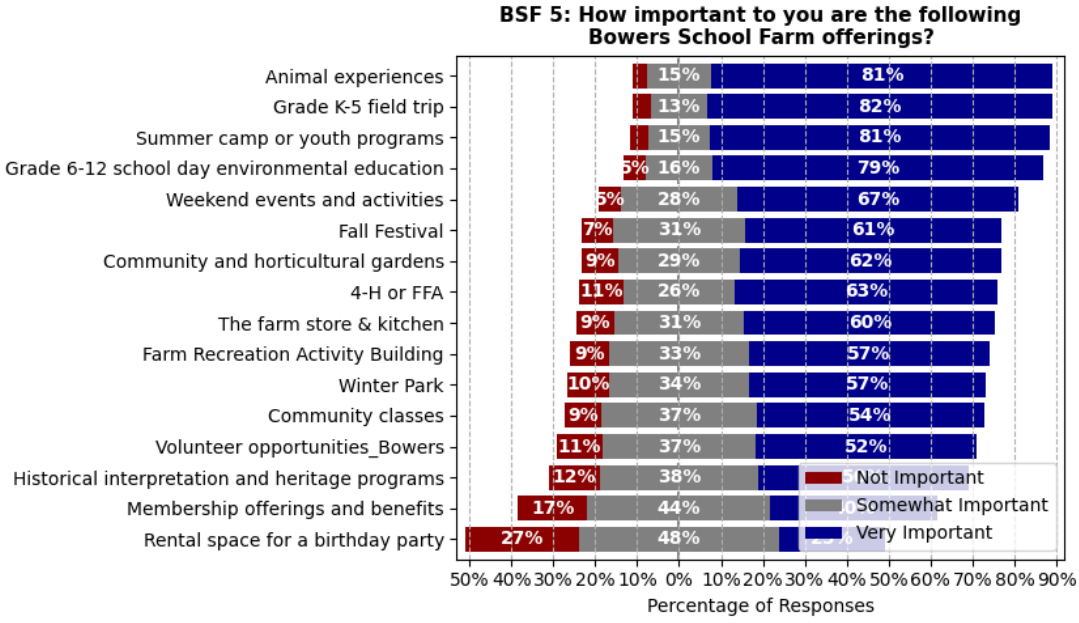
When asked about the importance of various offerings at Bowers School Farm, at least 50% of respondents answered that every item was “Very Important”, except for the items “Membership offerings and benefits” and “Rental space for a birthday party”. The most important offerings by rating are “Animal experiences”, “Grade K-5 field trip”, and “Summer camp or youth programs”.

Figure 20. BSF offerings in order of importance – percentage split



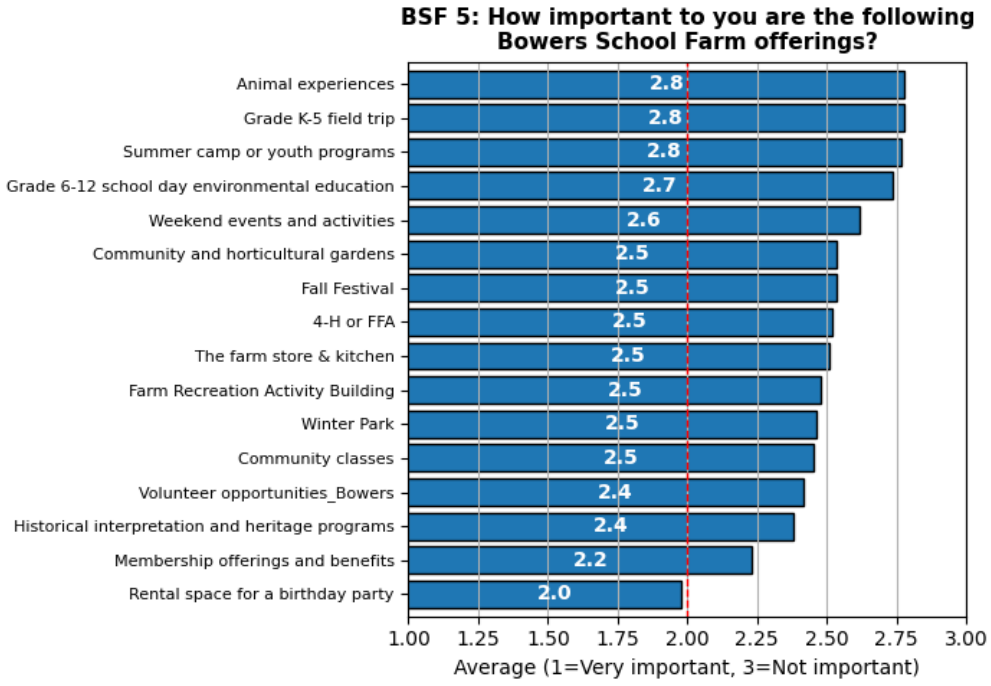


Figure 21. BSF offerings in order of importance – average score

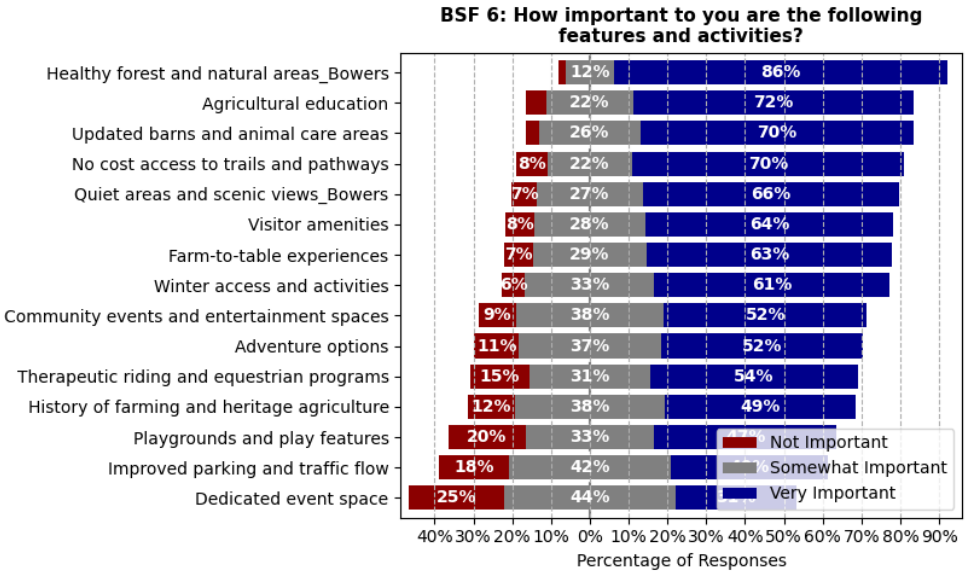
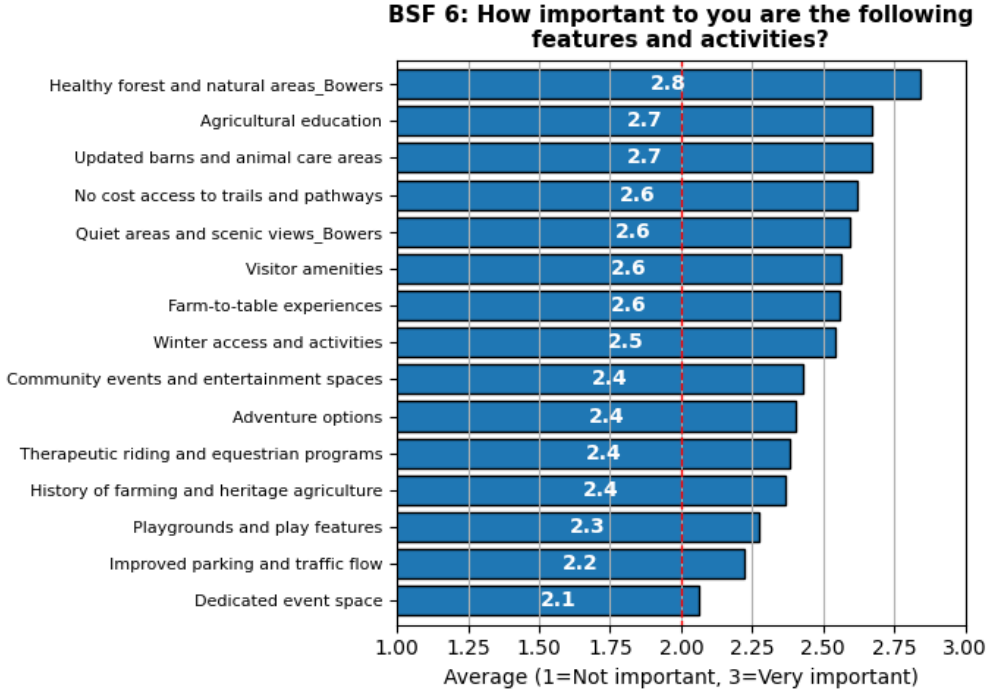
When asked about the importance of various features and activities at Bowers School Farm, there starts to appear some variation in importance, although at least half of the items still have greater than 50% of respondents rated as “Very Important”. The most important features and activities by rating are “Healthy forest and natural areas”, “Agricultural education”, and “Updated barns and animal care areas”. Least important are “Improved parking and traffic flow” and “Dedicated event space”

Figure 22. BSF features/activities in order of importance – percentage split





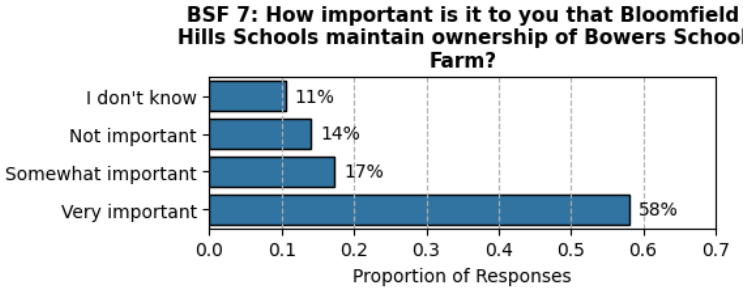


Figure 23. BSF features/activities in order of importance – average score

58% of respondents say that Bloomfield Hills Schools maintaining ownership of Bowers School Farm is Very Important.

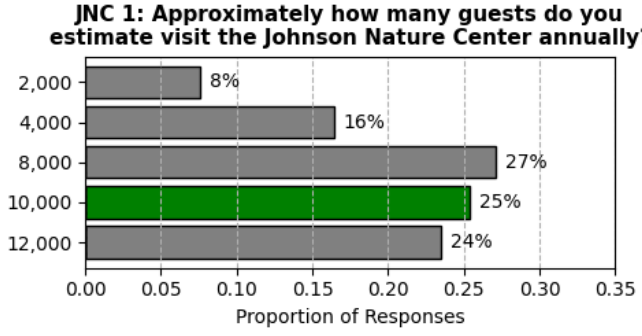

Figure 24. Importance of BHS ownership of BSF to respondents

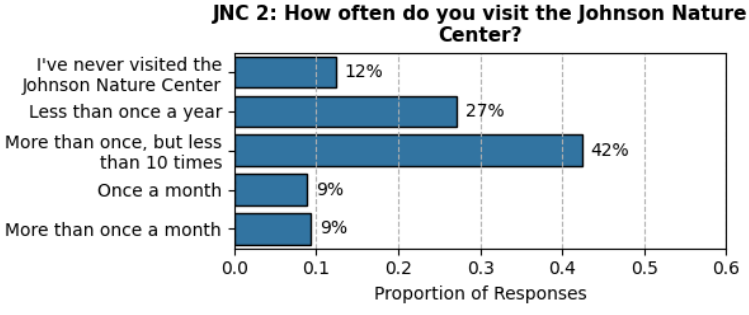
Johnson Nature Center Questions



25% of respondents guessed correctly that the Johnson Nature Center sees 10,000 visitors annually.

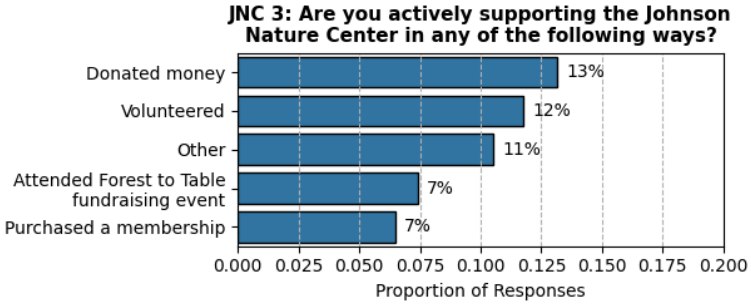
Figure 25. Respondent guess on BSF visitation with correct highlighted

42% of respondents visit the Johnson Nature Center more than once, but less than 10 times per year. 9% visit more than once per month, and 12% have never visited.

Figure 26. Respondent JNC visitation frequency

50% of respondents say they actively support the Johnson Nature Center in some way. 13% have donated money, 12% have volunteered, 7% have attended a Forest to Table fundraising event, and 7% have purchased a membership. 11% support in other ways, including attending school/classes and events.

Figure 27. Respondent JNC support style



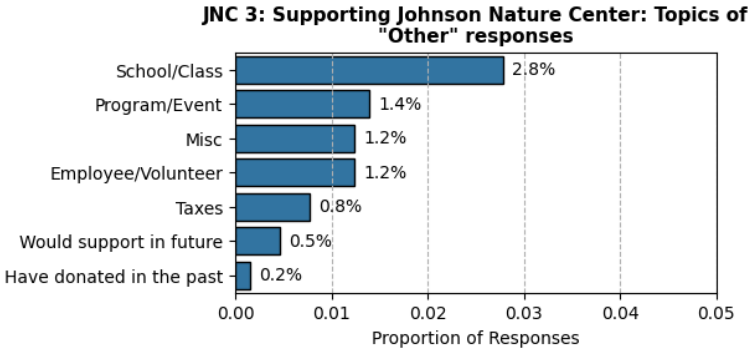


Figure 28. Respondent JNC support style "other" elaborated

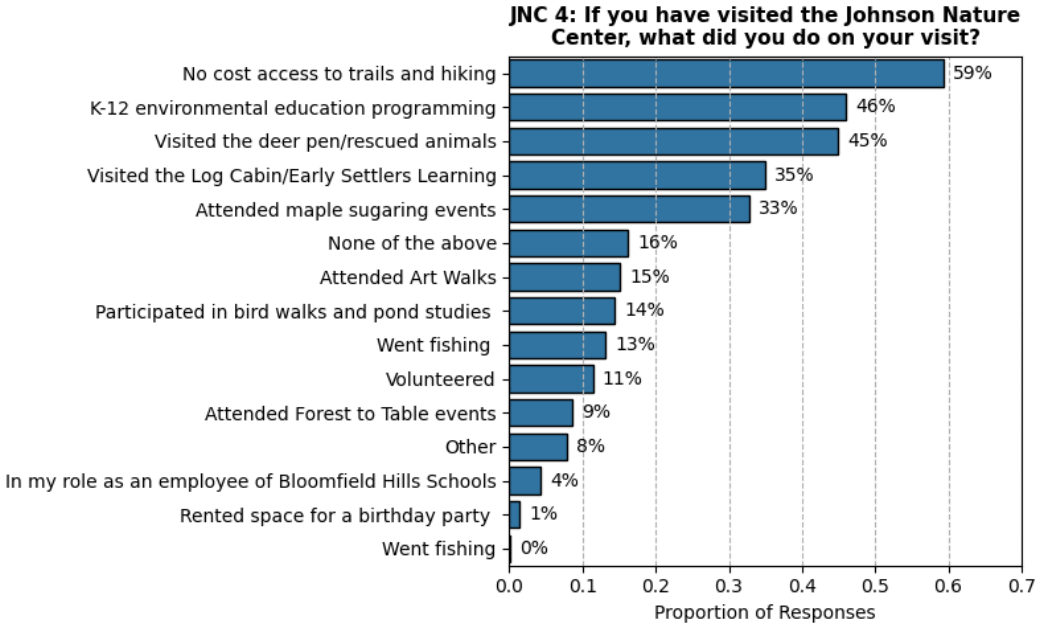
59% of respondents have used the trails and hiking opportunities when visiting the Johnson nature Center. 46% have taken part in K-12 environmental education programming, and 45% have visited the deer pen/rescued animals. There are many other popular activities listed in the two figures below.

Figure 29. Respondent activity upon visitation



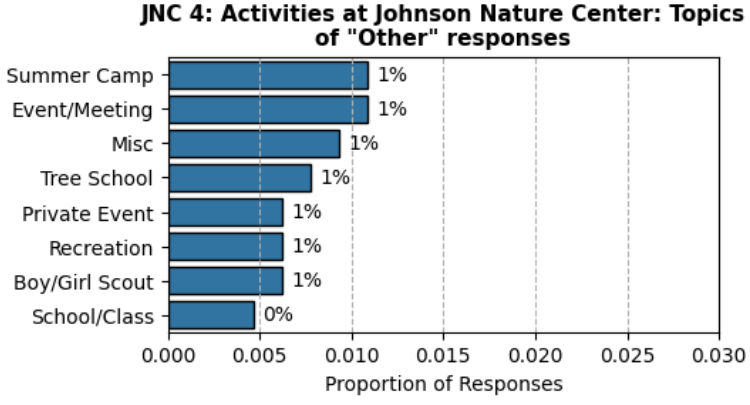


Figure 30. Respondent activity upon visitation "other" elaborated

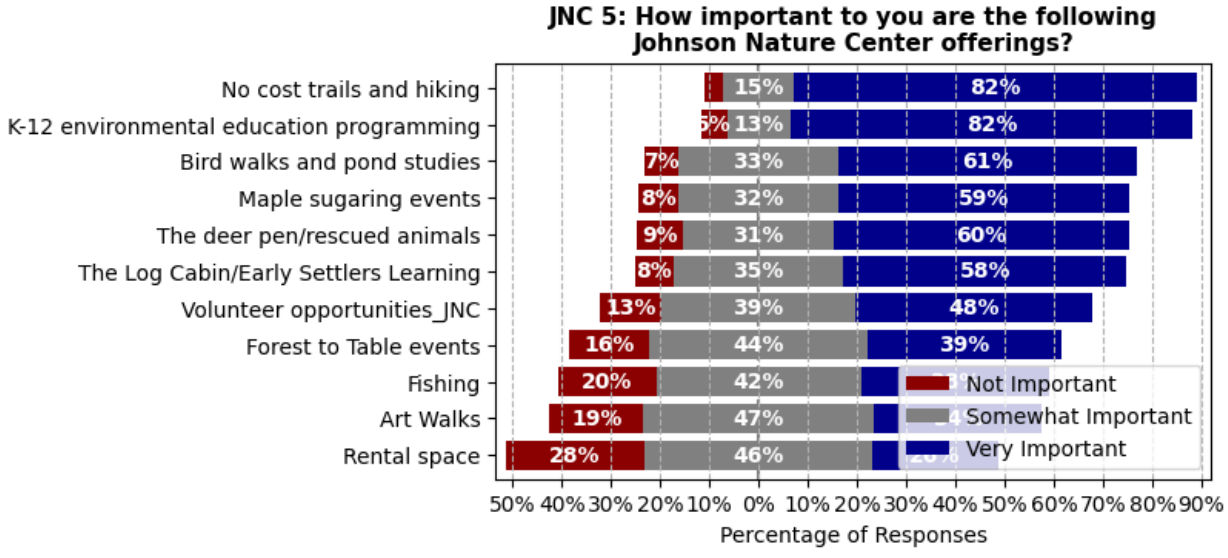
When asked about the importance of various offerings at the Johnson Nature Center, “No cost trails and hiking” (82% say Very Important) and “K-12 environmental education programming” (82% say Very Important) are the most important to respondents, followed by offerings such as “Bird walks and pond studies” and “Maple sugaring events”. Rental space and art walks are the least important.

Figure 31. JNC offerings in order of importance – percentage split



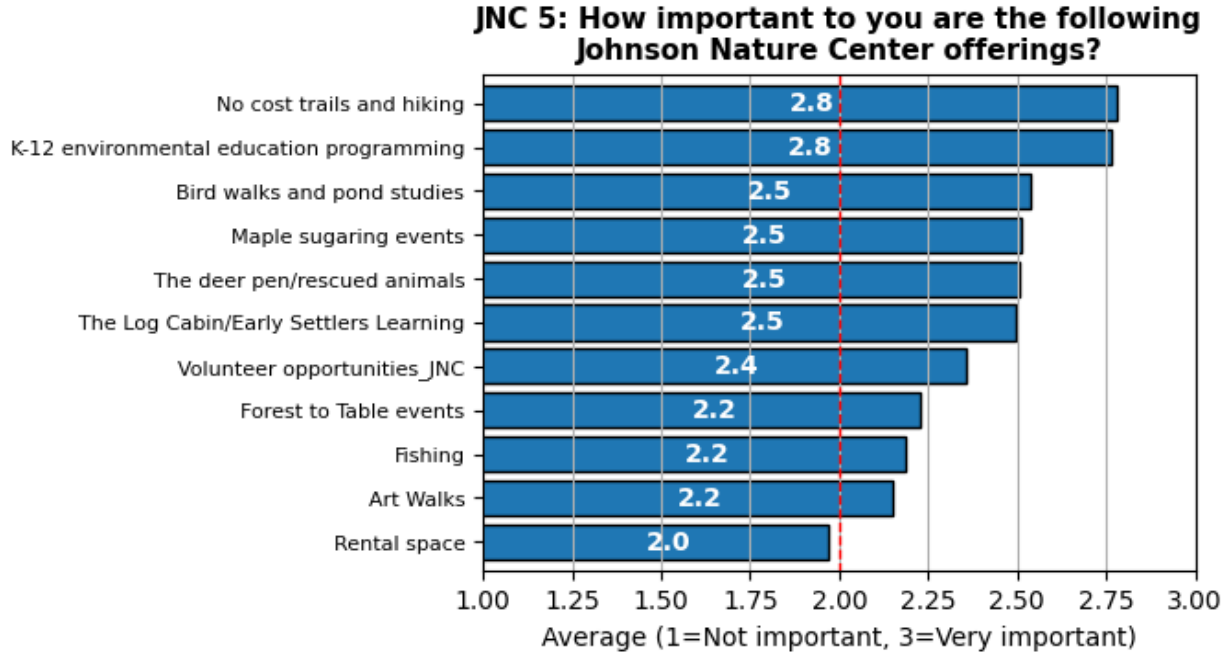


Figure 32. JNC offerings in order of importance – average score

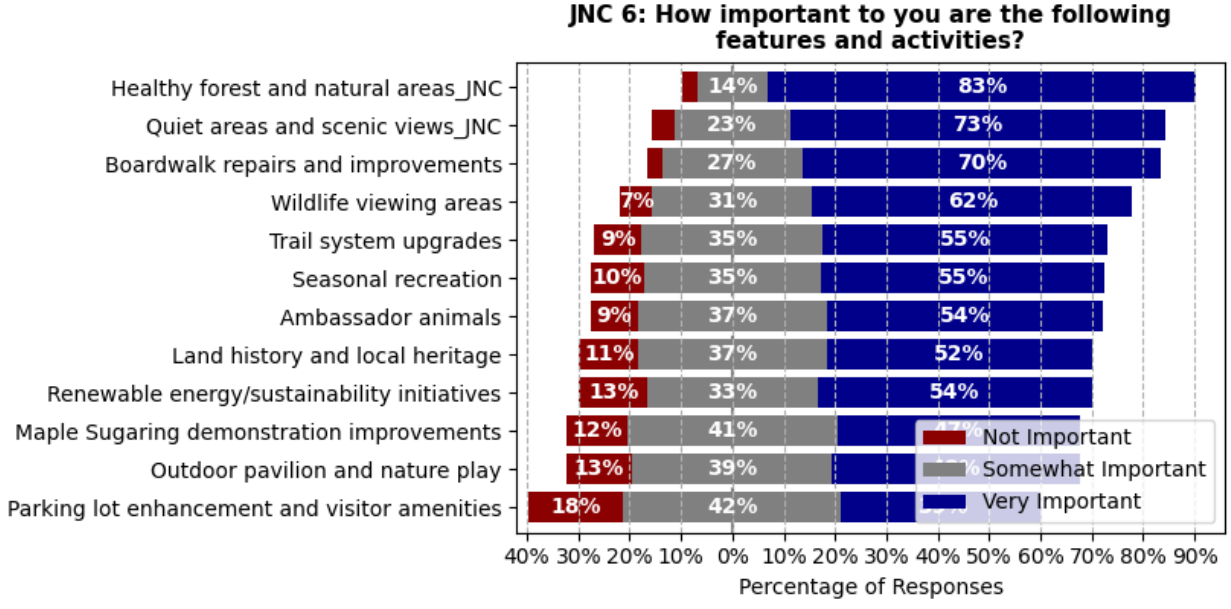
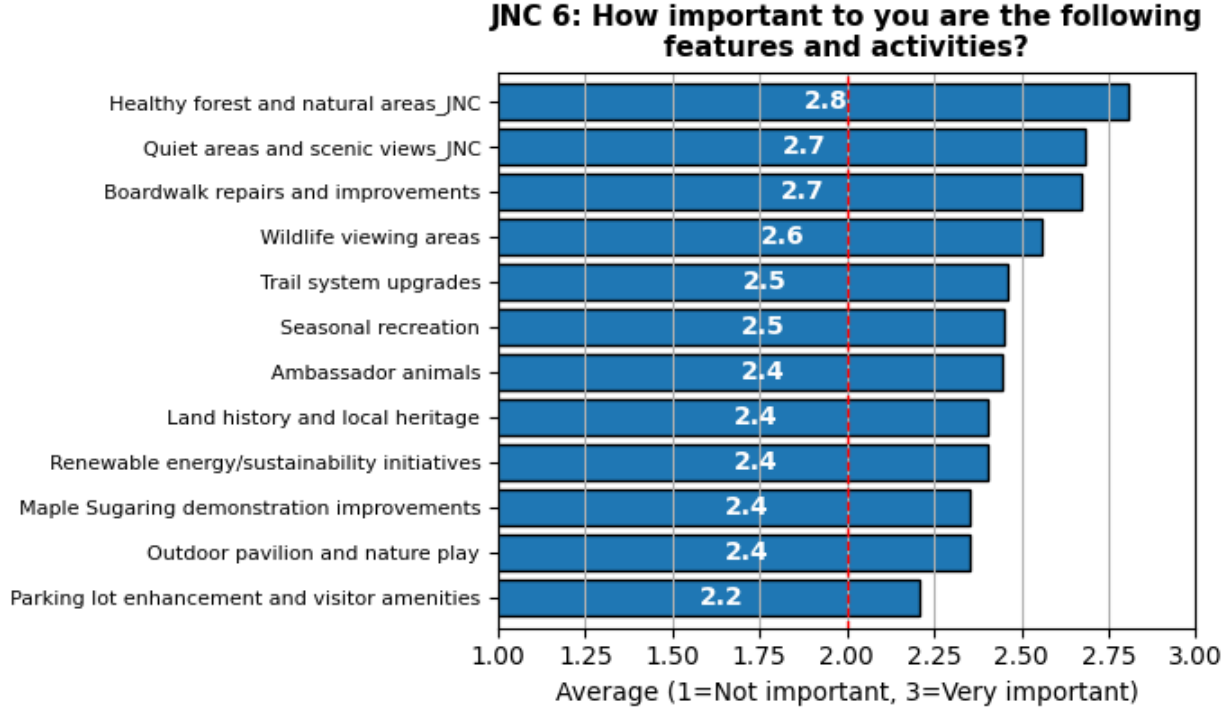
When asked about the importance of various features and activities at the Johnson Nature Center, natural areas and trails are the most important. Enhancements to visitor amenities like parking lots are the least important (30% Very Important).

Figure 33. JNC features/activities in order of importance – percentage split





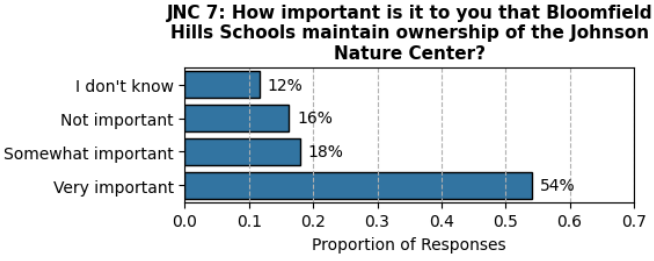


Figure 34. JNC features/activities in order of importance – average score

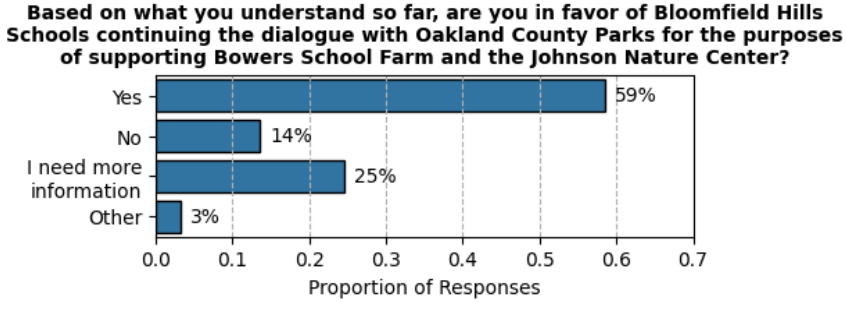
54% of respondents say that Bloomfield Hills Schools maintaining ownership of the Johnson Nature Center is Very Important.

Figure 35. Importance of BHS ownership of JNC to respondents

Other Questions

59% of respondents answered “Yes” to a question about whether they support the dialogue that may lead to a partnership. An additional 1.5% answered “Yes, with conditions” and an additional 0.5% are “leaning yes”, for a total of 61% in support. 25% need more information and 14% are not in support.

Figure 36. Proportion of respondents in favor of BHS partnering with OCP



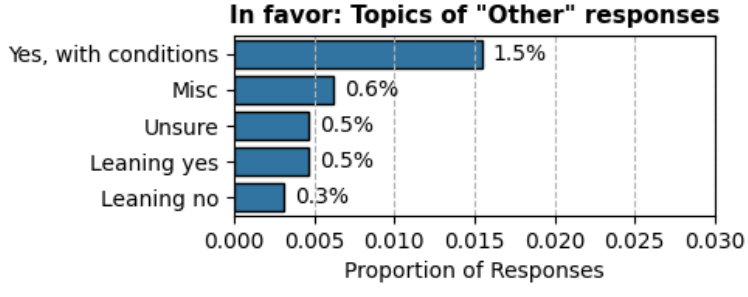


Figure 37. Proportion of respondents in favor of BHS partnering with OCP - "other" elaborated

Crosstab Survey Results

Responses to any of the above survey questions can be further broken down and separated by different demographic variables such as age or whether they have young children, or even their answers to a different question, such as whether they are in favor of the partnership or how often they visit the location in question. All the possible combinations of results are available in this interactive dashboard, but a subset will be presented here, along with any notable results from charts not included.

Factors Influencing Importance of Offerings, Features, and Activities

See *Figure 38*, *Figure 39*, *Figure 40*, and *Figure 41* for charts.

Effect of Age

- Respondents under age 35 generally think all offerings, features, and activities are more important than respondents over age 35.
    - In particular, younger respondents think volunteer opportunities are more important (true at Johnson Nature Center, more true at Bowers School Farm).

Effect of Having Young Children in the Household

- Respondents without children under 19 years old generally think all offerings, features, and activities are more important than respondents with young children.
    - In particular, respondents without young children think “History of farming and heritage agriculture” are more important at Bowers School Farm.

Effect of Visit Frequency

- Respondents who visit Bowers School Farm more often generally think all offerings, features, and activities are more important.
    - For an infrequent visitor (less than once per year), the most important features at Bowers School Farm are “Healthy forest and natural areas” and “No cost access to trails and pathways”.

Effect of Partnership Opinion

- Respondents who answered “Yes” to the question “…are you in favor of BHS continuing the dialogue with OCP…” generally think all offerings, features, and activities are slightly more important than respondents who answered “No”.

- Respondents who answered “No” still think natural areas are important at the Johnson Nature Center

Factors Influencing Answers to Other Questions

Effect of Partnership Opinion on Responses

- 54% of BHS residents support the partnership, while 68% of non-BHS residents support the partnership. (*Figure 42*)
- 48% of BHS parent/guardians support the partnership, while 65% of respondents who are not BHS parent/guardians support the partnership. (*Figure 43*)
- The percentage of respondents who do not support the partnership is roughly equal across Johnson Nature Center visit frequency (roughly 14%). The percentage of respondents who explicitly support the partnership is much lower for respondents who visit more than once a month (35% vs 62% for other frequencies). The most common answer for respondents who visit more than once a month is "I need more information", at 47%. (*Figure 45*)
    - Visit frequency does not have a notable effect on answers to the Bowers School Farm visit frequency question. (*Figure 44*)

Effect of BHS Ownership Importance on Responses

- As respondents' visit frequency to both Bowers School Farm and the Johnson Nature Center increases, so does respondents' level of importance placed on BHS ownership of those facilities. 68% of respondents who visit Bowers School Farm more than once a month think BHS ownership of the facility is "very important". (*Figure 46*) That number is 65% at the Johnson Nature Center. (*Figure 47*)

Effect of Support (Monetary or Otherwise) on Responses

- Respondents who have supported either Bowers School Farm or the Johnson Nature Center in some way (either through donations, volunteering, or other means) are much more likely to visit those locations more frequently.
    - 96% of respondents who visit Bowers School Farm once a month or more have supported the facility in the past. (*Figure 48*)
    - 70% of respondents who visit the Johnson Nature Center once a month or more have supported the facility in the past. (*Figure 49*)

Effect of Age on Responses

- At Bowers School Farm, visit frequency decreases as age increases. 58% of respondents who visit more than once per month are under the age of 35. (*Figure 50*)

- Age does not have as much correlation with visit frequency at the Johnson Nature Center. (*Figure 51*)

Numeric Crosstabs – Heatmaps

How to read a heatmap

The following four pages are heatmaps breaking the Importance questions down by additional variables. The numbers on the heatmaps are the same calculation shown earlier in the report (average rating), but grouped and averaged by different factors, such as age or gender. The color of each cell in the heatmap also corresponds to the average rating and provides a visual indicator of differences. Generally, you will be looking for especially light or dark areas that stand out (“hot spots”).

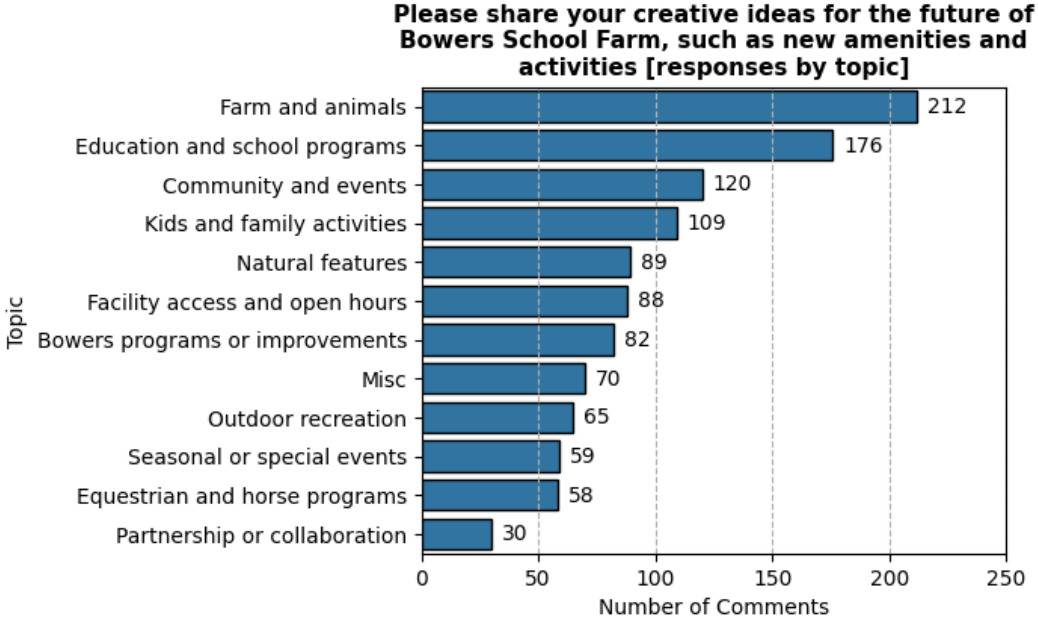
Comment Analysis

Almost 1,800 total comments were received between the four open-ended questions:



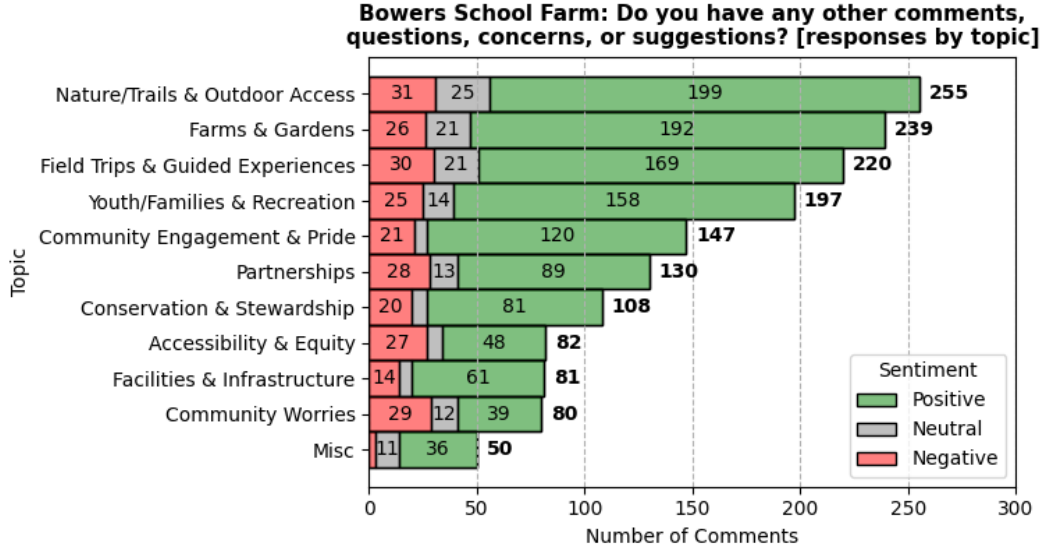
1. Please share your creative ideas for the future of Bowers School Farm, such as new amenities and activities.
2. Do you have any other comments, questions, concerns, or suggestions? (regarding Bowers School Farm)
3. Please share your creative ideas for the future of the Johnson Nature Center, such as new amenities and activities.
4. Do you have any other comments, questions, concerns, or suggestions? (regarding Johnson Nature Center)

All comments are available for viewing in this interactive dashboard.

Creative Ideas for Bowers School Farm

Most comments center on farm experiences, community events, and educational programs for students and families. Many recommend adding workshops, art activities, outdoor recreation, and equestrian opportunities. Several emphasize better access, extended hours, and revitalized Bowers-specific events and partnerships.

Figure 52. Ideas for BSF categorized by topic



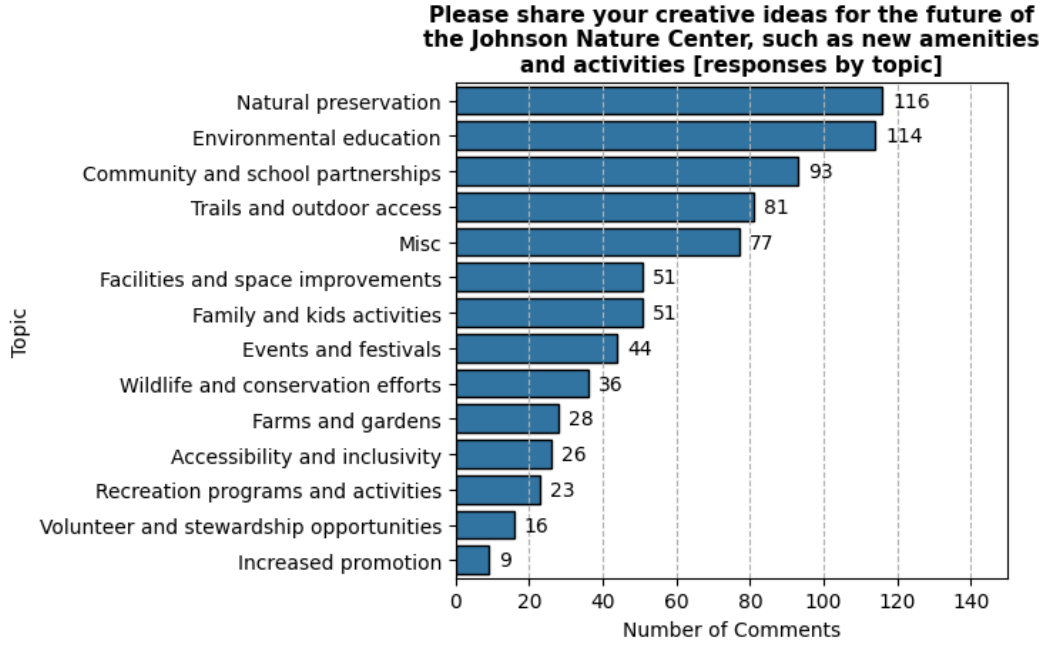
Comment Samples:

- “Partner with plain air painting groups and bring artists to the farm”
- “Expanded STEM programs and integration of student research”
- “Offer community garden plots with oversight on gardening”
- “Play structures and playground for children”
- “It would be great to have accessible trails for quiet walks”
- “Open the ropes course for public use”
- “More equestrian programs”

Comments on Bowers School Farm

The most common theme in responses to this question is strong community and educational value, with most commenters emphasizing Bowers School Farm's importance as an educational resource for students and a meaningful part of the Bloomfield Hills Schools experience. Also common are comments are diversity of experiences and programs, with many mentioning specific activities such as field trips, camps, animal care, agricultural learning, seasonal festival, and the tubing hill. Comments were also received regarding the respondents' desires for preservation and continued support of the facility. A significant portion express opposition to closure or redevelopment, urging continued funding, upkeep, and access for families and schools.

Figure 53. Additional comments about Bowers School Farm, categorized by topic and sentiment



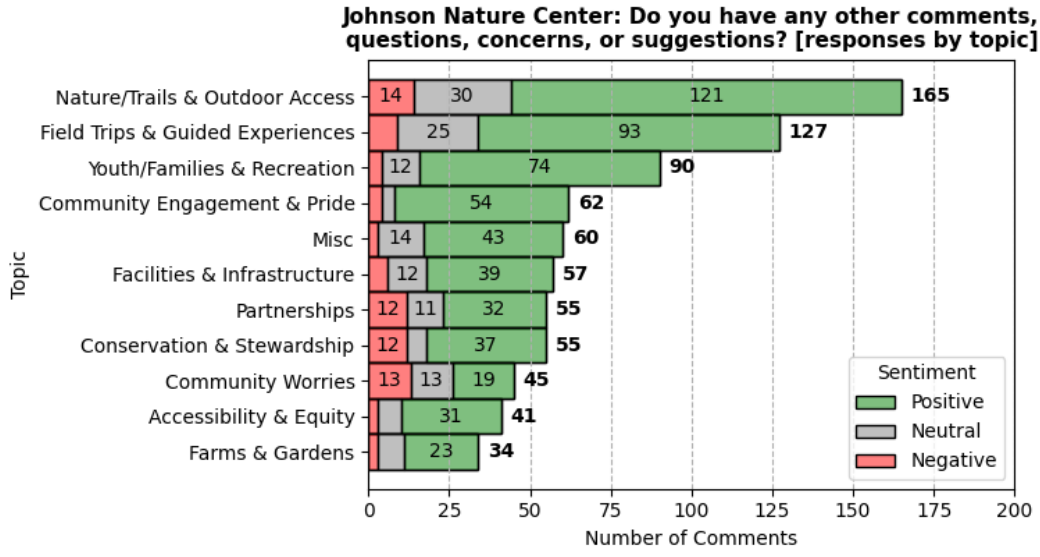
Comment Samples:

- "Bowers Farm is an important part of the Bloomfield Schools community and it's important to keep the relationship there for our children"
- "We love Bowers. Please do not move forward with this plan. Work with the community, the Bloomfield Foundation, grants, etc. to help with costs. Charge more for out of district field trips, perhaps?"
- "Expand curricular programs to grades 6-12. The programs seem mostly limited to grade schoolers."
- "Camps are amazing but so difficult to get into. Perhaps a lottery selection would be better"
- "Outdoor (green) spaces are more important than ever. We need to keep and maintain them for public use."

Creative Ideas for the Johnson Nature Center

Comments include strong interest in expanding outdoor and nature experiences, including more trails, hiking paths, and access to open spaces. There are frequent requests for education and community programs, particularly partnerships with schools, youth activities, and environmental learning. Also present are suggestions for facility improvements and inclusive events, such as better infrastructure, more family-friendly features, and accessible programming for all visitors.

Figure 54. Ideas for Johnson Nature Center, categorized into topics



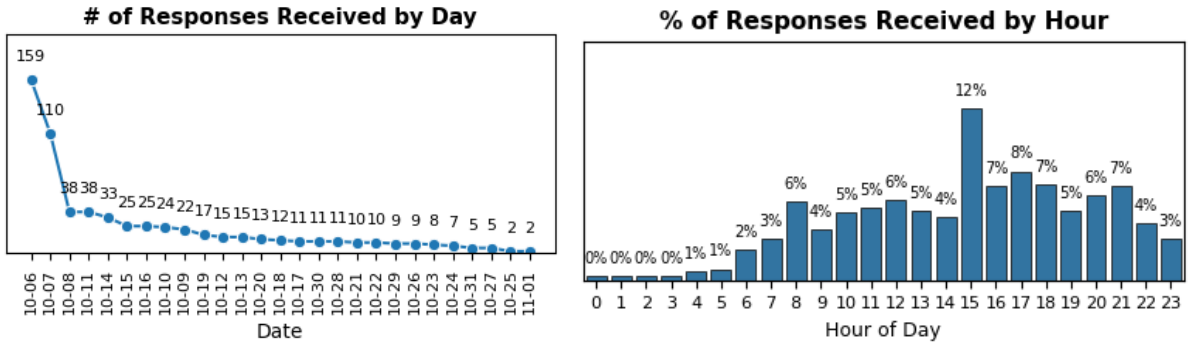
Comment Samples:

- “Wildlife signage related to potential species we might spot at the nature center”
- “Cross overs with university programs, enhancing environment concerns with like minded companies”
- “Open hours extended”
- “Guided hikes with naturalist…. Snow shoe and smores, qr code interactive displays, stargazing activity, arts and crafts”
- “We LOVED the fairy gardens last year: both on the nature trail and the homes from the middle school. Such a fun art installation.”

Comments on the Johnson Nature Center

The most common theme in responses to this question is education and learning, with a strong focus on student experiences, school district involvement, and learning opportunities through programs at the nature center. There is frequent praise for the nature center and trails as valuable community spaces that connect people to the environment. There are also repeated expressions of love, pride, and appreciation for the partnership between schools and the nature center as a community asset.

Figure 55. Additional Johnson Nature Center comments, categorized by topic and sentiment



Comment Samples:

- “We enjoy the trails to get some peace and quiet without having to travel farm from home!”
- “Bring program costs down”
- “This is such an important asset to protect. It is already well visited, so bringing in more visitors might make things worse for everyone”
- “I feel like the community is not aware enough about the nature center. I think that if people knew about it more, it would be used way more.”
- “Sounds like you want to pave it over for yoga studios, corporate party rental pavilions, and cross country skiing – this was supposed to be a natural area, not a playground.”

Appendix A. Further Analysis

Survey Days and Times

Figure 56. Day and time that respondents completed the survey

Response Correlation

See this interactive dashboard for correlation between answers to each question.

Data Cleaning Notes

- Answers to open-ended questions that just said “no”, “N/A”, or similar were removed
- Comments were anonymized, then AI was used to find a list of common topics expressed in the responses to a single question
    - A list of keywords associated with each topic was generated manually, then each comment was tagged with the topics it contained
- Responses to the BSF open comment question and JNC open comment question were assigned a topic and a sentiment (positive/neutral/negative)
    - Two different sentiment models were used:
        - VADER (Valence Aware Dictionary and sEntiment Reasoner) – a lexicon and rule-based sentiment analysis tool developed by MIT specifically attuned to sentiments expressed in social media
        - roBERTa (robustly optimized BERT approach) – a transformer-based model developed by Facebook AI designed to improve on the BERT (Bidirectional Encoder Representations from Transformers) model, trained on a larger corpus with more data

    - If both models presented the same result then the sentiment was assigned. For comments where the models disagreed, a manual review was conducted and sentiment was assigned by the analyst.
- Answers to the “Likert” questions were duplicated and then coded as numbers:
    - 1=Not Important, 2=Somewhat Important, 3=Very Important
    - This allowed these questions to be analyzed in aggregate and represented as averages to better summarize responses.

Appendix B. Online Marketing Activity

Bitly Link Tracking

A shortened Bitly link was created to use when promoting the survey online, with an accompanying QR code for physical promotion. The Bitly link gathered 807 clicks and the QR code gathered 12 scans. 69% of this engagement came from the Facebook mobile app, 21% came from “direct” sources, 7% came from Facebook desktop, and the remaining 3% from other sources.

Oakland County Parks Facebook and Instagram

The Oakland County Parks Facebook page published a paid ad to share the survey, with the following results:

- Active: 10/7/2025 to 11/1/2025
- Views: 27,663
- Reach: 11,666
- Link Clicks: 580
- Click-through Ratio: 2.1%
- Engagement: 667 total

The Oakland County Parks Facebook page also shared post #6 from Friends of Bowers Farm on 10/23 (1,186 views, 702 reach, 10 interactions, 6 link clicks) and posted natively on 10/30 (1,980 views, 1,220 reach, interactions, 13 link clicks)

OCP Partnership FAQ Document

What am I hearing about a possible partnership?

Oakland County Parks and Bloomfield Hills Schools are exploring a potential intergovernmental partnership to support and strengthen Bowers School Farm and the Johnson Nature Center. While no agreements have been made, early discussions suggest a model where Bloomfield Hills Schools would continue to have priority access for educational programming, while Oakland County Parks would oversee operations and management with a focus on bolstering recreation activities.

What is the status of the conversation?

This is still in the exploratory phase. No formal proposal or agreement has been drafted or reviewed.

What are the potential benefits of a partnership?

A partnership could:

Ensure long-term sustainability and environmental stewardship of both properties

Bring in new facility and infrastructure investments and improvements

Offer more programs and activities for families

Preserve first-in-line access for BHS students

Combine Oakland County Park's recreation expertise with BHS's commitment to education and community

Help win state and federal grants that require joint ownership

Will this increase my taxes?

No. This would not raise taxes.

How long would the partnership last?

The exact length has not yet been determined. In similar agreements, partnerships run 20–30 years. A long-term agreement would allow OCP and BHS to jointly apply for state and federal grants, bringing additional resources to enhance and sustain the Farm and Nature Center.

Why does this make sense for Oakland County Parks?

Oakland County Parks is committed to delivering increased value to residents by expanding access to recreation, education, and nature. Partnering with BHS on Bowers Farm and Johnson Nature Center would:

Strengthen OCP's mission to connect people with outdoor learning and recreation

Extend services into an area of the county that currently has limited OCP presence

Leverage county resources to invest in and sustain two well-loved community destinations

Ensure that more families and students benefit from high-quality programs and facilities

Why does this make sense for BHS?

This partnership could bring important resources to preserve and enhance these treasured spaces, while expanding recreational opportunities and addressing long-term facility needs.

Who would decide? Any agreement would need approval from:

The Bloomfield Hills Schools Board of Education

The Oakland County Parks Commission

The Oakland County Board of Commissioners

Will current programs change?

An intergovernmental partnership could strengthen long-term sustainability and expand offerings. It could help fund new programming, provide essential operational investments and maintenance, and improve accessibility.

Would the Farm and Nature Center be shared more widely with the public?

These spaces already serve the broader community through school field trips, camps, and public events. A partnership could maintain or expand these already established experiences.

Where do things stand now?

These are early talks only. No agreement has been written. Both Oakland County Parks and Bloomfield Hills Schools agree that nothing will move forward unless the community is on board.

What role do Friends of Bowers Farm and Friends of Johnson Nature Center play?

Both are independent 501(c)(3) nonprofit organizations that exist to advance the mission and reach of their respective sites through fundraising, volunteer efforts, and community events. Both organizations support any and all investments that strengthen and expand these facilities, including a partnership with Oakland County Parks.

When will a decision be made?

October will be dedicated to gathering community feedback, followed by a thorough analysis of the results in November. A summary of the feedback will be shared with both the Bloomfield Hills School Board of Education and the Oakland County Parks Commission at their November meetings. This website will continue to be updated as the timeline evolves.

How can I share my opinion?

Community input is essential in shaping how these treasured spaces can best serve students, staff, and residents in a sustainable, fiscally responsible, and operationally efficient way for

years to come. To gather feedback, Bloomfield Hills Schools is working with Oakland County Parks to offer public forums and a community survey.

Public Forums: Two sessions will be held for residents to learn more and share their views:

Saturday, October 18, 2025, at Bowers School Farm during the Fall Festival event from 10 a.m.–12 p.m.

Monday, October 20, 2025, at Johnson Nature Center from 4 p.m.–6 p.m.

Complete the short survey.

Full Survey Text

Bloomfield Hills Schools and Oakland County Parks Survey

An Intergovernmental Partnership to Support Bowers School Farm and Johnson Nature Center

Oakland County Parks and Bloomfield Hills Schools are exploring a potential intergovernmental partnership to support and strengthen Bowers School Farm and the Johnson Nature Center. While no agreements have been made, early discussions suggest a model where Bloomfield Hills Schools would continue to have priority access for educational programming, while Oakland County Parks would oversee recreation-related operations. This partnership could bring important resources to preserve and enhance these treasured spaces, while expanding recreational opportunities and addressing long-term facility needs. Here is a proposal that shares more details about a possible intergovernmental partnership.

Community input is essential in shaping how these treasured spaces can best serve students, staff, and residents in a sustainable, fiscally responsible, and operationally efficient way for years to come. To gather feedback, Bloomfield Hills Schools is working with Oakland County Parks to offer public forums and a community survey.

Public Forums: Two sessions will be held for residents to learn more and share their views:

- Saturday, October 18, 2025, at Bowers School Farm from 10 a.m.–12 p.m.
- Monday, October 20, 2025, at Johnson Nature Center from 4 p.m.–6 p.m.

Thank you for taking the time to complete the below survey. This survey should take you approximately ten minutes to complete.

Questions Specific to Bowers School Farm

1. Approximately how many guests do you estimate visit Bowers School Farm annually?
   - 10,000
   - 20,000
   - 30,000
   - 40,000
   - 50,000

Then branching/confirming the correct answer (Bowers School Farm has more than 40,000 annual visitors.)

2. How often do you visit Bowers School Farm?
   - I've never visited Bowers School Farm
   - Less than once a year
   - More than once, but less than 10 times a year
   - Once a month
   - More than once a month
3. Are you actively supporting Bowers School Farm in any of the following ways?
   - Monetary donations
   - Volunteered
   - Purchased a membership
   - None of the above
   - Other: (Open Ended)
4. If you have visited Bowers School Farm, what did you do on your visit? Please select all that apply.
   - Went on a grade K-5 field trip
   - Attended grade 6-12 school day environmental education
   - Used the Farm Recreation Activity Building (Barn used for Winter Park, rentals, etc.)
   - Attended Fall Festival
   - Attended the Winter Park (tubing hill)
   - Used the farm store & kitchen
   - Attended summer camp or youth programs

- Attended weekend events and activities
- Used membership offerings and benefits
- Booked space for a birthday party
- Attended community classes
- Participated in 4-H or FFA
- Volunteered
- Used community and horticultural gardens
- Attended historical interpretation and heritage programs
- Attended animal experiences

5. How important to you are the following Bowers School Farm offerings? [not important, somewhat important, very important]
   - Grade K-5 field trip
   - Grade 6-12 school day environmental education
   - Farm Recreation Activity Building (Barn used for Winter Park, rentals, etc.)
   - Fall Festival
   - Winter Park (tubing hill)
   - The farm store & kitchen
   - Summer camp or youth programs
   - Weekend events and activities
   - Membership offerings and benefits
   - Rental space for a birthday party
   - Community classes
   - 4-H or FFA
   - Volunteer opportunities
   - Community and horticultural gardens
   - Historical interpretation and heritage programs
   - Animal experiences
6. How important to you are the following features and activities? [not important, somewhat important, very important]
   - No cost access to trails and pathways
   - Healthy forest and natural areas
   - Winter access and activities
   - Playgrounds and play features
   - Quiet areas and scenic views
   - Community events and entertainment spaces
   - Updated barns and animal care areas
   - Visitor amenities (accessible restrooms, food/beverage, picnic shelters)

- Improved parking and traffic flow
- Dedicated event space (barn rentals, pavilion, amphitheater)
- Agricultural education (livestock, crops, equestrian)
- Farm-to-table experiences (gardening, cooking, maple sugaring)
- History of farming and heritage agriculture
- Therapeutic riding and equestrian programs
- Adventure options (farm mazes, ropes course, winter tubing)

7. How important is it to you that Bloomfield Hills Schools maintain ownership of Bowers School Farm?
   - Very important
   - Somewhat important
   - Not important
   - I don't know
8. Please share your creative ideas for the future of Bowers School Farm, such as new amenities and activities. [open-ended]
9. Is there anything else you'd like to share about Bowers School Farm? [open-ended]

Questions Specific to the Johnson Nature Center

1. Approximately how many guests do you estimate visit the Johnson Nature Center annually?
   - 2,000
   - 4,000
   - 8,000
   - 10,000
   - 12,000

Then branching/confirming the correct answer (The Johnson Nature Center has approximately 10,000 annual visitors.)

2. How often do you visit the Johnson Nature Center?
   - I've never visited the Johnson Nature Center
   - Less than once a year
   - More than once, but less than 10 times
   - Once a month
   - More than once a month
3. Are you actively supporting the Johnson Nature Center in any of the following ways?
   - Donated money
   - Volunteered

- Purchased a membership
- Attended Forest to Table fundraising event
- None of the above
- Other (open ended)

4. If you visited JNC, what did you do on your visit? Please select all that apply.
   - K-12 environmental education programming
   - No cost access to trails and hiking
   - Visited the Log Cabin/Early Settlers Learning
   - Visited the deer pen/rescued animals
   - Attended Art Walks (when visiting exhibits are on site)
   - Attended maple sugaring events
   - Participated in bird walks and pond studies
   - Attended Forest to Table events
   - Volunteered
   - Went fishing
   - Rented space for a birthday party
   - None of the above
   - Other (open-ended)
5. How important to you are the following Johnson Nature Center offerings? (all should be: not important, somewhat important, very important)
   - K-12 environmental education programming
   - No cost trails and hiking
   - The Log Cabin/Early Settlers Learning
   - The deer pen/rescued animals
   - Art Walks (when visiting exhibits are on site)
   - Maple sugaring events
   - Bird walks and pond studies
   - Forest to Table events
   - Volunteer opportunities
   - Fishing
   - Rental space
6. How important to you are the following features and activities? (all should be: not important, somewhat important, very important)
   - Trail system upgrades (ADA-accessible, wayfinding)
   - Healthy forest and natural areas
   - Boardwalk repairs and improvements
   - Wildlife viewing areas (bird blinds, observation decks)

- Quiet areas and scenic views
- Maple Sugaring demonstration improvements
- Land history and local heritage
- Seasonal recreation (snowshoeing, cross-country skiing, fishing)
- Outdoor pavilion and nature play
- Parking lot enhancement and visitor amenities (restrooms, water stations)
- Ambassador animals (rehabilitated, non-releasable)
- Renewable energy / sustainability initiatives (solar, rain gardens)

7. How important is it to you that Bloomfield Hills Schools maintain ownership of the Johnson Nature Center?
   - Very important
   - Somewhat important
   - Not important
   - I don't know
8. Please share your creative ideas for the future of the Johnson Nature Center, such as new amenities and activities. [open-ended]
9. Is there anything else you'd like to share about Johnson Nature Center? [open-ended]

Final Thoughts:

1. Based on what you understand so far, are you in favor of Bloomfield Hills Schools continuing the dialogue with Oakland County Parks for the purposes of supporting Bowers School Farm and the Johnson Nature Center?
   - Yes
   - No
   - I need more information
   - Other (open ended)
2. Do you have any other comments, questions, concerns, or suggestions? [open-ended]

About You

1. Do you live within the Bloomfield Hills Schools boundaries?
   - Yes
   - No
   - Unsure
2. Are you a parent or caretaker of a child currently enrolled in Bloomfield Hills Schools?
   - Yes

- No

3. How old are your children? Please select all that apply for multiple children.
   - 0-5
   - 6-11
   - 12-14
   - 15-18
   - 18+
   - No children
4. What is your home zip code?
5. What is your age?
   - 18-24
   - 25-34
   - 35-44
   - 45-54
   - 55-65
   - 65 or older
6. What is your gender?
   - Female
   - Male
   - Prefer not to answer
7. Which of the following best describes your race/ethnicity?
   - Asian or Asian Indian
   - Black or African American
   - Native American or Alaska Native
   - White
   - Native Hawaiian or other Pacific Islander
   - Hispanic or Latino/a
   - Middle Eastern or North African
   - Other ____
8. Languages spoken in your home:
   - English
   - Spanish
   - Arabic
   - Mandarin or Cantonese
   - Hindi
   - Other_____

After survey is completed:

Thank you for taking the time to complete the survey, your feedback is important to us.

This survey was created in partnership with the Friends of Bowers Farm, the Friends of the Johnson Nature Center, and Oakland County Parks.

For news and updates on the status of our discussions, please visit https://www.bloomfield.org/community/oakland-county-parks-partnership.

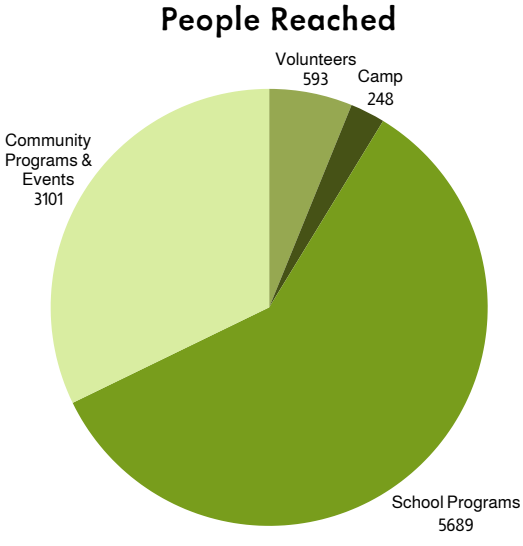
JOHNSON
NATURE CENTER
BLOOMFIELD HILLS SCHOOLS

Rooted in Nature. Growing through Experience.

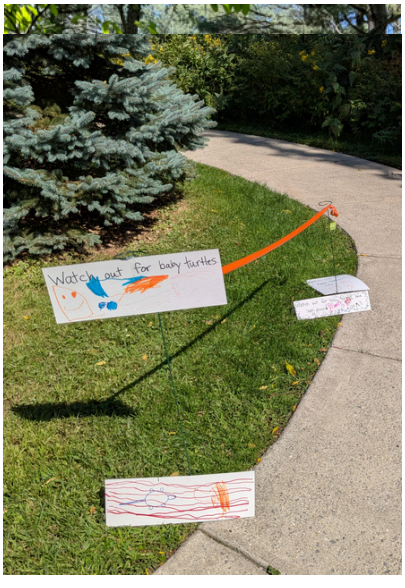
Community Report 2025 - 2026

Growing Wonder

Hands-on learning at our Nature Center sparks curiosity and fosters a sense of wonder in the natural world.



- 5,689 students participated in hands-on, interdisciplinary school programs.
- More than 3,000 community members enjoyed public programs and events.
- Spring & Summer camps provided enriching experiences for 248 children & youth.
- Through our new partnership with Brilliant Cities Pontiac, we explored their landscape, discovered the people and places that make Pontiac unique, and reflected on our experiences through journaling.



Sprouting in Creativity

At the nature center, we nurture curiosity and sprout creativity through engaging community programs that inspire all ages to connect with the natural world.

- In our second year, Girl Scouts Badge-A-Palooza reached 253 scouts in the fall and spring with learning activities such as fishing, bug studies, and nature art.
- The community joined themed hikes exploring bats, frogs, antler sheds, and owls—both by day and after dark.
- NEW Partnership with the BHHS Fishing Club, where 76 hours of fishing time were enjoyed in the fall and spring.
- Through our continued collaboration with BHS Middle School French classes, students created three different interpretive displays to enhance our center while continuing their project-based learning at school.

We were honored with the Environmental Stewardship award, by the Greater West Bloomfield's Michigan Week, in recognition of our community outdoor educational opportunities .

Blooming with Confidence

Growth happens here in every season. Through hands-on exploration, creative discovery, and meaningful connections with nature, our programs help children and adults alike build confidence from the ground up.

- The community engaged in maple sugaring by tapping maple trees, setting up the sap collection system, and helping to gather 1,048 gallons of sap for the sweetest season.
- Fishing activities were explored by 1,028 people: from the Pontiac's Police Athletic League (PAL), Girl Scouts of Southeast Michigan (GSSEM), TreeSchool, BHS students, camps, and visitors.
- DMF Bait Company supplied bait worms & donated 25 fishing poles for PAL youth and donated extra worms to the Nature Center for future fishing programs.

Bringing together Community

At the heart of our Nature Center lies a vibrant spirit of connection and celebration. Throughout the year, our community events create welcoming spaces where people of all ages and backgrounds come together to share in the beauty of nature and the joy of learning.

- Our Enchanted Craft & Hike series brought families together for four April craft sessions (Builds & Wands) and three themed May hikes — fairy, gnome, and dragon — creating joyful, imaginative entry points into nature.
- In partnership with the PAL, youth & families from Pontiac joined us for a maple sugaring experience — tapping trees, collecting sap, and learning about Michigan's maple traditions. This collaboration strengthened community connections and expanded access to seasonal outdoor learning.
- The Discovery Channel documented a day of fishing on the Big Pond for the fourth season of the three-time Emmy-nominated TV series, "Bassquatch Hunter: Fish Out of Water".

40%
increase in family craft workshops

Stewardship of the Environment

At the heart of our mission is a deep commitment to environmental stewardship, guiding our efforts to protect natural habitats, inspire sustainable practices, and foster a lasting connection between people and the Earth.

- Volunteer Stewardship: Our Monday Stewardship Group of 12 volunteers contributed 2,372 hours of dedicated care to the Land.
- Prescribed burns: Annual prescribed burns rotated across key areas helped control introduced species and support native plant regeneration.
- Native plantings: With support from North Oakland Wild Ones, the Outdoor Classroom now features a native flower and grass garden that enhances both ecological health and educational opportunities.
- Youth Stewardship: The DNR Summer Employment Program supported habitat restoration and youth stewardship, sparking early career pathways in Land care.

We celebrated the opening and first full school-year use of the **Outdoor Classroom**, a dynamic space that expands learning opportunities at the Nature Center. Sparked by the vision of TreeSchool and made possible through generous support from the Rotary Club of Bloomfield Hills, the Cohen Family Foundation, the Placemaking Realtor Grant, and other valued partners, this space is already transforming how students engage with the Land.

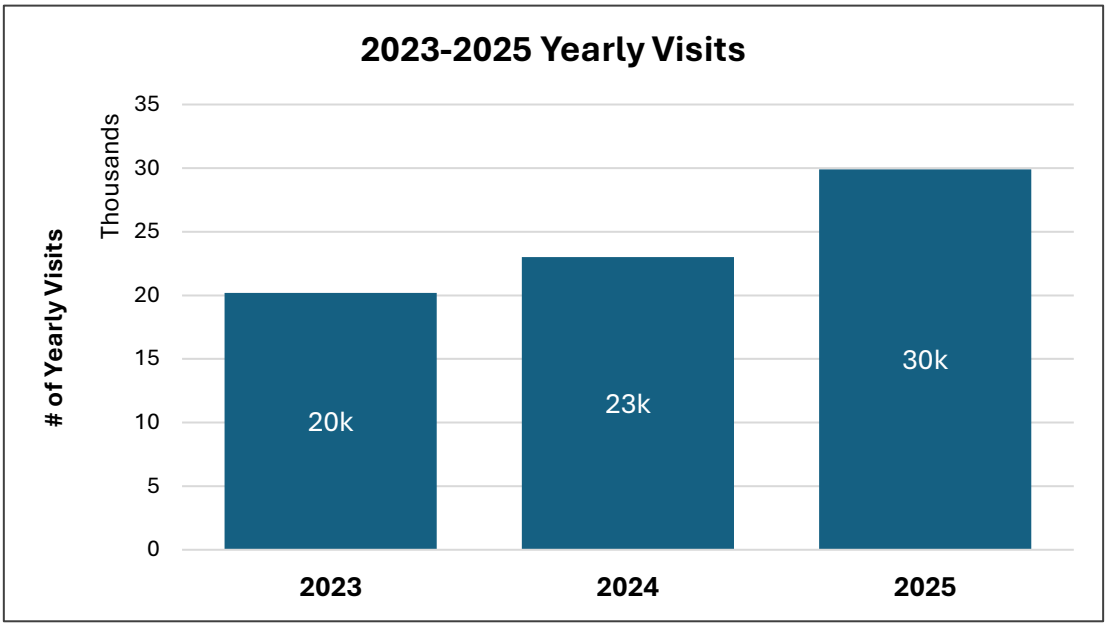
Bloomfield Oaks Visitor Data Summary

SUP-V01

Source Record

Bloomfield Oaks Visitor Data summary, supplied October 28, 2026

Review Context



Anonymized, aggregated mobile location data; approximately 20,000 modeled visits in 2023, 23,000 in 2024 and 30,000 in 2025. Staff advise lower capture reliability at Bloomfield Oaks than Discovery Oaks. Use origins, demographic patterns and comparable year-to-year trends cautiously; this is not a verified attendance count.

Outdoor Learning Program Inventory

SUP-G01

Source Record

Outdoor_Learning_Program_Inventory_DO-BO_Final.xlsx | Bloomfield Oaks Programs

Review Context

Complete Bloomfield Oaks Programs tab, 11 entries. Numbers are labeled FY 2025–26 in the source. Measures are not additive: TreeSchool includes an “overall impact” value and registration count; camps are 236 here versus 248 in the community report; Whimsical Woodlands is labeled “Planned” while reporting 1,150. Reconcile definitions and status before reporting totals. Natural Resources leads maple production; the listed Outdoor Learning role concerns programming.

Appendix source-page range: 884–894

School Field Trips

Bloomfield Oaks Program Inventory | Source row 4 | FY 2025–26 figures as reported

Purpose	Extends classroom learning into the natural environment through curriculum-connected, hands-on science.
Main Activities	Guided nature hikes, habitat exploration, wildlife observation, pond studies, plant and tree identification, and seasonal investigations, adapted to grade-level standards.
Audience	DK–12th grade
Season	School year, September–June
Delivery Lead	Outdoor Learning Team
Partners	Bloomfield Hills Schools; Birmingham Public Schools (long-standing agreement, Jr. K–5th)
Current Status	Running/Growth
Primary Facility	A combination of indoor nature center experiences and immersive outdoor learning opportunities.
Annual Participants	5689
Fee / Revenue	$12
Staffing	Outdoor learning Team
Opportunities & Notes	Not specified
Review Notes	Removed the Cranbrook, Detroit Country Day, and West Bloomfield arrangement, which is farm-only. Confirm the Birmingham agreement covers both sites.

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

TreeSchool

Bloomfield Oaks Program Inventory | Source row 5 | FY 2025–26 figures as reported

Purpose	State-licensed, nature-based preschool focused on whole-child development and kindergarten readiness.
Main Activities	Daily outdoor exploration, forest play, nature hikes, gardening, wildlife observation, storytelling, nature art, and STEM, with early literacy and math built in.
Audience	Ages 3–5 in two groups: Acorns (3–4) and Oaks (4–5)
Season	School year, September–June; weekly sessions
Delivery Lead	Licensed early childhood educators and outdoor education staff
Partners	Families and community organizations
Current Status	Running
Primary Facility	Licensed outdoor classroom / Indoor Classroom space maintained for safety
Annual Participants	(1680 overall impact) 24 Students Registered
Fee / Revenue	$4667-$5459 annual tuition
Staffing	TreeSchool Team with outdoor learning. Meet licensing requirements.
Opportunities & Notes	Partnering with Help Me Grow Oakland / GSRP possibilities
Review Notes	Licensing pathway under OCP requires Corporation Counsel review (per the Integrated Park Plan).

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Grown-Up & Me

Bloomfield Oaks Program Inventory | Source row 6 | FY 2025–26 figures as reported

Purpose	Introduces children ages 2–6 and their caregivers to nature through play-based learning.
Main Activities	Nature walks, forest exploration, wildlife discovery, sensory play, crafts, and storytelling, with rotating seasonal themes.
Audience	Children ages 2–6 with a parent, guardian, or caregiver; sessions grouped by age
Season	Fall, winter, spring, and summer sessions; typically weekly with rotating themes
Delivery Lead	Outdoor Learning Team
Partners	Open to collaboration with community organizations and early childhood partners
Current Status	Running
Primary Facility	Nature Trails
Annual Participants	233
Fee / Revenue	$20
Staffing	Early Childhood Learning team
Opportunities & Notes	Partnering with Help Me Grow Oakland
Review Notes	Not specified

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Maple Sugaring

Bloomfield Oaks Program Inventory | Source row 7 | FY 2025–26 figures as reported

Purpose	Teaches the science and history of maple syrup production and Michigan's sugaring tradition.
Main Activities	Sugar bush tours, tree identification, tapping, sap collection, boiling demonstrations, and history of traditional and modern methods.
Audience	Pre-K–12 students, families, adults, scout groups, and community groups
Season	Late winter to early spring, primarily March
Delivery Lead	Outdoor Learning Team
Partners	Open to collaboration with school districts, historical organizations, and volunteers
Current Status	Seasonal
Primary Facility	On-site at the Sugar Bush and Sugar Shack
Annual Participants	266
Fee / Revenue	$12
Staffing	Outdoor learning Team
Opportunities & Notes	Long-term succession planting is needed to sustain the sugar bush (per the Integrated Park Plan).
Review Notes	The Integrated Park Plan calls the public event "Sap Happy." Confirm whether it is tracked here or as its own row.

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Scout Programs / Badge-a-Palooza

Bloomfield Oaks Program Inventory | Source row 8 | FY 2025–26 figures as reported

Purpose	Helps scouts earn badges through hands-on outdoor and environmental learning.
Main Activities	Badge stations, nature hikes, habitat investigations, survival skills, shelter building, conservation projects, and nature crafts.
Audience	Girl Scouts, Scouts BSA, Cub Scouts, and other youth groups, primarily ages 5–18
Season	Year-round troop visits; Badge-a-Palooza events in fall, winter, and spring
Delivery Lead	Outdoor Learning Team
Partners	Girl Scouts of Southeastern Michigan, local scouting councils, and troop leaders
Current Status	Running
Primary Facility	Nature Trails
Annual Participants	113 & 58 Badge-a-palooza
Fee / Revenue	$16
Staffing	Outdoor learning Team
Opportunities & Notes	Not specified
Review Notes	Not specified

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Community Fishing Days

Bloomfield Oaks Program Inventory | Source row 9 | FY 2025–26 figures as reported

Purpose	Introduces families and first-time anglers to fishing, aquatic ecosystems, and conservation.
Main Activities	Casting, baiting, equipment basics, fish identification, catch-and-release, fishing safety, and habitat exploration.
Audience	Children, youth, adults, families, and community groups, including first-time anglers
Season	Spring, summer, and fall
Delivery Lead	Outdoor recreation staff, with volunteers and conservation partners
Partners	Not specified
Current Status	Running
Primary Facility	Turtle Pond On-site
Annual Participants	201
Fee / Revenue	$10
Staffing	Trained Outdoor Learning Staff
Opportunities & Notes	Exploring partnership and collaboration opportunities with a local bait and tackle shop to enhance community fishing programs
Review Notes	Partners blank in original; add any conservation or fishing organizations that help.

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Camps

Bloomfield Oaks Program Inventory | Source row 10 | FY 2025–26 figures as reported

Purpose	Summer day camps connecting youth to the outdoors through nature study and adventure.
Main Activities	Nature hikes, wildlife encounters, pond dipping, survival skills, shelter building, nature STEM, fishing, canoeing, archery, and team-building.
Audience	Ages 3–5 (half-day); ages 6–13 (grouped by age); ages 14–17 (Volunteer Camp Stewards)
Season	Summer weekly sessions; additional camps during school breaks as demand and capacity allow
Delivery Lead	Camp counselors and seasonal recreation staff
Partners	Oakland Schools (McKinney-Vento)
Current Status	Seasonal
Primary Facility	Nature Trails
Annual Participants	236
Fee / Revenue	$165-$390
Staffing	Seasonal Camp Staff
Opportunities & Notes	Not specified
Review Notes	Removed farm wording carried over from the Discovery Oaks tab (agricultural educators, farm operations staff, MSU Extension staffing, Friends of Bowers Farm camperships). Confirm whether any of these apply at Johnson.

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Community Programs

Bloomfield Oaks Program Inventory | Source row 11 | FY 2025–26 figures as reported

Purpose	Public nature programs and seasonal events that broaden access to Bloomfield Oaks.
Main Activities	Nature hikes, wildlife encounters, seasonal investigations, crafts, conservation activities, family programs, and workshops.
Audience	Individuals and families of all ages, and community organizations
Season	Year-round
Delivery Lead	Outdoor Learning Team
Partners	Not specified
Current Status	Running
Primary Facility	A combination of indoor nature center experiences and immersive outdoor learning opportunities.
Annual Participants	864
Fee / Revenue	$0-$50
Staffing	Outdoor learning Team
Opportunities & Notes	Not specified
Review Notes	Delivery Lead and Partners originally held chick-hatching text and "BHS"; replaced. Add partners if any.

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

Whimsical Woodlands

Bloomfield Oaks Program Inventory | Source row 12 | FY 2025–26 figures as reported

Purpose	Seasonal family event combining storytelling and imaginative play along woodland trails.
Main Activities	Self-guided trail with whimsical displays, storytelling stations, and creative activities.
Audience	Families with young children and community members of all ages
Season	Seasonal special event
Delivery Lead	Outdoor Learning Team and support staff
Partners	Seasonal staff, volunteers, local artists, and community organizations
Current Status	Planned
Primary Facility	Nature Trails
Annual Participants	1150
Fee / Revenue	Free Event
Staffing	FT/ PT and volunteer base
Opportunities & Notes	Not specified
Review Notes	Not specified

Source wording and review notes are retained. Fees, status labels, staffing and participation measures are reported inventory entries, not newly approved operating commitments. Blank fields are labeled “Not specified.”

BHS Fire Ecology

Bloomfield Oaks Program Inventory | Source row 13 | FY 2025–26 figures as reported

Purpose	Teaches high school students the role of fire in healthy ecosystems and land management.
Main Activities	Field study of fire-adapted ecosystems and plant adaptations, prescribed burning as a management tool, and habitat restoration.
Audience	Bloomfield Hills high school students
Season	Scheduled with BHS around curriculum and burn conditions
Delivery Lead	Johnson Nature Center Education Team
Partners	Bloomfield Hills Schools, local fire departments, and natural resource professionals
Current Status	Confirm
Primary Facility	Not specified
Annual Participants	Not specified

TreeSchool Family Handbook 2026-27

BO-T02

Source Record

TreeSchool Handbook 26-27(1).pdf | Updated July 2026

Review Context

Current family handbook supplied for the 2026-27 school year, replacing the 2025-26 edition. Supports the educational approach, family practices and program administration. Staffing ratios conflict (p. 4 versus pp. 12 and 20); Oaks class days conflict (p. 8 versus pp. 9 and 12). Reconcile these descriptions with program staff. The handbook is not evidence of a new OCP license or a completed licensing transition; capacity and approved spaces require license verification.

What is TreeSchool?

Every child deserves a “happy place” to gain independence, make friends, and develop unique skills and interests while learning to become a contributing community member. TreeSchool, our early childhood enrichment program at Johnson Nature Center, provides young children with such a place. With 40 acres of forest, pond, and prairie to explore, children develop lifelong skills through meaningful play and learning experiences.

We highly value the importance of relationships to build a strong learning community and maintain a low teacher-to-student ratio (3 teachers for every 6 students) to provide deep connections and personalized learning. We follow an emergent, child-led curriculum focused on discovering the joys and curiosities of the ever-changing seasons. Children engage in investigations inspired by their interests and the natural phenomena surrounding them to build the foundation they need to thrive.

Forest School Philosophy

Our preschool embraces the Forest School philosophy, which recognizes nature as a rich and meaningful environment for learning. Through regular outdoor experiences, children are encouraged to explore, investigate, create, and take appropriate risks in a safe and supportive setting. Time spent outdoors fosters confidence, independence, resilience, problem-solving skills, and a deep appreciation for the natural world. Rather than focusing solely on structured activities, our teachers follow children's interests, allowing curiosity and hands-on discovery to guide learning. We believe that meaningful connections with nature support children's physical, social, emotional, and cognitive development while nurturing a lifelong love of learning and environmental stewardship.

Adventures. Friendships. The joy of learning. Discover your “happy place” at Johnson Nature Center.

Let’s Learn Outdoors

Our Statement of Purpose

Our early childhood enrichment programs at Johnson Nature Center provide young children with place-based learning opportunities to cultivate a love of nature and agriculture while creating a safe place to grow resilience and connections within their world.

Our Goals

To develop an inquiry-based mindset through seasonal investigations and projects.

To promote the joys of learning through play.

To build confidence through risk-taking and problem-solving.

To nourish a sense of connection and community.

To create meaningful impacts in the local community and natural environment.

Assessment of Learning

TreeSchool is committed to supporting each child's growth through ongoing observation and developmentally appropriate assessment. We use a research-based assessment process to help teachers identify children's strengths, celebrate progress, and guide individualized learning experiences.

While the specific assessment tool may vary from year to year as we evaluate the best fit for our program, families can expect to receive information about their child's development at the beginning of the school year and again in the spring. Teachers also complete assessments throughout the year to monitor growth and inform instruction, ensuring each child is supported in reaching their full potential.

Requirements

Ages

TreeSchool is uniquely designed to meet the needs of children ages 3 - 5. To enroll, your child must meet the following age requirements:

- To enroll, your child must be three years of age by the first day of class for the school year and under the age of 6 by September 1st.
- As child care licensing requires, we will verify your child's age by birth certificate during the summer enrollment process. Any child not meeting the age requirements must be removed from the roster, and the registration fee will not be refunded.

Outdoor Environment

Our licensed outdoor classroom supports playful learning in a natural environment. The licensed space is designated by fencing. Any play and exploration outside this designated area will be considered a field trip requiring parent/caregiver approval at the start of the school year. We will review our safety and risk management procedures with families during an orientation, which is required before a child can participate in the program.

Toileting

Because of our unique environment, we require that children are toilet-trained (no pull-up diapers) by the start of class. We recognize that potty training is a developmental process typically taking up to three months with consistent support and encouragement. Please bear this in mind when considering the start date of the school year and how it fits with your toilet-training timeline.

We also recognize that children of differing abilities may toilet at different times in their development. We are committed to working with families of children with special needs who are not yet potty-trained to be as inclusive as possible. Let us know right away via email if your child needs adjustments, additional support, or accommodations.

Gear

TreeSchool is an entirely outdoor program, and children need to stay warm, dry, and comfortable for a positive learning experience. Please consider the following:

- **Weather-appropriate, durable clothing**: Ensure children are dressed for the conditions and can fully participate.
- **Layering**: Clothing must keep them warm and dry, including layers for rain or snow.
- **Avoid cotton**: Cotton doesn't wick moisture or insulate well, increasing hypothermia risk. We discourage cotton layers (except underwear) for most of the year.
- **Footwear**: Send children in comfortable, closed-toe shoes that support outdoor activity and walking on uneven surfaces.
- **Winter gear:** Please see our suggested gear list for colder months.

Physical Evaluation

Participation in the program requires a physical evaluation that notes any restrictions. A physician or the physician's designee must sign the evaluation per childcare licensing requirements.

Immunizations

TreeSchool requires that students are fully vaccinated, be in the process of completing immunizations, or have a signed Certificate of Exemption (religious or medical exemption) to attend the program by making an appointment with the Oakland County Health Department Nurse-On-Call: 800-848-5533. For more information, see the MDHHS Immunization Waiver Information website.

Wait Lists

TreeSchool does not keep multi-year wait lists. We ask that families submit a new application for each school year.

Preparation

What to Bring

- **Dress:** Students should arrive dressed comfortably and ready to participate.
- **Sunscreen / Bug Spray:** We ask that sunscreen and bug spray be applied to your child before/upon arrival. We will not apply these products to your child during the program.

- **Extra Clothes:** At the start of each season, please bring a full change of clothes and extra mittens (in colder seasons) for your child labeled with their first and last name (in the event they get really muddy, wet, or otherwise uncomfortably messy) to remain in the classroom inside their cubby.
- **Snack & Water Bottle (Labeled with first & last name):** Please label your child's snack bag and water bottle. See the *Snacks and Lunch* section for more information about food.
- **Daily Backpack (recommended):** Children may bring a daily backpack to help organize daily items.

Tree School staff, its governing body and Johnson Nature Center are not responsible for lost or damaged items. We ask that stuffed animals and other toys be left at home as these tend to be distracting and at risk of being lost or dirtied. Students should NOT bring any valuable items with them to class.

2026-2027 School Year Schedule

Location: *Johnson Nature Center*

Acorns: *Tuesday/Thursdays*

Option 1 Am Class Times: *9:00 a.m. - 12:00 p.m*

Option 2 Pm Class Times: *1:00 p.m. - 4:00 p.m*

Oaks: Monday/Wednesday/Thursday

TreeSchool reserves the right to revise policies, procedures, tuition, schedules, and program details as needed.

Families will be notified of any significant changes in writing.

Holiday and School Closings

To support staff well-being and provide families with a predictable schedule, the program observes designated holidays and planned school closures throughout the year.

Scheduled Closures

The program will be closed on designated holidays, professional development days (if applicable), and other scheduled closure dates outlined in the annual calendar.

Inclement Weather and Emergency Closures

In the event of severe weather, power outages, or other emergencies that make it unsafe to operate, the program may close or delay opening. Families will be notified as soon as possible through our usual communication channels. Please ensure your contact information is kept up to date.

Unplanned Closures

Occasionally, unexpected circumstances beyond our control may require the program to close. Every effort will be made to notify families promptly and provide updates regarding reopening.

Tuition During Closures

Tuition remains the same during scheduled holidays, school breaks, and emergency closures. Fees are not prorated. Fees are based on your child's enrollment space rather than attendance and help cover the ongoing operating costs of maintaining the program.

We appreciate your understanding and cooperation when closures are necessary. Our priority is always the health, safety, and well-being of the children, families, and staff in our care.

Field Trips to Bowers School Farm

One class each fall and spring will be held at Bowers School Farm as a field trip. Additional information will be shared separately as this date approaches. Drop-off and pick-up will occur at Bowers School Farm (1219 Square Lake Rd.) instead of Johnson Nature Center.

Daily Routine

Each season lends itself to new faces and discoveries to guide our play-based learning experiences together. We maintain a flexible schedule to create space for the interests and needs of the children in our program, yet with predictable routines to develop a sense of safety and community.

The following is an example daily schedule (sample schedule subject to change).

Arrival	Guardians will drop off at our outdoor classroom on the northeast side of our Visitor Center building.
Invitations to Play	Children are invited to engage with loose parts, explore sensory bins, perform science experiments, write or draw in their journals, play with

	the mud kitchen, build forts, and more. These options change with the seasons, our investigations, and the children's interests.
Morning Gathering Circle	Each day, children will come together to greet each other for a short Morning Gathering Circle, which may include singing a morning song, wishing others well, and reviewing the plan and expectations for the day.
Morning Care	Each class will work together to care for their environment, the animals, and the community through various stewardship actions.
Snack (15min)	Nut-free snack (based on classroom allergies)
Small Groups	Children gather in small groups of approximately six students to revisit, discuss, and expand on their current investigations. This intimate setting encourages meaningful conversations, hands-on exploration, collaborative problem-solving, and deeper learning as teachers guide children in following their curiosity.
Outdoor Exploration	In addition to discovery and exploration in the outdoors, this time includes: • Large and small muscle activity • Sensory exploration • Social interaction and dramatic play • Early math and science experiences • Creative experiences through art, music, and literature • Nature Hike
Wish You Well	Class will end with a gathering where we will share anyone we want to wish well to as well as any closing thoughts for the day.
Departure	Guardians will pick up at our outdoor classroom located to the northeast side of our Visitor Center building.

Policies & Procedures

Tuition

TREESCHOOL

2026-27 Classes

Schedule Information	
School Year:	September 10, 2026 to June 11, 2027
Class Times:	9:00 a.m. to 12:00 p.m (2 Day AM Tu/Th) 1:00 p.m. to 4:00 p.m. (2 Day PM Tu/Th) 9:00 a.m. to 12:00 p.m. (3 Day MWF) 1:00 p.m. to 4:00 p.m. (3 Day MWF)
Class Day Options:	Tuesday / Thursday 2 Day Class Monday Wednesday Friday 3 Day

Ages

- To enroll, your child must be three years of age by the first day of class for the school year but under the age of 6 by September 1st.
- As child care licensing requires, we will verify your child's age by birth certificate during the summer enrollment process. Any child not meeting the age requirements must be removed from the roster, and the registration fee will not be refunded.
- A complete list of required paperwork and documentation will be sent to you and is required before each child's first day of attendance.

Tuition

Sliding Scale Level	Annual Tuition Amount	Quarterly Payment Option
Acorns Tuesday / Thursday AM 9:00am - 12:00pm or PM 1:00pm - 4:00pm	$3,420	$855.00
Oaks Monday / Wednesday / Friday AM 9:00am - 12:00pm or PM 1:00pm - 4:00pm	$5,130	$1,282.50

*3% fee added for electronic payments.

Program Registration and Enrollment

Children are admitted to TreeSchool by registering during our registration period. Spots will be filled on a first-come basis class sizes can vary from 12-18 students per day, in accordance with state licensing standards. We are committed to maintaining our low 1:6 teacher-to-child ratio to ensure a high-quality learning environment. In order to preserve

this ratio and meet licensing requirements, we are unable to make exceptions to class size limits.

If you cannot secure a spot, you may opt to be added to the waitlist. In the case of cancellations, you will be notified via phone and email that you have cleared the waitlist and will have two business days to complete your registration, including payment, to secure your child's spot in class.

Program Withdrawal

We also understand that family needs and circumstances can change over time, and there may come a time when your child transitions out of our program. To support a smooth transition for your family and to allow us to plan for staffing and enrollment, we ask that families follow the withdrawal policy outlined below.

1. **Withdrawal During the School Year**
    - Families must provide written notice of withdrawal at least 30 days in advance.
    - Tuition for the following month is required in full, regardless of the withdrawal date.
2. **Refund Policy**
    - Registration fees and deposits are non-refundable.
    - Tuition paid in advance (beyond the next month's requirement) will be refunded only if written notice adheres to the timelines outlined above.

We appreciate your understanding and cooperation with this policy, as it allows us to effectively plan for staffing, materials, and the needs of our enrolled students.

Confidentiality

To be confidential means to be entrusted with someone's personal information and not share it with others. Staff must respect families, children's, and colleagues' privacy. All information and documentation necessary for enrollment will only be shared with the Lead Teacher, Program Director, and enrollment office to verify eligibility and state reporting. Documentation is stored outside the classroom in a locked location. Confidentiality also includes sharing other information regarding a child, including but not limited to all child/family information and records, private conversations with a parent, or developmental information. The Early Childhood Team may discuss confidential information with other staff only if they need to know the information to complete their job

responsibilities (e.g. to support substitute staff members). Employees should never discuss confidential information with anyone other than employees. No employee should remove confidential information unless approved by the Program Director.

Grievance

Johnson Nature Center strives to provide a positive, nurturing environment for all; however, at times, concerns may arise. If you have any concerns, please bring them to the attention of the Lead Teacher. The Program Director may be contacted if you need help resolving your concerns with the Lead Teacher. Johnson Nature Center will work with our families to reach a suitable resolution for all parties.

If you feel Johnson Nature Center violates a licensing regulation, you may report it to MiLEAP Child Care Licensing.

Arrival & Pick-Up

Caregivers will drop off and pick up students at the outdoor classroom on the northeast side of the Visitor Center building. Each parent/guardian must sign their child in and out daily with staff. The indoor classroom is open for families to get gear on before drop-off.

We want your children to be able to take advantage of every minute of their class time. Adhering to drop-off and pickup times is very important. There will be a late fee of $1.00 per minute enforced for every minute your child is not picked up after the 5-minute grace period.

We require you to notify staff of late arrivals and early departures due to required appointments.

Attendance & Absences

Consistent attendance is essential for children to fully benefit from the learning experiences and social development opportunities provided throughout the preschool year. Regular participation helps build a routine, fosters strong connections with peers and teachers, and supports continuous growth and progress. Families are expected to prioritize attendance, as extended absences, such as for vacations or other non-emergency reasons, disrupt the child's experience and the classroom dynamic.

Please inform the Lead Teacher (via email) if your child will be absent due to illness, vacation, or other personal reasons. Unfortunately, tuition refunds cannot be given due to absences.

Absences exceeding two consecutive weeks without prior approval may result in forfeiture of the child's spot in the program, and tuition for the subsequent two months must be paid in accordance with our Withdrawal Policy.

Snack

Families will be expected to provide a healthy snack. Please label all snack pouches.

TreeSchool staff will not be responsible for providing food.

Child care licensing requires that families label all lunch items, including your child's lunch bag and water bottle, with the child's first and last name.

Birthdays

If your child has a birthday on the day of a class, we plan to sing and honor your child with a special craft and/or activity. Please inform staff if their birthday falls on a class date during a session. We also ask that you refrain from bringing in food and/or treat bags. If you wish to bring treats in you must contact the Lead Teacher in advance to coordinate food allergies and other considerations.

Conflict Resolution

Children will have conflicts as they learn to navigate sharing, impulse control, delayed gratification, and social interactions with others. We aim to support them in developing empathy, compromise, self-advocacy, and independence skills. If a child is doing physical harm to themself or another, staff will use a calm voice and create space for everyone to be safe. When students are experiencing conflict or emotional upset, our team will engage in the following ways:

1. Approach a conflict with calm:

a. Bring yourself to eye level beside both students.

b. Use a calm voice and gently create physical space if needed.

c. Carefully gain control of any object that is part of the dispute or potentially harmful (i.e. stick, rock, tool).

2. Identify what you see, and ask about the children's feelings:

a. 'I see you are crying. Can you tell me how you feel?'

b. 'I see you hit Susie. Can you tell me what happened?'

3. Help children identify their needs in this situation and be able to express them:

a. ‘What do you need to make this feel better and get back to what you were doing?’

b. ‘What can you do to fix this and return to what you were doing?’

c. ‘I like how you stated what you need/how you feel.’

4. Support appropriate repair between children:

a. ‘Can we agree to … play safe, respect personal space, use kind words, take a break when upset, etc.?’

b. Apologies, high five, and a hug if each feels safe

Discipline

Our staff will encourage and recognize prosocial behaviors. Patience and understanding are our primary goals with a student who may be struggling. Our TreeSchool program embraces the principles of *Conscious Discipline* throughout our daily routines and classroom structures, including:

- Supporting co-regulation skills for impulse control.
- Creating a community with a sense of belonging for all to foster cooperation and willingness.
- Modeling, teaching, and scaffolding for social skill building and executive function skills.

The following are guidelines our staff will follow to support a student who is making undesired choices and to help them make more positive choices:

1. Establish a relationship/connection with the child: notice, acknowledge, and name what you see, reflect with empathy, offer the option to have a calm break and then restart;

(‘You are upset. You wanted to sit there. Do you need a few minutes to feel better?’)

2. Approach the behavior with positive intent and without judgment;

('You wanted to sit there, so you pushed her out of the way.)

3. Identify the missing skill and set the limit;

('You wanted to sit there, so you pushed her out of the way. You

didn't use your words to ask her to move. You may not push others.

It is hurtful.)

4. Teach the new skill and offer encouragement;

('You wanted to sit there, so you pushed her out of the way. You

didn't use your words to ask her to move. You may not push others. It is hurtful. When you want to sit where someone else is, say, *Can I sit there or next to you*? Let's practice that. You did it!')

If a student has ongoing or increasing difficulties after several interventions and is not responding to positive behavior supports, the teacher will talk with the team and parents to problem-solve together. Parents will be notified of ongoing interventions and progress on reshaping the behavior.

Corporal punishment and exclusion shall not be used as a means of discipline.

Family Engagement & Communication

We have several ways of disseminating information to our families. We want families to take full advantage of our various forms of communication. Below you will find information on our many ways of keeping you informed.

Orientations

We will host an opportunity for families and their preschoolers to interact with our instructional team and get to know the site before the first day of class. There will be two separate orientation sessions:

- Family Orientation: A tour of the space with parents **and** children with opportunities to learn about program details such as daily routines, risk and safety, and learning experiences.
- Parent Orientation: Staff will help parents finalize their enrollment set-up and complete checks of all required documents.

Additional details about orientation will be shared during the summer.

Blog post

A weekly private class blog will be used to share weekly updates, essential documents, classroom pictures, and more. Each week, you will receive an update from your classroom teacher, where they will share classroom happenings, reminders, and information regarding upcoming classroom events.

Email List

Please ensure that your email address is current and kept up to date. Email is our primary form of formal communication and is used to share important information, including program updates, newsletters, invoices, policy changes, emergency notifications, and other time-sensitive announcements. It is the responsibility of families to regularly check their email and notify the office promptly of any changes to their contact information.

Remind

Remind is a communication tool that enables staff to connect with families in an automated and real-time manner. *Remind* uses email, text, push notifications, and telephone calls to communicate with families quickly and safely.

Teachers will use *Remind* for short school updates ("Indoor drop off today," "Closed due to snow"), including those related to emergencies.

Access to communication platforms will be shared via email following enrollment.

Conferences

We will provide optional or suggested 20-minute time slots for families to meet with the Lead Teacher in December and May to discuss their child's growth.

Celebration of Learning

At the end of the school year, families are invited to our **Celebration of Learning**. This special event provides an opportunity to celebrate each child's growth and accomplishments throughout the year. Families will be invited to explore our Wonder Wall,

participate in hands-on experiences within our learning spaces, and reflect on their child's learning journey. Children will also take home special keepsakes from the season, including their individual learning journal.

Other Opportunities

When coordinated with teachers, parents/guardians may accompany their child on a special activity, such as a classroom celebration or field trip. The Lead Teacher can also arrange opportunities for you to observe your child's learning.

Media Release Policy

Throughout the school year, we may take photographs and videos of children participating in classroom activities, special events, celebrations, and learning experiences. These images help document children's learning, celebrate their accomplishments, and showcase the meaningful experiences within our program.

At the time of enrollment, families will be asked to complete a Media Release Consent Form. Parents/guardians may choose to:

- Grant permission for their child's image or likeness to be used.
- Decline permission for their child's image or likeness to be used.

Your decision will be respected and documented in your child's file. Families may update or change their media consent at any time by providing written notice to the Director.

Children whose families have not provided media consent will not be identified in photographs or videos used for promotional or public purposes. Staff will make every reasonable effort to ensure these children are not included in published media.

Media may be used for purposes such as:

- Classroom documentation and displays
- Learning journals and portfolios
- Program newsletters
- The preschool website and social media pages
- Promotional and marketing materials
- Community presentations or publications

Protecting the privacy and dignity of every child is a priority. All photographs and videos are used responsibly and in accordance with the permissions provided by each family.

Health and Wellbeing

Consistent Caregivers

To the best of our ability, we will maintain the same Early Childhood Team Members throughout the school year. Consistency will help to build relationships and a strong learning community.

Group Size

We highly value the importance of relationships to build a strong learning community and maintain a low teacher-to-student ratio (1 teacher for every 6 children) to provide safety, deep connections, and personalized learning in an outdoor learning environment.

Restrooms

We will use the restrooms at the Visitor Center, which is approximately a 15-20 minute walk from the farthest points of the trails.

Scheduled restroom breaks will be weaved into the daily schedule. Students needing to use the restroom between breaks will promptly return to the Visitor Center with a licensed staff member.

Parents and caregivers are asked to take their child to the bathroom at the Nature Center upon arrival before dropping off their child for the day.

Handwashing

The Visitor Center restrooms and classroom sinks will be used for handwashing purposes. Additionally, staff will carry hand sanitizer and wipes for use on trails when full hand washing is unnecessary.

Staff and students will wash their hands every time they transition into the indoor classroom, before meals, after toileting, after handling bodily fluids, after handling garbage, after handling animals, and when soiled with a material that poses a health risk.

This procedure will be followed when a staff member or student washes their hands.

1. Use soap and running water.

2. Rub hands vigorously.

3. Wash all surfaces, including:

- back of hands

- wrists
- between fingers
- under fingernails

4. Rinse well.

5. Dry hands with a paper towel.

6. Turn off the water using a paper towel instead of bare hands.

Illness & Exclusion Policy

Many illnesses do not require exclusion, but if a person is uncomfortable in the learning environment and the site supervisor feels it is appropriate, the parent/guardian will be called. Children, volunteers, and staff who have been ill must be symptom-free from the below symptoms for at least one full school day before returning to school.

Anyone with the following symptoms or illnesses should be sent home or remain home in the following situations:

1. Severely ill: A person who is lethargic or less responsive, has difficulty breathing, or has a rapidly spreading rash.
2. Fever: A person with a temperature of 101°F or greater AND behavior changes or other signs or symptoms (e.g., sore throat, rash, vomiting, or diarrhea). The person should not return until 24 hours of no fever without the use of fever-reducing medications. Note: If there is influenza-like or COVID-19-like activity in the school or the community, criteria would also include a temperature over 100.4°F and respiratory symptoms (e.g., cough, sore throat).
3. Diarrhea: A person has two loose or watery stools. The person should have no loose stools for 24 hours before returning to school. Exception: A healthcare provider has determined it is not infectious. Antibiotics or new foods may cause diarrhea a person has eaten. Discuss with a parent/guardian to determine if this is the likely cause for students. Please refer to the chart below for exclusions and required clearance criteria for students with diarrhea caused by Campylobacter, E. coli, Salmonella, or Shigella.
4. Vomiting: A person who has vomited two or more times. The person should have no vomiting episodes for 24 hours before returning. Exception: A healthcare provider has determined it is not infectious.

5. Abdominal pain: A person with abdominal pain that continues for more than two hours or intermittent pain associated with fever or other symptoms.
6. Rash: A person with a rash AND has a fever or a change in behavior. Exclude until the rash subsides or until a healthcare provider has determined it is not infectious. Please refer to the chart below for exclusions and required clearance criteria for students with a diagnosed rash. Note: Rapidly spreading bruising or small blood spots under the skin need immediate medical attention.
7. Skin sores: A person with weeping sores on an exposed area that cannot be covered with a waterproof dressing.
8. Certain communicable diseases: children, staff, and volunteers diagnosed with certain communicable diseases, including COVID-19, may have to be excluded for a certain period of time. See the chart below for disease-specific exclusion periods.

Procedures for sending ill children home and for staff/volunteers:

1. Children who become ill while in our care will have their parents or emergency contact person notified for immediate pick-up.
2. The Site Supervisor must be notified when a parent is called due to an illness, whether the child is picked up from school or not.
3. Staff will isolate the sick child, particularly those with symptoms of respiratory illness or gastrointestinal distress, from well staff, volunteers, and other children. Isolation can occur in the adjacent classroom or other educational space away from those who are well.
4. Staff will not leave a child unsupervised and will use appropriate PPE to protect themselves from illness. If not already wearing a face mask, a surgical or cloth mask should be provided to anyone with respiratory symptoms and fever over 100.4^{0}F if available and tolerated by the person and developmentally appropriate.
5. Sick staff will leave as soon as possible with administrative support.

Areas used by the sick person need to be closed off. Open the windows to increase circulation and wait 24 hours OR as long as possible before cleaning and disinfecting the space. This includes informing Physical Plant Services so they can contact the cleaning service. Classroom equipment (including toys) will be cleaned and sanitized after illness occurs within the classroom.

If your child has a chronic health illness (i.e. food allergy, seizures, asthma, diabetes), families must complete an individual action plan. The child's physician and the family must sign this action plan. All staff will review these plans each year and keep them on file in their assigned classroom and main office. If medication is needed, additional documentation is required.

Visit the *American Academy of Pediatrics*

webpages for additional guidance.

Allergies

If your child has an allergy to food or another substance, please let us know so we can be aware and watchful. If your child's allergy requires emergency medication (e.g. EpiPen, Antihistamines) you must complete a *Medication Information and Instructions Form* to be provided in the registration packet, along with the *FARE Form*. For your child's safety, all forms and medication must be submitted before your child's start date.

Medications

Medication will be administered provided we have written authorization on file. The medication must be sent in its original container only, including the physician's name, child's name, instructions, name, and medication dosing.

To administer prescription medication, a form must be completed by the child's physician and the legal guardian. It may be helpful to bring medication forms with you when visiting your child's physician to avoid delays in administering medication.

Non-prescription medication must have a form completed by the child's legal guardian. Additionally, non-prescription medications must follow the age and dosage directions.

It is important to inform your child's teacher whenever they are on medication or under a doctor's care. Certain medication and medical issues can affect their mood and/or appetite.

Outdoor Preparedness

TreeSchool operates rain or shine! Please send students appropriately dressed for the weather, including additional layers, boots, hats, etc., for changing conditions. See the section on “Gear.” This includes applying sunscreen and bug spray as needed. Staff members are unable to apply sunscreen and bug spray to students. In the case of inclement weather, the class will be moved inside the Visitor Center.

Ticks

We ask that you do a tick check every day in the warmer seasons (bath time is the perfect time). Ticks like to hide near waistbands but could be found anywhere. We are a nature immersion program, so there is a chance of picking up a tick during exploration. If you find a tick on your child, remove it (head and all) using a tool such as the Tick Twister. Place the tick in a Ziploc bag, date it, and place it in your freezer. If you have any questions about a tick-borne illness, you can have the tick tested.

Emergency

Tornado

In case of a tornado, students will not be sent home. Children will be taken to the Visitor Center until we have been notified that the danger has passed. Tornado drills are practiced monthly during tornado season. Please see the posting in your child's class and note the nearest emergency station.

Fire

In case of fire, an alarm will sound. Children will exit the building with their teacher at the nearest safe, designated emergency exit. The Program Director will do a final search of the building before joining staff and children outside. We will utilize *Remind* to notify parents to pick up their children. Fire drills are practiced monthly. Please see the posting in your child's classroom and note the nearest emergency exit.

Severe Weather

In case of severe weather, the Program Director and/or Lead Teacher will announce severe weather conditions to the teachers. All staff/students who are outside will immediately return to their classrooms. Classroom activities shall continue as usual. Children will not be dismissed during a severe weather warming unless they are picked up by their parent/guardian by checking out through the school office before departure.

Emergency Closing

The decision to close school is typically made before 5:45 a.m.; however, in case of rapidly changing weather conditions, the decision could be made as late as 6:45 a.m. Families are notified via email and *Remind*. Please keep the phone number and email you wish to receive notifications up-to-date.

Extreme Conditions

In the case of extreme conditions, including high winds, heavy precipitation, or temperatures, the class will be moved indoors according to risk management protocols. Staff use a combination of the NOAA Wind Chill Chart, Beaufort Wind Scale, weather forecast apps, and the children's age, comfort level, and dress to determine whether to hold class indoors or outdoors. If the class is moved indoors, children continue with nature-based activities within the indoor spaces, including the licensed classroom, interpretive floor, and log cabin.

Injury

If the injury is minor, staff members will conduct the following steps:

- Attend to the injury with basic first aid as trained.
- Contact family to notify them of the incident and care taken.
- Complete an incident report by the end of the school day in concert with the Lead Teacher and/or Program Director for submission to the reporting agency.

In case of serious injury, staff members will take the following steps:

- Immediately call 911. The staff member will remain with the injured person while EMS takes over care.
- The parent(s)/guardian(s) will be contacted by phone as soon as it is safely possible.
- The Program Director or staff member will accompany the injured party to the hospital if parents are not on site.
- Staff will submit incident reports within 72 hours in concert with the Program Director to reporting agencies.

All staff members are certified in Adult & Pediatric CPR/AED/First Aid. Visit the BHS *Safety & Security* webpage for additional information.

Other Disasters/Emergencies

In case of a power outage/water main break or flood, the BHS Facilities will be contacted to assess the situation. Facilities will contact the appropriate services (DTE/Consumer Powers) to help make decisions to maintain safety. Should it become necessary for children to be released early or the program cancelled, parents will be contacted via *Remind*.

Evacuation

Should an evacuation of the building become necessary, we will evacuate to Bloomfield Hills High School. Children and staff will either be bused or walk and use wagons for children who need support to transport themselves to the site. Once we have arrived and the situation is under control, families will be contacted using email or *Remind*. Staff will

work with families to develop a plan of action for students with special needs and/or a chronic health condition before the child starts the program (e.g. buses equipped to support a child requiring mobility supports). The relocation address is as follows:

Bloomfield Hills High School

4200 Andover Road

Bloomfield Twp., MI 48302

Lockdown Procedures

The safety and well-being of our children and staff is our highest priority. In the event of a lockdown, all established emergency procedures will be followed immediately in accordance with our emergency preparedness plan.

During a lockdown:

- The preschool will be secured, and all children and staff will remain in designated safe locations until authorities determine it is safe to resume normal operations.
- **Children will not be released to parents, guardians, or other authorized individuals during an active lockdown**, regardless of the circumstances. This policy is in place to ensure the safety of everyone in the building and to avoid disrupting emergency response efforts.
- Families will be notified as soon as it is safe and appropriate to do so. Updates will be shared through our established communication channels whenever possible.
- Once the lockdown has been lifted by emergency officials, families will receive instructions regarding reunification and child pick-up procedures.

We appreciate your understanding and cooperation. Following these procedures helps ensure the safest possible outcome for all children, families, and staff during an emergency.

Staff and Center License Requirements

Licensing Notebook Policy

A notebook containing licensing and registration inspections, renewal inspections, special investigations, and corrective action plans for the last years is available in the main office.

Our office hours are Monday-Friday from 8 am-4 pm. Licensing inspections and special inspections not included in the binder are available on the MiLEAP Child Care Licensing website at: www.michigan.gov/michildcare

Staffing Requirements

TreeSchool staff requirements are as follows:

- Comprehensive Child Care Background Check
- PSOR Screening
- CPR/First Aid/AED Certified
- Michigan Health and Safety Training for Licensed Child Care Providers
- A signed *Abuse Neglect Statement* indicating the individual is
    - aware of the abuse and neglect of children is against the law
    - informed of the center's policies on child abuse and neglect
    - required by law to immediately report suspected abuse and neglect to children's protective services.
- Complete Forest School Training within the first 6months of hire date

Additionally, lead staff are ALICE-trained and receive risk management and safety training in an outdoor learning environment.

Additional Staff and Volunteer Policy

Staff and volunteers shall not be present in the center if they have been convicted of any of the following:

- Child abuse or child neglect.
- A felony involving harm or threatened harm to an individual within the 10 years immediately preceding the hire date.

All volunteers at TreeSchool will be supervised at all times and required to have completed the following:

- Public Sex Offender Registry (PSOR) completed check
- Abuse Neglect Statement indicating the individual is:
    - aware of the abuse and neglect of children are against the law.

- informed of the center's policies on child abuse and neglect.
- required by law to immediately report suspected abuse and neglect to Children's Protective Services

Documentation will be kept on file. Volunteers must also apply through the Johnson Nature Center website.

TreeSchool will not have volunteers who are unsupervised with children.

Child Protection Policy

Our staff is required by law to take the following steps if they suspect child abuse or child neglect.

- The Program Director must be notified of the suspicion, and an oral and written report MUST be filed within the required time.
- The immediate verbal report must be made to Centralized Intake by calling (855) 444-3911. The verbal report must be followed by a written report. The written report must be submitted within 72 hours. DHHS encourages the use of the Report of Suspected or Actual Child Abuse or Neglect (DHS-3200) form, which includes all the information required by the law. The written report may be faxed to (616) 977-1154 or (616) 977-1158 or emailed to DHS-CPS-CIGroup@michigan.gov.

STATE OF MICHIGAN
DEPARTMENT OF NATURAL RESOURCES
LANSING

GRETCHEN WHITMER
GOVERNOR

M. SCOTT BOWEN
DIRECTOR

April 30, 2025

Carsenault@bloomfield.org

Dear Cass Arsenault,

This authorization letter is your official Threatened and Endangered Species Permit **(TE 322).** Your permit is issued in the *Education* category only. Your permit expires on **March 31, 2028**. If you decide to seek a renewal, we recommend you visit our website in December of 2027 and fill out the permit renewal application.

Authorization:
To conduct the activities listed under special conditions that may take the threatened/endangered species listed below. All activities are subject to the standard permit conditions within this letter unless noted elsewhere in the letter.

Special Conditions
In addition to the standard permit conditions listed below:

- This permit is issued under a ***Scientific, Zoological or Educational*** justification.
- This permit authorizes possession of one (1) **Peregrine Falcon** *(Falco peregrinus)* for the rest of its natural life for educational programming at **Johnson Nature Center in Bloomfield, Michigan**.
- All animals held under this permit must be acquired legally and kept under humane conditions.
- This permit does not allow release or translocation of state threatened or endangered species.
- This permit does not allow collection of state threatened or endangered species from the wild from anywhere in Michigan.
- This permit does not authorize breeding threatened or endangered species.
- Permittee must follow all conservation measures outlined in application materials, including the Threatened/Endangered Species Application and Permit, description of facilities and handling procedures for animal(s), and any other materials submitted for DNR review in support of this permit.
- The Permittee has provided the following description of facilities and handling procedures:
    - Facility is a 6x3.8x3 m enclosure with multiple feeding platforms, various stumps and boulders; additional details submitted with application.
    - Limited handling related to feeding and care.
- Permittee must apply for an amendment via our website in order to add additional threatened and endangered species to this permit.
- Additional permits may be required for eagles and other migratory bird species. Contact the U.S. Fish and Wildlife Service for more information.
- Authorized Sub-Permittees: none and those under the direction of the Permittee. To add additional Sub-Permittees, Permittee must 1) attach a signed letter to this permit detailing the names, relationship with Permittee, and duration of authorization for Sub-Permittees and 2) notify DNR-StateTEPermit@michigan.gov of additional Sub-Permittees. Applying for an amendment is not required to add Sub-Permittees and an updated letter will not be issued. All Sub-Permittees must follow the permit. To

qualify as Sub-Permittees, individuals must be in good standing with the Threatened and Endangered Species permit program and may not have a natural resource conviction in the past 5 years. Sub-Permittees may operate without direct supervision of the Permittee. However, Permittee is responsible for training Sub-Permittees, reporting, and compliance with the permit.

Standard Permit Conditions

- Permittee must maintain current contact information on record with the DNR Threatened and Endangered Species Program. At minimum, an email address and phone number must be provided. Changes to emails and phone numbers must be reported to the DNR within 30 days by requesting an amendment through our website. The DNR must be able to contact Permittee within 30 days regarding any policy changes or requests for information regarding the permit.
- Additional permits may be required for projects occurring on DNR-owned land. Please make sure to contact the local land manager before entering your proposed study area. You may apply for a land use permit here: Cultural/Scientific Research Permits (michigan.gov).
- All specimens authorized for collection under this permit shall be deposited in the collection of an approved public educational or research institution prior to permit expiration.
- None of the specimens collected shall become part of a private collection or a private property.
- This permit does not allow or grant the right of trespass. Projects shall not take place on any private or public lands without permission from the owner or administrator of such lands.
- This permit does not provide authorization to circumvent any federal, state, or local laws and ordinances.
- Additionally, federal permits may be required for activities affecting federally listed threatened or endangered species and/or migratory birds. Contact the U.S. Fish and Wildlife Service at 2651 Coolidge Road, East Lansing, MI 48823.
- The activities covered under this permit are not transferable to another person unless specifically authorized.
- Unless otherwise noted, within 10 days of the expiration of this permit, the holder is required to file a report detailing the locations of any threatened and endangered species encountered and the number and disposition of specimens handled. Annual reports for multi-year permits are due at the end of each calendar year.
- A person conducting any activities authorized by this permit shall carry a copy of this permit and shall produce a copy of this permit upon request of a Department of Natural Resources employee or law enforcement officer.

Reporting Requirements

An annual report is required each year for the life of the permit. Annual reports must include the numbered elements below and be submitted to DNR-StateTEPermit@michigan.gov.

Annually:

1. Any new acquisitions of threatened or endangered species already listed on the permit.
2. Observations of any threatened or endangered species observed at the Nature Center. These may be submitted as digital data (excel, shapefile, csv) that includes reporter, date, species, GPS location OR data entered into MNFI's Rare Species Form

Final report at end of permitting cycle:

1. A report summarizing the status of the animals is required

Occurrence data obtained through reports is shared with the Michigan Natural Features Inventory to add to the state's Natural Heritage Database to inform future conservation efforts. Please report any new occurrences of threatened and endangered species as soon as possible instead of waiting until the end of the year. This will allow new data to be incorporated into the state's Natural Heritage Database sooner, thus ensuring greater protection for these species and their habitats.

Thank you for helping protect our threatened and endangered species. Feel free to contact me with any questions or concerns.

Sincerely,

Amy Bleisch, Endangered Species Biologist
Michigan Department of Natural Resources

RESTATED
BYLAWS
OF
FRIENDS OF THE JOHNSON NATURE CENTER

I
NAME, OFFICES, AND PURPOSES

1.1 NAME. The name of the corporation is Friends of the Johnson Nature Center ("Friends").

1.2 PLACES OF BUSINESS. The corporation shall have its principal place of business in Oakland County, Michigan, and may have such other places of business as the Board of Directors may from time to time determine.

1.3 PURPOSES. The purposes for which the corporation is organized are as follows:

1.3.1 To receive and administer funds and property and to operate exclusively for charitable, scientific, or educational purposes within the meaning of section 501(c)(3) of the Internal Revenue Code of 1986, as amended or the corresponding section of any future federal tax code (the "Code"), and in particular to provide educational programs for the members of the Friends and the community at large on land conservation and stewardship of the flora and fauna of the Nature Center and beyond, and the importance of the Rouge River drainage system of which the Nature Center is a part.

1.3.2 To acquire, own, dispose of and deal with real and personal property and to apply gifts, grants, and bequests and their proceeds to further such purposes.

1.3.3 To do all such things and to perform all such acts to accomplish its purposes as the Members and Board of Directors may determine to be appropriate and as are not forbidden by section 501(c)(3) of the Code, with all the power conferred on nonprofit corporations under the laws of the State of Michigan.

1.4 NONPROFIT OPERATION. The corporation shall be operated exclusively for charitable, scientific, or educational purposes within the meaning of section 501(c)(3) of the Code as a nonprofit corporation. No director of the corporation shall have any title to or interest in the corporate property or earnings in the director's individual or private capacity, and no part of the net earnings of the corporation shall inure to the benefit of any trustee, director, officer or private individual. No substantial part of the activities of the corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation, and the corporation shall not participate in or intervene in any political campaign on behalf of (or in opposition to) any candidate for public office.

1.5 FISCAL YEAR. The fiscal year of the corporation shall begin July 1 and end June 30.

II
MEMBERS

2.1 MEMBERSHIP BASIS. The corporation is organized on a nonstock, membership basis under the Michigan Nonprofit Corporation Act of 1982, as amended (the "Act").

2.2 QUALIFICATIONS FOR MEMBERSHIP. Membership shall be open to all individuals who express sincere interest in the Friends and its objectives. Members join by payment of annual dues. The Board of Directors, by a majority vote, may revise annual dues and categories of membership as needed. All annual memberships shall be in effect for twelve months. Lifetime memberships shall be in effect for the duration of Friends. Honorary memberships may be granted by vote of the membership at a general meeting upon recommendation of the Board of Directors. Honorary members have all the privileges of general membership.

2.3 REMOVAL OF MEMBERS. Members may be removed by affirmative vote of a majority of the Members.

2.4 ANNUAL MEETING. Unless the Members shall otherwise determine, the annual meeting of the Members shall be held on a date to be determined by the Board of Directors each year. At the annual meeting, the Members shall elect directors and shall consider such other business as may properly be brought before the meeting. If less than a quorum of the Members appears for an annual meeting of the Members, the holding of such annual meeting shall not be required and matters which might have been taken up at the annual meeting may be taken up at any later regular, special, or annual meeting or by consent resolution.

2.5 REGULAR AND SPECIAL MEETINGS. Regular meetings of the Members may be held at such times and places as the Members may from time to time determine at a prior meeting or as shall be directed or approved by the vote or written consent of all the Members. Special meetings of the Members may be called by the President and shall be called by the Secretary upon the written request of a majority of the Members.

2.6 NOTICE OF MEETINGS OF THE MEMBERS. Notice of the time and place of all meetings of the Members shall be given to each Member at least ten days and not more than sixty days before the date of the meeting, either personally, by mailing such notice to each Member at the address designated by the Member for such purposes or, if none is designated, at the Member's last known address, or by electronic transmission. Notices of special meetings shall state the purpose or purposes of the meeting, and no business may be conducted at a special meeting except the business specified in the notice of the meeting.

2.7 WAIVER OF NOTICE. Whenever notice of any Members meeting is required, a written waiver of notice signed by a Member, whether before, at, or after the time of such meeting, shall be deemed equivalent to notice to such Member. Attendance of a Member at any

meeting shall constitute a waiver by the Member of notice of such meeting, except when the Member attends such meeting for the express purpose of objecting, at the beginning of the meeting, to the transaction of any business because such meeting is not lawfully called or convened. Neither the business to be transacted at nor the purpose of any meeting need be specified in any written waiver of notice.

2.8 ORGANIZATION. The President shall act as chairman and preside at all Members meetings. In the absence of the President, the Members present may designate an alternate chairman for any Members meeting. The Secretary of the corporation shall act as secretary at all Members meetings, but in the Secretary's absence the chairman of the meeting may appoint any person present to act as secretary of the meeting.

2.9 ORDER OF BUSINESS. The order of business at all Members meetings shall be as determined by the chairman of the meeting or as is otherwise determined by the Members.

2.10 QUORUM AND VOTING REQUIREMENTS. Members present at a meeting for which notice was provided in accordance with Section 2.6 above constitutes a quorum for the transaction of business. The vote of a majority of the Members present at any meeting at which there is a quorum shall be the act of the Members, except as a larger vote may be required by the laws of the State of Michigan, these bylaws or the Articles of Incorporation.

2.11 ACTION BY WRITTEN CONSENT. Any action required or permitted to be taken pursuant to authorization voted at a Members meeting may be taken without a meeting if, before, at the time of, or after the action, the Members consent to the action in writing. The written consents shall be filed with the minutes of the proceedings and shall have the same effect as a vote for all purposes.

2.12 PARTICIPATION IN MEETING BY REMOTE COMMUNICATIONS EQUIPMENT. A Member may participate in a meeting by conference telephone or by other means of remote communication (including an Internet chat room or web conference) through which all persons participating in the meeting may communicate with the other participants. All participants shall be advised of the means of remote communication and the names of the participants in the meeting shall be divulged to all participants. Participation in a meeting in this manner constitutes presence in person at the meeting.

2.13 METHODS FOR GIVING NOTICES AND CONSENTS. Unless otherwise provided in these bylaws or the Act, any notice or consent required or permitted may be given in writing or by electronic transmission. An electronic transmission, as defined in the Act, includes without limitation an email, voicemail, or facsimile.

III
BOARD OF DIRECTORS

3.1 BOARD OF DIRECTORS. The Board of Directors is the governing body of the corporation.

3.2 POWERS OF THE BOARD OF DIRECTORS. The Board of Directors shall have charge, control and management of the business, property, personnel, affairs and funds of the corporation, including the adoption of an annual budget, and shall have the power and authority to do and perform all acts and functions permitted for an organization described in section 501(c)(3) of the Code not inconsistent with these bylaws, the Articles of Incorporation, or the laws of the State of Michigan. The Board of Directors shall meet as often as necessary to conduct the business of the corporation, but at least annually.

3.3 NUMBER OF DIRECTORS. The Board of Directors shall consist of not less than three and not more than fifteen persons, as determined from time to time by the Members.

3.4 TERM AND SELECTION OF DIRECTORS. The Board of Directors shall consist of the Officers of the Friends, the manager of the E.L. Johnson Nature Center and other individuals elected and qualified in accordance with these bylaws. Directors shall be elected to one-year terms by the affirmative vote of the Members at their Annual Meeting, and vacancies shall be filled in the manner specified in section 3.8 below. Directors' terms shall commence at the conclusion of the Annual Meeting at which they are elected and shall expire at the conclusion of the Annual Meeting at which their successors are elected. There is no limit on the number of consecutive terms that a Director may serve.

3.5 ELIGIBILITY OF DIRECTORS. No person shall be eligible to be a Director who has been convicted of a criminal offense incident to the application for, or performance of, a State, public or private contract or subcontract or grant; convicted of a criminal offense, including any of the following: embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, attempting to influence a public employee to breach ethical conduct standards; convicted under State or federal antitrust statutes; or convicted of any other criminal offense which reflects upon that Director's business integrity. The election of any such person as a Director shall be deemed to be void.

3.6 RESIGNATION. A Director may resign by giving notice to the Secretary of the corporation, which notice shall be immediately forwarded to the Members and to the Board of Directors. Unless otherwise specified in the resignation, the resignation shall take effect upon receipt by the Secretary, and the acceptance of the resignation shall not be necessary to make it effective.

3.7 REMOVAL. Any director may be removed from office with or without cause at any annual or special meeting of the Members by the affirmative vote of two-thirds of the Members.

3.8 VACANCIES. Vacancies occurring in the Board of Directors by reason of death, resignation, removal or other inability to serve shall be filled by the affirmative vote of the Members. A director elected to fill a vacancy shall serve for the unexpired portion of the term of the replaced director.

3.9 ANNUAL MEETING. The annual meeting of the Board of Directors shall be held on a date to be determined by the Board from time to time. At the annual meeting, the Board of Directors shall elect officers and consider such other business as may properly be

brought before the meeting. If less than a quorum of the directors appears for an annual meeting of the Board of Directors, the holding of such annual meeting shall not be required and matters which might have been taken up at the annual meeting may be taken up at any later regular, special, or annual meeting or by consent resolution. Notice shall be given to the directors at least ten (10) but not more than sixty (60) days prior to an annual meeting of the Board of Directors.

3.10 REGULAR MEETINGS. Regular meetings of the Board of Directors may be held at such times and places as the directors may from time to time determine at a prior meeting or as shall be directed or approved by the vote or consent of all the directors. No notice is required for a regular meeting of the Board of Directors.

3.11 SPECIAL MEETINGS. Special meetings of the Board shall be called by the Secretary upon the written request of the President or any two directors. Special meetings of the Board of Directors shall be held pursuant to notice of the time, place and purpose thereof either delivered personally or sent by telephone, telegraph, mail or electronic means (including by email, voice mail or facsimile) to each director not less than twenty-four (24) hours prior to the meeting and if by telephone, telegraph, or electronic means, confirmed in writing before or after the meeting.

3.12 ACTION WITHOUT A MEETING. Any action required or permitted to be taken at any meeting of the Board of Directors or a committee thereof may be taken without a meeting, without prior notice, and without a vote, if all of the directors or committee members entitled to vote thereon consent in writing or by electronic transmission. The consents shall be filed with the minutes of the proceedings and shall have the same effect as a vote for all purposes.

3.13 QUORUM AND VOTING REQUIREMENTS. One-third (1/3) of the directors then in office constitutes a quorum for the transaction of business. The vote of a majority of the directors present at any meeting at which there is a quorum shall be the act of the Board, except as a larger vote may be required by the laws of the State of Michigan, these bylaws, or the Articles of Incorporation.

3.14 PARTICIPATION IN MEETING BY REMOTE COMMUNICATIONS EQUIPMENT. A member of the Board or of a committee may participate in a meeting by conference telephone or by other means of remote communication (including an Internet chat room or web conference) through which all persons participating in the meeting may communicate with the other participants. All participants shall be advised of the means of remote communication and the names of the participants in the meeting shall be divulged to all participants. Participation in a meeting in this manner constitutes presence in person at the meeting.

3.15 METHODS FOR GIVING NOTICES AND CONSENTS. Unless otherwise provided in these bylaws or the Act, any notice or consent required or permitted may be given in writing or by electronic transmission. An electronic transmission, as defined in the Act, includes without limitation an email, voicemail, or facsimile. Notwithstanding the foregoing, no notice need be given to any person who submits a signed waiver of notice before or after a meeting, or who attends a meeting without objecting to any lack of notice at the beginning of the meeting.

3.16 COMPENSATION. Directors may receive reasonable compensation for their services on the Board of Directors. If the Board of Directors decides not to provide compensation to Directors, the corporation may still purchase insurance as provided in section 7.2, provide reasonable compensation to a director for services which are beyond the scope of the director's duties as a director, or reimburse any director for expenses actually and necessarily incurred in the performance of the director's duties as a director.

IV
OFFICERS

4.1 OFFICERS. The officers shall be a President, a Secretary, and a Treasurer, and if desired, a Vice President. There may also be such other officers as the Board of Directors deems appropriate.

4.2 ELECTION AND TERM OF OFFICE. All officers shall be elected for a term of one year (or until their successors have been elected) by the Board of Directors at its annual meeting. No person may execute, acknowledge or verify an instrument in more than one capacity if the instrument is required by law or by the Articles of Incorporation or these bylaws to be executed, acknowledged or verified by two or more officers. In case of the absence or disability of any officer of the corporation and of any person hereby authorized to act in his place during periods of absence or disability, the Board may, from time to time, delegate the powers and duties of such officer to any other officer, or any directors, or any other person whom it may elect or appoint.

4.3 ELIGIBILITY OF OFFICERS. No person shall be eligible to be an officer who has been convicted of a criminal offense incident to the application for, or performance of, a State, public or private contract or subcontract or grant; convicted of a criminal offense, including any of the following: embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, attempting to influence a public employee to breach ethical conduct standards; convicted under State or federal antitrust statutes; or convicted of any other criminal offense which reflects upon that Officer's business integrity. The election of any such person as an officer shall be deemed to be void.

4.4 RESIGNATION. An officer may resign by giving notice to the Board of Directors. Unless otherwise specified in the resignation, the resignation shall take effect upon receipt by the Board of Directors, and the acceptance of the resignation shall not be necessary to make it effective.

4.5 REMOVAL. Any officer may be removed with or without cause by the vote of a majority of the directors then in office at any regular or special meeting of the Board of Directors.

4.6 VACANCIES. In the event of the death, resignation, removal, or other inability to serve of any officer, the Board of Directors shall elect a successor who shall serve until the expiration of the normal term of such officer or until his or her successor shall be elected.

4.7 PRESIDENT. The President shall be the chief executive officer of the corporation, and, as such, under the direction of the Board of Directors shall have power, on behalf of the Board of Directors, to perform all acts, execute and deliver all documents, and take all steps that the President may deem necessary or desirable in order to effectuate the actions and policies of the Board.

4.8 VICE PRESIDENT. In the absence or disability of the President, the Vice President shall perform the duties and exercise the powers of the President and shall perform such other duties as the Board of Directors shall prescribe.

4.9 SECRETARY. The Secretary (or, in the Secretary's absence or incapacity, an Assistant Secretary) shall send or cause to be sent all required notices of meetings of the Board of Directors, shall receive and attend to all correspondence of the Board of Directors, shall have custody of all documents belonging to the corporation (except as otherwise provided in these bylaws) and of the corporate seal (if any), and shall perform such other duties as usually pertain to the office or as shall be determined from time to time by the Board of Directors.

4.10 TREASURER. The Treasurer (or, in the Treasurer's absence or incapacity, an Assistant Treasurer) shall have charge of the funds of the corporation, except for such funds as the Board of Directors may designate; shall see that an accounting system is maintained which will give a true and accurate accounting of the financial transactions of the corporation; and shall render reports from time to time as requested by the Board of Directors of his or her activities and the financial condition of the corporation. All funds received by the Treasurer shall immediately be deposited in a depository designated by the Board of Directors.

V
COMMITTEES

5.1 EXECUTIVE COMMITTEE. The Board may establish a standing Executive Committee of the Board of Directors. If established, the Executive Committee would have broad authority to direct day-to-day actions of the corporation, including the powers and subject to the limitations described below.

5.1.1 POWERS OF THE EXECUTIVE COMMITTEE. Between meetings of the Board of Directors, the Executive Committee may exercise all of the power and authority of the Board of Directors in the management of the business and affairs of the corporation. At each regular or special meeting of the Board of Directors, a member of the Executive Committee shall report on action, if any, taken by the Executive Committee between meetings of the Board of Directors.

5.1.2 DIRECTORS' LIMITATIONS ON THE EXECUTIVE COMMITTEE. Notwithstanding the provisions of section 5.1.1, the Executive Committee shall not:

a) amend the Articles of Incorporation;

b) agree to merge with another organization;

c) authorize the sale, lease, exchange, or donation of all or substantially all of the corporation's property and assets;

d) authorize a dissolution of the corporation or a revocation of a dissolution;

e) amend the bylaws of the corporation;

f) fill vacancies on the Board of Directors;

g) remove any person from the Board of Directors;

h) adopt, delete, change or make an exception to policies, including but not limited to investment policies;

i) approve the payment of compensation for any director serving on the Board of Directors or any committee; or

j) establish or abolish any standing Board committee;

k) reverse actions previously taken by the Board of Directors; or

l) approve the payment of compensation for any director serving on the Board of Directors or any committee.

5.1.3 COMPOSITION. The Executive Committee shall be composed of the Officers of the Friends.

5.2 OTHER COMMITTEES. The Board of Directors may establish such other standing or special committees from time to time as it shall deem appropriate and shall define the powers and responsibilities of such committees.

VI
CORPORATE DOCUMENT PROCEDURE

6.1 EXECUTION OF CORPORATE DOCUMENTS. A corporate document shall not be signed by any officer, designated agent, or attorney-in-fact unless authorized by the Board of Directors or these bylaws.

6.2 AUTHORITY TO EXECUTE DOCUMENTS. The Board of Directors may in any instance designate one or more officers, agents or employees to execute any contract, conveyance, mortgage or other instrument on behalf of the corporation, and such authority may be general or confined to specific transactions. The Board of Directors may also ratify any execution. When the execution of any instrument has been authorized without specifying the executing officers or agents, any of the President, the Secretary, or the Treasurer may execute such instrument on behalf of the corporation.

VII
INDEMNIFICATION

7.1 INDEMNIFICATION. Each person who is, was, or is threatened to be made a party to any threatened, pending, or completed action, suit, or proceeding of any sort, whether civil, criminal, administrative, or investigative, and whether formal or informal, by reason of the fact such person is or was a director, officer, or member of a committee of the corporation or that such person serves or has served at the request of the corporation as a director, officer, partner, employee or agent of any other corporation, partnership, joint venture, trust or other enterprise shall be indemnified by the corporation to the fullest extent permitted by the laws of the State of Michigan as they may be in effect from time to time. The corporation may, to the extent authorized from time to time by the Board, grant such rights to indemnification to any employee, non-director volunteer, or agent of the corporation to the fullest extent provided under the laws of the State of Michigan as they may be in effect from time to time.

7.2 INSURANCE. The corporation may purchase and maintain insurance on behalf of any person described in section 7.1 above against any liability asserted against and incurred by such person in any such capacity or arising out of his status as such, whether or not the corporation would have power to indemnify such person against such liability under the preceding section 7.1.

VIII
AMENDMENTS

8.1 AMENDMENTS. These bylaws may be amended at any meeting of the Members by the affirmative vote of a majority of the Members present at the meeting. No amendment inconsistent with the Articles of Incorporation shall be effective prior to amendment of the Articles of Incorporation.

Our Vision: We envision a place where all people experience a connectedness with nature in a healthy Michigan ecosystem, and are inspired to respectfully care for our planet.

Our Mission: Friends of the Johnson Nature Center supports the mission of Johnson Nature Center through ecological conservation, community outreach, volunteerism, and fundraising.

About Us: Friends of the Johnson Nature Center is a registered 501(c)(3) nonprofit organization. We are a volunteer-run working board. Directors are approved by our membership. As volunteers, we share the supportive efforts at the Johnson Nature Center and work together as a team to ensure we are aligned with our mission and goals. Our Board of Directors meet once a month, both in person and virtual.

Background Checks
All volunteers for Friends of the Johnson Nature Center must have a background check completed by the Johnson Nature Center. Background checks are annual and require a renewal by July 1st.
Please go to johnsonnaturecenter.org/volunteer for more info and to access the application.

Friends of the Johnson Nature Center (FOJNC) Board Requirements and Expectations

- Retain membership of the organization.
- Actively support and implement the vision and mission of the organization.
- Serve for a minimum of one year, up to the next annual meeting, or until a successor is elected.
- Chair or serve on a committee.
- Submit committee board reports for monthly board meetings.
- Attend 75% of board meetings.
- Recruit new board members, committee members, and help increase membership.
- Support and attend program initiatives.
- Exiting board members are responsible for finding their replacement on the Board.

Interested applicants can submit their bio to admin@friendsofjnc.org

Board of Directors

[Our bylaws]

President

The President serves as the chair of FOJNC, manages board meetings, keeps meeting agendas, and focuses on the overall well-being and sustainability of the board.

Responsibilities:

- Preside over board and executive meetings.
- Work with the Secretary to prepare the final agenda for board meetings.
- Prioritize issues for the board to address.
- Create policy, strategic plan and operational procedures with the board
- Ensure bylaws are kept up to date.
- Ensure job descriptions are updated as appropriate.
- Contribute to the newsletter as appropriate.
- Execute/approve any contracts authorized by the board
- Preside over the annual meeting and participate in the planning of the annual meeting, as needed.
- Provide orientation to new board members.
- Solicit annual committee meeting budgets for board review.

Vice President

The Vice President performs the function of the President when the President is unable to serve. In addition the Vice President is assigned to ad-hoc committees and oversees important functions.

Responsibilities:

- Participate in executive meetings when they are scheduled.
- Help to facilitate agenda in board meetings.
- Oversee yearly adjustments to goals and plans.
- Coordinate strategies for strengthening the FOJNC.
- Assist with committees and the work of the board
- Communicate with the President regularly for updates and insights in preparation for the upcoming term as President.

Secretary

The Secretary keeps full and accurate records of Board meetings, assists with correspondence within the board, and manages outgoing communications.

Responsibilities:

- Email board members meeting dates, times and locations of each meeting, updating with changes as necessary.
- Maintain contact information for board members.
- Draft and e-mail board minutes so that they can be read by everyone prior to the next meeting.
- Notify board members of committee reports and agenda requests for upcoming board meetings.
- Assemble committee reports for distribution to board members.
- Participate in executive meetings when they are scheduled.
- Maintain all board records in an accessible, electronic format.
- Prepare board-meeting agendas and distribute to board members in advance of meetings.

Treasurer

The Treasurer reviews and approves significant transactions authorized by the executive committee and board, confirms executive committee approval on all disbursements in excess of $500, and provides budget and financial reports for board review and approval as needed.

Responsibilities:

- Prepare and present monthly financial reporting at board meetings.
- Balance and reconcile membership dollars received.
- Provide financials for the annual report.
- Prepare and revise an annual budget with input from the board.
- Participate in executive meetings when scheduled.
- Deposit checks and reconcile bank deposit information.
- Ensure annual filing of federal 990 form. Ensure annual filing of State of MI forms.
- Send regular reports for board-packet mailing.
- Ensure verification of IRS 501(c)(3) status and use of the FOJNC name.
- Ensure preparation of annual income statement and balance sheet process.

Assistant Treasurer

The Assistant Treasurer will work with the Treasurer to ensure adequate oversight and reporting of financials of the organization.

Responsibilities:

- Manage FOJNC mailbox and ensure mail delivery to specific board members in a timely manner.
- Ensure in-kind and financial donations are documented.
- Ensure tax donation acknowledgement letters are sent to members and other contributors.
- Provide regular updates to the board as needed.

Events Director

The Event Director works closely with the executive board and stakeholders to help strengthen the FOJNC’s mission through community outreach and fundraising events.

Responsibilities:

- Recruit committee members.
- Develop an overall calendar for all events and communications pertaining to those events throughout the year.
- Work closely with the Fundraising Director and Recruitment Director.
- Make sure the President or Vice President, or other board representative, is available to speak at each event.
- Arrange for all necessary tools and props at functions; easels, PA system, posters, sign in sheets, board members to attend and greet.
- Work with fundraising committees to plan and execute fundraising events.
- Send updates to Communications Director for inclusion in the newsletter regarding important upcoming events.
- Send a regular report to the board for the board-packet mailing.

Membership Director

The Membership Director helps strengthen the visibility and build membership of the organization.

Responsibilities:

- Recruit committee members.
- Develop an annual recruitment strategy and implementation plan.
- Manage the recruitment process including developing recruiting strategy that includes increasing membership, outreach, and communication with membership.
- Develop an annual member-engagement plan.
- Develop a membership-feedback survey and present results with the board.
- Maintain membership distribution lists.
- Update the membership database of confirmed members past and present.
- Attend FOJNC events to recruit new members.
- Send regular reports for the board packet mailing.

Fundraising Director

The Fundraising Director will seek event sponsors, in-kind donations, and other donations for events, scholarships, and program needs.

Responsibilities:

- Recruit committee members.
- Develop an annual fundraising plan.
- Develop a sponsorship packet for events.
- Seek out and fill sponsorships.
- Recruit businesses to donate toward events, in-kind services, or program costs.
- Work with the Events Director, Treasurer, and executive board to identify and secure sponsorships.
- Send regular reports for the board packet mailing.

- Engage in prospective donor outreach and donor development.

Communications Director

The Communications Director develops and implements strategies to build FOJNC visibility and reputation as an environmental-charitable organization, among potential members and the community at large. Utilize common and efficient communication methods designed to reach targeted constituencies, including newsletters, the Johnson Nature Center website, press releases, and social media posts. Provide support, when needed, to Events Director, Fundraising Director, and Membership Director.

Responsibilities:

- Manage FOJNC social media posts and assist with advance publicity for events.
- Attend events to record or receive and post photos and videos from event attendees to social media
- Ensure consistent look and feel of documents including FOJNC logo for all communications.
- Build and manage a media contact list on the FOJNC spreadsheet.
- Develop and maintain key messages, talking points, and publicity strategies.
- Recommend/write news releases and other materials and distribute to the media as appropriate.
- Submit regular reports for board-meeting packets.

Director

Directors may sit on the FOJNC board without a specific title, however all are asked to actively participate in duties around the organization's mission and activities as needed. Some of these duties may involve, but are not limited to:

- Conservation leadership
- Volunteer coordination
- Special projects
- Participation on existing committees

Johnson Nature Center Sugar Bush Preservation Plan

Overview

Oakland County Parks staff performed a site visit at the Johnson Nature Center Sugar Shack in June of 2023 at the request of Johnson Nature Center Staff. The goal was to identify any degradation of the sugar bush as well as to offer insight for preserving the site for future use.

Current Site Condition

The sugar bush is roughly 1.8 acres of mature sugar maple. Overall condition of the trees is good, observed tap holes from prior sugar seasons have all compartmentalized well and majority a majority of the tree canopy appears healthy.

- Issues that could potentially lead to decline in available trees to tap:
    - Lack of breaks between tapping seasons
    - No plan for expansion of the site
    - Very few saplings to replace the mature trees

Current sugar bush area

Recommendations

1. **Inventory:** Perform an inventory of the trees in the Sugar Bush and develop a system to

monitor forest health and production over time. Recommended systems could be online in ArcGIS (free to CVTs through Oakland County) or manually with an excel spreadsheet and tree tags. Aluminum tree tags should be placed into the trees at shoulder height, a spreadsheet can keep data on tree tag # and any info that is specific to that tag (DBH, tap count, years tapped, sap yield, etc..) or ArcGIS can track the same data. This data will make it easy to plan yearly tap rotations. This will also help to give accurate data on total sap collected per tree throughout the sugaring season.

2. **Expand:** There is a small stand of tulip poplar that were planted in the 1980's just north of the sugar shack. Removing these trees would open an area nearby for planting sugar maple saplings for future use. Also, along Telegraph Road is a stand of invasive black locust trees. Mixed in this stand are multiple sugar maple saplings ranging in size from 1" diameter to 4". Removing the tulip poplar and locust, along with planting new sugar maple saplings would nearly double the size of the sugar bush. A follow up treatment (or treatments) with herbicide will be required after removing the black locust.

3. **Plant:** Sugar maples are very shade tolerant and planting now with the goal of expanding into the areas north of the sugar bush will give the saplings time to establish before the canopy is open. A cost-effective solution would be hand digging sugar maples from other areas of the property. Small trees can also be purchased from a landscape company but should be straight species (not cultivars) and watered after planting.

Cost Estimates

Task	Cost	Notes
Tree inventory	$500	Tree tags
Tulip poplar removal	$10,000	Removal
Black locust removal	$25,000	Removal and follow up herbicide treatments
Sugar maple planting	$5,000	Trees 200-300 each plus labor to install

Total	**$40,500**	

Tulip poplar location

Black locust location

Sugarbush Maintenance and Restoration Project
2024

Overview of Project

Sugar maples have been an important part of Michigan's history for millenia, as native people recognized the sweet sap and cherished the late winter harvest season. From this knowledge came generations of sugar makers that still today harvest and process maple sap, a tradition that can only be done in a small corner of the world.

Much of the southern lower peninsula of Michigan was once populated by beech and sugar maple trees that extended for miles. Nearly all of these forests are no more, having been removed for lumber, development or agriculture. To practice sugar making today in SE Michigan forests must be actively restored or grown from scratch as invasive species, soil degradation and loss of established trees have disrupted the natural cycle of forest regeneration.

At Johnson Nature Center, we are fortunate that those who came before us had the foresight to establish and maintain a sugarbush to share this important aspect of Michigan's heritage with our students and community. To continue this work in the future, we must continue battling invasive species, planting and protecting trees, and maintaining the sugar bush so that future generations will learn about this important aspect of Michigan's past and present.

Current Conditions
~1.8 acre of sugar bush
~160 sugar maples, 195 total taps

Oakland County Parks forester performed a site visit at the Johnson Nature Center Sugar Shack in June of 2023 at the request of Johnson Nature Center Staff.

Issues to address:

1. The current stand is 'single aged' meaning they were planted at the same time and will all die in a condensed time period, leaving few tappable maples (40+ years to establish).
2. High deer pressure prevents maples from reestablishing, as deer consume sugar maple seedlings.
3. Invasive species, primarily buckthorn and black locust, are encroaching on sugarbush, limiting natural sugarbush regeneration.

Action Needed

1. **Inventory:** Perform an inventory of the trees in the Sugar Bush and develop a system to monitor forest health and production over time. Recommended systems could be online in ArcGIS (free to CVTs through Oakland County) or manually with an Excel spreadsheet and tree tags. Aluminum tree tags should be placed into the trees at shoulder height, a spreadsheet can keep data on tree tag # and any info that is specific to that tag (DBH, tap count, years tapped, sap yield, etc..) or ArcGIS can track the same data. This data will make it easy to plan yearly tap rotations. This will also help to give accurate data on the total sap collected per tree throughout the sugaring season.

2. **Expand:** There is a small stand of tulip poplar that were planted in the 1980s just north of the sugar shack. Removing these trees would open an area nearby for planting sugar maple saplings for future use. Also, along Telegraph Road is a stand of invasive black locust trees. Mixed in this stand are multiple sugar maple saplings ranging in size from 1" diameter to 4". Removing the tulip poplar and locust, along with planting new sugar maple saplings would nearly double the size of the sugar bush. A follow-up treatment (or treatments) with herbicide will be required after removing the black locust.

3. **Plant:** Sugar maples are very shade tolerant, and planting now with the goal of expanding into the areas north of the sugar bush will give the saplings time to establish before the canopy is open. A cost-effective solution would be hand digging sugar maples from other areas of the property. Small trees can also be purchased from a landscape company but should be straight species (not cultivars) and watered after planting.

The goal was to identify any degradation of the sugar bush as well as to offer insight into preserving the site for future use. The total project is a four-year restoration project, allowing new trees to be established while maintaining the integrity of an old-growth stand. JNC 2024-2028 master plan roll-out schedules completion of this project in 2028. Total cost of $31,000

Action Points

- Review current practices
    - Frequency of sugar maple tapping
        - Yearly tapping to be maintained
        - Size of tree diameter to be tapped: 12”
            - Currently tapping 10” trees or more for one tap & 20” trees for two taps,
            - Changing to 12” & 24” trees with a spiral tapping placement pattern
    - Number of tappable trees: ~160

- Expansion of Sugabush for succession Planting
    - Step :1 Remove Invasive plant tree species north and east of current suagrbush: opens canopy.
        - Michigan Property Network Bid: $6,400
        - Remove Black Locust & Tulip Poplar
            - Contacted Patrick Caniff at CISMA and applied for CISMA grant 12/2023 Waiting on approval of grant
    - Transplant sugar maple saplings from the property
        - Student involvement:
            - Agricultural, Food and Natural Resources high school science class and Environmental Field Research Course
                - Contact Jessica Lynn and Levi Ryfiak to gauge interest in the program
            - Bloomfield Hills High School Environmental Club
                - Contact Current student vice president Fiona Rudy or staff sponsor Angela Bitterman-Wenson to gauge interest
        - Operations Team
            - Including high school intern(s) on a conservation careers pathway
    - Purchase sugar maple saplings
        - Quantity: 10 per year for the next 5 years (TBD based on funds) = 50 additional trees
        - 6-7’ balled trees
            - Cold Stream Farm = $21.65 / tree ⇒ $1,082.50
            - Porcupine Hollow Farm = $17.50 / tree ⇒ $875.00
            - Michigan Timber Shack (2”) = $299.00 / tree ⇒ $15,000
    - Planting of trees
        - Location: Northeast corner of sugarbush expansion site
        - Time of year: Spring & Fall 2024-2029
        - Who:
            - Bloomfield Hills High School Environmental Club
                - Contact Current vice president Fiona Rudy or sponsor Angela Bitterman-Wenson to gauge interest
            - Operations Team

- Agricultural, Food and Natural Resources (Time-dependent)
- Friends of the Nature Center
- High School National Honor Society?
    - Sponsor is Krista Laliberte

Project Funding and Cost

- Donations
    - Private Donors: RC Laugal/ Olsen Family
        - Total of $3,200 in funding
    - Friends of Johnson Nature Center
        - Adopt a tree program
    - Municipality: Bloomfield Township Tree Planting Program
        - No funding available
- Grants
    - Arbor Day Foundation
        - Bloomfield Township is not a part of the Tree City USA (Birmingham has been for the last 45 years)
        - No grant opportunities
    - DNR Community Forest grants
        - Missed opportunity - deadline Oct 2023 -- can apply Summer 2024
    - DTE Grant
        - Missed opportunity - deadline August 2023 -- can apply, starting in June 2024
    - Oakland County CISMA
        - Grant submitted (online)
    - ReLEAF Michigan (phone call 3/28/2024)
        - First time doing sugar maples; they are really excited about doing this
        - Melinda Jones, 734.718.2702
        - 3 year maintenance agreement
        - DTE Foundation will be the funder
        - Zoom Call to go over details and proposed planting date; Event ReLEAF flyer, 30-min duration
            - Will assign a project forester
            - Go out to see quotes on 20 trees
            - Details to go over: delivery date, planting date
        - Could over the cost of 20 trees
        - Nature center provide in-kind services:
            - Dig holes in advance → auger for 36” (18-24” deep)
            - They could talk about it with us to discuss
        - Trees:
            - 1.5-2” diameter, container
            - If burlap-wrapped, would be MUCH heavier
        - Planting Day:

            - Have an agenda: DTE and Staff demonstration
            - Oversee entire planting
            - Make sure everything is clean up properly
            - 12 months later: return to walk with us and assess the area
            - April 2, between 12-3p
            - May 11 Volunteer Day suggested; second Saturday each month
    - Sav-a-Tree
        - Mark Brooke- suggested by Sandy

- Take out of our NC budget
- Sell timber
    - Waiting for responses, not looking favorable (next ops meeting will be discussing)
    - The value of the product does not offset the cost of production.
    - Black locust will be repurposed as trail boardwalk timber for the Easement Trail on the north side of the stream.

ReLeaf Michigan

Planting Trees, Growing Communities

Three-Year Tree Maintenance Agreement

This agreement addresses watering, pruning, monitoring of health, and other routine and corrective actions related to the trees being planted. While the trees planted are guaranteed to be disease/virus free and in good condition when planted, ***there is no tree replacement guarantee***. The survival rate is a critical metric to this grant and the awarding of others. Therefore, as part of this agreement, an onsite meeting with a ReLeaf Michigan representative and the individual directly responsible for the maintenance of the trees planted as part of this opportunity will be arranged one year after the planting to walk the site and discuss maintenance-related issues, remedial action and to answer questions.

Name of Municipality/School _____

Signature of city/village/town/county/township -manager/mayor/administrator/supervisor/school official to signify agreement and commitment to maintaining trees planted as a part of this project:

_____

(Print Name) (Date)

_____

(Signature/Title)

Signature of the municipality, requesting organization, or school individual (city/village forester, DPW Director/Supervisor, Park Supervisor, head of school maintenance, etc.) who is directly responsible for the trees planted to signify agreement and commitment to maintaining trees planted as a part of this project. Also, to agree to meet with a ReLeaf Michigan representative one year after planting to walk the site and discuss maintenance-related issues.

_____

(Print Name) (Date)

_____

(Signature/Title)

Received by:

_____

1100 N. Main Suite 105, Ann Arbor, MI 48104 (p) 1-800-642-7353 (F) 734-998-0163
info@releafmichigan.org ReLeafMichigan.org

Yearly Maintenance Schedule:

Year 1:

- Watering schedule – Water twice a week by hand for a total of 15 gallons per week **OR** provide gator bags for each tree and fill once a week
- Mulching – replenish yearly
- Weeding around trees will be based on a watering schedule
- Tree health inspection – Monitor trees for health and arrange for appropriate treatment if insect, disease, or improper cultural practices are present
- Prune only if necessary
- Stake only if necessary
- Check for mower/weed whip damage, vandal damage, and animal damage
- Do not fertilize. Fertilizer applied to newly transplanted trees can excessively dry roots (burning)
- Remove all tags from the tree

Year 2:

- Continue watering schedule
- Mulching – replenish yearly
- Weed around trees
- Pruning as necessary
- Remove any stakes and ties
- Check for any insect or disease problems on the new trees and surrounding trees

Year 3: Same as year 2

Equipment Transfer Inventory

SUP-Q01

Source Record

Farm NC Equipment Inventory updated May 2026 – th.xlsx | Current Inventory NC

Review Context

All 30 Current Inventory NC entries are included in the transfer to OCP, confirmed by Alan on October 30, 2026. Original workbook transfer cells were blank; the reproduced plan schedule records that later direction. Conditions remain source-reported. Reconcile identifiers and final schedule versions with PAP approval.

Reproduced source pages: 3
Appendix source-page range: 963·965

Equipment Transfer Inventory

Source: Farm NC Equipment Inventory updated May 2026 – th, “Current Inventory NC” tab, rows 4–33. This schedule retains all 30 source entries; listed conditions are those reported in the workbook.

Transfer to OCP: Yes for all 30 entries, confirmed by Alan on October 30, 2026. Original workbook transfer cells were blank; this plan records the subsequent transfer direction. Verify identifying numbers and current condition and retain the tractor and separately listed bucket as separate entries. Final schedule approval will be documented with the PAP.

Row Y/N	Equipment and Model	Uses and Notes	Condition
4 Yes	Tractor with Bucket John Deere 855 Type: Tractor	Uses: This is the main tractor that we use for NC operations.	Good
5 Yes	Small Manure Spreader- UTV Fimco Industries- 1/2 yard Type: Grounds Equipment	Uses: Moving small manure loads and spreading in fields Notes: New in 2017; moved from Farm to NC in 2021	Good
6 Yes	Bucket for Tractor John Deere 70A Type: Grounds Equipment	Uses: Loader	Good
7 Yes	Brush Hog John Deere 513 Type: Grounds Equipment	—	Good
8 Yes	Utility Trailer Snow Bear 8' long / single axle Type: Trailer	Uses: Utility hauling on site; not for road Notes: Not for road	Good
9 Yes	Gator John Deere 4 X 2 with dump box Type: Utility Vehicle	Uses: General hauling and towing of trailer Notes: Electric dump	Good
10 Yes	Electric Golf Car Club Car DS Golf Car 2002 Type: Utility Vehicle	Uses: General hauling and towing of trailer Notes: Manual Dump,	Good
11 Yes	Lawn Mower Toro SR4 Push Mower 20" Type: Mower	Uses: Cut Grass	Fair
12 Yes	Chain Saw Stihl MS180 Type: Power Tool	—	Good
13 Yes	Chain Saw Stihl MS251C Type: Power Tool	—	Good

Blank uses or notes are shown as an em dash. Source row numbers preserve the connection to the workbook.

Equipment Transfer Inventory Continued

Source: May 2026 equipment workbook, “Current Inventory NC” tab. Transfer to OCP: Yes for every entry, confirmed October 30, 2026. Conditions are source-reported.

Row Y/N	Equipment and Model	Uses and Notes	Condition
14 Yes	Snow Blower Toro Power Clear 21" Type: Grounds Equipment	Notes: Electric Start	Good
15 Yes	Long Handle Hedge Trimmer Stihl Type: Power Tool	—	Fair
16 Yes	Hedge Trimmer Stihl H576 Type: Power Tool	—	Fair
17 Yes	Hedge Trimmer Toro Electric Type: Power Tool	—	Fair

32 Yes	Air Compresser Porta Cable 1.6 HP / 20 Gal Type: Power Tool	—	Good
33 Yes	Pressure Washer Simpson 3000PSI MS61043 Type: Power Tool	—	Fair

Blank uses or notes are shown as an em dash. Source row numbers preserve the connection to the workbook.

Companion Records and Remaining Verification

SUP-R01

Source Record

Appendix assembly note | October 29, 2026

Review Context

Record of source scope, materials retained separately and verification items that the assembled appendix does not close.

Reproduced source pages: 1
Appendix source-page range: 967·967

Records Retained Separately

Staff and Financial Records

Licensing correspondence, staff handbooks, emergency procedures, donor-account reconciliation and the original email archive remain in staff records and are not reproduced here.

Source and Review Controls

The source register and consolidated October 30 review tracker remain companion files. The tracker identifies responsible roles, evidence or decisions needed, and timing gates. The mobility summary, program inventory and equipment schedule are included in this binder.

Supplementary Project Archive

The project-slide archive, interpretive animal artwork and raw survey workbook remain separate. BO-O01, BO-O02, BO-O03, BO-O07, BO-E06, BO-E08, BO-E09 and BO-E10 remain excluded from this appendix only. Their original records remain available separately.

Transfer and Permit Completion

All equipment, personal property and animals are included in the confirmed transfer direction. The master and appendix now contain the 30-entry equipment schedule and confirmed five-animal schedule. Final approved schedule versions, preserved-specimen records, TreeSchool license/application records and applicable animal permits remain separate administrative records. The latest supplied family handbook is reproduced at pages 896?925.

Excluded Acquisition Proposal

The unsuccessful 3115 Franklin Road preservation proposal remains excluded. References in historical source documents do not reactivate it.

Source Identifiers

BO identifiers follow the source register. SUP-V01, SUP-G01 and SUP-Q01 identify the supplementary visitor, program and equipment records.

Conceptual Site Layout

BO-V03

Review Context

Original concept map reproduced without alteration. Its project types are incorporated into Attachment A of the IPP. Locations, boundaries, grades and footprints remain conceptual and require verification. The governing IPP retains caretaker-house renovation, reuse and replacement as alternatives and establishes project-specific implementation requirements.

The Johnson Nature Center at Bloomfield Oaks County Park

Conceptual Site Layout Description

Park Vision

The Johnson Nature Center at Bloomfield Oaks County Park plays a beloved role in the local community and can serve as unique countywide resource. Despite having a relatively small footprint, the park is a diverse island of natural habitat located in on a section of the Rouge River in close proximity to several school systems. The park is particularly suited for nature programs, living history, and self-guided nature exploration.

Nature Center and Nature School

The school programs, community programs, and self-guided exhibits facilitated by the nature center will continue to play a major role in the services provided by Bloomfield Hills County Park. The Pre-K program will continue to play a pivotal role in our community outreach and will be a model for other similar efforts across the County Park system. To better support the Pre-K program and Summer Camps at Bloomfield Oaks County Park, we are proposing to replace the existing caretaker cottage with an indoor Nature School building adjacent to a new parking area.

Community Access and Trail Connectivity

To support trail access goals of the County Parks and support local trail connectivity, we are proposing to enhance the current park trails by adjusting the layout to facilitate accessible walking loops while still allowing for a variety of trail experiences including seasonal trails and rustic footpaths. The layout of the main trail loops have been adjusted, when necessary, to minimize potential grading while still allowing for slopes less than 5%.

A maintenance/trail easement has been secured for adjoining landowners to allow additional trail connections in support of local trail access.

Expanded parking is critical to maintaining and community access particularly during school programs and special events at the park.

Special Program Areas

To enhance the guest experience of Bloomfield Oaks County Park and maximize the educational opportunities that the park provides, we propose shaping the design and management of several areas of the park to promote specific activities and opportunities for exploration. These “Special Program Areas” are based on the natural landscape and local history of the area and can facilitate both guided programs and self-directed experiences.

Tree School

To meet licensing requirements, this fenced outdoor classroom area contains a number of uniques educational spaces set in natural habitat or filled with natural materials collected by the students themselves.

Explorer Woods

Building on the concept of a Nature Discovery Trail, this area is designed with exploratory play in mind. Wayfinding elements will be added to help define the space and young visitors will be encouraged to dig, climb, crawl, and create the spaces where their imaginations can wander.

Johnson's Landing

Rather than trying to restore or recreate period architecture, Johnson's Landing is intended to help create settings where kids of all ages can experience historically significant ways that our community has benefited from the unique landscapes and environments of Oakland County. Successful programs in woodworking, pioneer life, and maple sugaring could be expanded with the addition of a sawmill, woodfire bakery, smoke house, and even a chain-barge that could allow visitors to pull themselves across Johnson's Pond to view the wildlife and experience early means of moving freight.

Smokey's Sugar Bush

Maple sugaring has been a success program at the Johnson Nature Center for years. As part of Bloomfield Oaks County Park, we have a unique opportunity to involve researchers from Michigan State University Forestry Department and MSU Extension educators to introduce and interpret sustainable forestry practices into the long-term management of the Sugar Bush.

Tinker's Ridge

A variation on the discovery experience, *Tinker's Ridge* is designed to foster creative building skills with natural materials. With slightly older visitors in mind, this area will be filled with rocks, boulders, logs, stumps, dirt mounds, sand pits, cut branches, and natural fiber ropes that kids can use to create their own play elements. (The proximity to the proposed maintenance yard and maintenance building will help facilitate the placement/replacement, care, and management of the discovery building area.)

The Rambles

This natural area is proposed to be designed and managed to create a range of experiences that bring young people up close and personal with natural things. We will explore the creation of forest openings, brush piles, dense shrub plantings, rockpiles, tree-falls and rootwads, prescribed burns, and borrow-pits to create opportunities for a diversity of natural process to take place and be explored.

Cross River Adventure

There is something about crossing a river that makes us feel like we are on our way to an adventure, and in this special program area adventure will take the form of a low ropes course that will allow visitors to climb, balance, tip-toe, hop, and jump their way across the landscape.

Forest Garden

The Johnson Nature Center has been fortunate to have considerable local volunteer support including the MSU Master Gardeners Program. In the proposed *Forest Garden* we hope to utilize their continued support to help us create a botanical collection that highlights native Michigan

flora in its natural habitat. Wildlife management and decorative deer exclosures will be developed to support the long-term viability of this display which will serve as a community gateway for the trail experience at Bloomfield Hills County Park.

Mossy Hill

Similar to the Forest Garden, this botanical display will include unique Michigan forest plants but with the added opportunity to display mosses, lichen, fungi, and ferns that require the additional moisture, rocky surfaces, and canopy cover.

Park Maintenance and Educational Pods

A maintenance yard and maintenance building is proposed to help manage the unique combination of natural resources management and recreational services management that is required for Bloomfield Oaks County Park if we are to maximize is community and educational value. This investment will also allow us to continue to explore new means of creating sustainable, adaptable public engagement across the park system. One opportunity that we intend to explore at Bloomfield Oaks is the construction and use of “Educational Pods”. These custom built, movable structures will be designed to be transported to remote locations of our parks to help facilitate educational experience in ways that would otherwise not be possible or practical.

Animal Transfer Inventory

SUP-A01

Source: Current animal list and quantities confirmed by Alan Jaros.

Five animals are included in the transfer: one peregrine falcon, one white-tailed deer, one great horned owl, one red-eared slider turtle and one red-bellied cooter turtle.

This closes the missing-current-animal-list item. Final PAP approval and applicable permit administration remain separate. The following schedule is reproduced from the current master.

Reproduced schedule: appendix page 975

Animal Transfer Inventory

Source: Current animal list and quantities confirmed by Alan Jaros on October 30, 2026. All five animals are included in the transfer to OCP under the Final PAP. This schedule records the confirmed inventory and transfer direction; it does not represent that PAP approval or ownership transfer has already occurred.

Animal	Quantity	Transfer to OCP
Peregrine falcon	1	Yes
White-tailed deer	1	Yes
Great horned owl	1	Yes
Red-eared slider turtle	1	Yes
Red-bellied cooter turtle	1	Yes

Total: 5 animals. Ownership transfer does not itself transfer permit authority. Applicable permits and individual care records will remain with the operating records. The approved PAP record will identify the final version of this schedule.

RETURN TO AGENDA

Oakland County Parks and Recreation Commission
Agenda Item Brief

Meeting date	November 4, 2026
Agenda item	17 - Discovery Oaks–Bowers Farm Integrated Park Plan
Item type	Action
Lead staff	Alan Jaros, Deputy Director

ACTION REQUESTED

Recommended motion: Move to:

- Approve submission of the Discovery Oaks–Bowers Farm Integrated Park Plan, encompassing the Park Action Plan, Capital Improvement Plan and Park Operations and Management Plan, to Bloomfield Hills Schools for review under the interlocal agreement; and
- Authorize the Director to make revisions needed to complete the review and approval process, including updates to supporting information, schedules and operating arrangements and changes responding to BHS comments, consistent with the plan's purpose and the interlocal agreement.

This authorization does not amend the interlocal agreement or authorize expenditures beyond approved budgets. Existing BHS, County and Commission approval requirements remain in effect.

AT A GLANCE

The IPP establishes the capital, operating and stewardship framework for Discovery Oaks–Bowers Farm as a working agricultural learning campus and regional public destination. It supports broader public access, facility renewal and expanded learning while preserving the farm's identity. Staff recommends submission to BHS and authority for the Director to make necessary revisions through the review and approval process.

BACKGROUND AND CONTEXT

- The executed interlocal agreement establishes a 30-year partnership in which BHS retains property ownership and specified school-use rights, while OCP operates, manages, maintains and plans for the park. The IPP brings these responsibilities together through the required Park Action Plan (PAP), Capital Improvement Plan (CIP), and Park Operations and Management Plan (POMP).
- The PAP draws on the property's history, community engagement, visitor information and technical assessments. The CIP describes anticipated improvement types, general locations and intended uses. The POMP establishes the management framework for staffing, farm care, public programs, maintenance, partnerships and financial administration.
- The initial PAP requires BHS review before OCP final approval and implementation. Section 4.7.6 provides 30 calendar days from receipt for BHS response and establishes the applicable written-approval and deemed-approval provisions. The proposed November 4 action advances the draft for that review; it does not represent completion of the approval process.

PUBLIC VALUE AND STRATEGIC ALIGNMENT

Discovery Oaks advances Mission 26 by connecting countywide access with an experience rooted in agriculture, food and the care of working landscapes. The plan preserves the farm's distinctive educational role while broadening the ways residents can participate:

- Proposed free walking trails, dedicated trail-access parking at the western Squirrel Road entrance and connections to Township safety paths would create everyday access alongside the farm's established

programs. Defined routes and interior fencing would support public access while protecting agricultural work and animal care.

- School field trips, summer camps, family and adult learning, food experiences and volunteer stewardship support repeat participation. The Farm, Food, and Working Landscapes initiative connects this work with health and wellness, local food awareness and opportunities to reach schools and communities facing participation barriers.

Public subsidy, earned revenue, grants and partner support will serve different purposes. Resource-intensive programs and seasonal attractions can contribute revenue while accessible park experiences and educational opportunities deliver broader public benefit. Capital decisions will account for continuing staffing, maintenance and utility needs.

IMPACTS AND COMMITMENTS

Area	Key information
Financial	The agreement establishes separate commitments of at least $1.5 million from OCP and $1.5 million from BHS. The draft proposes October 1, 2028 for OCP's investment. Requested BHS work includes learning building and visitor center renewal, greenhouse repairs, and perimeter fencing and gates. BHS scope acceptance and the meaning of its reported July 1, 2027 milestone remain unconfirmed. Historical 2023 estimates are planning allowances, not current bids. This action creates no additional appropriation.
Operating	OCP leads public programming and farm operations through program, farm-management, park-operations and County support functions. The POMP coordinates authentic agricultural work with learning, animal welfare, visitor services and routine maintenance. BHS's specifically retained school-use rights remain protected.
Long-term	The CIP establishes a broad framework for buildings, utilities, circulation, accessibility, agricultural facilities, heritage, adventure learning, natural resources and seasonal recreation. Inclusion does not guarantee funding or completion. Once approved through the agreement's process, the CIP provides BHS preapproval for included project types to the extent authorized by Section 4.7.4. County authorizations, permitting and reserved BHS rights still apply.
Partners and public	The plan supports public and school participation while preserving the working farm's identity. Friends of Bowers Farm, MSU Extension, Preservation Bloomfield and other partners can contribute within their respective roles and applicable agreements. Preservation Bloomfield's separately owned historic buildings remain distinct from the transferred farm assets.
Risks and dependencies	Timely Commission action is needed to advance the IPP to BHS within the agreed submission schedule. Delay would reduce the time available for BHS review, resolution of comments and completion of the approval process. Staff will document delivery and manage the remaining review items through that process. The December 15 deadline applies to delivery, not completion of all approvals.

ALTERNATIVES CONSIDERED

- The interlocal agreement requires delivery of the IPP, so taking no action does not fulfill OCP's obligation. The Commission may advance the draft as presented or direct revisions.

NEXT STEPS

Following Commission action, the Director will target delivery to the BHS Representative on November 5, 2026. Confirmed receipt that day would make December 5 the end of the 30-calendar-day response period. The Director will coordinate responses, incorporate revisions within the authority granted by the Commission, and advance the plan through the agreement's final approval process. Detailed design, procurement and construction scheduling will proceed through applicable subsequent processes as projects are authorized.

Executive Summary

Discovery Oaks–Bowers Farm brings working agriculture, outdoor learning and public recreation together on approximately 87 acres in Bloomfield Township. Established by Bloomfield Hills Schools in 1967, the farm has connected generations of students and visitors with livestock, growing food and the daily work of caring for land. The partnership between Oakland County Parks and Bloomfield Hills Schools builds on that history, preserving the farm's distinct character while extending its educational and recreational opportunities to residents across Oakland County.

This Integrated Park Plan establishes the direction for that next chapter. Its three components—the Park Action Plan, Capital Improvement Plan and Park Operations and Management Plan—connect the park's public purpose with the facilities, investments and operating responsibilities needed to sustain it. BHS retains ownership and its specifically reserved rights under the interlocal agreement. OCP leads park management, operations, maintenance, programming and planning. [Sections 1.1–1.3; A-01]

A working farm with a broader public purpose

The long-term vision is a working agricultural learning campus and regional destination that welcomes everyday visits and deeper participation. Livestock, fields, gardens, pastures and food production remain central to the experience. School field trips, summer camps, family activities, adult learning and volunteer stewardship provide opportunities to return, develop skills and build lasting connections with the farm.

Discovery Oaks also offers a distinctive setting for OCP's Farm, Food, and Working Landscapes initiative within Health and Wellness Activation. Connections with the Oakland County Farmers Market, agricultural producers and community partners can help people understand where food comes from, how it is grown and how their choices connect to land and local livelihoods. The visitor center, Farm Store and Kitchen bring these experiences together through learning, food and farm products. The plan seeks to broaden participation, including opportunities for schools and communities that face barriers to agricultural and outdoor learning. [Sections 1.5–1.6]

This direction advances Mission 26 through greater access, active public spaces, outdoor learning and responsible stewardship. Proposed free walking trails, a dedicated trail-access parking area at the western Squirrel Road entrance and connections to Bloomfield Township's safety paths would create additional ways to experience the property. Designated routes and interior fencing would support visitor access alongside productive agricultural uses. Resource-intensive programs and attractions would continue to operate as paid experiences, consistent with the agreement's resident-entry provisions. [Section 1.5; Attachment A.4; Section B.3]

Heritage interpretation, adventure learning and seasonal recreation add to the farm's appeal. Potential improvements would strengthen these experiences while maintaining the agricultural setting and coordinating four-season activation with other OCP destinations. The plan provides flexibility to adapt programs and partnerships as community needs and operating conditions change. [Sections 1.6–1.7; Attachment A.6–A.9]

Renewing the campus and guiding investment

The farm's continued success depends on reliable buildings, utilities, accessible routes and functional agricultural facilities. The JFR building assessment, GMB infrastructure evaluation and accessibility assessment identify needs that inform renewal priorities. Their findings provide a basis for evaluating work, while individual projects will account for current conditions, intended uses and available resources. [Section 1.3; C-02–C-04]

The Capital Improvement Plan establishes a broad framework for building renewal and adaptation; livestock and agricultural facilities; utilities, drainage and circulation; parking, trails and accessibility; outdoor and adventure learning; heritage interpretation; natural-resource stewardship; seasonal recreation; and operational support. It identifies the types of improvements, locations and intended uses OCP may pursue while allowing detailed design, sequencing and delivery decisions to develop through established County processes.

The agreement establishes separate investment commitments of at least $1.5 million from OCP and $1.5 million from BHS. The requested BHS package focuses on renewal of the learning building and visitor center, greenhouse repairs, and perimeter fencing and gates. Historical 2023 estimates provide a planning basis for discussing that scope; they are not current bids or guaranteed quantities. This review draft proposes October 1, 2028 for fulfillment of OCP's investment commitment. Acceptance of proposed investment terms and clarification of BHS's reported July 1, 2027 milestone remain to be documented. [Section 1.8; A-01 §5.1]

CIP inclusion does not guarantee funding or implementation. Approval provides BHS preapproval for included project types when funding becomes available, to the extent authorized by the interlocal agreement. County funding authorizations, permitting requirements and expressly reserved BHS rights continue to apply. The separate investment commitments do not require completion of the entire CIP within the planning period. [Attachment A.1; A-01 §4.7.4]

Operating an authentic and sustainable learning campus

The Park Operations and Management Plan connects site operations with OCP's program leadership, technical teams and shared services. Program staff lead the design of learning experiences, while farm personnel establish meaningful agricultural outcomes and maintain responsible animal and land care. This coordination allows visitors and novice learners to participate in authentic work while recognizing that teaching requires time, supervision and approaches that differ from production alone. OCP's countywide learning programs and BHS's retained instructional uses have distinct responsibilities within this framework. [Sections B.1–B.5]

MSU Extension, Friends of Bowers Farm, Preservation Bloomfield and other community organizations contribute expertise, participation and support. Proposed operating agreements will define partner services, facility use and financial arrangements where needed. Preservation Bloomfield's historic buildings remain separately owned; their interpretation and potential use can enrich the park experience within the applicable lease and partnership arrangements. [Sections B.6–B.8]

Financial sustainability requires an intentional balance of public funding, earned revenue and external support. Public investment sustains access, learning, stewardship and the year-round responsibilities of a working farm. Fees, rentals, food and retail sales, sponsorships, grants and gifts can contribute to the cost and quality of services. OCP will evaluate offerings through their public purpose, full operating needs and results rather than applying a single cost-recovery target. Measures will consider participation, repeat engagement, accessibility, learning, volunteer stewardship, asset condition and responsible use of resources. [Sections 1.8–1.9; B.11]

Approval and implementation

Approval of the IPP establishes a coordinated planning and management framework within the interlocal agreement. OCP will advance work through its budgeting, capital-development and operating processes, applying the agreement's review and update requirements. Routine changes within approved authority do not automatically require a plan amendment.

Before adoption, the final package must accurately record agreed investment terms, equipment and animal transfers, and any unresolved allocation of responsibilities requiring written confirmation or Corporation Counsel review. Staff assignments and supporting-record updates are tracked separately. Detailed designs, procurement decisions, construction schedules and routine operating procedures will generally follow as implementation advances.

The plan's enduring purpose is to sustain a working farm where agricultural production, learning, recreation and community participation reinforce one another—and where public investment creates lasting value for Oakland County residents.

Park Action Plan

The Park Action Plan establishes the direction for managing, maintaining and improving Discovery Oaks–Bowers Farm as a working agricultural learning campus and public park. It brings together the park's public purpose, existing conditions, priorities and partnership responsibilities to guide OCP's decisions about programs, stewardship, operations and investment.

1.1 Purpose and Controlling Framework

This Integrated Park Plan provides a coordinated framework for Oakland County Parks and Bloomfield Hills Schools to sustain Discovery Oaks' agricultural and educational purposes, serve the wider community and responsibly manage the property. It guides OCP's management of the park while preserving BHS ownership, school use and other rights established in the interlocal agreement. [A-01 §§2.3–2.6, 4.3, 4.18]

The plan follows the structure required by the agreement:

- **Park Action Plan (PAP):** Establishes the park's purpose, conditions, strategic direction and management priorities.
- **Attachment A — Capital Improvement Plan (CIP):** Identifies anticipated improvement types, locations and intended uses, providing a framework for evaluating and advancing investments.
- **Attachment B — Park Operations and Management Plan (POMP):** Establishes the framework for daily operations, maintenance, staffing, programming and coordination.

These components work together. The PAP establishes direction; the CIP describes the improvements OCP may pursue within the approved scope; and the POMP explains how the park will be managed. The equipment and animal transfer schedules form part of the PAP and identify the property covered by the agreement's transfer provisions. [A-01 §§4.7, 4.10–4.11]

The interlocal agreement requires the final PAP to be based on Exhibit B and developed through OCP's policies and procedures. The agreement and its executed amendments govern the parties' responsibilities and the plan's approval and update requirements. Approval of this plan provides the planning authority described in those documents, including BHS preapproval of included capital project types to the extent provided in §4.7.4. Applicable County authorizations, permits and expressly reserved BHS rights continue to apply. [A-01 §§4.4, 4.7.2–4.7.6, 6.12]

The plan addresses near-term needs within the longer perspective of the 30-year partnership. The CIP establishes a five-year capital planning framework, and each plan component follows the update requirements in the agreement. Some needs will be addressed through routine maintenance and operations. Others may advance as funded improvements or remain longer-term concepts for further evaluation. Inclusion in the CIP does not guarantee funding or implementation, and the plan does not require every potential improvement to be completed within the planning period. [A-01 §§2.1, 4.7.4–4.7.6]

Supporting assessments, maps, historical plans and other records explain the evidence behind the plan's direction. Their findings retain the dates, scope and limitations of the original documents. A condition assessment can identify an important need without committing OCP to every recommended repair. A concept drawing can illustrate an opportunity without establishing an approved design or funded project. Proposed partner terms remain identified as proposals until accepted through the appropriate process.

The appendix binder preserves these supporting records for reference. Including a document in the binder does not adopt all of its recommendations, estimates, schedules or proposed terms. References in the report identify the relevant source so readers can examine the supporting evidence.

If this plan conflicts with the signed interlocal agreement or an executed amendment, the agreement or amendment takes precedence. OCP and BHS representatives will clarify how it applies, seeking legal or technical advice when needed. The approval record will identify the version of the plan and the equipment and animal transfer schedules that were approved.

1.2 Property History and Public Purpose

Discovery Oaks–Bowers Farm developed through Bloomfield Hills Schools' investment in agricultural land, outdoor education and community recreation. Its significance rests on the relationship among those purposes: a working farm where students and the public can learn, participate in agricultural activities, enjoy outdoor recreation and connect with the history of their community.

Development of the educational farm

BHS acquired the principal farm property from Pulte Land Company in January 1967. Subsequent acquisitions expanded the campus, including an addition along Square Lake Road in 1975 and an eastern acquisition begun under a 1981 land contract and completed by deed in 1992. An additional MDOT conveyance, signed in December 2020 and recorded in March 2021, added a parcel near Square Lake Road and the I-75 entrance ramp. Together, these acquisitions shaped the farm campus that supports agricultural learning, school programs and community recreation today. [F-01; Pulte deeds, January 3, 1967, Liber 4981, pp. 104–106; MDOT quitclaim deed, recorded March 9, 2021, Liber 55844, p. 781.]

The district's outdoor education efforts established the farm as an extension of the classroom. The farm's institutional history identifies John Bartley as its first farm manager in 1967 and describes students learning through contact with livestock, gardens and the daily work of maintaining a farm. The property was named for Charles L. Bowers in 1985, recognizing his service to the district and support for outdoor education. Over time, agricultural facilities and instructional spaces supported a broader range of school and community learning experiences. [Bowers Farm, *History of Bowers Farm*, "A learning farm" and "Bowers naming."]

The campus also became a setting for preserving and interpreting local heritage. The Benjamin-Barton Farmhouse and Craig Cabin were relocated to the property, connecting visitors with earlier patterns of settlement, domestic life and agriculture in the Bloomfield area. Preservation Bloomfield, a nonprofit preservation organization, brings together the school district, local governments, the Bloomfield Historical Society and community supporters in support of these historic resources. Their preservation complements the working farm by making local history tangible and providing opportunities to explore how agriculture and community life have changed over time. [F-02–F-03; Barton Farmhouse resolution, December 10, 2007; Bloomfield Historical Society, *Craig Log Cabin*.]

Community recreation and the changing funding model

Community recreation has long been part of the farm's role. Historical accounts describe public programs, gardening, seasonal activities and gatherings alongside school instruction. An internal account of farm and nature center operations records an increased emphasis on public use during the 1990s and the development of enrichment programs in coordination with the district's Recreation Department. The farm's institutional mission statement likewise identifies recreation, family activities and special events as central to its community purpose. [*Farm/NC recreation history*, account through 2009; *Bowers School Farm—Summary of Mission, Goals and History*.]

Community recreation was supported in part by the district's Recreation and Community Services Fund. The BHS Recreation Master Plan records that voters authorized a quarter-mill levy in June 1993 to purchase and maintain recreation facilities and operate recreation programs. The millage was discontinued following Proposal A in 1994. Without new revenue from that levy, the district took a more cautious approach to expanding recreation facilities and programs beyond those supporting student learning. [*Bloomfield Hills Schools Recreation Master Plan*, p. 22.]

The Recreation Master Plan distinguishes the district's core educational funding from the resources supporting recreation. It describes the General Fund's role in teaching, learning, facilities maintenance and district operations, while identifying user fees, grants, memberships and donations as expected sources for offsetting recreation operating costs. This funding history helps explain the importance of earned revenue, community support and partnerships in sustaining the farm's broader public role. It also provides context for the OCP–BHS partnership and the opportunity to support educational and recreational purposes through a durable public management framework. [*Bloomfield Hills Schools Recreation Master Plan*, pp. 21–22.]

Public purpose under the County partnership

The partnership with Oakland County Parks continues the property's educational and community purposes while BHS retains ownership of the premises. County operation creates an opportunity to broaden participation across Oakland County while continuing the farm's school use and building on its established community relationships. [A-01 §§2.1, 3.2.]

Discovery Oaks' public purpose is to provide agricultural and environmental learning, outdoor recreation, community connection and stewardship within an active farm campus. School programs, informal visits, seasonal attractions, food experiences and community gatherings can each contribute to that purpose. Their public value includes opportunities to learn, spend time outdoors, build relationships and experience a place that connects agriculture with everyday life. Recreation and social experiences are part of this public purpose alongside structured instruction.

Maintaining the working farm is fundamental to the property. Livestock require daily care; gardens and fields change with the seasons; and food production depends on soil, water, labor, equipment and responsible resource management. These activities provide authentic learning opportunities and require investment even when they generate little direct revenue. Reliable animal care, productive land, functioning buildings and utilities, and capable staff support both the educational mission and the visitor experience.

Future decisions should sustain this combination of learning, recreation and stewardship. Investments in facilities, accessibility, circulation, heritage resources and visitor amenities can strengthen the campus and make it welcoming to a broader public. Programs and services may evolve as community needs, resources and opportunities change, while remaining compatible with farm operations and school use. The enduring direction is to maintain a viable working farm and agricultural learning hub that also serves as a valued public place for recreation and community life.

1.3 Location and Existing Conditions

Location and property character

Discovery Oaks–Bowers Farm encompasses approximately 87 acres in Bloomfield Township, located on E. Square Lake Road between Squirrel Road and Adams Road. An ordered survey will confirm the property's acreage and boundaries. The property combines a working agricultural landscape with classrooms, visitor facilities, historic buildings, gardens and outdoor recreation areas. Together, these spaces support agricultural

production, school instruction and public experiences connecting people with farming, food and the natural environment. [A-01, premises description; Appendix B, site maps.]

The farm's physical character comes from the relationship between its buildings and productive landscape. Barns and animal facilities adjoin grazing pastures, while other areas support vegetable production, pumpkins and corn. Greenhouses, growing structures, production gardens and the Community Garden provide additional space for cultivation and learning. Fields change with the growing season and agricultural needs, making the landscape itself part of the visitor experience. Historic structures, including the Benjamin-Barton Farmhouse, connect the working campus with the area's agricultural history. [Bowers School Farm Master Plan 2027, published July 2023, Phase 1: Site Analysis and facility assessment.]

Arrival and principal facilities

Separate entrances serve visitors, farm operations and the Community Garden. Gate B provides service access to the main barn, animal facilities and historic structures. Gate C is the main visitor entrance near the center of the property's E. Square Lake Road frontage. From this entrance, visitors traveling west reach paved parking, including accessible parking, near the Visitor Center and learning building. Traveling east leads toward gravel parking and the Farm Activity Building.

The Visitor Center and adjoining learning spaces connect arrival, education, food and retail. The farm kitchen and farm store provide opportunities to enjoy food and purchase farm products, while classrooms accommodate school visits and community learning. As an arrival and departure point, this part of the campus helps visitors connect their experiences in the fields and animal areas with the food and products those agricultural activities produce.

The Farm Activity Building and surrounding outdoor areas support seasonal recreation and gatherings, including Winter Park. Their relationship to parking and outdoor activity spaces makes this area a distinct destination within the larger campus.

The working farm includes barns, livestock and equine facilities, animal shelters, pasture, crop-production areas, greenhouses, equipment and feed storage, and supporting service spaces. The Underground Storage/Root Cellar is part of this agricultural infrastructure. Outdoor learning and adventure-learning areas extend educational experiences beyond the buildings.

The existing-facility maps in Appendix B show the arrangement of these spaces. The July 2023 master plan's site analysis and facility evaluation provide an earlier inventory of buildings, agricultural areas and supporting facilities, supplemented by the more recent technical assessments discussed below.

Campus aerial overview

Figure 1.3a. Farm campus and surrounding roads. Source: Bloomfield Hills Bowers Farm Aerial, slide 1 [B-07]. Parcel lines and shading are reproduced from the source for orientation.

Property functions and relationships

The property operates as an interconnected place. Visitor routes, farm equipment movements, animal care, food production, school instruction and public activities occupy adjoining and sometimes shared spaces. Parking, service access, utilities and storage support multiple activities. Understanding these relationships is important to maintaining the working farm and providing a welcoming visitor experience.

Campus system	Role in the park	Planning implication
Instructional and visitor buildings	Visitor arrival and departure, school and community learning, farm kitchen and farm store.	Create a cohesive visitor experience connecting learning, food and farm products, with flexible spaces supporting school visits and public programs.
Barns, livestock and equine areas	Animal care, agricultural production, observation and hands-on learning.	Consider animal housing, handling, water, feed, manure management and visitor access together.
Fields, pasture, gardens and greenhouses	Crop production, grazing, community gardening and seasonal learning.	Coordinate soil health, water, equipment access, growing capacity and animal use.
Heritage resources	Connections to local history and opportunities for interpretation.	Integrate preservation, maintenance and visitor understanding of the historic buildings and their setting.

Campus system	Role in the park	Planning implication
Adventure and outdoor learning areas	Group learning, exploration and supervised challenge activities.	Consider facility condition, accessibility, inspections and operating capacity.
Seasonal recreation and gathering areas	Year-round participation, events and earned revenue.	Evaluate utilities, access, staffing and full operating demand.
Service and infrastructure systems	Daily care, maintenance, storage and continuity of operations.	Consider the capacity and condition of supporting systems alongside the facilities they serve.

Sources: Appendix B site documentation; C-02–C-05 technical assessments; Bowers School Farm Master Plan 2027, Phase 1.

Earlier property assessment

The Bowers School Farm Master Plan 2027, published in July 2023, assessed the campus's layout, facilities and visitor experience. It identified separation between the main farm and visitor hub and the southeastern event area, along with needs for clearer wayfinding, more accessible routes, better water management and more effective organization of visitor and working spaces. Its facility evaluation considered condition, operational usefulness and visitor experience. [Bowers School Farm Master Plan 2027, Phase 1 executive summary, printed pp. 4–5; Site Analysis and facility evaluation.]

This earlier assessment provides context for the later building and infrastructure studies. Its findings help explain how individual facility needs relate to the functioning of the whole farm, while reflecting conditions and operations during the 2022–2023 planning process.

Buildings and deferred maintenance

Oakland County Parks commissioned JFR's August 2026 assessment to document existing conditions in five structures supporting the farm's agricultural operations and related activities: the Horse Stable Barn, Bank Barn and Underground Animal Shelter, Toilet Rooms Barn, Cottage Building, and Underground Storage/Root Cellar.

The assessment establishes a baseline of deferred maintenance and building deficiencies in these structures. Findings include structural deterioration, water intrusion, exterior maintenance needs, electrical and mechanical deficiencies, accessibility barriers and life-safety concerns. This baseline provides a foundation for prioritizing repairs, evaluating rehabilitation needs and planning investment. Completed work and subsequent evaluations can be documented against it to maintain an accurate understanding of remaining needs. [C-02, executive summary and individual building assessments.]

Assessed facility	Principal conditions documented by JFR
Horse Stable Barn	Unsecured heater wiring; missing workshop exit and emergency lighting; a roof opening; broken glazing; hazardous-material storage concerns; and barriers to public access. [C-02, source PDF p. 10.]
Bank Barn and Underground Animal Shelter	Foundation settlement and cracking; upper-floor loading and balcony conditions requiring verification; deteriorated windows; and siding and roof concerns. [C-02, source PDF p. 30.]

Assessed facility	Principal conditions documented by JFR
Toilet Rooms Barn	Exterior decay and erosion at the foundation; inaccessible approaches and restroom fixtures or layouts; missing exit and emergency lighting; and water damage. [C-02, source PDF p. 55.]
Cottage Building	Water damage and failed wall areas; foundation deterioration; possible roof and deck movement; inaccessible entrances; and exposed cut utility services. [C-02, source PDF p. 77.]
Underground Storage/Root Cellar	Deteriorated doors and roof vents; water entry and floor cracking; damaged entrance wing walls; and hazardous-material storage concerns. [C-02, source PDF p. 104.]

JFR's findings describe the five assessed structures as of August 2026. They do not constitute a condition assessment of every building on the campus. Changes in occupancy or use may require electrical, mechanical, structural, accessibility or life-safety improvements beyond routine maintenance. The assessment informs investment decisions without committing OCP to complete every identified improvement. Available capital estimates and their qualifications are addressed in Attachment A: Capital Improvement Plan. [C-02, executive summary, assessment legend and budget qualifications.]

Utilities, sanitary systems and drainage

Bloomfield Hills Schools commissioned GMB's August 2024 infrastructure evaluation to inform investment at Bowers Farm associated with the district's 2020 bond program. The evaluation examined utility and drainage systems supporting existing facilities and potential campus improvements. It provides a baseline for understanding infrastructure needs across the property. [C-03, project background and infrastructure evaluation.]

Sanitary systems. The report identifies two campus sanitary lift stations. It describes frequent maintenance and pump replacement at the station serving the Academy and Visitor Center and identifies concerns about its ability to accommodate peak demand. GMB also records information supplied by BHS that the Township had identified a downstream public sanitary capacity constraint. Other onsite wastewater systems were not fully documented. These findings make sanitary capacity and system condition consequential considerations for facility use and investment. [C-03, sanitary sewer evaluation.]

Stormwater and drainage. GMB describes stormwater surcharging in the original farm area, with flooding affecting pavement and animal areas and, at times, barn floors. It also identifies deteriorated drainage infrastructure near the Farm Activity Building and standing water in the ropes-course area. These conditions affect access, animal care, maintenance and the usability of outdoor spaces. [C-03, stormwater evaluation.]

Water and other utilities. GMB reported that municipal water service was adequate for the uses considered and did not identify comparable concerns with incoming gas and electrical service. Incomplete records of buried utilities and other infrastructure, however, complicate maintenance and project planning. [C-03, water, gas, electrical and other utility evaluations.]

These findings reflect the August 2024 evaluation. Verified repairs and subsequent investigations provide the basis for updating that assessment and determining which needs remain.

Accessibility and the connected visitor experience

Bloomfield Hills Schools commissioned an accessibility assessment in 2022 as part of the master-planning process completed in 2023. The assessment provides a detailed inventory of barriers rather than a single

campus-wide verdict. It addresses parking, routes, entrances, facilities and opportunities to participate in activities. [C-04, introductory statement and site and building assessment schedules; Bowers School Farm Master Plan 2027, published July 2023, planning-process overview.]

Discovery Oaks should be understood as a sequence of experiences: arrival, orientation, movement, entry, participation, restrooms, food and departure. A barrier at any point can prevent participation in the whole experience. The planning objective is to improve those connections while using current information about routes and facilities; a capital project should avoid producing an accessible building that remains isolated by an inaccessible approach.

The assessment provides a baseline for identifying barriers and evaluating priorities. Subsequent improvements need to be reflected in the current understanding of site accessibility, including the status of the steep route behind the Visitor Center. Route information, appropriate program locations and accommodations also affect whether visitors can participate while physical improvements are being considered or completed. [C-04, route and facility assessment schedules.]

1.4 Community Engagement and Visitors

Community setting and regional role

Discovery Oaks–Bowers Farm is located in Bloomfield Township, within Oakland County's central suburban corridor. Its working agricultural landscape provides a distinctive setting for learning, recreation and community life. School visits, summer camps, public programs, volunteer participation and seasonal events connect people with the farm in different ways. Its regional appeal extends beyond the surrounding neighborhoods and the Bloomfield Hills Schools community. Oakland County Parks identifies the farm's seasonal attractions and signature events as serving a regional audience. [Oakland County Parks, Bowers Farm–Discovery Oaks webpage, accessed October 26, 2026.]

The farm also contributes to a local recreation landscape supported by schools, county facilities and community organizations. Bloomfield Township directs residents to Oakland County Parks and school-based recreation providers and has documented residents' interest in additional community recreation opportunities. Discovery Oaks builds on this established educational and community role while broadening opportunities for countywide participation. [Bloomfield Township, Living in Bloomfield webpage, accessed October 26, 2026.]

Connections to the surrounding community are an important part of that role. Bloomfield Township's safety-path network links neighborhoods with schools, shopping areas and other community destinations, supporting walking, jogging and bicycling. The proposed connections between that network and Discovery Oaks' entrances and internal trails would provide additional ways to reach and experience the park. The vision and Capital Improvement Plan describe those proposed improvements. [J-05; B-06; Attachment A.4]

Understanding the park's community requires several distinct perspectives: the characteristics of nearby residents, the people who currently visit, and the wider county population the park intends to serve. The demographic graphics and visitor evidence accompanying this section provide context for those perspectives. Community demographics, survey responses, recorded attendance and modeled visitation should be read according to their respective sources and methods.

Community engagement and visitation records provide different perspectives on Discovery Oaks. Surveys and workshops document participants' experiences, preferences and concerns. Attendance records and modeled visitation estimates describe use of the property. This section presents that evidence, distinguishing the sources, reporting periods and groups represented.

The principal sources are the engagement conducted during the 2022–2023 master-planning process, the October 2025 BHS–OCP engagement, and modeled visitation estimates from anonymized, aggregated mobile location data for calendar years 2023–2025.

What have people said about Bowers Farm?

Engagement during the 2022–2023 master-planning process

The Bowers School Farm Master Plan 2027, published in July 2023, documents workshops involving farm volunteers, students and community organizations, together with a digital survey. The survey included 553 respondents, of whom 514 were identified as previous Bowers Farm visitors. The report separately examined people who knew about the farm but had not visited and people who were previously unaware of it. [B-04, Phase 1, printed pp. 62–80.]

Workshop participants identified animal experiences, events, the farm store, educational activities, staff and teachers, gardens and recreation among the things they valued. Students frequently mentioned animals, ice cream, pizza and Winter Park. Other participants described the farm's appearance and its role in educating students and community residents. [B-04, Phase 1, printed pp. 65–66.]

Participants also raised concerns about facility condition, equipment and supplies, maintenance, safety, accessibility, gates and operating hours. Volunteer groups identified communication among organizations and with farm staff, promotion of activities, and recognition of volunteer efforts as areas needing attention. Comments about inclusion included program costs and relationships with neighboring schools and communities. These were participants' reported experiences and perceptions during the planning process. [B-04, Phase 1, printed pp. 67–69.]

The digital survey recorded interest in additional programs, events, interpretation, food options and equestrian experiences. It also recorded concerns about commercialization and perceptions that admission did not always correspond to the experience or length of a visit. Among nonvisitors, the report identified a perception that the farm primarily served BHS students and families, along with requests for clearer information about activities, audiences and hours. [B-04, Phase 1, printed pp. 71, 75–79.]

October 2025 engagement

The 2025 online survey collected responses between October 7 and October 31. The underlying workbook identifies 646 responses for inclusion. Of these, 615 respondents reported having visited Bowers Farm and 31 reported never visiting. The following results describe the 615 Bowers visitor respondents, rather than the combined survey population. [D-01, printed p. 7; BHS Survey Data.xlsx, "all data" worksheet, inclusion and Bowers visit-frequency fields.]

Respondents rated the importance of farm offerings and physical features. Selected results are shown below, including both highly rated items and items receiving lower proportions of "Very Important" responses.

Offering or feature	Bowers visitor respondents selecting "Very Important"	Share of 615
Healthy forest and natural areas	529	86.0%

Offering or feature	Bowers visitor respondents selecting “Very Important”	Share of 615
Grade K–5 field trips	516	83.9%
Animal experiences	507	82.4%
Summer camp or youth programs	504	82.0%
Grade 6–12 school-day environmental education	492	80.0%
Agricultural education	453	73.7%
Updated barns and animal-care areas	440	71.5%
Improved parking and traffic flow	250	40.7%
Dedicated event space	193	31.4%

Source: Recalculated from BHS Survey Data.xlsx, “all data” worksheet. All 615 visitor respondents answered these rating items. Other response options were “Somewhat Important” and “Not Important.” The table presents selected items, not the complete rating inventory.

The published report’s analysis of Bowers-specific written comments describes interest in agricultural and educational experiences, community events, workshops, art activities, equestrian opportunities, accessible trails and broader access to existing facilities. Comments also expressed attachment to the farm’s role in the school community, concern about closure or redevelopment, and a desire to preserve its educational character. Some respondents opposed the proposed partnership. [D-01, printed pp. 33–34.]

The in-person engagement included an event at Bowers Farm’s Fall Festival on October 18, 2025. Participants received four stickers to indicate priorities. The workbook’s Bowers entries record 24 selections for animal programs and experiences, 22 for agricultural education and experiences, 17 for healthy forest and natural areas, and 16 for barns and animal-care facilities. These are sticker selections, not counts of individual participants. [D-01, printed pp. 4–6; BHS Survey Data.xlsx, “In-Person” worksheet.]

The survey also asked about continuing discussions concerning the BHS–OCP partnership. Among the 615 Bowers visitor respondents, 362 selected “Yes,” 154 selected “I need more information,” 81 selected “No,” and 18 selected “Other.” These responses describe views during the October 2025 partnership discussion. [BHS Survey Data.xlsx, “all data” worksheet, “OCP in favor” field.]

Who participated, and how did they use the farm?

Visitors represented in the earlier master plan

The earlier master plan’s 514-person farm visitor segment included families and adults without children at home. The report states that 30% were adults without children at home. Its reported visit-frequency distribution was 40% visiting two or three times annually, 22% annually, 21% monthly, 14% weekly and 3% daily. These figures describe that survey’s visitor respondents during the earlier planning process. [B-04, Phase 1, printed p. 80.]

The report identifies animals, children’s programs, fresh produce and family events among favored experiences. Its audience analysis also records different interests among adults without children, older adults, younger participants and visitors traveling from farther away. [B-04, Phase 1, printed pp. 85–89.]

Visitors represented in the 2025 survey

Of the 615 Bowers visitor respondents, 416 reported living within BHS district boundaries, 191 reported living outside them and eight were unsure. A total of 255 identified themselves as a parent or guardian of a child currently enrolled in BHS. Respondents included 423 women and 156 men; 34 preferred not to answer and two left the gender question unanswered. The largest age groups were 35–44 and 45–54, together accounting for 342 respondents. [BHS Survey Data.xlsx, "all data" worksheet, Bowers visitor subset.]

Respondents reported a range of visit frequencies:

Reported frequency	Respondents	Share of 615
Less than once a year	133	21.6%
More than once, but fewer than 10 times a year	317	51.5%
Once a month	56	9.1%
More than once a month	109	17.7%

Source: BHS Survey Data.xlsx, "Bowers visits" field. Percentages may not total 100% because of rounding.

Visitors also identified activities they had experienced at the farm. The selections show participation across food and retail, seasonal events, school learning and other public programs.

Reported activity	Respondents selecting the activity	Share of 615
Used the farm store and kitchen	361	58.7%
Attended Fall Festival	342	55.6%
Attended weekend events and activities	312	50.7%
Attended Winter Park	294	47.8%
Participated in a Grade K–5 field trip	272	44.2%
Attended animal experiences	194	31.5%
Attended summer camp or youth programs	160	26.0%
Volunteered	143	23.3%
Used membership offerings and benefits	126	20.5%
Participated in 4-H or FFA	85	13.8%
Attended community classes	48	7.8%

Source: BHS Survey Data.xlsx, "Bowers activities" field, Bowers visitor subset. Respondents could select multiple activities. These are reported experiences, not annual attendance totals or counts of program enrollments.

Both engagement efforts describe the people who participated in them. Their demographic profiles should not be treated as a census of everyone who visits the farm.

What do the visitation records show?

The 2023 master plan reports 44,660 attendance occurrences for FY2022, described as programs and gate attendance. Its analysis separately examines programs and groups, general admissions and events. This is a historical figure reported in the master plan. [B-04, Phase 1, printed pp. 35–36.]

An anonymized, aggregated mobility data source provides a separate series of estimated visits:

Calendar year	Estimated visits
2023	52,000
2024	57,000
2025	59,000

Source: D-02, p. 1. Figures are presented at the rounded precision used in the source.

The mobility data summary reports an average visit frequency of 1.8 in 2025. Its leading home-location labels are Bloomfield Hills, accounting for 35% of modeled visits; Troy, 10%; and Rochester, 8%. Other listed locations include West Bloomfield, Auburn Hills, Royal Oak, Detroit, Waterford, Clawson and Leonard. These geographic names are reproduced as labeled in the source. [D-02, pp. 1–2.]

The modeled 2025 visitor profile reports a median household income of $125,000. Its race and ethnicity distribution is reported as 71% White/Caucasian, 11% Asian, 9% Black/African American, 4% Hispanic/Latino and 5% Other. These are modeled demographic estimates, separate from the self-reported characteristics of survey participants. [D-02, p. 2.]

Historical attendance, modeled visits and survey participation measure different things. They are presented separately here: the FY2022 attendance figure is not combined with the mobility source's calendar-year estimates to calculate a growth rate, and neither series is presented as a count of unique individuals.

Mobility-based estimates vary in how well they represent visitation at individual properties. They provide useful context for visitor home locations, demographic patterns and relative changes over time, but should be considered alongside recorded attendance and program participation. Year-to-year comparisons are most useful when the source and methodology remain consistent; changes in providers or methods may affect comparability. [D-02; OCP staff guidance on mobility data.]

1.5 Strategic Direction and Mission 26

A public mandate for access and investment

Oakland County residents' approval of the 2024 parks millage provided a public mandate to expand access, improve parks and recreational facilities, support outdoor learning and health, and conserve natural resources. Free general admission for county residents was an express purpose of the proposal. Discovery Oaks provides an opportunity to translate that mandate into a distinctive public benefit: access to a working agricultural landscape, outdoor recreation and learning experiences that connect people with food, farming and the natural world. [A-05, parks millage proposal; I-05.]

The long-term vision is for Discovery Oaks–Bowers Farm to serve as a working agricultural learning campus and regional destination, welcoming both everyday visits and deeper participation. Fields, gardens, pastures, livestock, historic buildings and food production give the park its character and educational purpose. School visits, family activities, adult learning, seasonal recreation and community involvement offer different ways to

experience that setting. The park's development should strengthen the connections among these uses while preserving the daily work that makes the farm authentic. [H-04, park purpose and vision.]

Discovery Oaks also provides a foundation for OCP's Farm, Food, and Working Landscapes initiative, within Health and Wellness Activation. The initiative connects agricultural experiences with a broader purpose: helping people understand where food comes from, develop practical skills, build relationships with producers and participate in a more accessible local food system. Discovery begins with direct experience—growing and harvesting vegetables, observing animal care, preparing a meal or talking with a farmer—and can develop into greater confidence, curiosity and involvement. The park's name expresses this opportunity to discover the relationships among land, food and everyday life.

OCP's operation of the County-owned Oakland County Farmers Market creates an opportunity to connect learning at the farm with relationships and choices beyond it. Discovery Oaks can help people understand the work and resources behind food production; the market provides a place to meet growers, ask questions, purchase seasonal food and support agricultural enterprises. Together, these settings can connect growing, preparing, sharing and purchasing food as parts of a continuing experience. The strategic opportunity is to make these connections intentional through complementary programming, producer participation and community partnerships. [G-R01, §1, p.1.]

The intended public benefit is practical. Growing and cooking experiences can help people become more comfortable using fresh ingredients. Affordable purchasing opportunities can help families put that knowledge into practice. Direct relationships can give consumers a clearer understanding of how their food is produced and give producers opportunities to explain their practices, understand customer needs and develop repeat business. These connections can support livelihoods, strengthen community relationships and make the agricultural landscapes that sustain food production more visible and valued.

Research confirms that combining hands-on learning with active participation delivers real-world impact. For instance, randomized studies show that integrating school-based gardening and cooking education directly leads to increased vegetable consumption and healthier habits. Michigan research also found that longer participation in Double Up Food Bucks was associated with greater fruit and vegetable consumption and improved food security. These findings support a direction that connects experiential learning with affordability and repeated engagement. Discovery Oaks should build opportunities for sustained participation through school and after-school programs, family experiences and seasonal activities that invite people to return, deepen their skills and apply what they learn in everyday life. [G-R02, results and conclusions; G-R03, abstract.]

Equitable participation should shape how this vision develops. Discovery Oaks should seek meaningful relationships with Black, Latino, Indigenous and other communities of color, alongside residents facing economic, transportation, disability or other barriers to participation. This work should recognize the agricultural knowledge, food traditions and community leadership residents already bring. Opportunities should be developed with communities and local producers, with attention to culturally relevant foods, welcoming instruction, affordable participation and connections to places where residents already live, learn and obtain food. Residents should have opportunities to participate as learners, growers, educators, vendors and partners.

Localizing parts of the food system is valuable when it improves people's actual choices and opportunities: access to affordable fresh food, skills to grow and prepare it, relationships with trusted producers and opportunities to earn income through food and agriculture. Shorter supply chains may also reduce transportation distances and help people understand seasonal production. Environmental stewardship, however, requires attention to how food is grown, stored, transported and used, including soil and water

management and food waste. Distance alone is not a reliable measure of environmental benefit. [G-R04, overview.]

Through this approach, Discovery Oaks can connect the experience of a working farm with healthier daily routines, stronger producer–consumer relationships and broader participation in the local food economy. Its contribution is to make those opportunities tangible and accessible while sustaining the land, facilities and agricultural work on which they depend.

Free access alongside supported experiences

A central direction of this plan is to establish a separate, clearly identified access point for residents to enjoy walking trails and the park landscape without purchasing a program or attraction ticket. This would create an opportunity to visit Discovery Oaks for a walk, time outdoors or informal discovery, including when visitors are not participating in a scheduled farm activity. The entrance and trail arrangement should make that opportunity easy to understand and use, with welcoming orientation and accessible connections to the areas intended for general public enjoyment.

Free access and paid experiences serve complementary purposes. General park access extends the benefits of public investment to residents, while fees for particular programs, attractions and services help support activities that require instructors, specialized facilities, equipment, materials or substantial operating support. Camps, guided agricultural experiences and seasonal attractions can offer more intensive participation while contributing revenue toward their delivery. Public funding, earned revenue, partnerships and external support together provide a framework for sustaining the farm's educational and recreational role. This approach does not establish a requirement that every activity recover its full cost. [H-04, public-value functions; I-04, access and sustainability; A-01, §§1.13 and 5.2.]

The interlocal agreement protects free entry and parking for BHS and Oakland County residents. The proposed separate trail entrance is a practical way to expand access while managing the different activities on the property; it does not narrow that protection to the trail area. Fees for specific experiences will be established through OCP's applicable policies and procedures, consistent with the agreement. Trails, gates, fencing and visitor circulation should support public enjoyment while maintaining appropriate boundaries around livestock, agricultural work, equipment and supervised activities. [A-01, §5.2; H-04, site access and management.]

Existing seasonal offerings and designated admission-free days provide opportunities for public access while the broader trail and circulation improvements are developed, as described in Section B.5.

Connections beyond the park boundary

Discovery Oaks should function as part of the surrounding pedestrian and recreation network. Bloomfield Township's safety-path system provides connections among neighborhoods, schools, shopping areas and community destinations. Planning for the park's entrances and internal routes should consider how people arriving from that network can enter the property, orient themselves and reach its public spaces. This makes the relationship between Township sidewalks and park trails an important part of the overall access framework. [J-05, Safety Paths; B-06, February 10, 2026 map.]

Potential improvements include accessible transitions between public paths and park entrances, clear wayfinding, bicycle parking and connections that reduce conflicts among pedestrians, farm vehicles and visitor traffic. The location and design of these improvements should respond to verified existing paths, road crossings, property boundaries and farm operations. The CIP provides the place to identify the appropriate scope of park connections, while detailed routes and designs can be developed through subsequent planning.

Learning that grows with participation

Discovery Oaks will offer three complementary ways to engage with agriculture, food systems and stewardship: inspirational, educational and aspirational. These approaches accommodate different interests and levels of participation, from an informal visit to sustained learning and involvement. Visitors may participate in any combination; each offers value in its own right. [H-04, public-value functions.]

Inspirational experiences invite curiosity and enjoyment. Seeing animals, exploring gardens and historic places, tasting farm-produced food or joining a seasonal activity can make agriculture approachable and memorable. These experiences welcome people with different backgrounds and interests and provide reasons to return.

Educational experiences develop understanding and practical skills through instruction and participation. School and after-school programs, camps, adult classes and demonstrations can connect growing, animal care, food preparation and environmental stewardship. The working campus allows participants to explore these subjects where the work takes place, with opportunities to build on their learning over repeated visits.

Aspirational experiences help participants pursue an interest further and contribute to the farm and their communities. Volunteer service, sustained projects, mentorship and educational partnerships can create opportunities to develop skills, take on responsibility and explore agricultural or environmental interests and careers. These opportunities can evolve with participant interests, partnerships and operating capacity. [H-04, inspirational, educational and aspirational functions.]

Mission 26 alignment

Mission 26 places Discovery Oaks within a broader effort to connect parks, communities and learning opportunities across Oakland County. Its current public framework emphasizes improving existing parks, bringing recreation closer to people, expanding partnerships, supporting health and year-round learning, strengthening stewardship and using public resources responsibly. Discovery Oaks contributes to that direction through the combination of free outdoor access, agricultural education, community participation and the continued care of an established public asset. [J-01, current public framework.]

For Discovery Oaks, these directions have practical implications. Accessible entrances and connected routes can broaden participation. Farm and environmental learning can make the relationships among food, land and everyday life more understandable. The Farm, Food, and Working Landscapes initiative connects agricultural learning at Discovery Oaks with the Farmers Market and community partnerships, supporting practical food skills, producer–consumer relationships and opportunities for healthier living. Walking, recreation and shared activities can support physical activity and community connections. Care for soils, pastures, water and natural areas can sustain both agricultural productivity and ecological health. Investment in buildings, utilities and visitor facilities can improve the experience while supporting reliable operations.

Renewal and development can proceed together. Maintaining essential facilities, making better use of existing spaces, strengthening programs and partnerships, and pursuing strategic capital improvements are related strands of work. Their sequence should respond to safety, condition, operational dependencies, funding and public value. This allows useful improvements and new opportunities to advance without making completion of every identified maintenance need a prerequisite for progress. [H-04, investment and implementation approach.]

Public value and sustainable operations

Discovery Oaks' success should be understood through the range and quality of benefits it provides. Attendance is one indicator, alongside opportunities for learning, accessible participation, community involvement, stewardship and responsible use of public resources. A school visit, an adult learning program, a

walk on a public trail and a seasonal attraction provide different benefits and require different levels of support. Their value should be considered in relation to their purpose and the resources needed to deliver them.

The evidence presented in this plan provides a basis for those decisions without predetermining every investment. Visitor information, community engagement, facility assessments and operating experience can inform choices about programs, access and capital improvements. The intended result is a park that remains recognizably a working farm while becoming more accessible, connected and useful to Oakland County residents.

1.6 Agricultural Learning and Public Services

Discovery Oaks brings school learning, public programs and daily farm work together in a setting where people can see, understand and participate in agriculture. Caring for animals, growing crops, tending gardens and preparing food provide experiences through which learners can explore the relationships among food, land and community. The working farm supplies the setting and substance for these experiences; educators, farm staff and volunteers help participants understand what they encounter and connect it to their own lives.

School instruction and public learning serve complementary purposes. School programs can connect classroom subjects with observation, investigation and practical work, while camps, family experiences and adult programs make those opportunities available across ages and stages of life. Repeated participation allows learners to follow seasonal changes, build skills and develop familiarity with the people, animals and landscapes of the farm. The planning direction is to strengthen these connections while sustaining the agricultural work that makes them possible. [B-04, Phase 1, pp. 25–30; G-03, “About Summer Camps.”]

The program framework encompasses school and after-school learning; camps and family experiences; adult classes and workshops; livestock and equine learning; gardening and food production; heritage interpretation; adventure learning; and seasonal recreation. The July 2023 master plan documents an established foundation that included school field experiences and agricultural education, summer camps, Open Barn, community gardens, 4-H, workshops, the farm store, Fall Festival and Winter Park. These offerings provide a starting point for a program portfolio that can evolve with community interests, partnerships and operating capacity. [B-04, Phase 1, pp. 25–33.]

Outdoor learning and participation

Discovery Oaks offers a range of experiences connecting people with agriculture, animals, food production and stewardship. School field trips bring classroom topics into the working farm through animal encounters, agricultural activities, barn and garden exploration, and farm history. Summer camps provide sustained opportunities for livestock care, gardening, food production, nature investigations and collaborative activities. Volunteer Camp Stewards offer older youth a pathway into service and practical leadership.

Early childhood offerings, including Grown-Up & Me, introduce young children and their caregivers to farm life through seasonal activities, sensory exploration, stories and play. Equine programs connect riding and horsemanship with grooming, animal care, barn safety and responsibility. Community programs and workshops provide additional opportunities for families and adults to participate throughout the year.

Learning also extends beyond the property. Traveling Farms brings animal encounters and agricultural experiences to schools and community settings, reaching people who may face transportation or other participation barriers. The program inventory also identifies classroom-based chick hatching and vermicomposting as opportunities to connect life cycles, decomposition and soil health with continued learning.

The supporting Outdoor Learning Program Inventory describes program purposes, audiences, activities, seasons, delivery responsibilities and facilities. It distinguishes operating programs from seasonal offerings, paused activities and entries requiring confirmation. The inventory provides a reference for managing an evolving program portfolio; it does not require OCP to retain every named offering, schedule, fee or delivery arrangement. [Appendix G, Outdoor Learning Program Inventory, “Discovery Oaks Programs” worksheet.]

Learning through daily farm work

Daily farm work gives agricultural learning its substance. Participants can investigate how soil, water and weather influence crops; how animals depend on appropriate feed, housing and care; and how production connects to food preparation, consumption and waste. Planting, harvesting, tending gardens and participating in suitable animal-care tasks allow learners to contribute to the farm while understanding the purpose behind the work.

Experiences can range from an introductory visit to repeated participation across a growing season. School programs, camps, community learning and volunteer service offer different opportunities to observe change, practice skills and assume appropriate responsibility. Staff guidance connects these activities to learning while maintaining responsibility for daily operations and animal welfare. Programs such as Farmer for a Day, Animal Investigations and The Science of Agriculture illustrate this approach. [Appendix G: Programs and Services.]

Stewardship learning through volunteering

Volunteering is an important form of participation and learning at Discovery Oaks. Through purposeful work, participants can develop an understanding of what it takes to care for a working agricultural landscape and welcome people into it. Opportunities may include tending gardens, supporting planting and harvest activities, assisting educational programs, interpreting the farm for visitors and contributing to community events. Connecting each task to its purpose helps volunteers understand how their efforts support the farm, its visitors and the wider community.

The farm’s volunteer tradition provides a foundation for this approach. The 2023 master plan identifies engaged volunteer groups and the relationship with Master Gardeners, and recommends expanding volunteer opportunities. The 2025 Stewards Leadership Program handbook describes a more structured model in which young people support camp activities while developing communication, teamwork, leadership and job-readiness skills. Together, these records demonstrate how service can contribute to the operation while offering meaningful benefits to the participant. [B-04, Phase 1, pp. 6 and 22; Phase 2, pp. 15–17; G-03, “About the Stewards Leadership Program.”]

The plan supports volunteer experiences with clear purposes, appropriate preparation and opportunities to learn from staff and one another. Participation can range from an introductory service activity to a recurring role or sustained project. Responsibilities should match the volunteer’s preparation and the needs of the activity, with qualified staff retaining responsibility for farm operations, animal care and program delivery. The POMP addresses volunteer administration and supervision.

Livestock and animal care

Livestock are central to Discovery Oaks’ identity as a working agricultural learning campus and to the familiar character of Bowers Farm. Animals draw people into the farm experience, spark curiosity and create opportunities for meaningful engagement. Seeing animals grazing, observing their behavior and participating in guided care activities help visitors connect agriculture with their own lives. These encounters also open conversations about food production, the responsibilities of raising animals and the relationships among livestock, land and people.

Animal welfare is fundamental to that purpose. The farm's published care framework recognizes animals' physical and behavioral needs, including appropriate nutrition, water, shelter, health care, opportunities for normal behavior and protection from fear and distress. Caring for livestock is a year-round responsibility that continues when programs end and visitors leave. Knowledgeable staff, veterinary guidance, daily observation and reliable care arrangements support both animal well-being and a meaningful learning environment. [Bowers Farm, "Animal Welfare & Care," public website.]

The livestock program should remain responsive to agricultural and educational purposes, animal welfare, available facilities and staff capacity. Decisions about species, numbers, breeding and participation in public activities should reflect those considerations together. Pastures, fencing, shelters, water supplies, feed storage and handling areas are essential parts of the working farm. The CIP addresses potential improvements to these facilities, while the POMP addresses responsibility for animal care and management. [Bowers Farm Standard Operating Procedure, "General," "Animal Environment, Housing, and Management," and "Behavioral Management"; The 5 Freedoms.]

Horticulture and food production

Fields, gardens and growing spaces are central to the working landscape of Discovery Oaks. Vegetable production, pumpkins, corn, sunflowers and grazing pastures give the campus its agricultural character and make seasonal change visible. Horticultural production—including bedding plants and petunia hanging baskets—also connects the farm with familiar home and community gardening experiences. Greenhouse activities link plant propagation and early growth with the work of tending crops outdoors. Together, these spaces reveal the care, labor and resources involved in producing food and ornamental plants.

Demonstrating different production methods is an important part of the farm's educational purpose. Conventional practices can help participants understand the equipment, growing technologies and management decisions used in contemporary agriculture. Sustainable and organic practices, along with permaculture approaches, offer opportunities to explore soil quality, composting, crop rotation, biodiversity, water conservation and the relationships among plants, animals and the landscape. Teaching across these approaches can help learners examine why growers choose particular methods and how those choices respond to different conditions and purposes.

The educational value lies in making those choices understandable through observation and practical experience. Participants can investigate how growers manage fertility, weeds and pests; how soil cover and organic matter influence growing conditions; and how different approaches affect labor, resource use and production. Demonstrations should encourage informed comparison, recognizing that practices can overlap and that their suitability depends on the crop, site and intended outcome. This approach supports curiosity and agricultural literacy while giving participants ideas they can apply in gardens, workplaces and everyday decisions about food.

Growing and harvesting also create opportunities to explore pollination, plant life cycles and the relationship between weather and production. School groups, campers and other participants can connect those lessons with food preparation and tasting, while produce offered through the farm kitchen and store brings the growing landscape into the visitor experience. These connections support the broader Farm, Food, and Working Landscapes initiative by helping people understand where food comes from and the work of those who produce it.

The Community Garden provides another way to participate in the agricultural life of the property. Alongside volunteer-supported gardens, it creates opportunities to grow food, share knowledge and contribute to the care of the campus. These activities complement staff-managed production and connect individual participation with stewardship of the wider landscape.

The plan supports a flexible combination of production, demonstration and learning spaces. Crop selections, growing methods and the scale of production can evolve with educational interests, seasonal conditions, soil and water resources, staffing and operating needs. The CIP addresses potential improvements to growing facilities and supporting infrastructure; the POMP addresses their management and the handling and use of farm products.

Connecting the farm experience through food

The visitor center, farm kitchen and store connect agricultural production with the everyday experience of food. They provide places where visitors can orient themselves, gather, learn, taste and purchase products associated with the farm. A visit can begin with an introduction to what is growing or being raised and conclude with a meal, fresh produce, farm-raised meat or another product that carries the experience home. These spaces also support classroom learning, community programs and adult discovery opportunities.

Food service and retail therefore have both an educational and an operating role. They can make the relationships among production, preparation and consumption tangible while generating revenue that contributes to the farm's sustainability. The master plan recognized this connection through its description of the farm store and its direction to strengthen food offerings, showcase farm-grown products and develop complementary local partnerships. This plan carries forward that purpose while leaving menus, product selections, hours and service arrangements to subsequent operating decisions. [B-04, Phase 1, p. 28; Phase 2, p. 15.]

OCP's public programming and farm operations will work alongside BHS's instructional responsibilities under the interlocal agreement and signed collaboration guidelines. The POMP describes those responsibilities, shared-space arrangements and operating practices. Within that framework, programs can adapt without making annual calendars, individual offerings or routine delivery decisions permanent requirements of the IPP. [A-01, §§4.3, 4.18 and 5.2; A-04.]

Heritage learning and traditional skills

Heritage learning may include hands-on experiences in traditional skills such as candlemaking, blacksmithing, beekeeping, timber framing, breadmaking and textile arts. Offerings can connect historic practices with contemporary interests in food, craft, self-reliance and stewardship, drawing on the farm's buildings, agricultural activities and partnerships with skilled practitioners. The mix of programs may evolve with instructor availability, suitable facilities, public interest and operating capacity.

Adventure learning

Adventure learning adds challenge, exploration and shared accomplishment to the Discovery Oaks experience. Through facilitated activities, participants can practice communication, cooperation and problem-solving, build confidence and discover strengths in themselves and others. The farm's outdoor setting gives these experiences a sense of place, connecting group learning with the landscape and the wider life of the campus.

The plan supports a flexible range of adventure-learning opportunities for school groups, camps, families and community organizations. Activities may evolve as interests, facilities and resources change, with qualified leadership and suitable equipment supporting their delivery. Existing course conditions and professional assessments will inform decisions about use, rehabilitation or replacement; specific improvements are addressed through the CIP and operating practices through the POMP. [B-04, Phase 1, p. 26; C-05.]

Seasonal attractions and community experiences

Seasonal attractions are part of the farm's character and an inviting way for people to discover it. Fall Festival brings the harvest season into public life through pumpkins, wagon rides, animal encounters, food and shared activities. Winter Park offers a different experience of the same landscape, bringing people outdoors during the colder months for recreation and gathering. Their appeal comes from the combination of seasonal traditions, a working farm and the pleasure of spending time together in a distinctive place. [B-04, Phase 1, pp. 32–33.]

These experiences can introduce new visitors to Discovery Oaks, give families reasons to return and connect people with its broader educational and agricultural offerings. A visit for a seasonal attraction may become an introduction to a camp, a class, volunteering or food produced at the farm. Food, hospitality and opportunities to gather help make these visits memorable, while earned revenue can contribute to sustaining the wider operation.

The planning direction is to preserve that character while allowing attractions and events to evolve. Individual activities, formats and schedules can respond to visitor interests, available resources and operating experience. Decisions about scale and delivery should consider accessibility, staffing, circulation, utilities, animal care and financial performance together. The plan establishes a continuing role for seasonal recreation and community experiences without committing OCP to a fixed event calendar or particular attraction.

1.7 Environment and Heritage Stewardship

Stewardship at Discovery Oaks brings the care of a working agricultural landscape together with the protection of natural and historic resources. Fields, pastures, gardens, ponds, wooded areas and heritage buildings contribute to the park's character and educational value. Their management should support productive agriculture, healthy soils and water, wildlife habitat and opportunities for people to understand the relationships among land, food and community.

These responsibilities are connected. Pasture management influences animal health, soil condition and runoff. Trees and vegetation provide habitat, shade and shelter while requiring ongoing care. Historic buildings help explain how people have lived and worked within this landscape over time. The planning direction is to sustain these resources through practical maintenance, informed management and improvements suited to the conditions and uses of the property.

Working landscape and water stewardship

The farm's fields, pastures, gardens and natural areas require coordinated care. Maintaining soil cover, managing grazing, replenishing soil nutrients and handling manure appropriately support agricultural production while protecting surrounding land and water. These practices also provide opportunities to demonstrate stewardship through daily farm work and public learning.

Water connects the developed campus with the wider landscape. Runoff from roofs, roads, parking areas and animal facilities moves through drainage systems, ponds and low-lying areas. GMB's 2024 infrastructure evaluation documented drainage problems, including flooding and surcharging, deteriorated storm piping near the Farm Activity Building and uncertainty about some system connections. These findings support evaluating drainage as a connected system so that improvements address the causes of problems without transferring them elsewhere. [C-03, printed pp. 11–12.]

Wooded areas, trees, ponds and other habitat features contribute to the farm's ecological and educational value. Management can include invasive-species control, care of established trees, appropriate planting and protection of sensitive areas. Priorities should reflect documented conditions, agricultural uses, visitor access

and opportunities to improve habitat and water quality. Work affecting wetlands or other regulated resources remains subject to applicable review and permitting.

The CIP provides a framework for potential drainage, landscape and ecological improvements. The POMP addresses routine stewardship and maintenance responsibilities. Together, they support an approach that can respond to changing conditions while sustaining the property's agricultural purpose.

Environmental assessment and follow-up

ASTI's October 28, 2026 Limited Phase II Environmental Site Assessment confirmed petroleum-related soil contamination beneath the cottage's former heating-oil tank enclosure. The investigation indicates that the removed tank was most likely an aboveground tank within the basement enclosure, rather than the underground tank described in earlier records. One soil sample exceeded state environmental criteria and residential vapor-intrusion screening levels. ASTI identifies parcel 19-01-376-006 as a "facility" under Michigan's Part 201 environmental framework. These findings concern the investigated cottage area and do not establish contamination throughout the park. [E-05 §§2, 7–8, printed pp. 2, 5–6; Figure 2.]

Further evaluation will address the cottage's intended use and appropriate management of affected soil. ASTI identifies potential additional soil-gas sampling to assess vapor-intrusion risk before preparation of a Due Care Plan. OCP will coordinate the necessary response with qualified environmental professionals and Corporation Counsel. [E-05 §8, printed p. 6.]

OCP will coordinate environmental follow-up with BHS, qualified environmental professionals and Corporation Counsel, consistent with the interlocal agreement's allocation of responsibilities. Before changes in use or work that could disturb affected soil at the cottage and former tank area, the applicable findings and any necessary protective measures will be confirmed. These findings do not, by themselves, establish restrictions on unrelated park activities or improvements elsewhere on the property. [A-01 §§3.5, 6.4.]

Heritage interpretation and visitor experience

The Benjamin-Barton Farmhouse and other heritage resources connect the working farm with the lives and landscapes of earlier generations. Their value extends beyond preserving buildings: they offer places to explore how people grew and prepared food, managed households, used tools and adapted to changing circumstances. Set within an active agricultural campus, these experiences can help visitors compare past and present practices and consider how decisions about land, technology and food continue to shape community life.

The 2011 assessment commissioned by Preservation Bloomfield identified experiential learning and community use as central purposes for the farmhouse. That direction remains useful to this plan. Heritage interpretation can complement school visits, family experiences, demonstrations and community gatherings, with activities suited to the character and condition of each resource. Preservation and appropriate use should reinforce one another, protecting significant features while keeping local history accessible and relevant. [Benjamin-Barton House Existing Conditions Assessment and Master Plan, June 2011, printed pp. 1-3–1-5 and 4-1–4-2.]

Heritage ownership and the park experience

The land lease identifies Preservation Bloomfield as the owner of the Benjamin-Barton Farmhouse and Craig Log Cabin and assigns it responsibility for maintaining and repairing the buildings at its expense. These buildings contribute to the Discovery Oaks experience while remaining under separate ownership and lease arrangements. Their inclusion in this plan does not transfer ownership or create additional preservation responsibilities for OCP. [Land Lease, §§1.01 and 5.01.]

These buildings are nevertheless important parts of the property's story and can enrich the overall park experience. OCP can explore coordinated interpretation, school and public learning, demonstrations and other suitable activities with Preservation Bloomfield, connecting historic domestic and agricultural life with the working farm today. Any use would respect the applicable agreements and the suitability of the buildings for the intended activity.

The 2011 Benjamin-Barton House assessment provides historical information and ideas for preservation and use. It can inform these discussions without committing OCP to its restoration program, proposed alterations or associated costs.

A potential operating agreement with Preservation Bloomfield could clarify arrangements for coordinated programming and use of the historic buildings. The POMP addresses this opportunity within the existing ownership and lease arrangements.

1.8 Financial Sustainability and Investment

Public purpose and financial approach

Discovery Oaks' financial approach supports OCP's systemwide purpose: accessible recreation and learning, healthier and more connected communities, and responsible stewardship of public places and natural resources. As a working agricultural learning campus, the park advances these benefits through everyday visits, repeated participation and deeper engagement with farming, food and the landscape.

Public funding, earned revenue, grants, gifts, sponsorships and partnerships each contribute to sustaining that purpose. The appropriate balance reflects who benefits, participation barriers and the full cost of delivery. Public subsidy supports broadly shared benefits and access to learning and recreation. Participant fees can help cover the added costs of specialized experiences, while exclusive uses, premium offerings, food and retail services provide opportunities for greater earned revenue. High operating cost alone does not determine the appropriate fee or level of public support.

Discovery Oaks will apply OCP's applicable financial policies, approved fee schedules and budget processes, consistent with the interlocal agreement. Free public access and paid programs and services should be clearly distinguished. Each offering should have a clear purpose, a realistic budget, an intentional funding approach and evidence of the public benefit it provides.

Sustaining a working farm

Discovery Oaks has operating needs that continue throughout the year. Livestock require daily care, crops and gardens require seasonal attention, and buildings, utilities and equipment require maintenance whether or not a public program is underway. Staff preparation, cleanup, administration and visitor support also contribute to the cost of delivering programs and events.

Financial evaluation should account for these shared responsibilities alongside direct program expenses. Ticket receipts alone do not establish an activity's financial contribution. An offering may help support the wider operation after its direct costs are covered, while another may appropriately receive public support because of its educational value or its role in removing participation barriers.

OCP will use its annual budgeting and accounting processes to manage these resources. Available financial information should distinguish program receipts and direct expenses, site operating costs, shared services, restricted support and capital expenditures. These distinctions support informed decisions about programming, staffing, fees and investment without establishing an additional contractual reporting cycle.

Capital decisions also affect operating sustainability. A grant or one-time contribution may fund a facility improvement while future budgets must support its utilities, staffing, maintenance, inspections and eventual replacement. The evaluation of proposed improvements should consider these continuing needs, including opportunities to reduce operating burdens or sequence investments to match available capacity.

Historical financial baseline

Historical BHS financial records document the farm's reliance on both public funding and revenue from programs, events, food, retail and other activities. Appendix I preserves the supporting records, including separate historical farm information and later financial summaries covering both the farm and nature center. [I-01; BHS MP_Program and Budgets, "Revenues" worksheet.]

These records provide context for the transition to OCP management. Their different reporting periods, fund classifications and treatment of shared expenses must be reconciled before using them to calculate a Discovery Oaks operating subsidy or compare financial performance over time. Budgeted amounts must also remain distinguishable from actual results.

OCP's authorized budgets and subsequent operating results will provide the basis for evaluating the park under County management, including its operating needs, earned revenue and public investment.

Revenue administration and accountability

The interlocal agreement directs park revenue to OCP, subject to its specified transition exception. No alternative revenue-retention arrangement is proposed in this plan. Payments to service providers and partners will follow their authorized agreements, with OCP revenue, restricted contributions and funds belonging to partner organizations accounted for according to their applicable terms. [A-01 §§5.3–5.4]

BHS may request an annual revenue accounting and exercise the audit rights provided in the interlocal agreement. Fee and assistance decisions must also respect the agreement's resident entry provisions. [A-01 §§5.2–5.4]

Capital investment commitments

OCP's minimum $1.5 million investment and BHS's separate $1.5 million investment provide a defined foundation for improving Discovery Oaks. Each contribution has its own scope and requirements. Together, they sit within the broader Capital Improvement Plan, which identifies the types of improvements the park may pursue as funding and opportunities become available. Neither contribution commits the parties to completing every improvement identified in the CIP. [A-01 §5.1; Attachment A]

OCP proposes October 1, 2028 as the deadline for fulfilling its $1.5 million investment commitment. This deadline is submitted for BHS approval as part of this IPP. It applies to the investment commitment, not completion of the broader Capital Improvement Plan. OCP's contribution may be allocated among approved improvement categories and supporting work, subject to applicable funding and authorization requirements. Attachment A describes those categories, their locations and intended uses. [A-01 §§5.1, 4.7.4; H-01]

The requested BHS investment prioritizes renewal of the learning building and visitor center, including roofs and flashing, windows, siding and trim, selected doors, flooring and moisture-related restoration. The requested package also includes greenhouse repairs and perimeter fencing and gates. The October 8 investment brief provides the supporting scope; quantities and technical solutions remain subject to assessment, pricing and design. [I-02]

OCP's Parks Development and Engineering staff have provided preliminary material and performance guidance to support BHS's estimating of the Learning Building/Visitor Center renewal. The guidance addresses roofing,

siding, windows, doors and flooring, with final selections and replacement limits to reflect building conditions, architectural character, maintenance needs and compatibility with OCP systems. This information supports scope development and updated estimates; it does not establish final specifications, quantities or project costs. [I-06, Darryn Horvath correspondence, received October 29, 2026.]

This package is submitted for BHS approval through the IPP. BHS identified July 1, 2027 as its anticipated investment milestone. Whether that date refers to funds committed, expenditures incurred or construction completed remains to be confirmed with BHS. [I-02; H-01]

Investment matter	Planning direction	Approval or confirmation status
OCP minimum $1.5 million	Allocate among approved improvement categories and supporting work; proposed investment deadline of October 1, 2028.	Amount established by A-01 §5.1.1. Proposed date requires acceptance through the applicable approval process.
BHS $1.5 million	Prioritize building renewal, greenhouse repairs, and perimeter fencing and gates, using historical estimates as a planning basis.	Amount established by A-01 §5.1.2. Acceptance of the requested scope remains to be documented.
Reported BHS July 1, 2027 date	Establish the intended milestone.	Remains Unresolved
Broader CIP	Provide a framework for additional improvements as resources become available.	Inclusion does not guarantee funding or implementation.

Planning estimates for the BHS investment

The requested BHS investment package comprises renewal of the Learning Building/Visitor Center, greenhouse repairs, and perimeter fencing and gates. The illustrative $1,460,300 allocation draws on historical planning estimates and does not establish current project prices. The earlier building allowance covers a different scope, and greenhouse repairs do not have a separately verified allowance. Updated estimates will inform the final scope and delivery arrangements within BHS's $1.5 million commitment. Applying the historical building allowance together with three perimeter-fencing phases leaves $39,700 within the commitment.

Component	Planning allowance based on 2023 estimates
Building renewal, using the historical Education / Administration Building allowance	$1,004,300
Perimeter fencing—Phase 1	$152,000
Perimeter fencing—Phase 2	$152,000
Perimeter fencing—Phase 3	$152,000
Illustrative project total	$1,460,300
Remaining unallocated allowance	$39,700

Component	Planning allowance based on 2023 estimates
Total BHS investment framework	$1,500,000

Source: BHS MP_Program and Budgets, “BSF Project Budgets_Ph 1,” rows 10–13 and 32; “BSF Estimate_Detail_Ph 1,” rows 104–111.

These figures include the original estimating allowances. The building estimate incorporates a 25 percent construction contingency, a 10 percent owner contingency and a 10 percent architectural and engineering fee allowance, applied sequentially as calculated in the workbook. Each fencing phase includes a 10 percent construction contingency and a 10 percent owner contingency, with rounding; no separate design fee is included.

Costs may have changed since these estimates were prepared. The original contingencies address estimating uncertainty and should not be assumed to fully cover subsequent changes in prices or scope. The historical building allowance also includes mezzanine and outdoor-space improvements that differ from the currently requested renewal package. Its use here provides a planning allowance rather than an itemized estimate of the requested repairs.

The workbook divides the perimeter-fencing estimate into four equal phases. The illustrative allocation accommodates three at the historical estimated cost; their geographic limits and achievable extent remain to be established. Greenhouse repairs remain part of the requested scope but do not have a separate verified allowance in this allocation.

Accordingly, these amounts are planning estimates for establishing a mutually acceptable scope, rather than final project budgets or guaranteed quantities. BHS and OCP will determine the final figures for their respective investments through applicable assessment, estimating, procurement and authorization processes. The estimates support agreement on projects that address each organization’s needs, with the extent and sequencing of work determined by verified conditions, current pricing and available funding.

The CIP provides the detailed capital framework. Appendix I preserves the financial baseline and investment documentation. Together, these records support responsible investment while allowing design, sequencing and funding decisions to respond to verified needs and available resources.

1.9 Implementation Priorities and Measures

Setting priorities

Implementation will strengthen Discovery Oaks as a working agricultural learning campus and public park. Priorities should reflect the consequences of delay, the public benefit of the work, its contribution to school and outdoor learning programs, and OCP’s capacity to deliver and sustain it.

Daily animal care, life safety, essential utilities and continuity of established operations form the foundation. Building renewal, reliable infrastructure and accessible circulation support the farm’s educational and public uses. Program and facility improvements should build on that foundation, responding to documented needs and opportunities to improve the visitor experience. [C-02–C-04; Attachment A]

School field trips and outdoor learning are central OCP services at Discovery Oaks. Implementation should account for their instructional spaces, seasonal schedules, staffing, animal and landscape resources, and supporting facilities alongside public programs and daily farm operations. BHS’s retained school-use rights will be accommodated in accordance with the interlocal agreement. Where major renovations or other necessary

work require temporary relocation or changes to instructional space, the responsible OCP and BHS administrators will coordinate arrangements to maintain instructional continuity and obtain any approvals required by the agreement. [A-01; Section 1.6]

Priorities may advance together where practical. A building repair may also improve accessibility, strengthen an instructional setting or reduce maintenance demands. A partnership or funding opportunity may allow an improvement to proceed sooner when its operating needs and dependencies can be addressed. The plan establishes direction while allowing OCP to adjust sequencing within its authority and available resources.

Advancing work through OCP processes

OCP will advance implementation through its established budgeting, work planning, capital delivery and operating processes. Program leadership defines the intended experience and service needs; site and operations staff identify practical requirements and ongoing care; planning staff connect proposals to park and systemwide objectives; and the responsible technical staff guide assessment, design and delivery. Finance and other County functions support projects within their established responsibilities.

Project decisions should address the conditions relevant to the proposed work. Utility capacity matters when an improvement adds demand. Environmental findings inform work and use in affected areas. Inspection findings and professional acceptance inform the availability of adventure-learning elements. Accessibility should be considered across the complete experience, including arrival, routes, facilities and participation. [C-03–C-05; Appendix E]

Detailed design, procurement and construction scheduling will develop as individual projects advance. Approval requirements remain those established by the interlocal agreement and applicable County processes. The CIP identifies anticipated improvements, while the POMP describes the operating framework that supports their use and care.

Planning priority	Intended result	Principal delivery considerations
Sustain safe, reliable farm operations	Consistent animal care, essential services and a dependable setting for visitors and learning	Animal welfare, staffing, utilities, inspections, maintenance and current operating conditions
Support school and outdoor learning programs	Effective spaces and resources for OCP field trips, instruction and public learning, while accommodating BHS's retained rights	Program schedules, instructional needs, staff capacity, animal and landscape resources, and facility availability
Renew buildings and infrastructure	Protect existing assets, address deferred maintenance and improve operating reliability	JFR and GMB findings, current conditions, BHS investment scope, funding and continuing maintenance needs
Improve accessible and connected experiences	Make arrival, movement and participation easier across the campus	Routes, entrances, parking, visitor amenities, accessibility findings and connections to surrounding paths
Develop recreation and seasonal experiences	Sustain distinctive offerings that complement the working farm and support participation across seasons	Public demand, technical requirements, utilities, staffing, accessibility and operating costs

Planning priority	Intended result	Principal delivery considerations
Strengthen agricultural, food and heritage learning	Connect production, livestock, food, history and visitor participation	Program purpose, farm operations, partner capabilities, building ownership and applicable agreements
Care for land, water and habitat	Sustain productive soils, healthy landscapes and ecological function	Drainage, soil management, grazing, habitat conditions, environmental findings and stewardship participation

These priorities guide choices across the park. Individual scopes, costs and schedules will be established as work is evaluated and authorized.

Evaluating results and public value

Discovery Oaks should be evaluated through the experiences it makes possible, the people it reaches and the condition of the farm and landscape that sustain those benefits. Attendance and revenue are useful measures, but they provide only part of the picture. Repeat participation, learning, volunteer stewardship, accessible experiences and responsible use of resources also inform management decisions.

OCP will use its existing data and management systems to evaluate results, developing reliable baselines as records become available. Measures may be refined as the park's operations and information improve. The following questions provide a framework for evaluation without establishing unsupported numerical targets or additional partner reporting requirements.

Management question	Useful evidence	How the evidence informs decisions
Who is participating, and whom are we reaching?	School groups and students served, registrations, ticket use, geographic reach and participation across seasons	Identify patterns in use and opportunities to reach more Oakland County residents
Are people returning and deepening their involvement?	Repeat registrations or visits where measurable, participation across offerings, and movement into volunteering or further learning	Assess whether the park supports continuing relationships as well as individual visits
Can people access and enjoy the experience?	Visitor feedback, accommodation requests, assistance use, route conditions and information about participation barriers	Identify practical improvements to arrival, communication, affordability and participation
Are school and outdoor learning programs fulfilling their purpose?	Participant, teacher and instructor feedback; enrollment; camp fill; unmet demand; and learning evidence appropriate to the program	Improve content, scheduling, delivery and capacity while distinguishing participation from demonstrated learning
Is the working farm supporting agricultural and food learning?	Program records, participant feedback and documented use of livestock, gardens, production areas and food experiences	Assess how effectively daily farm activities support understanding and engagement

Management question	Useful evidence	How the evidence informs decisions
Are people contributing to stewardship?	Volunteer participation, repeat involvement, hours and completed work where recorded	Understand the contribution of volunteers and the quality and continuity of stewardship opportunities
Are animals, landscapes and facilities being sustained?	Animal-care records, inspections, asset condition, maintenance work, and soil, water and habitat observations	Set care and renewal priorities and assess the results of completed work
How are resources supporting public benefit?	Actual revenue and expenses, public subsidy, shared costs, restricted support and capital investment	Evaluate affordability, operating sustainability and the resources required to deliver each service

Each measure should retain a clear definition, reporting period and scope. Registrations, admissions, visits and unique visitors describe different things and should remain distinguishable. Mobility-based visitation estimates provide a separate source of context rather than a substitute for recorded participation. Financial comparisons should identify shared expenses and distinguish operating costs from capital investment. [D-01–D-02; Appendix I]

Management decisions should draw on several forms of evidence. Low enrollment may reflect scheduling, price, communication or the specialized purpose of an offering. High attendance may increase demands on staff, infrastructure or animal care. Preventive maintenance may improve reliability even when visitation remains unchanged. Taken together, these findings can guide decisions to continue, improve, expand or discontinue activities and investments.

The purpose of evaluation is to help OCP direct limited resources toward reliable operations, meaningful experiences and lasting public benefit while preserving the working farm's distinct character.

1.10 Plan Administration and Approval

Administrative responsibility

OCP will administer and implement the Integrated Park Plan through its established management, budgeting, planning and operating processes. The OCP Director and BHS Superintendent, or their respective written designees, serve as the agreement administrators. Each party will notify the other of changes to its designated representative. [A-01 §4.1]

OCP manages daily park operations, including programming, staffing, maintenance, scheduling, fees and authorized third-party use, consistent with the interlocal agreement, approved plans and applicable County policies. This authority allows the park to respond to changing needs and opportunities while maintaining its public purpose and BHS's expressly retained rights. [A-01 §§4.3, 4.16–4.18, 5.2]

Implementing the approved plan

The PAP and its CIP and POMP attachments establish the framework for park stewardship, operations and investment. Within that framework, OCP will manage implementation details through its normal processes. These include program offerings, staff assignments, maintenance methods, operating schedules, equipment specifications, project sequencing and design development within the approved scope.

Under §4.7.4, inclusion of a project type in the CIP provides BHS preapproval for that project type to proceed when funding becomes available, without additional BHS approval. CIP inclusion does not guarantee funding or

implementation and does not replace required County authorizations, permits or other applicable approvals. Capital Improvement Projects outside the PAP require prior written approval from the BHS Representative under §4.4. [A-01 §§4.4, 4.7.4]

Implementation remains subject to the agreement's provisions concerning school use, ownership, property restrictions and other retained rights. OCP may refine how an approved activity or improvement is delivered without amending the plan when the adjustment remains within the approved scope and existing authority.

Submission, review and periodic updates

On September 30, 2026, the parties executed a joint extension establishing December 15, 2026 as the deadline for delivery of the final Park Action Plans for Discovery Oaks and Bloomfield Oaks. All other agreement requirements, including the applicable review and approval procedures, remain unchanged. [A-03]

The agreement establishes distinct procedures for the PAP and its attachments:

Plan component	Submission or update requirement	BHS review and approval
Initial PAP, including its CIP and POMP attachments	Submit the completed plan to the BHS Representative.	BHS has 30 calendar days after receipt to provide comments and recommendations. OCP must consider them and endeavor to address them. Prior written BHS approval is required before OCP approves or implements the PAP, except that BHS is deemed to have approved it if its Representative does not respond within the 30-day period.
Updated PAP	Prepare an updated PAP every five years.	Provide the BHS Representative at least 60 days to review and comment, as specified in §4.7.6.
Updated CIP — Attachment A	Prepare an updated CIP at least every four years.	Provide the BHS Representative at least 60 days to review and approve. If approval is withheld, the improvement may not be made unless the parties otherwise agree. The approved update replaces the existing CIP.
Updated POMP — Attachment B	Prepare an updated POMP at least every five years.	Provide the BHS Representative at least 60 days to review and approve. If approval is withheld, the change may not be made unless the parties otherwise agree. The approved update replaces the existing POMP.

Source: A-01 §§1.8, 4.7.3–4.7.6; A-03.

The initial PAP's 30-day deemed-approval provision is distinct from the review periods specified for subsequent updates. The approval record will identify the version of the IPP and transfer schedules acted upon, the date BHS received the submission, and the evidence of approval under the interlocal agreement. Supporting records will distinguish dated assessments from subsequently verified conditions.

Changes to the plan or agreement

Routine adjustments within the approved framework will be administered by OCP. Changes to the CIP or POMP framework will follow the applicable review and approval provisions in §§4.7.4–4.7.5.

A proposed use of the premises for a purpose outside those described in the agreement requires BHS's prior written consent under §2.4. That section allows such consent without requiring an amendment to the agreement. Changes to the agreement itself must be in writing, approved by both parties, recorded in their governing bodies' official minutes and filed as required by §§2.1–2.2. [A-01 §§2.1–2.4]

Coordination and resolution of issues

OCP and BHS administrators will address matters involving their respective responsibilities through the agreement's established channels. Practical coordination may include scheduling retained school uses, communicating construction disruptions, arranging temporary instructional accommodations and resolving access or service needs. This coordination supports delivery within existing authority; approval is required where the agreement specifies it.

Disputes concerning the agreement will first be referred to the designated OCP and BHS representatives. If they cannot resolve the matter, the agreement provides for nonbinding mediation with costs shared equally, followed by available legal remedies if mediation does not resolve the dispute. [A-01 §4.2]

1.11 Continuing responsibilities and property rights

The interlocal agreement provides OCP with authority to operate, maintain and improve Discovery Oaks while BHS retains ownership of the premises. OCP's use does not create a title interest or easement. Capital improvements constructed under the agreement remain with the premises and become BHS property, subject to the agreement's provisions concerning depreciation and reimbursement upon termination or expiration. [A-01 §§4.4, 7.1, 2.7]

Ownership and responsibilities differ for certain assets. Preservation Bloomfield owns the Benjamin-Barton Farmhouse and Craig Log Cabin, with building care and preservation responsibilities established by its land lease. Equipment and other personal property are addressed through the applicable ownership and transfer schedules. The plan recognizes these distinctions; including an asset in the park's visitor experience does not itself transfer ownership or responsibility for its preservation. Section 1.7 and the POMP address coordination with Preservation Bloomfield and the applicable landlord responsibilities. [Land Lease, §§1.01, 5.01; PAP ownership schedules]

OCP will carry out the plan in accordance with applicable property restrictions, grant conditions and other agreements governing the premises, as required by the interlocal agreement. Any delegation or assignment of rights or obligations will follow the agreement's written-consent requirements. These continuing requirements apply alongside the administrative procedures described in Section 1.10. [A-01 §§6.12.2, 7.2]

Renewal, termination and the return of the premises will follow the interlocal agreement, including its provisions for personal property and any reimbursement owed for capital improvements. The plan does not change those terms or create an additional reimbursement commitment. [A-01 §§2.1, 2.7]

Attachment A — Capital Improvement Plan

The July 27, 2026 concept drawing illustrates the relationship of farm, learning, recreation and support areas. It includes proposed features and is not an as-built map, a survey, a funding commitment or a construction approval. The category descriptions that follow establish the scope presented for plan review. [B-01]

Planning context: Discovery Oaks concept plan, July 27, 2026 [B-01]. The original drawing uses earlier names: "The Great Hall" identifies the proposed Agricultural & Equestrian Pavilion; "Apple Barn" identifies the potential reconstructed Pickering Barn. These are conceptual locations; exact siting and footprints will be developed through project design. The capital categories define the scope proposed for approval.

A.1 Capital Authority and Investment Boundaries

The Capital Improvement Plan establishes a five-year framework for investments that sustain Discovery Oaks as a working agricultural learning campus and welcoming public park. It supports renewal of buildings and infrastructure, reliable farm operations, universal accessibility, stewardship, and opportunities for agricultural learning and public recreation. The improvement categories that follow identify the project types, general locations and intended uses proposed for BHS approval.

Section 4.7.4 of the interlocal agreement establishes the capital planning framework:

“The CIP shall establish a five (5) year framework to identify, evaluate, and prioritize potential capital investments at the Park. The CIP serves as a planning and evaluation tool, not a guarantee of implementation. Inclusion of an item in the CIP does not constitute project approval, funding authorization, or a commitment to proceed. The CIP will set forth a process for approvals, authorizations, and commitments to proceed. Inclusion of an item in the CIP constitutes BHS pre-approval for the project type to proceed when funding is available, without requiring additional BHS approval. The CIP may be amended as set forth in the Park Action Plan, but at least every four (4) years OCPRC shall create an updated CIP, which the BHS Representative shall have at least sixty (60) days to review and approve. If the BHS Representative does not approve the CIP, the improvement may not be made, unless otherwise agreed to by the Parties. The updated CIP, approved by the BHS Representative, shall replace the existing CIP and be incorporated into the Park Action Plan as Attachment A.” [A-01 §4.7.4.]

Individual projects will advance through applicable OCP and County planning, budgeting, procurement and project-authorization processes. Project recommendations will address the intended public benefit, proposed scope, estimated capital and continuing operating costs, funding and relevant site constraints at a level appropriate to the decision being requested. The Director will administer implementation within delegated authority; matters reserved to the Commission or other County authorities will be submitted for approval. Projects outside the approved capital scope and amendments will follow the governing agreement. Detailed design, procurement and construction scheduling will develop as projects advance.

Within the approved project types, locations and intended uses, OCP will develop designs, select delivery methods, establish project sequences and allocate available funding through its established processes. This flexibility allows related improvements—such as building renewal, utility upgrades, drainage and accessible routes—to advance together. Inclusion does not require every anticipated improvement to be funded or completed within the five-year planning period.

For purposes of the agreement, a Capital Improvement Project costs $30,000 or more and extends an existing facility’s or asset’s life, replaces, renovates or remodels it, or adds a new facility or asset. Routine maintenance and personal-property purchases remain subject to their applicable requirements and OCP processes. Capital improvements constructed under the agreement become part of the premises and are owned by BHS as provided in §4.4. Applicable construction requirements and retained school-use rights continue to apply, and OCP may not authorize easements or other encumbrances on the premises. [A-01 §§1.4, 4.4, 4.6, 4.18, 6.12]

OCP’s minimum $1.5 million investment and BHS’s separate $1.5 million investment sit within this broader capital framework. Their scope and status are described in Section 1.8. The proposed October 1, 2028 deadline applies to OCP’s investment commitment, subject to acceptance through the applicable process; it is not a deadline for completing the entire CIP. BHS’s requested building renewal, greenhouse repairs, and perimeter fencing and gates remain separately identified so that each organization’s contribution can be clearly understood and administered. [A-01 §5.1; Section 1.8]

Planning scope and supporting work

The project types described in Sections A.2–A.10 are included for BHS preapproval under Section 4.7.4, subject to their stated locations, intended uses and qualifications. Further evaluation of an included project does not, by itself, exclude its project type from that approval scope.

Each improvement category includes the evaluation, investigation, design and supporting work reasonably associated with its described project types, locations and intended uses. Building improvements may require related utility, drainage, accessibility and service-area work. OCP will develop these components together where appropriate, with dimensions, materials, technical systems, procurement methods and phase boundaries determined through subsequent project development.

Condition assessments and concept plans inform this work without committing OCP to every recommendation or illustrated feature. The category descriptions establish the scope proposed for approval; individual projects advance through applicable funding and authorization processes. A concept already covered by the approved project types, locations and intended uses may be developed within that framework. Capital Improvement Projects outside the approved scope require the BHS approval specified in the interlocal agreement. A feature shown only on a concept map does not, by itself, establish its inclusion in the approved capital scope. [A-01 §§4.4, 4.7.4; B-01; B-04; C-02–C-05]

Capital framework at a glance

Category	General location	Principal purpose
Buildings and agricultural facilities	Instructional, visitor, farm and service areas of the developed campus	Renew, adapt, replace or develop facilities supporting agricultural learning, public programs, visitor services and farm operations.
Utilities and supporting infrastructure	Campus utility networks, drainage systems and connecting service corridors	Improve reliability and capacity, address drainage needs and provide infrastructure supporting park uses.
Circulation and universal accessibility	Entrances, roads, parking areas, paths and connections among facilities and experiences	Improve arrival, movement, safety and participation, including connections to surrounding public paths.
Farm operations and food production	Barns, pastures, fields, gardens, greenhouse and associated service areas	Support animal welfare, agricultural production, demonstrations, learning and food-related activities.
Outdoor and adventure learning	Existing adventure-learning area and outdoor teaching areas identified in the detailed scope	Support supervised challenge, outdoor instruction and the facilities and systems needed for participation.
Heritage interpretation and coordinated improvements	Heritage building settings, visitor approaches and associated interpretive areas	Connect heritage resources to the park experience through interpretation, access and coordinated improvements consistent with ownership and lease responsibilities.

Category	General location	Principal purpose
Natural resources and landscape resilience	Woodlands, fields, pastures, habitat areas, ponds and drainage areas	Improve soil, water and habitat conditions while sustaining the working agricultural landscape.
Recreation and seasonal gathering spaces	Seasonal recreation, event and gathering areas identified in the detailed scope	Support year-round recreation and flexible gatherings with appropriate visitor amenities and operating infrastructure.
Operations and supporting assets	Maintenance, storage, staff and service areas, and associated operating systems	Support reliable daily operations, staff effectiveness, security and care of park assets.

The following sections describe the anticipated improvements, locations and intended uses within each category. Categories may be combined in a project where their scopes overlap. Work involving Preservation Bloomfield's buildings remains subject to the ownership and lease arrangements described in Section 1.7; this CIP does not assign their preservation responsibilities to OCP.

A.2 Buildings and Agricultural Facilities

Building improvements will sustain Discovery Oaks' working agricultural enterprise and expand its capacity for learning, public participation and visitor services. This category addresses the learning building and visitor center, Farm Activity Building, barns, equine and livestock facilities, greenhouses, maintenance and storage facilities, and potential new structures supporting these uses within the developed farm campus. [B-01–B-03; C-02–C-04]

Anticipated work includes stabilization, repair, renovation, adaptation, replacement, expansion and new construction. Projects may address roofs and building envelopes, foundations and structural systems, doors and windows, interiors, restrooms, ventilation, mechanical and electrical systems, fire protection and accessibility. Utility connections, drainage, service access and accessible approaches may be incorporated into the same project.

Existing buildings and deferred maintenance

OCP commissioned JFR's August 2026 assessment to examine existing conditions in five selected structures. It provides a baseline for identifying deferred-maintenance needs in those buildings and evaluating improvements supporting the farm's agricultural activities and public use. Priorities include protecting buildings from deterioration, correcting service deficiencies, improving access and supporting suitable occupancy. Individual projects may combine several building systems where coordinated renewal provides a more effective result. [C-02, executive summary and individual building assessments]

Evaluation may determine that repair, adaptation, replacement or removal best serves a building's intended use and long-term operating needs. Proposed changes in occupancy will be assessed against applicable structural, mechanical, electrical, accessibility, fire-safety and exiting requirements. Assessment recommendations inform these decisions without committing OCP to every proposed repair.

Agricultural and animal facilities

Potential investments include new or replacement animal housing, improvements to existing barns and shelters, and facilities combining livestock care with agricultural instruction. Earlier master planning identified a

livestock learning lab, renovation of ruminant housing, and improvements to equestrian facilities. These concepts provide a basis for considering buildings that support animal welfare, practical husbandry, staff access and meaningful visitor learning. [Bowers School Farm Full Master Plan 2027, “Phasing & Roll-Out,” p. 25.]

An Agricultural & Equestrian Pavilion could provide covered space for instruction, demonstrations, equestrian activities and compatible gatherings. Its general planning location is beside the visitor and learning campus, west of the central parking area, shown as “The Great Hall” on the July 27, 2026 concept plan. Building projects may connect with pasture, fencing, watering, handling and service-area improvements described in A.5. Exact siting, footprints and capacities will be developed during design within the approved capital framework. [B-01]

Learning, food and visitor facilities

The learning building and visitor center may be renewed or adapted to strengthen arrival, orientation, classrooms, public learning, the farm store and kitchen. Potential work includes improvements to instructional spaces, food preparation and teaching areas, retail displays, storage, restrooms and visitor gathering spaces. Earlier master planning identified expansion of the farm store and kitchen as opportunities to connect agricultural production with the visitor experience. [Bowers School Farm Full Master Plan 2027, “Strategies & Timeline,” Goal 2, p. 15.]

The Farm Activity Building, Bowers Cottage and Underground Storage/Root cellar may also be evaluated for renewal or adaptation supporting their appropriate park uses. Greenhouse and associated production facilities may be repaired, expanded or replaced to support growing, demonstration and learning. Maintenance, equipment storage and service facilities may be improved alongside public-facing buildings so that expanded use remains practical to operate and maintain.

Pickering Barn reconstruction

Potential reconstruction of the Pickering Barn would bring a historic agricultural structure to Discovery Oaks, strengthening the connection between local farming history and the working farm experience. Anticipated work may include reassembly of stored barn components, restoration, foundations, building systems and site improvements supporting agricultural learning, interpretation and compatible public use. Its general planning location is north of the main pond, shown as “Apple Barn” on the July 27, 2026 concept plan. Exact siting, footprint and program configuration will be developed through project design within the approved capital framework. [B-01]

Work affecting BHS’s retained instructional spaces will follow the agreement and the coordination provisions in Sections 1.9–1.10. Work involving Preservation Bloomfield’s existing buildings remains subject to their ownership and lease arrangements and is addressed under the heritage category.

A.3 Utilities and Supporting Infrastructure

Reliable infrastructure supports daily farm operations, animal care, agricultural production, learning and visitor services. Improvements will address existing service needs and provide capacity for appropriate building renewal and future park uses. This category covers utility networks, drainage systems, buildings and connecting service corridors within the park premises. Anticipated work includes assessment, rehabilitation, replacement, relocation, extension and new construction. [C-03; B-03]

Water and wastewater

Potential improvements include water distribution, sanitary sewers, lift stations, onsite wastewater systems and associated connections, controls and equipment. Work may improve reliability, address deteriorated or insufficient infrastructure, and support restrooms, food service, animal care and other park activities.

BHS commissioned GMB's 2024 evaluation to assess facility investment associated with its 2020 Bond program. The study identified sanitary capacity constraints, two campus lift stations and incompletely documented wastewater arrangements serving portions of the property. These findings provide a basis for evaluating improvements and determining where infrastructure work may need to precede building reuse or increased visitor demand. [C-03, printed pp. 3–10]

Potential solutions include rehabilitation or replacement of existing systems, changes to connections and other technically appropriate improvements. The approach for individual projects will reflect verified conditions, intended use and available service capacity.

Stormwater and drainage

Potential improvements include storm pipes and structures, surface drainage, grading, erosion protection, and stormwater detention and treatment facilities. Work may address drainage around buildings, roads, parking, pedestrian routes, pastures and animal facilities, with related landscape restoration.

GMB's evaluation documented stormwater surcharging affecting pavement and animal areas and identified gaps in information about portions of the drainage network. These findings support investigation and coordinated improvements that protect facilities, sustain farm activities and improve visitor circulation. Drainage projects may be combined with parking, pathway, building and landscape work where a coordinated approach is practical. [C-03, printed pp. 4, 11–12]

Energy, communications and operating systems

Potential improvements include electrical and gas service, geothermal and other heating and cooling infrastructure, lighting, communications and data networks, security systems, access controls and associated equipment. Work may renew aging systems, improve operating reliability and efficiency, and extend service to facilities and activity areas covered by the CIP.

Utility improvements may be delivered independently or incorporated into building and site projects. Assessment and design will establish the location and condition of buried infrastructure, service requirements and necessary connections before construction. Infrastructure sequencing will account for daily farm operations, animal care, school and outdoor learning programs, and public use.

A.4 Circulation and Universal Accessibility

Circulation improvements will make Discovery Oaks easier to reach, navigate and enjoy while supporting the daily work of the farm. This category includes entrances, internal roads, parking and drop-off areas, service and emergency access, and connections among visitor facilities, agricultural areas, heritage resources, gardens, trails and program settings. Anticipated work includes construction, expansion, reconstruction and improvement of routes, crossings, gates, surfacing, drainage, lighting, wayfinding and accessible visitor amenities. [B-01–B-03; C-04]

Arrival and parking

Potential improvements include expansion and reconfiguration of visitor, program and event parking, with associated accessible spaces, pedestrian connections, drop-off areas, service access, drainage, lighting and landscaping. Improvements would support everyday operations and seasonal demand while providing clear connections to park entrances and principal facilities.

Entrance improvements may clarify the different functions of public arrival, trail access, deliveries and farm service traffic. Parking and pedestrian routes will be considered together so that visitors can move from their arrival point to their intended experience safely and conveniently.

Trails and community connections

The proposed trail-access improvements include expansion of the westernmost entrance off Squirrel Road to establish a day-use parking area reserved for visitors accessing the trails. This entrance would support free access to designated walking routes while allowing staffed farm experiences and seasonal attractions to operate through their appropriate admission arrangements.

Dedicated, maintained trails would provide opportunities for hiking, casual walks and enjoyment of the working agricultural landscape. Routes may pass alongside or through portions of land used for agriculture. Interior fencing, defined crossings and clear route boundaries would separate visitors from livestock, equipment and active production areas while preserving views and opportunities to experience the farm.

The proposed trail network would connect with Bloomfield Township safety paths to improve access from surrounding neighborhoods and the broader community. Potential work includes connecting paths, entrance treatments, crossings, wayfinding and bicycle amenities. Exact alignments and connection details will be developed through site planning, with applicable rights and approvals obtained for work outside the park premises.

Movement through a working farm

The circulation network must accommodate visitors, school and outdoor learning groups, staff, deliveries, farm machinery and emergency responders. Improvements may separate routes, establish controlled crossings, adjust gates and service access, and provide clear connections between public destinations.

Public routes will be arranged to support agricultural operations and animal care. Access to fields, pastures, production areas and service spaces may be managed according to seasonal work and operating conditions. Connections to gardens and other program areas can adapt as uses evolve.

Universal accessibility

Accessibility improvements will address the complete visitor experience: arrival, orientation, movement, building entry, participation and access to supporting amenities. Potential work includes accessible parking and drop-off areas, improved surfaces and grades, ramps, boardwalks, crossings, seating, shade, restrooms, viewing areas and accessible program settings.

The 2022 accessibility assessment provides a baseline for identifying barriers and coordinating improvements across facilities and routes. Project development will consider how individual improvements connect, so that an accessible destination can also be reached and used. Adaptive equipment and accessible information may complement physical improvements and broaden participation. [C-04]

Orientation and signage

Potential improvements include entrance identification, campus maps, directional signs, trail markers and information distinguishing public routes from restricted operational areas. Signage will help visitors understand available experiences and navigate between them.

A potential park identification sign oriented toward I-75 could improve awareness and recognition of Discovery Oaks–Bowers Farm. Its location, size, design and installation would be subject to applicable laws, ordinances, permitting requirements and any necessary property or right-of-way authorizations.

A.5 Farm operations and food production

Capital improvements will sustain Discovery Oaks as an authentic working farm where agricultural production, animal care and learning reinforce one another. Facilities should support practical farm work while welcoming visitors into settings where they can observe, understand and, when appropriate, participate. The intent is to make agriculture accessible without losing the character, function and daily activity that give the farm its educational value.

This category includes barns, animal-care and handling spaces, paddocks, pastures, equine facilities, crop fields, gardens, greenhouses and associated production and service areas. Anticipated work includes repair, replacement, reconfiguration, expansion and new construction, coordinated with the building, utility and circulation improvements described in A.2–A.4. [A-04; B-01; C-01–C-03]

Animal care and pasture systems

Potential improvements include livestock shelters, feeding and watering systems, handling areas, fencing and gates, pasture divisions, equestrian arenas, feed and bedding storage, and manure-management facilities. These investments will support animal welfare, dependable daily care and efficient use of staff time while providing suitable settings for agricultural instruction.

Facilities may incorporate viewing areas, demonstration spaces and supervised opportunities to participate in husbandry. Their arrangement should allow visitors to understand how animals are housed, fed and cared for while providing appropriate separation, animal retreat areas and staff access. Public participation will be accommodated within the needs of a functioning livestock operation.

The scale and arrangement of facilities will reflect animal-care requirements, available land, staffing, educational purpose and continuing operating costs. Herd composition and production levels may evolve within the farm's operating framework.

Crop and horticultural production

Potential improvements include irrigation, growing structures, propagation areas, production beds, field access, fencing, equipment storage and other infrastructure supporting crops and horticulture. These facilities may serve vegetable, pumpkin, corn, sunflower and bedding-plant production, alongside other crops suited to the farm's educational and operating needs.

Production areas can demonstrate different approaches to agriculture, including conventional growing methods, organic practices, permaculture and techniques that support soil health and responsible water use. Infrastructure should allow practices and crop selections to evolve as staff evaluate their suitability, productivity and educational value.

The arrangement of fields, gardens and growing facilities should accommodate both practical production and learning. Accessible work areas, observation points and defined routes can bring visitors close to cultivation and harvesting while maintaining space for equipment, seasonal tasks and crop protection. Garden improvements may support production, demonstration or community participation, with flexibility to adapt their location and use as programs evolve.

Harvest, storage and food connections

Potential investments include produce washing and packing areas, covered workspaces, dry and refrigerated storage, food-handling equipment and connections to the farm kitchen and store. These improvements would support the movement of farm products from growing and harvesting through storage, preparation, sale and educational use.

The relationship among production areas, service access, storage, the kitchen and visitor facilities should make daily work efficient and help visitors understand the connection between agriculture and food. Demonstrations and supervised activities may make appropriate parts of that process visible and participatory.

Facilities and equipment will be matched to their intended use, with utility capacity, sanitation, food safety and applicable licensing requirements addressed as projects develop. Building improvements supporting the kitchen and store are included in A.2; this category addresses the production systems and supporting equipment that connect them to the working farm. [A-04; C-03; G-01]

Agricultural learning and stewardship

Potential improvements include demonstration areas, accessible growing and work spaces, instructional gathering areas, tool storage, handwashing facilities and supporting amenities for supervised participation. These spaces may serve school and outdoor learning programs, families, adult learners and volunteers.

Learning should remain connected to meaningful farm activity: caring for animals, preparing soil, growing and harvesting crops, managing nutrients and maintaining the landscape. Facilities can support these experiences through clear sightlines, appropriate work surfaces and safe access while allowing staff to manage participation around the needs of animals, crops and daily operations.

Investment decisions will consider durability, ease of maintenance, staff workload and the quality of the learning experience. The objective is a farm that works well and invites people to discover how agriculture works.

A.6 Outdoor and adventure learning

Capital improvements will support outdoor experiences that invite discovery, build confidence and create opportunities for cooperation and learning. Discovery Oaks' farm, woodlands and ponds provide varied settings for these experiences, complementing agricultural education and expanding how visitors engage with the property.

This category includes the existing challenge-course and Adventure Woods area, compatible adjoining learning spaces, and outdoor teaching and observation areas within the farm and natural landscape. Anticipated work includes rehabilitation, replacement, reconfiguration, expansion and new construction of learning facilities and their supporting infrastructure. [B-01; C-05]

Adventure, challenge and forest exploration

Potential improvements include high and low ropes elements, climbing features, ziplines, team-building activities, platforms and associated access and support spaces. Existing elements may be repaired, replaced, relocated or removed as part of a coordinated renewal. Pole-supported structures and other suitable systems may provide alternatives to tree-supported facilities.

Forest exploration would complement these challenge experiences, inviting visitors to discover the wooded ravine, changing terrain and views through the trees. Potential improvements include woodland paths, observation platforms and a rope or suspension-style pedestrian bridge that could provide a distinctive way to experience the ravine and surrounding forest. Design would respond to the terrain, tree health, accessibility and protection of the woodland setting.

These spaces could support learning about forest ecology, landforms and the processes that shaped the landscape. Interpretation may explore the area's glacial history, informed by verification of the site's geological

features. Archaeological learning could also introduce how evidence helps explain past human relationships with the land, drawing on documented local history and appropriate educational activities.

The intended experience combines physical activity, discovery, problem-solving and supervised challenge. Facilities may serve school and outdoor learning groups, camps, families and other public programs, with configurations suited to different ages, abilities and instructional purposes. Design should consider adaptive participation, accessible approaches, observation areas and space for group preparation and reflection. Woodland exploration routes and specialized challenge elements may have different access and supervision arrangements.

The March 2026 inspection provides a technical baseline for evaluating renewal of the existing adventure facilities. Its findings inform decisions about repair, replacement and the suitability of existing trees and structures. Detailed findings remain in the supporting assessment; individual projects will respond to current conditions and the intended experience. [C-05, findings summary and individual element records]

Outdoor classrooms and discovery spaces

Potential improvements include outdoor teaching areas, gathering spaces, seating, shade structures, demonstration settings, interpretive features and equipment storage. These facilities may be located in compatible farm and natural settings, with connections to the circulation network described in A.4.

Spaces should accommodate both guided learning and opportunities for observation and discovery. Flexible arrangements can support school groups, camps, family activities, adult learning and volunteer stewardship without requiring a separate facility for every program. Their location and design should preserve the character of the setting and account for nearby agricultural activities.

Pond learning and observation

Potential improvements around the park's ponds include shoreline observation areas, teaching platforms, boardwalks, seating and interpretation. These features could provide places to explore aquatic life, water quality, seasonal change and the relationship between water, agriculture and the surrounding landscape.

The extent and location of improvements will reflect shoreline conditions, water levels, habitat, accessibility and visitor safety. Learning and observation facilities may be coordinated with shoreline restoration and water-management improvements described in A.8, connecting public use with stewardship of the ponds.

Supporting facilities and operating readiness

Capital projects may include equipment storage, participant preparation areas, staff access, emergency access and infrastructure needed for inspection, maintenance and rescue. These supporting elements will be considered alongside the principal learning facilities so that completed projects can be operated and maintained effectively.

Adventure facilities will enter service following appropriate technical acceptance, required permissions and confirmation of operating readiness. Staffing, training, participant management, inspections and emergency procedures are addressed through the POMP and subsequent OCP operating processes.

A.7 Heritage interpretation and coordinated improvements

Capital improvements will connect Discovery Oaks' agricultural history, historic buildings and traditional skills with the experience of a working farm. Heritage learning can help visitors understand how people grew and preserved food, built structures, made useful goods and cared for the land—and how those practices relate to agriculture and daily life today.

This category includes the settings of the Benjamin-Barton Farmhouse and Craig Cabin, the existing barn, Underground Storage/Root cellar, Bowers Cottage and associated landscape and interpretation areas. Potential Pickering Barn reconstruction is addressed in A.2 and could further strengthen the relationship between local agricultural history and the working farm. [F-01–F-04; B-01; C-02; Section 1.7]

Heritage settings and visitor connections

Potential improvements include interpretive displays, paths, accessible approaches, seating, gathering areas, landscape treatments and supporting services that connect heritage resources with the wider campus. Improvements may help visitors move between buildings, agricultural activities and demonstrations while understanding the history and purpose of each setting.

The existing barn, Underground Storage/Root cellar and Bowers Cottage may provide opportunities to interpret agricultural work, food storage, domestic life and the changing use of the property. Their suitability for particular activities will reflect building condition, accessibility and intended occupancy. Building repair and adaptation are addressed in A.2; this category addresses their contribution to heritage learning and the visitor experience.

Traditional skills and agricultural heritage

Potential investments include adaptable demonstration and workshop spaces, work surfaces, equipment, tool and material storage, and supporting utilities for heritage learning. These settings could accommodate activities such as candlemaking, blacksmithing, beekeeping, timber framing, breadmaking and textile arts, connecting practical skills with their historical and contemporary uses.

Facilities may support visiting artisans, instructors, volunteers and partner-led activities alongside OCP programming. The scope of individual improvements will reflect the activities proposed, including appropriate ventilation, fire protection, sanitation, equipment separation and visitor access.

The programs and services section describes the educational direction. Capital improvements will provide flexible settings that can accommodate changing offerings rather than dedicate a separate facility to every activity.

Preservation Bloomfield partnership

Preservation Bloomfield, a 501(c)(3) nonprofit organization, owns the Benjamin-Barton Farmhouse and Craig Cabin. Those buildings did not transfer to OCP through the interlocal agreement. Their preservation responsibilities remain distinct from OCP's applicable responsibilities for the leased land and supporting services. [Section 1.7; J-03–J-04]

Potential coordinated improvements may strengthen access, interpretation, landscape connections and appropriate public use of these buildings. Work will reflect the applicable ownership and lease arrangements. Any additional allocation of work, costs or operating responsibilities will be addressed through the proposed MOU or another applicable written agreement.

This capital framework supports integration of the heritage experience into Discovery Oaks without assigning OCP general responsibility for preserving Preservation Bloomfield's buildings.

A.8 Natural resources and landscape resilience

Capital improvements will sustain the soils, water, woodlands and habitats that support Discovery Oaks' working agricultural landscape and visitor experience. Investments may strengthen ecological health, address

erosion and drainage needs, improve landscape character and create opportunities for people to learn through stewardship.

This category includes woodlands, ponds and drainage areas, wetlands where present, fields, pastures, gardens, habitat areas, property boundaries and developed landscapes. Projects may combine restoration, agricultural improvements and visitor access where their purposes overlap. [E-01–E-03; C-03]

Woodlands and habitat

Potential improvements include invasive-species management, tree care, replacement and succession planting, native vegetation establishment and habitat restoration. Work may improve woodland condition, sustain shade and landscape character, and support wildlife and pollinators.

Woodland improvements will be coordinated with trails, forest exploration and adventure-learning facilities. Tree condition, terrain and habitat needs will inform the location and design of paths, observation areas and other features. Planting and restoration may also strengthen connections among wooded areas, field edges, gardens and other habitat settings.

Soils and agricultural landscapes

Potential improvements include erosion control, soil restoration, pasture renovation, field-edge planting and measures that protect productive growing areas. Work may address compacted or disturbed ground, stabilize frequently used areas and support suitable vegetation in fields, pastures and adjoining landscapes.

Agricultural and ecological needs will be considered together. Soil improvements, grazing infrastructure, drainage and planting can support farm production while protecting water and habitat. Projects may also provide opportunities for demonstrations and volunteer stewardship, connecting investment in the landscape with the park's educational purpose.

Ponds, shorelines and water

Potential improvements include shoreline stabilization, native shoreline planting, aquatic habitat enhancement, erosion control and measures to improve water quality and pond function. Assessment may identify additional restoration or management needs appropriate to individual ponds and drainage areas.

These projects will be coordinated with the drainage infrastructure described in A.3 and the pond-learning facilities described in A.6. Observation areas, boardwalks and teaching spaces should be located and designed to support public learning while protecting shoreline stability and habitat. Water levels, drainage patterns and surrounding agricultural uses will inform project scope and methods. [C-03; Appendix E]

Property-edge buffers and landscape improvements

Potential improvements along the I-75 and East Square Lake Road boundaries include landscape buffers, screening, planting, fencing and related site treatments. These improvements would strengthen the farm's landscape character, improve the visitor setting and help separate agricultural and recreational activities from adjoining transportation corridors. Design would account for visibility, drainage, maintenance and applicable right-of-way requirements.

Landscape improvements may also strengthen entrances, parking edges, gathering areas and connections among facilities. Plant selection and placement should reflect site conditions, seasonal interest, habitat value and long-term maintenance needs. Boundary treatments will be coordinated with the entrances, trails and potential identification sign described in A.4.

Environmental conditions and project planning

Environmental assessments and current site information will inform work in affected areas, including excavation, grading, planting and changes in use. Qualified assessment and applicable permitting will guide projects involving wetlands, shorelines or other regulated features. Restoration and routine landscape work remain distinct from investigation or remediation of contamination; responsibilities for environmental conditions remain governed by the interlocal agreement and applicable requirements. [E-01–E-03; A-01 §6.4]

Individual projects will reflect verified conditions, intended use and available resources. The framework allows improvements to proceed in practical phases, coordinating agricultural operations, natural resource care and visitor access.

A.9 Recreation and seasonal gathering spaces

Capital improvements will strengthen Discovery Oaks as a four-season destination where recreation, seasonal traditions and community gatherings complement the working farm. Investments should preserve the property's agricultural character while making experiences more accessible, comfortable and practical to operate.

Discovery Oaks will contribute to OCP's coordinated approach to four-season activation across the park system. Planning will consider how its experiences complement those at other parks, extend opportunities across seasons and geographic areas, and make effective use of shared staff, equipment and partnerships. Its distinctive contribution will remain rooted in agriculture, food, outdoor learning and seasonal recreation.

This category includes Winter Park and existing event areas, the visitor campus and compatible developed portions of the property. Potential improvements include renewal, expansion and reconfiguration of recreation facilities, flexible gathering spaces and supporting visitor amenities. [B-01; C-03; G-01]

Winter Park and seasonal recreation

Potential improvements may expand Winter Park's capacity and improve the experience of tubing, skating and winter gathering. Work may include additional or reconfigured tubing runs, slope improvements, a conveyor lift, skating improvements and associated equipment and infrastructure.

The extent and arrangement of improvements will respond to site conditions, visitor demand, accessibility and operating capacity. Facilities and supporting spaces should accommodate compatible uses across seasons where practical, allowing investment in winter recreation to contribute to the broader park experience.

Flexible gathering and event spaces

Potential improvements include adaptable outdoor spaces, shelters, pavilions and supporting facilities for seasonal attractions, festivals, demonstrations, recreation and community gatherings. Spaces may accommodate different activities over time, with layouts that support both everyday use and larger events.

Design will consider circulation, seating, shade, landscape character, sound, utilities and the effects of repeated use. Gathering areas should connect naturally with the farm's food, learning and recreation experiences while allowing agricultural work and animal care to continue effectively.

Visitor amenities and operating support

Potential investments include warming and gathering spaces, restrooms, food-service support, equipment storage, lighting, power and other infrastructure needed for seasonal operations. These improvements will be coordinated with the building, utility and parking categories in A.2–A.4.

Expansion will be evaluated alongside the resources needed to sustain it, including staffing, maintenance, utilities, equipment replacement and visitor management. Planning will account for farm operations, OCP school and outdoor learning programs, and BHS's specifically retained rights.

The framework allows recreation and events to evolve with community interests, systemwide priorities and available resources. Individual scopes, capacities and schedules will be established as projects advance through applicable OCP processes.

A.10 Operations and supporting assets

Reliable farm operations, animal care, learning programs and visitor services depend on suitable workspaces, equipment, storage and service access. Capital improvements will support this daily work, protect public investment and provide the operating capacity needed as the park's facilities and activities evolve.

This category includes maintenance and storage yards, workshops, staff work areas, delivery and service access, and operating systems throughout the campus. Anticipated improvements include construction, renovation or reconfiguration of support facilities; secure storage for tools, feed, equipment and materials; waste, recycling and composting facilities; staff support spaces; fencing, access controls and security systems; communications and operating technology; and acquisition or replacement of equipment supporting park operations. [C-01–C-03; A-04]
